NATO

The North Atlantic Treaty Organization, also called the North Atlantic Alliance, is an intergovernmental transnational military alliance of 32 member states—30 European and 2 North American. Established in the aftermath of World War II, the organization implements the North Atlantic Treaty, signed in Washington, D.C., on 4 April 1949. NATO is a collective security system: its independent member states agree to defend each other against attacks by third parties. .

NICE Competency areas is a cluster galaxy available in JSON format at **this location** The JSON format can be freely reused in your application or automatically enabled in MISP.

authors

NIST - Jean-Louis Huynen

This Competency Area describes a learner's capabilities to improve and maintain the security of Operational Technology (OT) systems while addressing t - NF-COM-010

This Competency Area describes a learner's capabilities to improve and maintain the security of Operational Technology (OT) systems while addressing their unique performance, reliability, and safety requirements.

The tag is: *misp-galaxy:nice-framework-competency_areas="This Competency Area describes a learner's capabilities to improve and maintain the security of Operational Technology (OT) systems*

while addressing t - NF-COM-010"

This Competency Area describes a learner’s capabilities to analyze and control digital and physical risks presented by technology products or services - NF-COM-011

This Competency Area describes a learner’s capabilities to analyze and control digital and physical risks presented by technology products or services purchased from parties outside your organization.

The tag is: *misp-galaxy:nice-framework-competency_areas="This Competency Area describes a learner’s capabilities to analyze and control digital and physical risks presented by technology products or services - NF-COM-011"*

This Competency Area describes a learner’s capabilities to install, administer, troubleshoot, backup, and conduct recovery of Operating Systems (OS), - NF-COM-009

This Competency Area describes a learner’s capabilities to install, administer, troubleshoot, backup, and conduct recovery of Operating Systems (OS), including in simulated environments.

The tag is: *misp-galaxy:nice-framework-competency_areas="This Competency Area describes a learner’s capabilities to install, administer, troubleshoot, backup, and conduct recovery of Operating Systems (OS), - NF-COM-009"*

This Competency Area describes a learner’s capability related to architecting, designing, developing, implementing, and maintaining the trustworthines - NF-COM-007

This Competency Area describes a learner’s capability related to architecting, designing, developing, implementing, and maintaining the trustworthiness of systems that use or are enabled by cyber resources in order to anticipate, withstand, recover from, and adapt to adverse conditions, stresses, attacks, or compromises that use or are enabled by cyber resources.

The tag is: *misp-galaxy:nice-framework-competency_areas="This Competency Area describes a learner’s capability related to architecting, designing, developing, implementing, and maintaining the trustworthines - NF-COM-007"*

This Competency Area describes a learner’s capabilities to integrate security as a shared responsibility throughout the development, security, and ope - NF-COM-008

This Competency Area describes a learner’s capabilities to integrate security as a shared responsibility throughout the development, security, and operations (DevSecOps) life cycle of technologies.

The tag is: *misp-galaxy:nice-framework-competency_areas="This Competency Area describes a learner’s capabilities to integrate security as a shared responsibility throughout the development, security, and ope - NF-COM-008"*

This Competency Area describes a learner’s capabilities to secure the transmissions, broadcasting, switching, control, and operation of communications - NF-COM-005

This Competency Area describes a learner’s capabilities to secure the transmissions, broadcasting, switching, control, and operation of communications and related network infrastructures.

The tag is: *misp-galaxy:nice-framework-competency_areas="This Competency Area describes a learner’s capabilities to secure the transmissions, broadcasting, switching, control, and operation of communications - NF-COM-005"*

This Competency Area describes a learner’s capabilities to transform data using cryptographic processes to ensure it can only be read by the person wh - NF-COM-006

This Competency Area describes a learner’s capabilities to transform data using cryptographic processes to ensure it can only be read by the person who is authorized to access it.

The tag is: *misp-galaxy:nice-framework-competency_areas="This Competency Area describes a learner’s capabilities to transform data using cryptographic processes to ensure it can only be read by the person wh - NF-COM-006"*

This Competency Area describes a learner’s capabilities to conduct and maintain an accurate inventory of all digital assets, to include identifying, d - NF-COM-003

This Competency Area describes a learner’s capabilities to conduct and maintain an accurate inventory of all digital assets, to include identifying, developing, operating, maintaining, upgrading, and disposing of assets.

The tag is: *misp-galaxy:nice-framework-competency_areas="This Competency Area describes a learner’s capabilities to conduct and maintain an accurate inventory of all digital assets, to include identifying, d - NF-COM-003"*

This Competency Area describes a learner’s capabilities to protect cloud data, applications, and infrastructure from internal and external threats. - NF-COM-004

This Competency Area describes a learner’s capabilities to protect cloud data, applications, and infrastructure from internal and external threats.

The tag is: *misp-galaxy:nice-framework-competency_areas="This Competency Area describes a learner’s capabilities to protect cloud data, applications, and infrastructure from internal and external threats. - NF-COM-004"*

This Competency Area describes a learner’s capabilities to define, manage, and monitor the roles and secure access privileges of who is authorized to - NF-COM-001

This Competency Area describes a learner’s capabilities to define, manage, and monitor the roles and secure access privileges of who is authorized to access protected data and resources and understand the impact of different types of access controls.

The tag is: *misp-galaxy:nice-framework-competency_areas="This Competency Area describes a learner’s capabilities to define, manage, and monitor the roles and secure access privileges of who is authorized to - NF-COM-001"*

This Competency Area describes a learner’s capabilities to secure Artificial Intelligence (AI) against cyberattacks, to ensure it is adequately contai - NF-COM-002

This Competency Area describes a learner’s capabilities to secure Artificial Intelligence (AI) against cyberattacks, to ensure it is adequately contained where it is used, and to mitigate the threat AI presents where it or its users have malicious intent.

The tag is: *misp-galaxy:nice-framework-competency_areas="This Competency Area describes a learner’s capabilities to secure Artificial Intelligence (AI) against cyberattacks, to ensure it is adequately contai - NF-COM-002"*

Knowledge of language analysis principles and practices - K1056

Knowledge of language analysis principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of language analysis principles and practices - K1056"*

Knowledge of Interactive On-Net (ION) operator roles and responsibilities - K1057

Knowledge of Interactive On-Net (ION) operator roles and responsibilities

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of Interactive On-Net (ION) operator roles and responsibilities - K1057"*

Knowledge of foreign languages and dialects - K1162

Knowledge of foreign languages and dialects

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of foreign languages and dialects - K1162"*

Knowledge of target communication network characteristics - K1229

Knowledge of target communication network characteristics

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of target communication network characteristics - K1229"*

Knowledge of target communications tools and techniques - K1230

Knowledge of target communications tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of target communications tools and techniques - K1230"*

Knowledge of Communications Security (COMSEC) policies and procedures - K0671

Knowledge of Communications Security (COMSEC) policies and procedures

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of Communications Security (COMSEC) policies and procedures - K0671"*

Knowledge of the Communications Security (COMSEC) Material Control System (CMCS) - K0672

Knowledge of the Communications Security (COMSEC) Material Control System (CMCS)

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of the Communications Security (COMSEC) Material Control System (CMCS) - K0672"*

Knowledge of types of Communications Security (COMSEC) incidents - K0673

Knowledge of types of Communications Security (COMSEC) incidents

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of types of Communications Security*

(COMSEC) incidents - K0673"

Knowledge of program management principles and practices - K0798

Knowledge of program management principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of program management principles and practices - K0798"*

Knowledge of mission assurance practices and principles - K1171

Knowledge of mission assurance practices and principles

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of mission assurance practices and principles - K1171"*

Knowledge of organization’s security strategy - K1179

Knowledge of organization’s security strategy

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of organization’s security strategy - K1179"*

Knowledge of industry indicators - K0943

Knowledge of industry indicators

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of industry indicators - K0943"*

Knowledge of organizational cybersecurity policies and procedures - K1183

Knowledge of organizational cybersecurity policies and procedures

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of organizational cybersecurity policies and procedures - K1183"*

Knowledge of organizational human resource (HR) policies and procedures - K1186

Knowledge of organizational human resource (HR) policies and procedures

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of organizational human resource*

(HR) policies and procedures - K1186"

Knowledge of research and design processes and procedures - K1206

Knowledge of research and design processes and procedures

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of research and design processes and procedures - K1206"*

Knowledge of the organizational cybersecurity workforce - K0640

Knowledge of the organizational cybersecurity workforce

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of the organizational cybersecurity workforce - K0640"*

Knowledge of career paths - K0648

Knowledge of career paths

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of career paths - K0648"*

Knowledge of organizational career progressions - K0649

Knowledge of organizational career progressions

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of organizational career progressions - K0649"*

Knowledge of workforce trends - K0652

Knowledge of workforce trends

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of workforce trends - K0652"*

Knowledge of resource management principles and practices - K0754

Knowledge of resource management principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of resource management principles and practices - K0754"*

Knowledge of training policies and procedures - K0887

Knowledge of training policies and procedures

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of training policies and procedures - K0887"*

Knowledge of training systems and software - K0893

Knowledge of training systems and software

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of training systems and software - K0893"*

Knowledge of the NIST Workforce Framework for Cybersecurity (NICE Framework) - K0902

Knowledge of the NIST Workforce Framework for Cybersecurity (NICE Framework)

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of the NIST Workforce Framework for Cybersecurity (NICE Framework) - K0902"*

Knowledge of human resources policies and procedures - K0908

Knowledge of human resources policies and procedures

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of human resources policies and procedures - K0908"*

Knowledge of personnel systems and software - K1098

Knowledge of personnel systems and software

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of personnel systems and software - K1098"*

Knowledge of cybersecurity workforce policies and procedures - K1140

Knowledge of cybersecurity workforce policies and procedures

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of cybersecurity workforce policies and procedures - K1140"*

Knowledge of organizational cybersecurity workforce requirements - K1184

Knowledge of organizational cybersecurity workforce requirements

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of organizational cybersecurity workforce requirements - K1184"*

Knowledge of intelligence processes - K1058

Knowledge of intelligence processes

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of intelligence processes - K1058"*

Knowledge of priority intelligence collection requirements - K1196

Knowledge of priority intelligence collection requirements

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of priority intelligence collection requirements - K1196"*

Knowledge of service desk principles and practices - K0903

Knowledge of service desk principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of service desk principles and practices - K0903"*

Knowledge of remote access tools and techniques - K0911

Knowledge of remote access tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of remote access tools and techniques - K0911"*

Knowledge of software, hardware, and peripheral equipment repair tools and techniques - K1090

Knowledge of software, hardware, and peripheral equipment repair tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of software, hardware, and peripheral equipment repair tools and techniques - K1090"*

Knowledge of asset management policies and procedures - K1112

Knowledge of asset management policies and procedures

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of asset management policies and procedures - K1112"*

Knowledge of customer experience principles and practices - K1127

Knowledge of customer experience principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of customer experience principles and practices - K1127"*

Knowledge of Voice over IP (VoIP) - K0159

Knowledge of Voice over IP (VoIP)

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of Voice over IP (VoIP) - K0159"*

Knowledge of system performance indicators - K0740

Knowledge of system performance indicators

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of system performance indicators - K0740"*

Knowledge of system availability measures - K0741

Knowledge of system availability measures

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of system availability measures - K0741"*

Knowledge of credential management systems and software - K0930

Knowledge of credential management systems and software

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of credential management systems and software - K0930"*

Knowledge of data-at-rest encryption (DARE) standards and best practices - K0931

Knowledge of data-at-rest encryption (DARE) standards and best practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of data-at-rest encryption (DARE) standards and best practices - K0931"*

Knowledge of cryptographic key storage systems and software - K0932

Knowledge of cryptographic key storage systems and software

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of cryptographic key storage systems and software - K0932"*

Knowledge of system availability requirements - K1222

Knowledge of system availability requirements

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of system availability requirements - K1222"*

Knowledge of intelligence collection tasking tools and techniques - K0972

Knowledge of intelligence collection tasking tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of intelligence collection tasking tools and techniques - K0972"*

Knowledge of intelligence collection principles and practices - K0976

Knowledge of intelligence collection principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of intelligence collection principles and practices - K0976"*

Knowledge of resource and asset readiness reporting policies and procedures - K1021

Knowledge of resource and asset readiness reporting policies and procedures

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of resource and asset readiness*

reporting policies and procedures - K1021"

Knowledge of requirements submission processes - K1026

Knowledge of requirements submission processes

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of requirements submission processes - K1026"*

Knowledge of production exploitation principles and practices - K1029

Knowledge of production exploitation principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of production exploitation principles and practices - K1029"*

Knowledge of tasking processes - K1045

Knowledge of tasking processes

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of tasking processes - K1045"*

Knowledge of intelligence collection requirements tools and techniques - K1048

Knowledge of intelligence collection requirements tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of intelligence collection requirements tools and techniques - K1048"*

Knowledge of the Tasking, Collection, Processing, Exploitation and Dissemination (TCPED) process - K1052

Knowledge of the Tasking, Collection, Processing, Exploitation and Dissemination (TCPED) process

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of the Tasking, Collection, Processing, Exploitation and Dissemination (TCPED) process - K1052"*

Knowledge of intelligence collection authority policies and procedures - K1060

Knowledge of intelligence collection authority policies and procedures

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of intelligence collection authority policies and procedures - K1060"*

Knowledge of environment preparation tools and techniques - K1061

Knowledge of environment preparation tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of environment preparation tools and techniques - K1061"*

Knowledge of surveillance tools and techniques - K1062

Knowledge of surveillance tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of surveillance tools and techniques - K1062"*

Knowledge of operational environment risks - K1178

Knowledge of operational environment risks

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of operational environment risks - K1178"*

Knowledge of priority information requirements - K1195

Knowledge of priority information requirements

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of priority information requirements - K1195"*

Knowledge of data concealment tools and techniques - K0941

Knowledge of data concealment tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of data concealment tools and*

techniques - K0941"

Knowledge of data encryption practices and principles - K1145

Knowledge of data encryption practices and principles

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of data encryption practices and principles - K1145"*

Knowledge of steganography practices and principles - K1220

Knowledge of steganography practices and principles

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of steganography practices and principles - K1220"*

Knowledge of blue force tracking - K1113

Knowledge of blue force tracking

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of blue force tracking - K1113"*

Knowledge of cybersecurity standards and best practices - K1138

Knowledge of cybersecurity standards and best practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of cybersecurity standards and best practices - K1138"*

Knowledge of data visualization tools and techniques - K0647

Knowledge of data visualization tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of data visualization tools and techniques - K0647"*

Knowledge of data administration policies and procedures - K0699

Knowledge of data administration policies and procedures

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of data administration policies and procedures - K0699"*

Knowledge of data standardization policies and procedures - K0700

Knowledge of data standardization policies and procedures

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of data standardization policies and procedures - K0700"*

Knowledge of database management system (DBMS) principles and practices - K0704

Knowledge of database management system (DBMS) principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of database management system (DBMS) principles and practices - K0704"*

Knowledge of database query language capabilities and applications - K0705

Knowledge of database query language capabilities and applications

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of database query language capabilities and applications - K0705"*

Knowledge of database schema capabilities and applications - K0706

Knowledge of database schema capabilities and applications

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of database schema capabilities and applications - K0706"*

Knowledge of digital rights management (DRM) tools and techniques - K0708

Knowledge of digital rights management (DRM) tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of digital rights management (DRM) tools and techniques - K0708"*

Knowledge of query languages - K0750

Knowledge of query languages

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of query languages - K0750"*

Knowledge of database application programming interfaces (APIs) - K0867

Knowledge of database application programming interfaces (APIs)

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of database application programming interfaces (APIs) - K0867"*

Knowledge of logging tools and technologies - K0897

Knowledge of logging tools and technologies

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of logging tools and technologies - K0897"*

Knowledge of machine learning principles and practices - K0904

Knowledge of machine learning principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of machine learning principles and practices - K0904"*

Knowledge of hexadecimal data - K1094

Knowledge of hexadecimal data

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of hexadecimal data - K1094"*

Knowledge of data mapping tools and techniques - K1097

Knowledge of data mapping tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of data mapping tools and techniques - K1097"*

Knowledge of data gathering tools and techniques - K1146

Knowledge of data gathering tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of data gathering tools and techniques - K1146"*

Knowledge of statistical processes - K1219

Knowledge of statistical processes

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of statistical processes - K1219"*

Knowledge of UNIX scripts - K1233

Knowledge of UNIX scripts

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of UNIX scripts - K1233"*

Knowledge of Windows scripts - K1238

Knowledge of Windows scripts

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of Windows scripts - K1238"*

Knowledge of data storage media characteristics - K0777

Knowledge of data storage media characteristics

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of data storage media characteristics - K0777"*

Knowledge of capacity management - K1114

Knowledge of capacity management

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of capacity management - K1114"*

Knowledge of configuration management - K1121

Knowledge of configuration management

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of configuration management - K1121"*

Knowledge of financial management - K1161

Knowledge of financial management

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of financial management - K1161"*

Knowledge of content creation tools and techniques - K0774

Knowledge of content creation tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of content creation tools and techniques - K0774"*

Knowledge of collaboration tools and techniques - K0776

Knowledge of collaboration tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of collaboration tools and techniques - K0776"*

Knowledge of cloud computing principles and practices - K0863

Knowledge of cloud computing principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of cloud computing principles and practices - K0863"*

Knowledge of knowledge management principles and practices - K0864

Knowledge of knowledge management principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of knowledge management principles and practices - K0864"*

Knowledge of taxonomy models and frameworks - K0895

Knowledge of taxonomy models and frameworks

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of taxonomy models and frameworks - K0895"*

Knowledge of semantic ontology models and frameworks - K0896

Knowledge of semantic ontology models and frameworks

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of semantic ontology models and frameworks - K0896"*

Knowledge of content synchronization tools and techniques - K0929

Knowledge of content synchronization tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of content synchronization tools and techniques - K0929"*

Knowledge of performance tuning tools and techniques - K0064

Knowledge of performance tuning tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of performance tuning tools and techniques - K0064"*

Knowledge of standard operating procedures (SOPs) - K0645

Knowledge of standard operating procedures (SOPs)

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of standard operating procedures (SOPs) - K0645"*

Knowledge of incident, event, and problem management policies and procedures - K0935

Knowledge of incident, event, and problem management policies and procedures

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of incident, event, and problem management policies and procedures - K0935"*

Knowledge of incident reporting policies and procedures - K0946

Knowledge of incident reporting policies and procedures

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of incident reporting policies and procedures - K0946"*

Knowledge of system integration principles and practices - K0958

Knowledge of system integration principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of system integration principles and practices - K0958"*

Knowledge of automated security control testing tools and techniques - K1072

Knowledge of automated security control testing tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of automated security control testing tools and techniques - K1072"*

Knowledge of systems administration standard operating policies and procedures - K1226

Knowledge of systems administration standard operating policies and procedures

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of systems administration standard operating policies and procedures - K1226"*

Knowledge of cloud service models and frameworks - K0898

Knowledge of cloud service models and frameworks

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of cloud service models and frameworks - K0898"*

Knowledge of web filtering systems and software - K0811

Knowledge of web filtering systems and software

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of web filtering systems and software - K0811"*

Knowledge of NIST Risk Management Framework authorization requirements - K1177

Knowledge of NIST Risk Management Framework authorization requirements

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of NIST Risk Management Framework authorization requirements - K1177"*

Knowledge of security assessment authorization requirements - K1211

Knowledge of security assessment authorization requirements

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of security assessment authorization requirements - K1211"*

Knowledge of Virtual Private Network (VPN) devices - K1237

Knowledge of Virtual Private Network (VPN) devices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of Virtual Private Network (VPN) devices - K1237"*

Knowledge of risk scoring principles and practices - K1076

Knowledge of risk scoring principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of risk scoring principles and practices - K1076"*

Knowledge of social engineering tools and techniques - K1087

Knowledge of social engineering tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of social engineering tools and techniques - K1087"*

Knowledge of cyber defense auditing laws and regulations - K1129

Knowledge of cyber defense auditing laws and regulations

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of cyber defense auditing laws and regulations - K1129"*

Knowledge of cyber defense auditing policies and practices - K1130

Knowledge of cyber defense auditing policies and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of cyber defense auditing policies and practices - K1130"*

Knowledge of organizational cybersecurity policies and configurations - K1182

Knowledge of organizational cybersecurity policies and configurations

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of organizational cybersecurity policies and configurations - K1182"*

Knowledge of data remediation tools and techniques - K0862

Knowledge of data remediation tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of data remediation tools and techniques - K0862"*

Knowledge of abnormal physical and physiological behaviors - K0909

Knowledge of abnormal physical and physiological behaviors

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of abnormal physical and physiological behaviors - K0909"*

Knowledge of risk mitigation tools and techniques - K1031

Knowledge of risk mitigation tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of risk mitigation tools and techniques - K1031"*

Knowledge of data analysis tools and techniques - K1096

Knowledge of data analysis tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of data analysis tools and techniques - K1096"*

Knowledge of cybersecurity threats and vulnerabilities - K1139

Knowledge of cybersecurity threats and vulnerabilities

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of cybersecurity threats and vulnerabilities - K1139"*

Knowledge of organizational cybersecurity goals and objectives - K1180

Knowledge of organizational cybersecurity goals and objectives

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of organizational cybersecurity goals and objectives - K1180"*

Knowledge of organizational policies and procedures - K1188

Knowledge of organizational policies and procedures

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of organizational policies and procedures - K1188"*

Knowledge of risk mitigation principles and practices - K1209

Knowledge of risk mitigation principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of risk mitigation principles and practices - K1209"*

Knowledge of cultural, political, and organizational assets - K1241

Knowledge of cultural, political, and organizational assets

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of cultural, political, and organizational assets - K1241"*

Knowledge of cybersecurity review processes and procedures - K1242

Knowledge of cybersecurity review processes and procedures

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of cybersecurity review processes and procedures - K1242"*

Knowledge of cybersecurity threat remediation principles and practices - K1243

Knowledge of cybersecurity threat remediation principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of cybersecurity threat remediation principles and practices - K1243"*

Knowledge of cybersecurity tools and techniques - K1244

Knowledge of cybersecurity tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of cybersecurity tools and techniques - K1244"*

Knowledge of data exfiltration tools and techniques - K1245

Knowledge of data exfiltration tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of data exfiltration tools and techniques - K1245"*

Knowledge of data handling tools and techniques - K1246

Knowledge of data handling tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of data handling tools and techniques - K1246"*

Knowledge of data monitoring tools and techniques - K1247

Knowledge of data monitoring tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of data monitoring tools and techniques - K1247"*

Knowledge of digital and physical security vulnerabilities - K1248

Knowledge of digital and physical security vulnerabilities

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of digital and physical security vulnerabilities - K1248"*

Knowledge of digital and physical security vulnerability remediation principles and practices - K1249

Knowledge of digital and physical security vulnerability remediation principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of digital and physical security vulnerability remediation principles and practices - K1249"*

Knowledge of external organization roles and responsibilities - K1250

Knowledge of external organization roles and responsibilities

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of external organization roles and responsibilities - K1250"*

Knowledge of external referrals policies and procedures - K1251

Knowledge of external referrals policies and procedures

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of external referrals policies and procedures - K1251"*

Knowledge of high value asset characteristics - K1252

Knowledge of high value asset characteristics

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of high value asset characteristics - K1252"*

Knowledge of information collection tools and techniques - K1253

Knowledge of information collection tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of information collection tools and techniques - K1253"*

Knowledge of insider threat hub policies and procedures - K1254

Knowledge of insider threat hub policies and procedures

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of insider threat hub policies and procedures - K1254"*

Knowledge of insider threat hub operations - K1255

Knowledge of insider threat hub operations

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of insider threat hub operations - K1255"*

Knowledge of insider threat operational indicators - K1256

Knowledge of insider threat operational indicators

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of insider threat operational indicators - K1256"*

Knowledge of insider threat policies and procedures - K1257

Knowledge of insider threat policies and procedures

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of insider threat policies and procedures - K1257"*

Knowledge of insider threat tactics - K1258

Knowledge of insider threat tactics

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of insider threat tactics - K1258"*

Knowledge of insider threat targets - K1259

Knowledge of insider threat targets

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of insider threat targets - K1259"*

Knowledge of intelligence laws and regulations - K1260

Knowledge of intelligence laws and regulations

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of intelligence laws and regulations - K1260"*

Knowledge of known insider attacks - K1261

Knowledge of known insider attacks

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of known insider attacks - K1261"*

Knowledge of network endpoints - K1262

Knowledge of network endpoints

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of network endpoints - K1262"*

Knowledge of notification policies and procedures - K1263

Knowledge of notification policies and procedures

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of notification policies and procedures - K1263"*

Knowledge of organizational objectives, resources, and capabilities - K1265

Knowledge of organizational objectives, resources, and capabilities

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of organizational objectives, resources, and capabilities - K1265"*

Knowledge of previously referred potential insider threats - K1267

Knowledge of previously referred potential insider threats

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of previously referred potential insider threats - K1267"*

Knowledge of risk reduction metrics - K1268

Knowledge of risk reduction metrics

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of risk reduction metrics - K1268"*

Knowledge of security information and event management (SIEM) tools and techniques - K1269

Knowledge of security information and event management (SIEM) tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of security information and event management (SIEM) tools and techniques - K1269"*

Knowledge of suspicious activity response processes - K1270

Knowledge of suspicious activity response processes

Knowledge of identity and access management (IAM) principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of identity and access management (IAM) principles and practices - K0742"*

Knowledge of new and emerging technologies - K0743

Knowledge of new and emerging technologies

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of new and emerging technologies - K0743"*

Knowledge of operating system (OS) systems and software - K0744

Knowledge of operating system (OS) systems and software

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of operating system (OS) systems and software - K0744"*

Knowledge of parallel and distributed computing principles and practices - K0745

Knowledge of parallel and distributed computing principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of parallel and distributed computing principles and practices - K0745"*

Knowledge of process engineering principles and practices - K0749

Knowledge of process engineering principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of process engineering principles and practices - K0749"*

Knowledge of system threats - K0751

Knowledge of system threats

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of system threats - K0751"*

Knowledge of system vulnerabilities - K0752

Knowledge of system vulnerabilities

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of system vulnerabilities - K0752"*

Knowledge of remote access principles and practices - K0753

Knowledge of remote access principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of remote access principles and practices - K0753"*

Knowledge of security management principles and practices - K0756

Knowledge of security management principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of security management principles and practices - K0756"*

Knowledge of system design tools and techniques - K0757

Knowledge of system design tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of system design tools and techniques - K0757"*

Knowledge of server administration principles and practices - K0758

Knowledge of server administration principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of server administration principles and practices - K0758"*

Knowledge of client and server architecture - K0759

Knowledge of client and server architecture

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of client and server architecture - K0759"*

Knowledge of software engineering principles and practices - K0765

Knowledge of software engineering principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of software engineering principles and practices - K0765"*

Knowledge of automated systems analysis tools and techniques - K0768

Knowledge of automated systems analysis tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of automated systems analysis tools and techniques - K0768"*

Knowledge of systems testing and evaluation tools and techniques - K0772

Knowledge of systems testing and evaluation tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of systems testing and evaluation tools and techniques - K0772"*

Knowledge of telecommunications principles and practices - K0773

Knowledge of telecommunications principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of telecommunications principles and practices - K0773"*

Knowledge of enterprise information technology (IT) architecture principles and practices - K0778

Knowledge of enterprise information technology (IT) architecture principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of enterprise information technology (IT) architecture principles and practices - K0778"*

Knowledge of systems engineering processes - K0779

Knowledge of systems engineering processes

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of systems engineering processes -*

K0779"

Knowledge of defense-in-depth principles and practices - K0791

Knowledge of defense-in-depth principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of defense-in-depth principles and practices - K0791"*

Knowledge of secure coding tools and techniques - K0814

Knowledge of secure coding tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of secure coding tools and techniques - K0814"*

Knowledge of risk assessment principles and practices - K0835

Knowledge of risk assessment principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of risk assessment principles and practices - K0835"*

Knowledge of threat assessment principles and practices - K0836

Knowledge of threat assessment principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of threat assessment principles and practices - K0836"*

Knowledge of critical infrastructure systems and software - K0839

Knowledge of critical infrastructure systems and software

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of critical infrastructure systems and software - K0839"*

Knowledge of hardware reverse engineering tools and techniques - K0840

Knowledge of hardware reverse engineering tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of hardware reverse engineering tools and techniques - K0840"*

Knowledge of software reverse engineering tools and techniques - K0842

Knowledge of software reverse engineering tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of software reverse engineering tools and techniques - K0842"*

Knowledge of secure software deployment principles and practices - K0846

Knowledge of secure software deployment principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of secure software deployment principles and practices - K0846"*

Knowledge of secure software deployment tools and techniques - K0847

Knowledge of secure software deployment tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of secure software deployment tools and techniques - K0847"*

Knowledge of network systems management principles and practices - K0848

Knowledge of network systems management principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of network systems management principles and practices - K0848"*

Knowledge of network systems management tools and techniques - K0849

Knowledge of network systems management tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of network systems management tools and techniques - K0849"*

Knowledge of reverse engineering principles and practices - K0851

Knowledge of reverse engineering principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of reverse engineering principles and practices - K0851"*

Knowledge of encryption tools and techniques - K0859

Knowledge of encryption tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of encryption tools and techniques - K0859"*

Knowledge of data classification standards and best practices - K0865

Knowledge of data classification standards and best practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of data classification standards and best practices - K0865"*

Knowledge of data classification tools and techniques - K0866

Knowledge of data classification tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of data classification tools and techniques - K0866"*

Knowledge of process improvement principles and practices - K0868

Knowledge of process improvement principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of process improvement principles and practices - K0868"*

Knowledge of process maturity models and frameworks - K0869

Knowledge of process maturity models and frameworks

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of process maturity models and frameworks - K0869"*

Knowledge of enterprise architecture (EA) reference models and frameworks - K0870

Knowledge of enterprise architecture (EA) reference models and frameworks

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of enterprise architecture (EA) reference models and frameworks - K0870"*

Knowledge of enterprise architecture (EA) principles and practices - K0871

Knowledge of enterprise architecture (EA) principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of enterprise architecture (EA) principles and practices - K0871"*

Knowledge of service management principles and practices - K0872

Knowledge of service management principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of service management principles and practices - K0872"*

Knowledge of service management standards and best practices - K0873

Knowledge of service management standards and best practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of service management standards and best practices - K0873"*

Knowledge of key management service (KMS) principles and practices - K0874

Knowledge of key management service (KMS) principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of key management service (KMS) principles and practices - K0874"*

Knowledge of symmetric encryption principles and practices - K0875

Knowledge of symmetric encryption principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of symmetric encryption principles and practices - K0875"*

Knowledge of key management service (KMS) key rotation policies and procedures - K0876

Knowledge of key management service (KMS) key rotation policies and procedures

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of key management service (KMS) key rotation policies and procedures - K0876"*

Knowledge of application firewall principles and practices - K0877

Knowledge of application firewall principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of application firewall principles and practices - K0877"*

Knowledge of network firewall principles and practices - K0878

Knowledge of network firewall principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of network firewall principles and practices - K0878"*

Knowledge of the Open Systems Interconnect (OSI) reference model - K0891

Knowledge of the Open Systems Interconnect (OSI) reference model

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of the Open Systems Interconnect (OSI) reference model - K0891"*

Knowledge of computer architecture principles and practices - K0894

Knowledge of computer architecture principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of computer architecture principles and practices - K0894"*

Knowledge of multi-level security (MLS) systems and software - K0906

Knowledge of multi-level security (MLS) systems and software

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of multi-level security (MLS) systems and software - K0906"*

Knowledge of cross-domain solutions - K0907

Knowledge of cross-domain solutions

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of cross-domain solutions - K0907"*

Knowledge of network architecture principles and practices - K0915

Knowledge of network architecture principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of network architecture principles and practices - K0915"*

Knowledge of Personally Identifiable Information (PII) data security standards and best practices - K0917

Knowledge of Personally Identifiable Information (PII) data security standards and best practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of Personally Identifiable Information (PII) data security standards and best practices - K0917"*

Knowledge of Payment Card Industry (PCI) data security standards and best practices - K0918

Knowledge of Payment Card Industry (PCI) data security standards and best practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of Payment Card Industry (PCI) data security standards and best practices - K0918"*

Knowledge of Personal Health Information (PHI) data security standards and best practices - K0919

Knowledge of Personal Health Information (PHI) data security standards and best practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of Personal Health Information (PHI) data security standards and best practices - K0919"*

Knowledge of program protection plan (PPP) principles and practices - K0921

Knowledge of program protection plan (PPP) principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of program protection plan (PPP) principles and practices - K0921"*

Knowledge of configuration management tools and techniques - K0927

Knowledge of configuration management tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of configuration management tools and techniques - K0927"*

Knowledge of systems engineering principles and practices - K0928

Knowledge of systems engineering principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of systems engineering principles and practices - K0928"*

Knowledge of N-tier architecture principles and practices - K0933

Knowledge of N-tier architecture principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of N-tier architecture principles and practices - K0933"*

Knowledge of data classification policies and procedures - K0934

Knowledge of data classification policies and procedures

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of data classification policies and procedures - K0934"*

Knowledge of cryptology principles and practices - K0942

Knowledge of cryptology principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of cryptology principles and practices - K0942"*

Knowledge of computer engineering principles and practices - K0947

Knowledge of computer engineering principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of computer engineering principles and practices - K0947"*

Knowledge of embedded systems and software - K0948

Knowledge of embedded systems and software

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of embedded systems and software - K0948"*

Knowledge of fault tolerance tools and techniques - K0949

Knowledge of fault tolerance tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of fault tolerance tools and techniques - K0949"*

Knowledge of information theory principles and practices - K0952

Knowledge of information theory principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of information theory principles and practices - K0952"*

Knowledge of computer networking principles and practices - K0983

Knowledge of computer networking principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of computer networking principles and practices - K0983"*

Knowledge of network security principles and practices - K1014

Knowledge of network security principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of network security principles and practices - K1014"*

Knowledge of routing protocols - K1049

Knowledge of routing protocols

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of routing protocols - K1049"*

Knowledge of secure software update principles and practices - K1080

Knowledge of secure software update principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of secure software update principles and practices - K1080"*

Knowledge of secure firmware update principles and practices - K1081

Knowledge of secure firmware update principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of secure firmware update principles and practices - K1081"*

Knowledge of design modeling - K1086

Knowledge of design modeling

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of design modeling - K1086"*

Knowledge of design methods - K1095

Knowledge of design methods

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of design methods - K1095"*

Knowledge of acquisition cybersecurity requirements - K1110

Knowledge of acquisition cybersecurity requirements

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of acquisition cybersecurity requirements - K1110"*

Knowledge of application security design principles and practices - K1111

Knowledge of application security design principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of application security design principles and practices - K1111"*

Knowledge of Confidentiality, Integrity, Availability, Authenticity, and Non-repudiation (CIAAN) principles and practices - K1120

Knowledge of Confidentiality, Integrity, Availability, Authenticity, and Non-repudiation (CIAAN) principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of Confidentiality, Integrity, Availability, Authenticity, and Non-repudiation (CIAAN) principles and practices - K1120"*

Knowledge of cybersecurity requirements - K1137

Knowledge of cybersecurity requirements

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of cybersecurity requirements - K1137"*

Knowledge of data classification levels - K1143

Knowledge of data classification levels

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of data classification levels - K1143"*

Knowledge of fail-over or alternate site requirements - K1159

Knowledge of fail-over or alternate site requirements

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of fail-over or alternate site requirements - K1159"*

Knowledge of material supportability requirements - K1169

Knowledge of material supportability requirements

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of material supportability requirements - K1169"*

Knowledge of multilevel security requirements - K1173

Knowledge of multilevel security requirements

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of multilevel security requirements - K1173"*

Knowledge of Personally Identifiable Information (PII) attributes - K1194

Knowledge of Personally Identifiable Information (PII) attributes

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of Personally Identifiable Information (PII) attributes - K1194"*

Knowledge of security controls - K1212

Knowledge of security controls

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of security controls - K1212"*

Knowledge of service-oriented security architecture practices and principles - K1216

Knowledge of service-oriented security architecture practices and principles

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of service-oriented security architecture practices and principles - K1216"*

Knowledge of system backup requirements - K1223

Knowledge of system backup requirements

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of system backup requirements - K1223"*

Knowledge of user requirements - K1236

Knowledge of user requirements

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of user requirements - K1236"*

Knowledge of programming language structures and logic - K0068

Knowledge of programming language structures and logic

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of programming language structures and logic - K0068"*

Knowledge of code tailoring tools and techniques - K0639

Knowledge of code tailoring tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of code tailoring tools and techniques - K0639"*

Knowledge of complex data structure capabilities and applications - K0693

Knowledge of complex data structure capabilities and applications

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of complex data structure capabilities and applications - K0693"*

Knowledge of programming principles and practices - K0695

Knowledge of programming principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of programming principles and practices - K0695"*

Knowledge of Local Area Networks (LAN) - K0712

Knowledge of Local Area Networks (LAN)

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of Local Area Networks (LAN) - K0712"*

Knowledge of Wide Area Networks (WAN) - K0713

Knowledge of Wide Area Networks (WAN)

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of Wide Area Networks (WAN) - K0713"*

Knowledge of risk management principles and practices - K0721

Knowledge of risk management principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of risk management principles and practices - K0721"*

Knowledge of software development principles and practices - K0722

Knowledge of software development principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of software development principles and practices - K0722"*

Knowledge of Risk Management Framework (RMF) requirements - K0734

Knowledge of Risk Management Framework (RMF) requirements

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of Risk Management Framework (RMF) requirements - K0734"*

Knowledge of risk management models and frameworks - K0735

Knowledge of risk management models and frameworks

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of risk management models and frameworks - K0735"*

Knowledge of bandwidth management tools and techniques - K0737

Knowledge of bandwidth management tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of bandwidth management tools and techniques - K0737"*

Knowledge of low-level programming languages - K0738

Knowledge of low-level programming languages

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of low-level programming languages - K0738"*

Knowledge of Privacy Impact Assessment (PIA) principles and practices - K0748

Knowledge of Privacy Impact Assessment (PIA) principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of Privacy Impact Assessment (PIA) principles and practices - K0748"*

Knowledge of configuration management (CM) tools and techniques - K0755

Knowledge of configuration management (CM) tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of configuration management (CM) tools and techniques - K0755"*

Knowledge of software debugging principles and practices - K0762

Knowledge of software debugging principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of software debugging principles and practices - K0762"*

Knowledge of software design tools and techniques - K0763

Knowledge of software design tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of software design tools and techniques - K0763"*

Knowledge of software development models and frameworks - K0764

Knowledge of software development models and frameworks

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of software development models and frameworks - K0764"*

Knowledge of structured analysis principles and practices - K0767

Knowledge of structured analysis principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of structured analysis principles and practices - K0767"*

Knowledge of web service protocols - K0782

Knowledge of web service protocols

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of web service protocols - K0782"*

Knowledge of supply chain risk management principles and practices - K0803

Knowledge of supply chain risk management principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of supply chain risk management principles and practices - K0803"*

Knowledge of interpreted and compiled programming language characteristics - K0813

Knowledge of interpreted and compiled programming language characteristics

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of interpreted and compiled programming language characteristics - K0813"*

Knowledge of supply chain risks - K0820

Knowledge of supply chain risks

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of supply chain risks - K0820"*

Knowledge of software security principles and practices - K0826

Knowledge of software security principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of software security principles and practices - K0826"*

Knowledge of software quality assurance (SQA) principles and practices - K0827

Knowledge of software quality assurance (SQA) principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of software quality assurance (SQA) principles and practices - K0827"*

Knowledge of supply chain risk management standards and best practices - K0828

Knowledge of supply chain risk management standards and best practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of supply chain risk management standards and best practices - K0828"*

Knowledge of risk management policies and procedures - K0920

Knowledge of risk management policies and procedures

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of risk management policies and procedures - K0920"*

Knowledge of penetration testing principles and practices - K0955

Knowledge of penetration testing principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of penetration testing principles and practices - K0955"*

Knowledge of penetration testing tools and techniques - K0956

Knowledge of penetration testing tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of penetration testing tools and techniques - K0956"*

Knowledge of root cause analysis tools and techniques - K0957

Knowledge of root cause analysis tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of root cause analysis tools and techniques - K0957"*

Knowledge of web application security risks - K1079

Knowledge of web application security risks

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of web application security risks - K1079"*

Knowledge of code analysis tools and techniques - K1099

Knowledge of code analysis tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of code analysis tools and techniques - K1099"*

Knowledge of coding and testing standards - K1117

Knowledge of coding and testing standards

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of coding and testing standards - K1117"*

Knowledge of completion criteria - K1118

Knowledge of completion criteria

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of completion criteria - K1118"*

Knowledge of cost constraints - K1126

Knowledge of cost constraints

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of cost constraints - K1126"*

Knowledge of data manipulation principles and practices - K1148

Knowledge of data manipulation principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of data manipulation principles and practices - K1148"*

Knowledge of data retrieval principles and practices - K1149

Knowledge of data retrieval principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of data retrieval principles and practices - K1149"*

Knowledge of data storage principles and practices - K1150

Knowledge of data storage principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of data storage principles and practices - K1150"*

Knowledge of enterprise-wide version control systems - K1157

Knowledge of enterprise-wide version control systems

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of enterprise-wide version control systems - K1157"*

Knowledge of independent testing methods - K1165

Knowledge of independent testing methods

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of independent testing methods - K1165"*

Knowledge of mathematical models - K1170

Knowledge of mathematical models

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of mathematical models - K1170"*

Knowledge of Public Key Infrastructure (PKI) libraries - K1203

Knowledge of Public Key Infrastructure (PKI) libraries

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of Public Key Infrastructure (PKI) libraries - K1203"*

Knowledge of required reporting formats - K1205

Knowledge of required reporting formats

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of required reporting formats - K1205"*

Knowledge of risk acceptance and documentation - K1208

Knowledge of risk acceptance and documentation

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of risk acceptance and documentation - K1208"*

Knowledge of secure programming tools and techniques - K1210

Knowledge of secure programming tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of secure programming tools and techniques - K1210"*

Knowledge of security restrictions - K1214

Knowledge of security restrictions

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of security restrictions - K1214"*

Knowledge of security testing tools and techniques - K1215

Knowledge of security testing tools and techniques

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of security testing tools and techniques - K1215"*

Knowlege of certificate management principles and practices - K1239

Knowlege of certificate management principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowlege of certificate management principles and practices - K1239"*

Knowledge of cybersecurity practices in the acquisition process - K0653

Knowledge of cybersecurity practices in the acquisition process

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of cybersecurity practices in the acquisition process - K0653"*

Knowledge of resiliency and redundancy principles and practices - K0715

Knowledge of resiliency and redundancy principles and practices

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of resiliency and redundancy principles and practices - K0715"*

Knowledge of host access control (HAC) systems and software - K0716

Knowledge of host access control (HAC) systems and software

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of host access control (HAC) systems and software - K0716"*

Knowledge of network access control (NAC) systems and software - K0717

Knowledge of network access control (NAC) systems and software

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of network access control (NAC) systems and software - K0717"*

Knowledge of policy-based access controls - K0746

Knowledge of policy-based access controls

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of policy-based access controls - K0746"*

Knowledge of Risk Adaptive (Adaptable) Access Controls (RAdAC) - K0747

Knowledge of Risk Adaptive (Adaptable) Access Controls (RAdAC)

The tag is: *misp-galaxy:nice-framework-knowledges="Knowledge of Risk Adaptive (Adaptable) Access Controls (RAdAC) - K0747"*

Knowledge of system design standards and best practices - K0769

Knowledge of system design standards and best practices

OPM - Jean-Louis Huynen

Security Architect - Systems Architecture - Designs enterprise and systems security throughout the development life cycle; translates technology and e - 652

Security Architect - Systems Architecture - Designs enterprise and systems security throughout the development life cycle; translates technology and environmental conditions (e.g., law and regulation) into security designs and processes. (Securely Provision)

The tag is: *misp-galaxy:nice-framework-opm_codes="Security Architect - Systems Architecture -*

Designs enterprise and systems security throughout the development life cycle; translates technology and e - 652"

Enterprise Architect - Systems Architecture - Develops and maintains business, systems, and information processes to support enterprise mission needs; - 651

Enterprise Architect - Systems Architecture - Develops and maintains business, systems, and information processes to support enterprise mission needs; develops information technology (IT) rules and requirements that describe baseline and target architectures. (Securely Provision)

The tag is: *misp-galaxy:nice-framework-opm_codes="Enterprise Architect - Systems Architecture - Develops and maintains business, systems, and information processes to support enterprise mission needs; - 651"*

Information Systems Security Developer - Systems Development - Designs, develops, tests, and evaluates information system security throughout the syst - 631

Information Systems Security Developer - Systems Development - Designs, develops, tests, and evaluates information system security throughout the systems development life cycle. (Securely Provision)

The tag is: *misp-galaxy:nice-framework-opm_codes="Information Systems Security Developer - Systems Development - Designs, develops, tests, and evaluates information system security throughout the syst - 631"*

Systems Developer - Systems Development - Designs, develops, tests, and evaluates information systems throughout the systems development life cycle. (- 632

Systems Developer - Systems Development - Designs, develops, tests, and evaluates information systems throughout the systems development life cycle. (Securely Provision)

The tag is: *misp-galaxy:nice-framework-opm_codes="Systems Developer - Systems Development - Designs, develops, tests, and evaluates information systems throughout the systems development life cycle. (- 632"*

Software Developer - Software Development - Develops, creates, maintains, and writes/codes new (or modifies existing) computer applications, software, - 621

Software Developer - Software Development - Develops, creates, maintains, and writes/codes new (or modifies existing) computer applications, software, or specialized utility programs. (Securely Provision)

The tag is: *misp-galaxy:nice-framework-opm_codes="Software Developer - Software Development - Develops, creates, maintains, and writes/codes new (or modifies existing) computer applications, software, - 621"*

Secure Software Assessor - Software Development - Analyzes the security of new or existing computer applications, software, or specialized utility pro - 622

Secure Software Assessor - Software Development - Analyzes the security of new or existing computer applications, software, or specialized utility programs and provides actionable results. (Securely Provision)

The tag is: *misp-galaxy:nice-framework-opm_codes="Secure Software Assessor - Software Development - Analyzes the security of new or existing computer applications, software, or specialized utility pro - 622"*

Partner Integration Planner - Cyber Operational Planning - Works to advance cooperation across organizational or national borders between cyber operat - 333

Partner Integration Planner - Cyber Operational Planning - Works to advance cooperation across organizational or national borders between cyber operations partners. Aids the integration of partner cyber teams by providing guidance, resources, and collaboration to develop best practices and facilitate organizational support for achieving objectives in integrated cyber actions. (Collect and Operate)

The tag is: *misp-galaxy:nice-framework-opm_codes="Partner Integration Planner - Cyber Operational Planning - Works to advance cooperation across organizational or national borders between cyber operat - 333"*

Mission Assessment Specialist - All-Source Analysis - Develops assessment plans and measures of performance/effectiveness. Conducts strategic and oper - 112

Mission Assessment Specialist - All-Source Analysis - Develops assessment plans and measures of performance/effectiveness. Conducts strategic and operational effectiveness assessments as required for cyber events. Determines whether systems performed as expected and provides input to the determination of operational effectiveness. (Analyze)

The tag is: *misp-galaxy:nice-framework-opm_codes="Mission Assessment Specialist - All-Source Analysis - Develops assessment plans and measures of performance/effectiveness. Conducts strategic and oper - 112"*

Target Developer - Targets - Performs target system analysis, builds and/or maintains electronic target folders to include inputs from environment pre - 131

Target Developer - Targets - Performs target system analysis, builds and/or maintains electronic target folders to include inputs from environment preparation, and/or internal or external intelligence sources. Coordinates with partner target activities and intelligence organizations, and presents candidate targets for vetting and validation. (Analyze)

The tag is: *misp-galaxy:nice-framework-opm_codes="Target Developer - Targets - Performs target system analysis, builds and/or maintains electronic target folders to include inputs from environment pre - 131"*

Target Network Analyst - Targets - Conducts advanced analysis of collection and open-source data to ensure target continuity; to profile targets and t - 132

Target Network Analyst - Targets - Conducts advanced analysis of collection and open-source data to ensure target continuity; to profile targets and their activities; and develop techniques to gain more target information. Determines how targets communicate, move, operate and live based on knowledge of target technologies, digital networks and the applications on them. (Analyze)

The tag is: *misp-galaxy:nice-framework-opm_codes="Target Network Analyst - Targets - Conducts advanced analysis of collection and open-source data to ensure target continuity; to profile targets and t - 132"*

Cyber Defense Analyst - Cyber Defense Analysis - Uses data collected from a variety of cyber defense tools (e.g., IDS alerts, firewalls, network traff - 511

Cyber Defense Analyst - Cyber Defense Analysis - Uses data collected from a variety of cyber defense tools (e.g., IDS alerts, firewalls, network traffic logs) to analyze events that occur within their environments for the purposes of mitigating threats. (Protect and Defend)

The tag is: *misp-galaxy:nice-framework-opm_codes="Cyber Defense Analyst - Cyber Defense Analysis - Uses data collected from a variety of cyber defense tools (e.g., IDS alerts, firewalls, network traff - 511"*

Cyber Defense Forensics Analyst - Digital Forensics - Analyzes digital evidence and investigates computer security incidents to derive useful informat - 212

Cyber Defense Forensics Analyst - Digital Forensics - Analyzes digital evidence and investigates computer security incidents to derive useful information in support of system/network vulnerability mitigation. (Investigate)

The tag is: *misp-galaxy:nice-framework-opm_codes="Cyber Defense Forensics Analyst - Digital Forensics - Analyzes digital evidence and investigates computer security incidents to derive useful informat - 212"*

Cyber Defense Incident Responder - Incident Response - Investigates, analyzes, and responds to cyber incidents within the network environment or encla - 531

Cyber Defense Incident Responder - Incident Response - Investigates, analyzes, and responds to cyber incidents within the network environment or enclave. (Protect and Defend)

The tag is: *misp-galaxy:nice-framework-opm_codes="Cyber Defense Incident Responder - Incident Response - Investigates, analyzes, and responds to cyber incidents within the network environment or encla - 531"*

Systems Requirements Planner - Systems Requirements Planning - Consults with customers to evaluate functional requirements and translate functional re - 641

Systems Requirements Planner - Systems Requirements Planning - Consults with customers to evaluate functional requirements and translate functional requirements into technical solutions.

(Securely Provision)

The tag is: *misp-galaxy:nice-framework-opm_codes="Systems Requirements Planner - Systems Requirements Planning - Consults with customers to evaluate functional requirements and translate functional re - 641"*

System Testing and Evaluation Specialist - Test and Evaluation - Plans, prepares, and executes tests of systems to evaluate results against specificat - 671

System Testing and Evaluation Specialist - Test and Evaluation - Plans, prepares, and executes tests of systems to evaluate results against specifications and requirements as well as analyze/report test results. (Securely Provision)

The tag is: *misp-galaxy:nice-framework-opm_codes="System Testing and Evaluation Specialist - Test and Evaluation - Plans, prepares, and executes tests of systems to evaluate results against specificat - 671"*

Research & Development Specialist - Technology R&D - Conducts software and systems engineering and software systems research in order to develop new c - 661

Research & Development Specialist - Technology R&D - Conducts software and systems engineering and software systems research in order to develop new capabilities, ensuring cybersecurity is fully integrated. Conducts comprehensive technology research to evaluate potential vulnerabilities in cyberspace systems. (Securely Provision)

The tag is: *misp-galaxy:nice-framework-opm_codes="Research & Development Specialist - Technology R&D - Conducts software and systems engineering and software systems research in order to develop new c - 661"*

Cyber Operator - Cyber Operations - Conducts collection, processing, and/or geolocation of systems in order to exploit, locate, and/or track targets o - 321

Cyber Operator - Cyber Operations - Conducts collection, processing, and/or geolocation of systems in order to exploit, locate, and/or track targets of interest. Performs network navigation, tactical forensic analysis, and, when directed, executing on-net operations. (Collect and Operate)

The tag is: *misp-galaxy:nice-framework-opm_codes="Cyber Operator - Cyber Operations - Conducts collection, processing, and/or geolocation of systems in order to exploit, locate, and/or track targets o - 321"*

Cyber Ops Planner - Cyber Operational Planning - Develops detailed plans for the conduct or support of the applicable range of cyber operations throug - 332

Cyber Ops Planner - Cyber Operational Planning - Develops detailed plans for the conduct or support of the applicable range of cyber operations through collaboration with other planners, operators and/or analysts. Participates in targeting selection, validation, synchronization, and enables integration during the execution of cyber actions. (Collect and Operate)

The tag is: *misp-galaxy:nice-framework-opm_codes="Cyber Ops Planner - Cyber Operational Planning - Develops detailed plans for the conduct or support of the applicable range of cyber operations throug - 332"*

Exploitation Analyst - Exploitation Analysis - Collaborates to identify access and collection gaps that can be satisfied through cyber collection and/ - 121

Exploitation Analyst - Exploitation Analysis - Collaborates to identify access and collection gaps that can be satisfied through cyber collection and/or preparation activities. Leverages all authorized resources and analytic techniques to penetrate targeted networks. (Analyze)

The tag is: *misp-galaxy:nice-framework-opm_codes="Exploitation Analyst - Exploitation Analysis - Collaborates to identify access and collection gaps that can be satisfied through cyber collection and/ - 121"*

Cyber Defense Infrastructure Support Specialist - Cyber Defense Infrastructure Support - Tests, implements, deploys, maintains, and administers the in - 521

Cyber Defense Infrastructure Support Specialist - Cyber Defense Infrastructure Support - Tests, implements, deploys, maintains, and administers the infrastructure hardware and software. (Protect and Defend)

The tag is: *misp-galaxy:nice-framework-opm_codes="Cyber Defense Infrastructure Support Specialist - Cyber Defense Infrastructure Support - Tests, implements, deploys, maintains, and administers the in - 521"*

Warning Analyst - Threat Analysis - Develops unique cyber indicators to maintain constant awareness of the status of the highly dynamic operating envi - 141

Warning Analyst - Threat Analysis - Develops unique cyber indicators to maintain constant awareness of the status of the highly dynamic operating environment. Collects, processes, analyzes, and disseminates cyber warning assessments. (Analyze)

The tag is: *misp-galaxy:nice-framework-opm_codes="Warning Analyst - Threat Analysis - Develops unique cyber indicators to maintain constant awareness of the status of the highly dynamic operating envi - 141"*

Network Operations Specialist - Network Services - Plans, implements, and operates network services/systems, to include hardware and virtual environme - 441

Network Operations Specialist - Network Services - Plans, implements, and operates network services/systems, to include hardware and virtual environments. (Operate and Maintain)

The tag is: *misp-galaxy:nice-framework-opm_codes="Network Operations Specialist - Network Services - Plans, implements, and operates network services/systems, to include hardware and virtual environme - 441"*

System Administrator - Systems Administration - Installs, configures, troubleshoots, and maintains hardware and software, and administers system accou - 451

System Administrator - Systems Administration - Installs, configures, troubleshoots, and maintains hardware and software, and administers system accounts. (Operate and Maintain)

The tag is: *misp-galaxy:nice-framework-opm_codes="System Administrator - Systems Administration - Installs, configures, troubleshoots, and maintains hardware and software, and administers system accou - 451"*

Systems Security Analyst - Systems Analysis - Responsible for the analysis and development of the integration, testing, operations, and maintenance of - 461

Systems Security Analyst - Systems Analysis - Responsible for the analysis and development of the integration, testing, operations, and maintenance of systems security. (Operate and Maintain)

The tag is: *misp-galaxy:nice-framework-opm_codes="Systems Security Analyst - Systems Analysis - Responsible for the analysis and development of the integration, testing, operations, and maintenance of - 461"*

Technical Support Specialist - Customer Service and Technical Support - Provides technical support to customers who need assistance utilizing client-l - 411

Technical Support Specialist - Customer Service and Technical Support - Provides technical support to customers who need assistance utilizing client-level hardware and software in accordance with established or approved organizational process components. (i.e., Master Incident Management Plan, when applicable). (Operate and Maintain)

The tag is: *misp-galaxy:nice-framework-opm_codes="Technical Support Specialist - Customer Service and Technical Support - Provides technical support to customers who need assistance utilizing client-l - 411"*

Vulnerability Assessment Analyst - Vulnerability Assessment and Management - Performs assessments of systems and networks within the network environme - 541

Vulnerability Assessment Analyst - Vulnerability Assessment and Management - Performs assessments of systems and networks within the network environment or enclave and identifies where those systems/networks deviate from acceptable configurations, enclave policy, or local policy. Measures effectiveness of defense-in-depth architecture against known vulnerabilities. (Protect and Defend)

The tag is: *misp-galaxy:nice-framework-opm_codes="Vulnerability Assessment Analyst - Vulnerability Assessment and Management - Performs assessments of systems and networks within the network environme - 541"*

Cyber Crime Investigator - Cyber Investigation - Identifies, collects, examines, and preserves evidence using controlled and documented analytical and - 221

Cyber Crime Investigator - Cyber Investigation - Identifies, collects, examines, and preserves evidence using controlled and documented analytical and investigative techniques. (Investigate)

The tag is: *misp-galaxy:nice-framework-opm_codes="Cyber Crime Investigator - Cyber Investigation - Identifies, collects, examines, and preserves evidence using controlled and documented analytical and - 221"*

Forensics Analyst - Digital Forensics - Conducts deep-dive investigations on computer-based crimes establishing documentary or physical evidence, to - 211

Forensics Analyst - Digital Forensics - Conducts deep-dive investigations on computer-based crimes establishing documentary or physical evidence, to include digital media and logs associated with cyber intrusion incidents. (Investigate)

The tag is: *misp-galaxy:nice-framework-opm_codes="Forensics Analyst - Digital Forensics - Conducts deep-dive investigations on computer-based crimes establishing documentary or physical evidence, to - 211"*

Data Analyst - Data Administration - Examines data from multiple disparate sources with the goal of providing new insight. Designs and implements cust - 422

Data Analyst - Data Administration - Examines data from multiple disparate sources with the goal of providing new insight. Designs and implements custom algorithms, flow processes, and layouts for complex, enterprise-scale data sets used for modeling, data mining, and research purposes. (Operate and Maintain)

The tag is: *misp-galaxy:nice-framework-opm_codes="Data Analyst - Data Administration - Examines data from multiple disparate sources with the goal of providing new insight. Designs and implements cust - 422"*

Database Administrator - Data Administration - Administers databases and/or data management systems that allow for the storage, query, and utilization - 421

Database Administrator - Data Administration - Administers databases and/or data management systems that allow for the storage, query, and utilization of data. (Operate and Maintain)

The tag is: *misp-galaxy:nice-framework-opm_codes="Database Administrator - Data Administration - Administers databases and/or data management systems that allow for the storage, query, and utilization - 421"*

Knowledge Manager - Knowledge Management - Responsible for the management and administration of processes and tools that enable the organization to id - 431

Knowledge Manager - Knowledge Management - Responsible for the management and administration of processes and tools that enable the organization to identify, document, and access intellectual capital and information content. (Operate and Maintain)

The tag is: *misp-galaxy:nice-framework-opm_codes="Knowledge Manager - Knowledge Management - Responsible for the management and administration of processes and tools that enable the organization to id - 431"*

All Source-Collection Requirements Manager - Collection Operations - Evaluates collection operations and develops effects-based collection requirement - 312

All Source-Collection Requirements Manager - Collection Operations - Evaluates collection operations and develops effects-based collection requirements strategies using available sources and methods to improve collection. Develops, processes, validates, and coordinates submission of collection requirements. Evaluates performance of collection assets and collection operations. (Collect and Operate)

The tag is: *misp-galaxy:nice-framework-opm_codes="All Source-Collection Requirements Manager - Collection Operations - Evaluates collection operations and develops effects-based collection requirement - 312"*

Cyber Intel Planner - Cyber Operational Planning - Develops detailed intelligence plans to satisfy cyber operations requirements. Collaborates with cy - 331

Cyber Intel Planner - Cyber Operational Planning - Develops detailed intelligence plans to satisfy cyber operations requirements. Collaborates with cyber operations planners to identify, validate, and levy requirements for collection and analysis. Participates in targeting selection, validation, synchronization, and execution of cyber actions. Synchronizes intelligence activities to support organization objectives in cyberspace. (Collect and Operate)

The tag is: *misp-galaxy:nice-framework-opm_codes="Cyber Intel Planner - Cyber Operational Planning - Develops detailed intelligence plans to satisfy cyber operations requirements. Collaborates with cy - 331"*

Multi-Disciplined Language Analyst - Language Analysis - Applies language and culture expertise with target/threat and technical knowledge to process, - 151

Multi-Disciplined Language Analyst - Language Analysis - Applies language and culture expertise with target/threat and technical knowledge to process, analyze, and/or disseminate intelligence information derived from language, voice and/or graphic material. Creates, and maintains language specific databases and working aids to support cyber action execution and ensure critical knowledge sharing. Provides subject matter expertise in foreign language-intensive or interdisciplinary projects. (Analyze)

The tag is: *misp-galaxy:nice-framework-opm_codes="Multi-Disciplined Language Analyst - Language Analysis - Applies language and culture expertise with target/threat and technical knowledge to process, - 151"*

All-Source Analyst - All-Source Analysis - Analyzes data/information from one or multiple sources to conduct preparation of the environment, respond t - 111

All-Source Analyst - All-Source Analysis - Analyzes data/information from one or multiple sources to conduct preparation of the environment, respond to requests for information, and submit intelligence collection and production requirements in support of planning and operations. (Analyze)

The tag is: *misp-galaxy:nice-framework-opm_codes="All-Source Analyst - All-Source Analysis - Analyzes data/information from one or multiple sources to conduct preparation of the environment, respond t - 111"*

All Source-Collection Manager - Collection Operations - Identifies collection authorities and environment; incorporates priority information requireme - 311

All Source-Collection Manager - Collection Operations - Identifies collection authorities and environment; incorporates priority information requirements into collection management; develops concepts to meet leadership's intent. Determines capabilities of available collection assets, identifies new collection capabilities; and constructs and disseminates collection plans. Monitors execution of tasked collection to ensure effective execution of the collection plan. (Collect and Operate)

The tag is: *misp-galaxy:nice-framework-opm_codes="All Source-Collection Manager - Collection Operations - Identifies collection authorities and environment; incorporates priority information requireme - 311"*

IT Program Auditor - Acquisition and Program/Project Management - Conducts evaluations of an IT program or its individual components, to determine com - 805

IT Program Auditor - Acquisition and Program/Project Management - Conducts evaluations of an IT program or its individual components, to determine compliance with published standards. (Oversee and Govern)

The tag is: *misp-galaxy:nice-framework-opm_codes="IT Program Auditor - Acquisition and Program/Project Management - Conducts evaluations of an IT program or its individual components, to determine com - 805"*

Security Control Assessor - Risk Management - Conducts independent comprehensive assessments of the management, operational, and technical security co - 612

Security Control Assessor - Risk Management - Conducts independent comprehensive assessments of the management, operational, and technical security controls and control enhancements employed within or inherited by an information technology (IT) system to determine the overall effectiveness of the controls (as defined in NIST SP 800-37). (Securely Provision)

The tag is: *misp-galaxy:nice-framework-opm_codes="Security Control Assessor - Risk Management - Conducts independent comprehensive assessments of the management, operational, and technical security co - 612"*

COMSEC Manager - Cybersecurity Management - Manages the Communications Security (COMSEC) resources of an organization (CNSSI 4009). (Oversee and Gover - 723

COMSEC Manager - Cybersecurity Management - Manages the Communications Security (COMSEC) resources of an organization (CNSSI 4009). (Oversee and Govern)

The tag is: *misp-galaxy:nice-framework-opm_codes="COMSEC Manager - Cybersecurity Management - Manages the Communications Security (COMSEC) resources of an organization (CNSSI 4009). (Oversee and Gover - 723"*

Cyber Policy and Strategy Planner - Strategic Planning and Policy - Develops cyberspace plans, strategy and policy to support and align with organizat - 752

Cyber Policy and Strategy Planner - Strategic Planning and Policy - Develops cyberspace plans, strategy and policy to support and align with organizational cyberspace missions and initiatives. (Oversee and Govern)

The tag is: *misp-galaxy:nice-framework-opm_codes="Cyber Policy and Strategy Planner - Strategic Planning and Policy - Develops cyberspace plans, strategy and policy to support and align with organizat - 752"*

Cyber Workforce Developer and Manager - Strategic Planning and Policy - Develops cyberspace workforce plans, strategies and guidance to support cybers - 751

Cyber Workforce Developer and Manager - Strategic Planning and Policy - Develops cyberspace workforce plans, strategies and guidance to support cyberspace workforce manpower, personnel, training and education requirements and to address changes to cyberspace policy, doctrine, materiel, force structure, and education and training requirements. (Oversee and Govern)

The tag is: *misp-galaxy:nice-framework-opm_codes="Cyber Workforce Developer and Manager - Strategic Planning and Policy - Develops cyberspace workforce plans, strategies and guidance to support cybers - 751"*

Cyber Instructional Curriculum Developer - Training, Education, and Awareness - Develops, plans, coordinates, and evaluates cyber training/education c - 711

Cyber Instructional Curriculum Developer - Training, Education, and Awareness - Develops, plans, coordinates, and evaluates cyber training/education courses, methods, and techniques based on instructional needs. (Oversee and Govern)

The tag is: *misp-galaxy:nice-framework-opm_codes="Cyber Instructional Curriculum Developer - Training, Education, and Awareness - Develops, plans, coordinates, and evaluates cyber training/education c - 711"*

Cyber Instructor- Training, Education, and Awareness - Develops and conducts training or education of personnel within cyber domain. (Oversee and Gove - 712

Cyber Instructor- Training, Education, and Awareness - Develops and conducts training or education of personnel within cyber domain. (Oversee and Govern)

The tag is: *misp-galaxy:nice-framework-opm_codes="Cyber Instructor- Training, Education, and Awareness - Develops and conducts training or education of personnel within cyber domain. (Oversee and Gove - 712"*

Cyber Legal Advisor - Legal Advice and Advocacy - Provides legal advice and recommendations on relevant topics related to cyber law. (Oversee and Gove - 731

Cyber Legal Advisor - Legal Advice and Advocacy - Provides legal advice and recommendations on relevant topics related to cyber law. (Oversee and Govern)

The tag is: *misp-galaxy:nice-framework-opm_codes="Cyber Legal Advisor - Legal Advice and Advocacy - Provides legal advice and recommendations on relevant topics related to cyber law. (Oversee and Gove - 731"*

Executive Cyber Leadership - Executive Cyber Leadership - Executes decision-making authorities and establishes vision and direction for an organizatio - 901

Executive Cyber Leadership - Executive Cyber Leadership - Executes decision-making authorities and establishes vision and direction for an organization's cyber and cyber-related resources and/or operations. (Oversee and Govern)

The tag is: *misp-galaxy:nice-framework-opm_codes="Executive Cyber Leadership - Executive Cyber Leadership - Executes decision-making authorities and establishes vision and direction for an organizatio - 901"*

Privacy Compliance Manager - Legal Advice and Advocacy - Develops and oversees privacy compliance program and privacy program staff, supporting privac - 732

Privacy Compliance Manager - Legal Advice and Advocacy - Develops and oversees privacy compliance program and privacy program staff, supporting privacy compliance needs of privacy and security executives and their teams. (Oversee and Govern)

The tag is: *misp-galaxy:nice-framework-opm_codes="Privacy Compliance Manager - Legal Advice and Advocacy - Develops and oversees privacy compliance program and privacy program staff, supporting privac - 732"*

Program Manager - Acquisition and Program/Project Management - Leads, coordinates, communicates, integrates and is accountable for the overall success - 801

Program Manager - Acquisition and Program/Project Management - Leads, coordinates, communicates, integrates and is accountable for the overall success of the program, ensuring alignment with critical agency priorities. (Oversee and Govern)

The tag is: *misp-galaxy:nice-framework-opm_codes="Program Manager - Acquisition and Program/Project Management - Leads, coordinates, communicates, integrates and is accountable for the overall success - 801"*

IT Project Manager - Acquisition and Program/Project Management - Directly manages information technology projects to provide a unique service or prod - 802

IT Project Manager - Acquisition and Program/Project Management - Directly manages information technology projects to provide a unique service or product. (Oversee and Govern)

The tag is: *misp-galaxy:nice-framework-opm_codes="IT Project Manager - Acquisition and Program/Project Management - Directly manages information technology projects to provide a unique service or prod - 802"*

Authorizing Official/Designating Representative - Risk Management - Senior official or executive with the authority to formally assume responsibility - 611

Authorizing Official/Designating Representative - Risk Management - Senior official or executive with the authority to formally assume responsibility for operating an information system at an acceptable level of risk to organizational operations (including mission, functions, image, or reputation), organizational assets, individuals, other organizations, and the Nation (CNSSI 4009). (Securely Provision)

The tag is: *misp-galaxy:nice-framework-opm_codes="Authorizing Official/Designating Representative - Risk Management - Senior official or executive with the authority to formally assume responsibility - 611"*

Product Support Manager - Acquisition and Program/Project Management- Manages the package of support functions required to field and maintain the read - 803

Product Support Manager - Acquisition and Program/Project Management- Manages the package of support functions required to field and maintain the readiness and operational capability of systems and components. (Oversee and Govern)

The tag is: *misp-galaxy:nice-framework-opm_codes="Product Support Manager - Acquisition and Program/Project Management- Manages the package of support functions required to field and maintain the read - 803"*

Information Systems Security Manager - Cybersecurity Management - Responsible for the cybersecurity of a program, organization, system, or enclave. (- 722

Information Systems Security Manager - Cybersecurity Management - Responsible for the cybersecurity of a program, organization, system, or enclave. (Oversee and Govern)

The tag is: *misp-galaxy:nice-framework-opm_codes="Information Systems Security Manager - Cybersecurity Management - Responsible for the cybersecurity of a program, organization, system, or enclave. (- 722"*

IT Investment/Portfolio Manager - Acquisition and Program/Project Management - Manages a portfolio of IT capabilities that align with the overall need - 804

IT Investment/Portfolio Manager - Acquisition and Program/Project Management - Manages a portfolio of IT capabilities that align with the overall needs of mission and business enterprise priorities. (Oversee and Govern)

The tag is: *misp-galaxy:nice-framework-opm_codes="IT Investment/Portfolio Manager - Acquisition and Program/Project Management - Manages a portfolio of IT capabilities that align with the overall need - 804"*

Skill in monitoring system performance

The tag is: *misp-galaxy:nice-framework-skills="Skill in monitoring system performance - S0580"*

Skill in configuring systems for performance enhancement - S0581

Skill in configuring systems for performance enhancement

The tag is: *misp-galaxy:nice-framework-skills="Skill in configuring systems for performance enhancement - S0581"*

Skill in performing data requirement analysis - S0855

Skill in performing data requirement analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing data requirement analysis - S0855"*

Skill in creating a risk management program - S0452

Skill in creating a risk management program

The tag is: *misp-galaxy:nice-framework-skills="Skill in creating a risk management program - S0452"*

Skill in creating a risk management strategy - S0453

Skill in creating a risk management strategy

The tag is: *misp-galaxy:nice-framework-skills="Skill in creating a risk management strategy - S0453"*

Skill in creating an internal information sharing program - S0454

Skill in creating an internal information sharing program

The tag is: *misp-galaxy:nice-framework-skills="Skill in creating an internal information sharing program - S0454"*

Skill in integrating authorizations with requirements - S0455

Skill in integrating authorizations with requirements

The tag is: *misp-galaxy:nice-framework-skills="Skill in integrating authorizations with requirements - S0455"*

Skill in integrating security plans and authorizations - S0456

Skill in integrating security plans and authorizations

The tag is: *misp-galaxy:nice-framework-skills="Skill in integrating security plans and authorizations - S0456"*

Skill in determining system authorization status - S0457

Skill in determining system authorization status

The tag is: *misp-galaxy:nice-framework-skills="Skill in determining system authorization status - S0457"*

Skill in creating security assessment reports - S0459

Skill in creating security assessment reports

The tag is: *misp-galaxy:nice-framework-skills="Skill in creating security assessment reports - S0459"*

Skill in maintaining data - S0843

Skill in maintaining data

The tag is: *misp-galaxy:nice-framework-skills="Skill in maintaining data - S0843"*

Skill in verifying contractor compliance with contracts - S0460

Skill in verifying contractor compliance with contracts

The tag is: *misp-galaxy:nice-framework-skills="Skill in verifying contractor compliance with contracts - S0460"*

Skill in integrating security requirements and contracts - S0461

Skill in integrating security requirements and contracts

The tag is: *misp-galaxy:nice-framework-skills="Skill in integrating security requirements and contracts - S0461"*

Skill in applying stakeholder management within a system development life cycle - S0464

Skill in applying stakeholder management within a system development life cycle

The tag is: *misp-galaxy:nice-framework-skills="Skill in applying stakeholder management within a system development life cycle - S0464"*

Skill in implementing countermeasures - S0489

Skill in implementing countermeasures

The tag is: *misp-galaxy:nice-framework-skills="Skill in implementing countermeasures - S0489"*

Skill in developing curriculum standards - S0816

Skill in developing curriculum standards

The tag is: *misp-galaxy:nice-framework-skills="Skill in developing curriculum standards - S0816"*

Skill in providing software updates - S0541

Skill in providing software updates

The tag is: *misp-galaxy:nice-framework-skills="Skill in providing software updates - S0541"*

Skill in developing access control lists - S0542

Skill in developing access control lists

The tag is: *misp-galaxy:nice-framework-skills="Skill in developing access control lists - S0542"*

Skill in responding to threat reports - S0810

Skill in responding to threat reports

The tag is: *misp-galaxy:nice-framework-skills="Skill in responding to threat reports - S0810"*

Skill in performing supply chain analysis - S0812

Skill in performing supply chain analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing supply chain analysis - S0812"*

Skill in performing market analysis - S0868

Skill in performing market analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing market analysis - S0868"*

Skill in creating policies - S0665

Skill in creating policies

The tag is: *misp-galaxy:nice-framework-skills="Skill in creating policies - S0665"*

Skill in defining performance objectives - S0666

Skill in defining performance objectives

The tag is: *misp-galaxy:nice-framework-skills="Skill in defining performance objectives - S0666"*

Skill in cooperating with internal and external stakeholders - S0832

Skill in cooperating with internal and external stakeholders

The tag is: *misp-galaxy:nice-framework-skills="Skill in cooperating with internal and external stakeholders - S0832"*

Skill in correlating incident data - S0833

Skill in correlating incident data

The tag is: *misp-galaxy:nice-framework-skills="Skill in correlating incident data - S0833"*

Skill in applying security controls - S0097

Skill in applying security controls

The tag is: *misp-galaxy:nice-framework-skills="Skill in applying security controls - S0097"*

Skill in verifying participation in a security awareness program - S0379

Skill in verifying participation in a security awareness program

The tag is: *misp-galaxy:nice-framework-skills="Skill in verifying participation in a security awareness program - S0379"*

Skill in facilitating cybersecurity awareness briefings - S0380

Skill in facilitating cybersecurity awareness briefings

The tag is: *misp-galaxy:nice-framework-skills="Skill in facilitating cybersecurity awareness briefings - S0380"*

Skill in developing training programs - S0381

Skill in developing training programs

The tag is: *misp-galaxy:nice-framework-skills="Skill in developing training programs - S0381"*

Skill in facilitating small group discussions - S0388

Skill in facilitating small group discussions

The tag is: *misp-galaxy:nice-framework-skills="Skill in facilitating small group discussions - S0388"*

Skill in facilitating group discussions - S0389

Skill in facilitating group discussions

The tag is: *misp-galaxy:nice-framework-skills="Skill in facilitating group discussions - S0389"*

Skill in assessing learner comprehension - S0390

Skill in assessing learner comprehension

The tag is: *misp-galaxy:nice-framework-skills="Skill in assessing learner comprehension - S0390"*

Skill in providing training and education feedback to learners - S0392

Skill in providing training and education feedback to learners

The tag is: *misp-galaxy:nice-framework-skills="Skill in providing training and education feedback to*

learners - S0392"

Skill in applying technologies for instructional purposes - S0629

Skill in applying technologies for instructional purposes

The tag is: *misp-galaxy:nice-framework-skills="Skill in applying technologies for instructional purposes - S0629"*

Skill in developing instructional materials - S0395

Skill in developing instructional materials

The tag is: *misp-galaxy:nice-framework-skills="Skill in developing instructional materials - S0395"*

Skill in conducting an education needs assessment - S0467

Skill in conducting an education needs assessment

The tag is: *misp-galaxy:nice-framework-skills="Skill in conducting an education needs assessment - S0467"*

Skill in conducting a training needs assessment - S0468

Skill in conducting a training needs assessment

The tag is: *misp-galaxy:nice-framework-skills="Skill in conducting a training needs assessment - S0468"*

Skill in developing curricula - S0601

Skill in developing curricula

The tag is: *misp-galaxy:nice-framework-skills="Skill in developing curricula - S0601"*

Skill in teaching training programs - S0602

Skill in teaching training programs

The tag is: *misp-galaxy:nice-framework-skills="Skill in teaching training programs - S0602"*

Skill in developing learning activities - S0628

Skill in developing learning activities

The tag is: *misp-galaxy:nice-framework-skills="Skill in developing learning activities - S0628"*

Skill in aligning privacy and cybersecurity objectives - S0447

Skill in aligning privacy and cybersecurity objectives

The tag is: *misp-galaxy:nice-framework-skills="Skill in aligning privacy and cybersecurity objectives - S0447"*

Skill in authoring privacy disclosure statements - S0450

Skill in authoring privacy disclosure statements

The tag is: *misp-galaxy:nice-framework-skills="Skill in authoring privacy disclosure statements - S0450"*

Skill in creating privacy policies - S0796

Skill in creating privacy policies

The tag is: *misp-galaxy:nice-framework-skills="Skill in creating privacy policies - S0796"*

Skill in negotiating vendor agreements - S0797

Skill in negotiating vendor agreements

The tag is: *misp-galaxy:nice-framework-skills="Skill in negotiating vendor agreements - S0797"*

Skill in evaluating vendor privacy practices - S0798

Skill in evaluating vendor privacy practices

The tag is: *misp-galaxy:nice-framework-skills="Skill in evaluating vendor privacy practices - S0798"*

Skill in building internal and external stakeholder relationships - S0818

Skill in building internal and external stakeholder relationships

The tag is: *misp-galaxy:nice-framework-skills="Skill in building internal and external stakeholder relationships - S0818"*

Skill in resolving conflicting intelligence collection requirements - S0792

Skill in resolving conflicting intelligence collection requirements

The tag is: *misp-galaxy:nice-framework-skills="Skill in resolving conflicting intelligence collection requirements - S0792"*

Skill in establishing timelines - S0794

Skill in establishing timelines

The tag is: *misp-galaxy:nice-framework-skills="Skill in establishing timelines - S0794"*

Skill in tracking intelligence collection requirements - S0795

Skill in tracking intelligence collection requirements

The tag is: *misp-galaxy:nice-framework-skills="Skill in tracking intelligence collection requirements - S0795"*

Skill in applying analytical standards during intelligence product evaluation - S0310

Skill in applying analytical standards during intelligence product evaluation

The tag is: *misp-galaxy:nice-framework-skills="Skill in applying analytical standards during intelligence product evaluation - S0310"*

Skill in determining intelligence employment requirements - S0513

Skill in determining intelligence employment requirements

The tag is: *misp-galaxy:nice-framework-skills="Skill in determining intelligence employment requirements - S0513"*

Skill in performing strategic guidance analysis - S0761

Skill in performing strategic guidance analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing strategic guidance analysis - S0761"*

Skill in coordinating product development - S0766

Skill in coordinating product development

The tag is: *misp-galaxy:nice-framework-skills="Skill in coordinating product development - S0766"*

Skill in developing tailored intelligence products - S0767

Skill in developing tailored intelligence products

The tag is: *misp-galaxy:nice-framework-skills="Skill in developing tailored intelligence products - S0767"*

Skill in allocating resources - S0768

Skill in allocating resources

The tag is: *misp-galaxy:nice-framework-skills="Skill in allocating resources - S0768"*

Skill in creating planning documents - S0771

Skill in creating planning documents

The tag is: *misp-galaxy:nice-framework-skills="Skill in creating planning documents - S0771"*

Skill in maintaining planning documents - S0772

Skill in maintaining planning documents

The tag is: *misp-galaxy:nice-framework-skills="Skill in maintaining planning documents - S0772"*

Skill in tracking services - S0773

Skill in tracking services

The tag is: *misp-galaxy:nice-framework-skills="Skill in tracking services - S0773"*

Skill in monitoring threat effects to partner capabilities - S0787

Skill in monitoring threat effects to partner capabilities

The tag is: *misp-galaxy:nice-framework-skills="Skill in monitoring threat effects to partner capabilities - S0787"*

Skill in managing intelligence collection requirements - S0811

Skill in managing intelligence collection requirements

The tag is: *misp-galaxy:nice-framework-skills="Skill in managing intelligence collection requirements - S0811"*

Skill in transcribing target language communications - S0283

Skill in transcribing target language communications

The tag is: *misp-galaxy:nice-framework-skills="Skill in transcribing target language communications - S0283"*

Skill in implementing network security - S0524

Skill in implementing network security

The tag is: *misp-galaxy:nice-framework-skills="Skill in implementing network security - S0524"*

Skill in developing target communication profiles - S0533

Skill in developing target communication profiles

The tag is: *misp-galaxy:nice-framework-skills="Skill in developing target communication profiles - S0533"*

Skill in developing transcripts - S0539

Skill in developing transcripts

The tag is: *misp-galaxy:nice-framework-skills="Skill in developing transcripts - S0539"*

Skill in performing language processing tool analysis - S0689

Skill in performing language processing tool analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing language processing tool analysis - S0689"*

Skill in developing target assessments - S0692

Skill in developing target assessments

The tag is: *misp-galaxy:nice-framework-skills="Skill in developing target assessments - S0692"*

Skill in performing Open Source Intelligence (OSINT) research - S0695

Skill in performing Open Source Intelligence (OSINT) research

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing Open Source Intelligence (OSINT) research - S0695"*

Skill in identifying target network characteristics - S0717

Skill in identifying target network characteristics

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying target network characteristics - S0717"*

Skill in identifying regional languages and dialects - S0720

Skill in identifying regional languages and dialects

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying regional languages and dialects - S0720"*

Skill in translating languages - S0747

Skill in translating languages

The tag is: *misp-galaxy:nice-framework-skills="Skill in translating languages - S0747"*

Skill in mapping networks - S0845

Skill in mapping networks

The tag is: *misp-galaxy:nice-framework-skills="Skill in mapping networks - S0845"*

Skill in performing cultural analysis - S0851

Skill in performing cultural analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing cultural analysis - S0851"*

Skill in performing language analysis - S0865

Skill in performing language analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing language analysis - S0865"*

Skill in performing social network analysis - S0881

Skill in performing social network analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing social network analysis - S0881"*

Skill in developing assessments - S0393

Skill in developing assessments

The tag is: *misp-galaxy:nice-framework-skills="Skill in developing assessments - S0393"*

Skill in developing security assessments - S0394

Skill in developing security assessments

The tag is: *misp-galaxy:nice-framework-skills="Skill in developing security assessments - S0394"*

Skill in forecasting requirements - S0396

Skill in forecasting requirements

The tag is: *misp-galaxy:nice-framework-skills="Skill in forecasting requirements - S0396"*

Skill in assessing requirements - S0397

Skill in assessing requirements

The tag is: *misp-galaxy:nice-framework-skills="Skill in assessing requirements - S0397"*

Skill in analyzing organizational objectives - S0398

Skill in analyzing organizational objectives

The tag is: *misp-galaxy:nice-framework-skills="Skill in analyzing organizational objectives - S0398"*

Skill in creating career path definitions - S0410

Skill in creating career path definitions

The tag is: *misp-galaxy:nice-framework-skills="Skill in creating career path definitions - S0410"*

Skill in developing career paths - S0411

Skill in developing career paths

The tag is: *misp-galaxy:nice-framework-skills="Skill in developing career paths - S0411"*

Skill in evaluating workforce trends - S0422

Skill in evaluating workforce trends

The tag is: *misp-galaxy:nice-framework-skills="Skill in evaluating workforce trends - S0422"*

Skill in managing a workforce - S0647

Skill in managing a workforce

The tag is: *misp-galaxy:nice-framework-skills="Skill in managing a workforce - S0647"*

Skill in developing policy plans - S0406

Skill in developing policy plans

The tag is: *misp-galaxy:nice-framework-skills="Skill in developing policy plans - S0406"*

Skill in identifying possible security violations - S0841

Skill in identifying possible security violations

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying possible security violations - S0841"*

Skill in performing cost/benefit analysis - S0850

Skill in performing cost/benefit analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing cost/benefit analysis - S0850"*

Skill in performing economic analysis - S0858

Skill in performing economic analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing economic analysis - S0858"*

Skill in providing customer support - S0478

Skill in providing customer support

The tag is: *misp-galaxy:nice-framework-skills="Skill in providing customer support - S0478"*

Skill in repairing hardware - S0594

Skill in repairing hardware

The tag is: *misp-galaxy:nice-framework-skills="Skill in repairing hardware - S0594"*

Skill in repairing system peripherals - S0595

Skill in repairing system peripherals

The tag is: *misp-galaxy:nice-framework-skills="Skill in repairing system peripherals - S0595"*

Skill in troubleshooting client-level problems - S0661

Skill in troubleshooting client-level problems

The tag is: *misp-galaxy:nice-framework-skills="Skill in troubleshooting client-level problems - S0661"*

Skill in configuring network workstations and peripherals - S0679

Skill in configuring network workstations and peripherals

The tag is: *misp-galaxy:nice-framework-skills="Skill in configuring network workstations and peripherals - S0679"*

Skill in validating network workstations and peripherals - S0680

Skill in validating network workstations and peripherals

The tag is: *misp-galaxy:nice-framework-skills="Skill in validating network workstations and peripherals - S0680"*

Skill in performing cyber defense trend analysis - S0852

Skill in performing cyber defense trend analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing cyber defense trend analysis - S0852"*

Skill in evaluating supplier trustworthiness - S0479

Skill in evaluating supplier trustworthiness

The tag is: *misp-galaxy:nice-framework-skills="Skill in evaluating supplier trustworthiness - S0479"*

Skill in evaluating product trustworthiness - S0480

Skill in evaluating product trustworthiness

The tag is: *misp-galaxy:nice-framework-skills="Skill in evaluating product trustworthiness - S0480"*

Skill in developing user credential management systems - S0484

Skill in developing user credential management systems

The tag is: *misp-galaxy:nice-framework-skills="Skill in developing user credential management systems - S0484"*

Skill in implementing user credential management systems - S0485

Skill in implementing user credential management systems

The tag is: *misp-galaxy:nice-framework-skills="Skill in implementing user credential management systems - S0485"*

Skill in implementing enterprise key escrow systems - S0486

Skill in implementing enterprise key escrow systems

The tag is: *misp-galaxy:nice-framework-skills="Skill in implementing enterprise key escrow systems - S0486"*

Skill in establishing a routing schema - S0035

Skill in establishing a routing schema

The tag is: *misp-galaxy:nice-framework-skills="Skill in establishing a routing schema - S0035"*

Skill in operating network equipment - S0421

Skill in operating network equipment

The tag is: *misp-galaxy:nice-framework-skills="Skill in operating network equipment - S0421"*

Skill in executing command line tools - S0424

Skill in executing command line tools

The tag is: *misp-galaxy:nice-framework-skills="Skill in executing command line tools - S0424"*

Skill in operating network systems - S0425

Skill in operating network systems

The tag is: *misp-galaxy:nice-framework-skills="Skill in operating network systems - S0425"*

Skill in deploying continuous monitoring technologies - S0451

Skill in deploying continuous monitoring technologies

The tag is: *misp-galaxy:nice-framework-skills="Skill in deploying continuous monitoring technologies - S0451"*

Skill in troubleshooting system performance - S0582

Skill in troubleshooting system performance

The tag is: *misp-galaxy:nice-framework-skills="Skill in troubleshooting system performance - S0582"*

Skill in implementing established network security practices - S0583

Skill in implementing established network security practices

The tag is: *misp-galaxy:nice-framework-skills="Skill in implementing established network security practices - S0583"*

Skill in configuring network protection components - S0618

Skill in configuring network protection components

The tag is: *misp-galaxy:nice-framework-skills="Skill in configuring network protection components - S0618"*

Skill in applying subnet techniques - S0682

Skill in applying subnet techniques

The tag is: *misp-galaxy:nice-framework-skills="Skill in applying subnet techniques - S0682"*

Skill in troubleshooting network equipment - S0815

Skill in troubleshooting network equipment

The tag is: *misp-galaxy:nice-framework-skills="Skill in troubleshooting network equipment - S0815"*

Skill in identify intelligence gaps - S0335

Skill in identify intelligence gaps

The tag is: *misp-galaxy:nice-framework-skills="Skill in identify intelligence gaps - S0335"*

Skill in determining asset availability, capabilities, and limitations - S0495

Skill in determining asset availability, capabilities, and limitations

The tag is: *misp-galaxy:nice-framework-skills="Skill in determining asset availability, capabilities, and limitations - S0495"*

Skill in assessing intelligence collection tasking - S0496

Skill in assessing intelligence collection tasking

The tag is: *misp-galaxy:nice-framework-skills="Skill in assessing intelligence collection tasking - S0496"*

Skill in creating intelligence collection strategies - S0500

Skill in creating intelligence collection strategies

The tag is: *misp-galaxy:nice-framework-skills="Skill in creating intelligence collection strategies - S0500"*

Skill in evaluating intelligence collection products - S0502

Skill in evaluating intelligence collection products

The tag is: *misp-galaxy:nice-framework-skills="Skill in evaluating intelligence collection products - S0502"*

Skill in assessing threat actors - S0518

Skill in assessing threat actors

The tag is: *misp-galaxy:nice-framework-skills="Skill in assessing threat actors - S0518"*

Skill in determining intelligence collection asset posture and availability - S0520

Skill in determining intelligence collection asset posture and availability

The tag is: *misp-galaxy:nice-framework-skills="Skill in determining intelligence collection asset posture and availability - S0520"*

Skill in managing operations - S0525

Skill in managing operations

The tag is: *misp-galaxy:nice-framework-skills="Skill in managing operations - S0525"*

Skill in identifying priority information - S0528

Skill in identifying priority information

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying priority information - S0528"*

Skill in identifying production exploitation needs - S0529

Skill in identifying production exploitation needs

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying production exploitation needs - S0529"*

Skill in managing sensors - S0538

Skill in managing sensors

The tag is: *misp-galaxy:nice-framework-skills="Skill in managing sensors - S0538"*

Skill in prioritizing information - S0721

Skill in prioritizing information

The tag is: *misp-galaxy:nice-framework-skills="Skill in prioritizing information - S0721"*

Skill in navigating databases - S0760

Skill in navigating databases

The tag is: *misp-galaxy:nice-framework-skills="Skill in navigating databases - S0760"*

Skill in comparing indicators with requirements - S0764

Skill in comparing indicators with requirements

The tag is: *misp-galaxy:nice-framework-skills="Skill in comparing indicators with requirements - S0764"*

Skill in evaluating feasibility of intelligence collection sources - S0774

Skill in evaluating feasibility of intelligence collection sources

The tag is: *misp-galaxy:nice-framework-skills="Skill in evaluating feasibility of intelligence collection sources - S0774"*

Skill in developing intelligence collection plans - S0775

Skill in developing intelligence collection plans

The tag is: *misp-galaxy:nice-framework-skills="Skill in developing intelligence collection plans - S0775"*

Skill in evaluating collection capabilities - S0781

Skill in evaluating collection capabilities

The tag is: *misp-galaxy:nice-framework-skills="Skill in evaluating collection capabilities - S0781"*

Skill in interpreting readiness reporting - S0786

Skill in interpreting readiness reporting

The tag is: *misp-galaxy:nice-framework-skills="Skill in interpreting readiness reporting - S0786"*

Skill in analyzing performance specifications - S0793

Skill in analyzing performance specifications

The tag is: *misp-galaxy:nice-framework-skills="Skill in analyzing performance specifications - S0793"*

Skill in navigating the dark web - S0469

Skill in navigating the dark web

The tag is: *misp-galaxy:nice-framework-skills="Skill in navigating the dark web - S0469"*

Skill in using the TOR network - S0470

Skill in using the TOR network

The tag is: *misp-galaxy:nice-framework-skills="Skill in using the TOR network - S0470"*

Skill in examining digital media - S0471

Skill in examining digital media

The tag is: *misp-galaxy:nice-framework-skills="Skill in examining digital media - S0471"*

Skill in evaluating the trustworthiness of a supply chain - S0620

Skill in evaluating the trustworthiness of a supply chain

The tag is: *misp-galaxy:nice-framework-skills="Skill in evaluating the trustworthiness of a supply chain - S0620"*

Skill in developing data dictionaries - S0028

Skill in developing data dictionaries

The tag is: *misp-galaxy:nice-framework-skills="Skill in developing data dictionaries - S0028"*

Skill in developing data models - S0029

Skill in developing data models

The tag is: *misp-galaxy:nice-framework-skills="Skill in developing data models - S0029"*

Skill in identifying hidden patterns or relationships - S0109

Skill in identifying hidden patterns or relationships

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying hidden patterns or relationships -*

S0109"

Skill in performing sensitivity analysis - S0114

Skill in performing sensitivity analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing sensitivity analysis - S0114"*

Skill in developing machine understandable semantic ontologies - S0118

Skill in developing machine understandable semantic ontologies

The tag is: *misp-galaxy:nice-framework-skills="Skill in developing machine understandable semantic ontologies - S0118"*

Skill in creating complex data structures - S0399

Skill in creating complex data structures

The tag is: *misp-galaxy:nice-framework-skills="Skill in creating complex data structures - S0399"*

Skill in creating programming languages - S0400

Skill in creating programming languages

The tag is: *misp-galaxy:nice-framework-skills="Skill in creating programming languages - S0400"*

Skill in identifying common encoding techniques - S0626

Skill in identifying common encoding techniques

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying common encoding techniques - S0626"*

Skill in performing data preprocessing - S0631

Skill in performing data preprocessing

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing data preprocessing - S0631"*

Skill in performing format conversions - S0636

Skill in performing format conversions

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing format conversions - S0636"*

Skill in performing regression analysis - S0640

Skill in performing regression analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing regression analysis - S0640"*

Skill in performing transformation analytics - S0644

Skill in performing transformation analytics

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing transformation analytics - S0644"*

Skill in applying descriptive statistics - S0646

Skill in applying descriptive statistics

The tag is: *misp-galaxy:nice-framework-skills="Skill in applying descriptive statistics - S0646"*

Skill in detecting anomalies - S0648

Skill in detecting anomalies

The tag is: *misp-galaxy:nice-framework-skills="Skill in detecting anomalies - S0648"*

Skill in removing outliers - S0649

Skill in removing outliers

The tag is: *misp-galaxy:nice-framework-skills="Skill in removing outliers - S0649"*

Skill in assessing an organization’s data assets - S0808

Skill in assessing an organization’s data assets

The tag is: *misp-galaxy:nice-framework-skills="Skill in assessing an organization’s data assets - S0808"*

Skill in caching data - S0819

Skill in caching data

The tag is: *misp-galaxy:nice-framework-skills="Skill in caching data - S0819"*

Skill in cataloging data - S0820

Skill in cataloging data

The tag is: *misp-galaxy:nice-framework-skills="Skill in cataloging data - S0820"*

Skill in compiling data - S0828

Skill in compiling data

The tag is: *misp-galaxy:nice-framework-skills="Skill in compiling data - S0828"*

Skill in distributing data - S0835

Skill in distributing data

The tag is: *misp-galaxy:nice-framework-skills="Skill in distributing data - S0835"*

Skill in performing quantitative analysis - S0877

Skill in performing quantitative analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing quantitative analysis - S0877"*

Skill in retrieving data - S0897

Skill in retrieving data

The tag is: *misp-galaxy:nice-framework-skills="Skill in retrieving data - S0897"*

Skill in developing standard operating procedures (SOPs) - S0407

Skill in developing standard operating procedures (SOPs)

The tag is: *misp-galaxy:nice-framework-skills="Skill in developing standard operating procedures (SOPs) - S0407"*

Skill in maintaining standard operating procedures (SOPs) - S0408

Skill in maintaining standard operating procedures (SOPs)

The tag is: *misp-galaxy:nice-framework-skills="Skill in maintaining standard operating procedures (SOPs) - S0408"*

Skill in creating automated security control systems - S0448

Skill in creating automated security control systems

The tag is: *misp-galaxy:nice-framework-skills="Skill in creating automated security control systems - S0448"*

Skill in maintaining automated security control systems - S0449

Skill in maintaining automated security control systems

The tag is: *misp-galaxy:nice-framework-skills="Skill in maintaining automated security control systems - S0449"*

Skill in operating IT systems - S0487

Skill in operating IT systems

The tag is: *misp-galaxy:nice-framework-skills="Skill in operating IT systems - S0487"*

Skill in maintaining IT systems - S0488

Skill in maintaining IT systems

The tag is: *misp-galaxy:nice-framework-skills="Skill in maintaining IT systems - S0488"*

Skill in configuring software - S0561

Skill in configuring software

The tag is: *misp-galaxy:nice-framework-skills="Skill in configuring software - S0561"*

Skill in troubleshooting computer networks - S0577

Skill in troubleshooting computer networks

The tag is: *misp-galaxy:nice-framework-skills="Skill in troubleshooting computer networks - S0577"*

Skill in maintaining directory services - S0587

Skill in maintaining directory services

The tag is: *misp-galaxy:nice-framework-skills="Skill in maintaining directory services - S0587"*

Skill in managing servers - S0662

Skill in managing servers

The tag is: *misp-galaxy:nice-framework-skills="Skill in managing servers - S0662"*

Skill in managing workstations - S0663

Skill in managing workstations

The tag is: *misp-galaxy:nice-framework-skills="Skill in managing workstations - S0663"*

Skill in troubleshooting failed system components - S0672

Skill in troubleshooting failed system components

The tag is: *misp-galaxy:nice-framework-skills="Skill in troubleshooting failed system components - S0672"*

Skill in recovering failed systems - S0677

Skill in recovering failed systems

The tag is: *misp-galaxy:nice-framework-skills="Skill in recovering failed systems - S0677"*

Skill in managing account access rights - S0844

Skill in managing account access rights

The tag is: *misp-galaxy:nice-framework-skills="Skill in managing account access rights - S0844"*

Skill in conducting information searches - S0011

Skill in conducting information searches

The tag is: *misp-galaxy:nice-framework-skills="Skill in conducting information searches - S0011"*

Skill in conducting research - S0530

Skill in conducting research

The tag is: *misp-galaxy:nice-framework-skills="Skill in conducting research - S0530"*

Skill in creating knowledge maps - S0557

Skill in creating knowledge maps

The tag is: *misp-galaxy:nice-framework-skills="Skill in creating knowledge maps - S0557"*

Skill in optimizing database performance - S0045

Skill in optimizing database performance

The tag is: *misp-galaxy:nice-framework-skills="Skill in optimizing database performance - S0045"*

Skill in designing data storage solutions - S0545

Skill in designing data storage solutions

The tag is: *misp-galaxy:nice-framework-skills="Skill in designing data storage solutions - S0545"*

Skill in implementing data storage solutions - S0546

Skill in implementing data storage solutions

The tag is: *misp-galaxy:nice-framework-skills="Skill in implementing data storage solutions - S0546"*

Skill in securing network communications - S0077

Skill in securing network communications

The tag is: *misp-galaxy:nice-framework-skills="Skill in securing network communications - S0077"*

Skill in performing damage assessments - S0080

Skill in performing damage assessments

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing damage assessments - S0080"*

Skill in identifying malware - S0547

Skill in identifying malware

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying malware - S0547"*

Skill in capturing malware - S0548

Skill in capturing malware

The tag is: *misp-galaxy:nice-framework-skills="Skill in capturing malware - S0548"*

Skill in containing malware - S0549

Skill in containing malware

The tag is: *misp-galaxy:nice-framework-skills="Skill in containing malware - S0549"*

Skill in reporting malware - S0550

Skill in reporting malware

The tag is: *misp-galaxy:nice-framework-skills="Skill in reporting malware - S0550"*

Skill in protecting a network against malware - S0615

Skill in protecting a network against malware

The tag is: *misp-galaxy:nice-framework-skills="Skill in protecting a network against malware - S0615"*

Skill in designing incident responses - S0805

Skill in designing incident responses

The tag is: *misp-galaxy:nice-framework-skills="Skill in designing incident responses - S0805"*

Skill in performing incident responses - S0806

Skill in performing incident responses

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing incident responses - S0806"*

Skill in performing threat environment analysis - S0492

Skill in performing threat environment analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing threat environment analysis - S0492"*

Skill in performing social engineering - S0591

Skill in performing social engineering

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing social engineering - S0591"*

Skill in reviewing logs - S0641

Skill in reviewing logs

The tag is: *misp-galaxy:nice-framework-skills="Skill in reviewing logs - S0641"*

Skill in identifying evidence of past intrusions - S0642

Skill in identifying evidence of past intrusions

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying evidence of past intrusions - S0642"*

Skill in assessing application vulnerabilities - S0656

Skill in assessing application vulnerabilities

The tag is: *misp-galaxy:nice-framework-skills="Skill in assessing application vulnerabilities - S0656"*

Skill in assessing an organization’s threat environment - S0804

Skill in assessing an organization’s threat environment

The tag is: *misp-galaxy:nice-framework-skills="Skill in assessing an organization’s threat environment - S0804"*

Skill in applying host access controls - S0552

Skill in applying host access controls

The tag is: *misp-galaxy:nice-framework-skills="Skill in applying host access controls - S0552"*

Skill in applying network access controls - S0553

Skill in applying network access controls

The tag is: *misp-galaxy:nice-framework-skills="Skill in applying network access controls - S0553"*

Skill in tuning network sensors - S0592

Skill in tuning network sensors

The tag is: *misp-galaxy:nice-framework-skills="Skill in tuning network sensors - S0592"*

Skill in applying hardening techniques - S0643

Skill in applying hardening techniques

The tag is: *misp-galaxy:nice-framework-skills="Skill in applying hardening techniques - S0643"*

Skill in troubleshooting cyber defense infrastructure anomalies - S0645

Skill in troubleshooting cyber defense infrastructure anomalies

The tag is: *misp-galaxy:nice-framework-skills="Skill in troubleshooting cyber defense infrastructure anomalies - S0645"*

Skill in configuring hardware - S0831

Skill in configuring hardware

The tag is: *misp-galaxy:nice-framework-skills="Skill in configuring hardware - S0831"*

Skill in testing hardware - S0898

Skill in testing hardware

The tag is: *misp-galaxy:nice-framework-skills="Skill in testing hardware - S0898"*

Skill in identifying anomalous activity - S0477

Skill in identifying anomalous activity

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying anomalous activity - S0477"*

Skill in performing threat modeling - S0588

Skill in performing threat modeling

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing threat modeling - S0588"*

Skill in performing behavioral analysis - S0848

Skill in performing behavioral analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing behavioral analysis - S0848"*

Skill in performing threat analysis - S0890

Skill in performing threat analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing threat analysis - S0890"*

Skill in recognizing behavioral patterns - S0896

Skill in recognizing behavioral patterns

The tag is: *misp-galaxy:nice-framework-skills="Skill in recognizing behavioral patterns - S0896"*

Skill in analyzing information from multiple sources - S0900

Skill in analyzing information from multiple sources

The tag is: *misp-galaxy:nice-framework-skills="Skill in analyzing information from multiple sources - S0900"*

Skill in building relationships remotely and in person - S0902

Skill in building relationships remotely and in person

The tag is: *misp-galaxy:nice-framework-skills="Skill in building relationships remotely and in person - S0902"*

Skill in correlating data from multiple tools - S0904

Skill in correlating data from multiple tools

The tag is: *misp-galaxy:nice-framework-skills="Skill in correlating data from multiple tools - S0904"*

Skill in determining what information may helpful to a specific audience - S0905

Skill in determining what information may helpful to a specific audience

The tag is: *misp-galaxy:nice-framework-skills="Skill in determining what information may helpful to a specific audience - S0905"*

Skill in identifying insider risk security gaps - S0906

Skill in identifying insider risk security gaps

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying insider risk security gaps - S0906"*

Skill in identifying insider threats - S0907

Skill in identifying insider threats

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying insider threats - S0907"*

Skill in determining the importance of assets - S0908

Skill in determining the importance of assets

The tag is: *misp-galaxy:nice-framework-skills="Skill in determining the importance of assets - S0908"*

Skill in integrating information from multiple sources - S0909

Skill in integrating information from multiple sources

The tag is: *misp-galaxy:nice-framework-skills="Skill in integrating information from multiple sources - S0909"*

Skill in performing cyberintelligence data analysis - S0910

Skill in performing cyberintelligence data analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing cyberintelligence data analysis - S0910"*

Skill in performing data queries - S0911

Skill in performing data queries

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing data queries - S0911"*

Skill in performing human behavioral analysis - S0912

Skill in performing human behavioral analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing human behavioral analysis - S0912"*

Skill in performing link analysis - S0913

Skill in performing link analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing link analysis - S0913"*

Skill in recognizing recurring threat incidents - S0916

Skill in recognizing recurring threat incidents

The tag is: *misp-galaxy:nice-framework-skills="Skill in recognizing recurring threat incidents - S0916"*

Skill in finding system files - S0474

Skill in finding system files

The tag is: *misp-galaxy:nice-framework-skills="Skill in finding system files - S0474"*

Skill in identifying filename extension abuse - S0476

Skill in identifying filename extension abuse

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying filename extension abuse - S0476"*

Skill in developing network infrastructure contingency and recovery plans - S0575

Skill in developing network infrastructure contingency and recovery plans

The tag is: *misp-galaxy:nice-framework-skills="Skill in developing network infrastructure contingency and recovery plans - S0575"*

Skill in testing network infrastructure contingency and recovery plans - S0576

Skill in testing network infrastructure contingency and recovery plans

The tag is: *misp-galaxy:nice-framework-skills="Skill in testing network infrastructure contingency and recovery plans - S0576"*

Skill in preserving digital evidence integrity - S0589

Skill in preserving digital evidence integrity

The tag is: *misp-galaxy:nice-framework-skills="Skill in preserving digital evidence integrity - S0589"*

Skill in identifying forensics data in diverse media - S0603

Skill in identifying forensics data in diverse media

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying forensics data in diverse media - S0603"*

Skill in extracting forensics data in diverse media - S0604

Skill in extracting forensics data in diverse media

The tag is: *misp-galaxy:nice-framework-skills="Skill in extracting forensics data in diverse media - S0604"*

Skill in storing digital evidence - S0605

Skill in storing digital evidence

The tag is: *misp-galaxy:nice-framework-skills="Skill in storing digital evidence - S0605"*

Skill in manipulating operating system components - S0606

Skill in manipulating operating system components

The tag is: *misp-galaxy:nice-framework-skills="Skill in manipulating operating system components - S0606"*

Skill in collecting digital evidence - S0607

Skill in collecting digital evidence

The tag is: *misp-galaxy:nice-framework-skills="Skill in collecting digital evidence - S0607"*

Skill in processing digital evidence - S0608

Skill in processing digital evidence

The tag is: *misp-galaxy:nice-framework-skills="Skill in processing digital evidence - S0608"*

Skill in transporting digital evidence - S0609

Skill in transporting digital evidence

The tag is: *misp-galaxy:nice-framework-skills="Skill in transporting digital evidence - S0609"*

Skill in disassembling Personal Computers (PCs) - S0611

Skill in disassembling Personal Computers (PCs)

The tag is: *misp-galaxy:nice-framework-skills="Skill in disassembling Personal Computers (PCs) - S0611"*

Skill in performing digital forensics analysis - S0612

Skill in performing digital forensics analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing digital forensics analysis - S0612"*

Skill in performing binary analysis - S0621

Skill in performing binary analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing binary analysis - S0621"*

Skill in implementing one-way hash functions - S0622

Skill in implementing one-way hash functions

The tag is: *misp-galaxy:nice-framework-skills="Skill in implementing one-way hash functions - S0622"*

Skill in performing source code analysis - S0623

Skill in performing source code analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing source code analysis - S0623"*

Skill in performing volatile data analysis - S0624

Skill in performing volatile data analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing volatile data analysis - S0624"*

Skill in interpreting debugger results - S0625

Skill in interpreting debugger results

The tag is: *misp-galaxy:nice-framework-skills="Skill in interpreting debugger results - S0625"*

Skill in performing bit-level analysis - S0652

Skill in performing bit-level analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing bit-level analysis - S0652"*

Skill in creating digital evidence copies - S0653

Skill in creating digital evidence copies

The tag is: *misp-galaxy:nice-framework-skills="Skill in creating digital evidence copies - S0653"*

Skill in implementing network infrastructure contingency and recovery plans - S0671

Skill in implementing network infrastructure contingency and recovery plans

The tag is: *misp-galaxy:nice-framework-skills="Skill in implementing network infrastructure contingency and recovery plans - S0671"*

Skill in administering operating systems - S0678

Skill in administering operating systems

The tag is: *misp-galaxy:nice-framework-skills="Skill in administering operating systems - S0678"*

Skill in collaborating with internal and external stakeholders - S0821

Skill in collaborating with internal and external stakeholders

The tag is: *misp-galaxy:nice-framework-skills="Skill in collaborating with internal and external stakeholders - S0821"*

Skill in developing technical reports - S0834

Skill in developing technical reports

The tag is: *misp-galaxy:nice-framework-skills="Skill in developing technical reports - S0834"*

Skill in performing digital evidence analysis - S0856

Skill in performing digital evidence analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing digital evidence analysis - S0856"*

Skill in performing file system forensic analysis - S0860

Skill in performing file system forensic analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing file system forensic analysis - S0860"*

Skill in performing static analysis - S0882

Skill in performing static analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing static analysis - S0882"*

Skill in performing static malware analysis - S0884

Skill in performing static malware analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing static malware analysis - S0884"*

Skill in recreating network topologies - S0490

Skill in recreating network topologies

The tag is: *misp-galaxy:nice-framework-skills="Skill in recreating network topologies - S0490"*

Skill in detecting host- and network-based intrusions - S0572

Skill in detecting host- and network-based intrusions

The tag is: *misp-galaxy:nice-framework-skills="Skill in detecting host- and network-based intrusions - S0572"*

Skill in handling incidents - S0593

Skill in handling incidents

The tag is: *misp-galaxy:nice-framework-skills="Skill in handling incidents - S0593"*

Skill in categorizing types of vulnerabilities - S0614

Skill in categorizing types of vulnerabilities

The tag is: *misp-galaxy:nice-framework-skills="Skill in categorizing types of vulnerabilities - S0614"*

Skill in reading signatures - S0627

Skill in reading signatures

The tag is: *misp-galaxy:nice-framework-skills="Skill in reading signatures - S0627"*

Skill in performing malware analysis - S0651

Skill in performing malware analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing malware analysis - S0651"*

Skill in assessing security controls - S0667

Skill in assessing security controls

The tag is: *misp-galaxy:nice-framework-skills="Skill in assessing security controls - S0667"*

Skill in interpreting traceroute results - S0722

Skill in interpreting traceroute results

The tag is: *misp-galaxy:nice-framework-skills="Skill in interpreting traceroute results - S0722"*

Skill in utilizing cyber defense service provider information - S0809

Skill in utilizing cyber defense service provider information

The tag is: *misp-galaxy:nice-framework-skills="Skill in utilizing cyber defense service provider information - S0809"*

Skill in identifying anomalous activities - S0838

Skill in identifying anomalous activities

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying anomalous activities - S0838"*

Skill in identifying exploited system weaknesses - S0839

Skill in identifying exploited system weaknesses

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying exploited system weaknesses - S0839"*

Skill in identifying misuse activities - S0840

Skill in identifying misuse activities

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying misuse activities - S0840"*

Skill in monitoring system activity - S0846

Skill in monitoring system activity

The tag is: *misp-galaxy:nice-framework-skills="Skill in monitoring system activity - S0846"*

Skill in performing dynamic analysis - S0857

Skill in performing dynamic analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing dynamic analysis - S0857"*

Skill in performing event correlation - S0859

Skill in performing event correlation

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing event correlation - S0859"*

Skill in performing incident analysis - S0863

Skill in performing incident analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing incident analysis - S0863"*

Skill in performing malicious activity analysis - S0867

Skill in performing malicious activity analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing malicious activity analysis - S0867"*

Skill in performing network data flow analysis - S0872

Skill in performing network data flow analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing network data flow analysis - S0872"*

Skill in performing network trafffic analysis - S0873

Skill in performing network trafffic analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing network trafffic analysis - S0873"*

Skill in performing network traffic packet analysis - S0875

Skill in performing network traffic packet analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing network traffic packet analysis - S0875"*

Skill in performing system activity analysis - S0885

Skill in performing system activity analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing system activity analysis - S0885"*

Skill in performing trend analysis - S0892

Skill in performing trend analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing trend analysis - S0892"*

Skill in performing network analysis on targets - S0177

Skill in performing network analysis on targets

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing network analysis on targets - S0177"*

Skill in integrating information - S0521

Skill in integrating information

The tag is: *misp-galaxy:nice-framework-skills="Skill in integrating information - S0521"*

Skill in summarizing information - S0522

Skill in summarizing information

The tag is: *misp-galaxy:nice-framework-skills="Skill in summarizing information - S0522"*

Skill in applying target templates - S0536

Skill in applying target templates

The tag is: *misp-galaxy:nice-framework-skills="Skill in applying target templates - S0536"*

Skill in performing network data analysis - S0688

Skill in performing network data analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing network data analysis - S0688"*

Skill in analyzing social networks - S0697

Skill in analyzing social networks

The tag is: *misp-galaxy:nice-framework-skills="Skill in analyzing social networks - S0697"*

Skill in identifying target communications networks - S0716

Skill in identifying target communications networks

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying target communications networks - S0716"*

Skill in performing data normalization - S0726

Skill in performing data normalization

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing data normalization - S0726"*

Skill in identifying technical information - S0734

Skill in identifying technical information

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying technical information - S0734"*

Skill in reconstructing target networks - S0753

Skill in reconstructing target networks

The tag is: *misp-galaxy:nice-framework-skills="Skill in reconstructing target networks - S0753"*

Skill in performing network analysis - S0871

Skill in performing network analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing network analysis - S0871"*

Skill in performing target communications analysis - S0888

Skill in performing target communications analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing target communications analysis - S0888"*

Skill in developing information requirements - S0375

Skill in developing information requirements

The tag is: *misp-galaxy:nice-framework-skills="Skill in developing information requirements - S0375"*

Skill in developing target lists - S0534

Skill in developing target lists

The tag is: *misp-galaxy:nice-framework-skills="Skill in developing target lists - S0534"*

Skill in conducting deep web research - S0696

Skill in conducting deep web research

The tag is: *misp-galaxy:nice-framework-skills="Skill in conducting deep web research - S0696"*

Skill in performing fusion analysis - S0714

Skill in performing fusion analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing fusion analysis - S0714"*

Skill in creating target materials - S0740

Skill in creating target materials

The tag is: *misp-galaxy:nice-framework-skills="Skill in creating target materials - S0740"*

Skill in applying geospatial resources - S0750

Skill in applying geospatial resources

The tag is: *misp-galaxy:nice-framework-skills="Skill in applying geospatial resources - S0750"*

Skill in fulfilling information requests - S0780

Skill in fulfilling information requests

The tag is: *misp-galaxy:nice-framework-skills="Skill in fulfilling information requests - S0780"*

Skill in assessing partner intelligence processes - S0802

Skill in assessing partner intelligence processes

The tag is: *misp-galaxy:nice-framework-skills="Skill in assessing partner intelligence processes - S0802"*

Skill in performing log file analysis - S0866

Skill in performing log file analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing log file analysis - S0866"*

Skill in interfacing with customers - S0111

Skill in interfacing with customers

The tag is: *misp-galaxy:nice-framework-skills="Skill in interfacing with customers - S0111"*

Skill in conducting non-attributable research - S0194

Skill in conducting non-attributable research

The tag is: *misp-galaxy:nice-framework-skills="Skill in conducting non-attributable research - S0194"*

Skill in mitigating cognitive biases - S0443

Skill in mitigating cognitive biases

The tag is: *misp-galaxy:nice-framework-skills="Skill in mitigating cognitive biases - S0443"*

Skill in mitigating deception in reporting and analysis - S0444

Skill in mitigating deception in reporting and analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in mitigating deception in reporting and analysis - S0444"*

Skill in mimicking threat actors - S0446

Skill in mimicking threat actors

The tag is: *misp-galaxy:nice-framework-skills="Skill in mimicking threat actors - S0446"*

Skill in performing operational environment analysis - S0494

Skill in performing operational environment analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing operational environment analysis - S0494"*

Skill in establishing priorities - S0511

Skill in establishing priorities

The tag is: *misp-galaxy:nice-framework-skills="Skill in establishing priorities - S0511"*

Skill in preparing operational environments - S0514

Skill in preparing operational environments

The tag is: *misp-galaxy:nice-framework-skills="Skill in preparing operational environments - S0514"*

Skill in performing threat emulation tactics - S0516

Skill in performing threat emulation tactics

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing threat emulation tactics - S0516"*

Skill in anticipating threats - S0517

Skill in anticipating threats

The tag is: *misp-galaxy:nice-framework-skills="Skill in anticipating threats - S0517"*

Skill in performing threat factor analysis - S0535

Skill in performing threat factor analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing threat factor analysis - S0535"*

Skill in developing position qualification requirements - S0633

Skill in developing position qualification requirements

The tag is: *misp-galaxy:nice-framework-skills="Skill in developing position qualification requirements - S0633"*

Skill in assessing effects generated during and after cyber operations - S0693

Skill in assessing effects generated during and after cyber operations

The tag is: *misp-galaxy:nice-framework-skills="Skill in assessing effects generated during and after cyber operations - S0693"*

Skill in defining an operational environment - S0702

Skill in defining an operational environment

The tag is: *misp-galaxy:nice-framework-skills="Skill in defining an operational environment - S0702"*

Skill in identifying cybersecurity threats - S0718

Skill in identifying cybersecurity threats

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying cybersecurity threats - S0718"*

Skill in identifying intelligence gaps - S0719

Skill in identifying intelligence gaps

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying intelligence gaps - S0719"*

Skill in producing after-action reports - S0731

Skill in producing after-action reports

The tag is: *misp-galaxy:nice-framework-skills="Skill in producing after-action reports - S0731"*

Skill in analyzing intelligence products - S0739

Skill in analyzing intelligence products

The tag is: *misp-galaxy:nice-framework-skills="Skill in analyzing intelligence products - S0739"*

Skill in querying data - S0748

Skill in querying data

The tag is: *misp-galaxy:nice-framework-skills="Skill in querying data - S0748"*

Skill in conducting open-source searches - S0751

Skill in conducting open-source searches

The tag is: *misp-galaxy:nice-framework-skills="Skill in conducting open-source searches - S0751"*

Skill in converting intelligence requirements into intelligence production tasks - S0765

Skill in converting intelligence requirements into intelligence production tasks

The tag is: *misp-galaxy:nice-framework-skills="Skill in converting intelligence requirements into intelligence production tasks - S0765"*

Skill in developing collection strategies - S0777

Skill in developing collection strategies

The tag is: *misp-galaxy:nice-framework-skills="Skill in developing collection strategies - S0777"*

Skill in performing all-source intelligence analysis - S0847

Skill in performing all-source intelligence analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing all-source intelligence analysis - S0847"*

Skill in performing nodal analysis - S0876

Skill in performing nodal analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing nodal analysis - S0876"*

Skill in performing packet-level analysis - S0156

Skill in performing packet-level analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing packet-level analysis - S0156"*

Skill in evaluating accesses for intelligence value - S0214

Skill in evaluating accesses for intelligence value

The tag is: *misp-galaxy:nice-framework-skills="Skill in evaluating accesses for intelligence value - S0214"*

Skill in performing target system analysis - S0248

Skill in performing target system analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing target system analysis - S0248"*

Skill in creating analytics - S0433

Skill in creating analytics

The tag is: *misp-galaxy:nice-framework-skills="Skill in creating analytics - S0433"*

Skill in extrapolating from incomplete data sets - S0434

Skill in extrapolating from incomplete data sets

The tag is: *misp-galaxy:nice-framework-skills="Skill in extrapolating from incomplete data sets - S0434"*

Skill in analyzing large data sets - S0435

Skill in analyzing large data sets

The tag is: *misp-galaxy:nice-framework-skills="Skill in analyzing large data sets - S0435"*

Skill in creating target intelligence products - S0436

Skill in creating target intelligence products

The tag is: *misp-galaxy:nice-framework-skills="Skill in creating target intelligence products - S0436"*

Skill in identifying targets of interest - S0437

Skill in identifying targets of interest

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying targets of interest - S0437"*

Skill in identifying target vulnerabilities - S0440

Skill in identifying target vulnerabilities

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying target vulnerabilities - S0440"*

Skill in describing target vulnerabilities - S0441

Skill in describing target vulnerabilities

The tag is: *misp-galaxy:nice-framework-skills="Skill in describing target vulnerabilities - S0441"*

Skill in performing intelligence collection analysis - S0499

Skill in performing intelligence collection analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing intelligence collection analysis - S0499"*

Skill in selecting targets - S0503

Skill in selecting targets

The tag is: *misp-galaxy:nice-framework-skills="Skill in selecting targets - S0503"*

Skill in identifying vulnerabilities - S0504

Skill in identifying vulnerabilities

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying vulnerabilities - S0504"*

Skill in performing intrusion data analysis - S0505

Skill in performing intrusion data analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing intrusion data analysis - S0505"*

Skill in collecting terminal or environment data - S0507

Skill in collecting terminal or environment data

The tag is: *misp-galaxy:nice-framework-skills="Skill in collecting terminal or environment data - S0507"*

Skill in extracting metadata - S0512

Skill in extracting metadata

The tag is: *misp-galaxy:nice-framework-skills="Skill in extracting metadata - S0512"*

Skill in developing signatures - S0566

Skill in developing signatures

The tag is: *misp-galaxy:nice-framework-skills="Skill in developing signatures - S0566"*

Skill in deploying signatures - S0567

Skill in deploying signatures

The tag is: *misp-galaxy:nice-framework-skills="Skill in deploying signatures - S0567"*

Skill in configuring network devices - S0584

Skill in configuring network devices

The tag is: *misp-galaxy:nice-framework-skills="Skill in configuring network devices - S0584"*

Skill in installing network devices - S0585

Skill in installing network devices

The tag is: *misp-galaxy:nice-framework-skills="Skill in installing network devices - S0585"*

Skill in creating intelligence collection requirements - S0698

Skill in creating intelligence collection requirements

The tag is: *misp-galaxy:nice-framework-skills="Skill in creating intelligence collection requirements - S0698"*

Skill in creating plans in support of remote operations - S0699

Skill in creating plans in support of remote operations

The tag is: *misp-galaxy:nice-framework-skills="Skill in creating plans in support of remote operations - S0699"*

Skill in depicting data on a network map - S0703

Skill in depicting data on a network map

The tag is: *misp-galaxy:nice-framework-skills="Skill in depicting data on a network map - S0703"*

Skill in performing network visualization - S0725

Skill in performing network visualization

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing network visualization - S0725"*

Skill in performing data fusion - S0727

Skill in performing data fusion

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing data fusion - S0727"*

Skill in recognizing malicious network activity in traffic - S0732

Skill in recognizing malicious network activity in traffic

The tag is: *misp-galaxy:nice-framework-skills="Skill in recognizing malicious network activity in traffic - S0732"*

Skill in interpreting malicious network activity in traffic - S0733

Skill in interpreting malicious network activity in traffic

The tag is: *misp-galaxy:nice-framework-skills="Skill in interpreting malicious network activity in traffic - S0733"*

Skill in researching software vulnerabilities - S0736

Skill in researching software vulnerabilities

The tag is: *misp-galaxy:nice-framework-skills="Skill in researching software vulnerabilities - S0736"*

Skill in researching software exploits - S0737

Skill in researching software exploits

The tag is: *misp-galaxy:nice-framework-skills="Skill in researching software exploits - S0737"*

Skill in determining relevant information - S0749

Skill in determining relevant information

The tag is: *misp-galaxy:nice-framework-skills="Skill in determining relevant information - S0749"*

Skill in evading network detection - S0752

Skill in evading network detection

The tag is: *misp-galaxy:nice-framework-skills="Skill in evading network detection - S0752"*

Skill in reconstructing a network - S0755

Skill in reconstructing a network

The tag is: *misp-galaxy:nice-framework-skills="Skill in reconstructing a network - S0755"*

Skill in performing geospatial analysis - S0862

Skill in performing geospatial analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing geospatial analysis - S0862"*

Skill in performing intercept related information (IRI) analysis - S0864

Skill in performing intercept related information (IRI) analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing intercept related information (IRI) analysis - S0864"*

Skill in performing metadata analysis - S0869

Skill in performing metadata analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing metadata analysis - S0869"*

Skill in performing network traffic analysis - S0874

Skill in performing network traffic analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing network traffic analysis - S0874"*

Skill in analyzing target communications internals and externals collected from wireless LANs - S0182

Skill in analyzing target communications internals and externals collected from wireless LANs

The tag is: *misp-galaxy:nice-framework-skills="Skill in analyzing target communications internals and externals collected from wireless LANs - S0182"*

Skill in determining the physical location of network devices - S0208

Skill in determining the physical location of network devices

The tag is: *misp-galaxy:nice-framework-skills="Skill in determining the physical location of network devices - S0208"*

Skill in extracting information from packet captures - S0221

Skill in extracting information from packet captures

The tag is: *misp-galaxy:nice-framework-skills="Skill in extracting information from packet captures - S0221"*

Skill in processing collected data for follow-on analysis - S0252

Skill in processing collected data for follow-on analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in processing collected data for follow-on analysis - S0252"*

Skill in decrypting information - S0378

Skill in decrypting information

The tag is: *misp-galaxy:nice-framework-skills="Skill in decrypting information - S0378"*

Skill in collecting network data - S0442

Skill in collecting network data

The tag is: *misp-galaxy:nice-framework-skills="Skill in collecting network data - S0442"*

Skill in developing virtual machines - S0472

Skill in developing virtual machines

The tag is: *misp-galaxy:nice-framework-skills="Skill in developing virtual machines - S0472"*

Skill in maintaining virtual machines - S0473

Skill in maintaining virtual machines

The tag is: *misp-galaxy:nice-framework-skills="Skill in maintaining virtual machines - S0473"*

Skill in processing digital forensic data - S0491

Skill in processing digital forensic data

The tag is: *misp-galaxy:nice-framework-skills="Skill in processing digital forensic data - S0491"*

Skill in identifying customer information needs - S0506

Skill in identifying customer information needs

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying customer information needs - S0506"*

Skill in managing enterprise-wide information - S0508

Skill in managing enterprise-wide information

The tag is: *misp-galaxy:nice-framework-skills="Skill in managing enterprise-wide information - S0508"*

Skill in evaluating security products - S0509

Skill in evaluating security products

The tag is: *misp-galaxy:nice-framework-skills="Skill in evaluating security products - S0509"*

Skill in detecting exploitation activities - S0519

Skill in detecting exploitation activities

The tag is: *misp-galaxy:nice-framework-skills="Skill in detecting exploitation activities - S0519"*

Skill in constructing networks - S0523

Skill in constructing networks

The tag is: *misp-galaxy:nice-framework-skills="Skill in constructing networks - S0523"*

Skill in assessing security hardware and software - S0531

Skill in assessing security hardware and software

The tag is: *misp-galaxy:nice-framework-skills="Skill in assessing security hardware and software - S0531"*

Skill in administering databases - S0586

Skill in administering databases

The tag is: *misp-galaxy:nice-framework-skills="Skill in administering databases - S0586"*

Skill in performing memory dump analysis - S0599

Skill in performing memory dump analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing memory dump analysis - S0599"*

Skill in writing scripts - S0650

Skill in writing scripts

The tag is: *misp-galaxy:nice-framework-skills="Skill in writing scripts - S0650"*

Skill in performing midpoint collection data analysis - S0690

Skill in performing midpoint collection data analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing midpoint collection data analysis - S0690"*

Skill in auditing network devices - S0694

Skill in auditing network devices

The tag is: *misp-galaxy:nice-framework-skills="Skill in auditing network devices - S0694"*

Skill in mining data - S0700

Skill in mining data

The tag is: *misp-galaxy:nice-framework-skills="Skill in mining data - S0700"*

Skill in performing data mining analysis - S0701

Skill in performing data mining analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing data mining analysis - S0701"*

Skill in performing target analysis - S0704

Skill in performing target analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing target analysis - S0704"*

Skill in installing patches - S0705

Skill in installing patches

The tag is: *misp-galaxy:nice-framework-skills="Skill in installing patches - S0705"*

Skill in identifying patch signatures - S0706

Skill in identifying patch signatures

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying patch signatures - S0706"*

Skill in evaluating metadata - S0710

Skill in evaluating metadata

The tag is: *misp-galaxy:nice-framework-skills="Skill in evaluating metadata - S0710"*

Skill in interpreting metadata - S0711

Skill in interpreting metadata

The tag is: *misp-galaxy:nice-framework-skills="Skill in interpreting metadata - S0711"*

Skill in generating operation plans - S0715

Skill in generating operation plans

The tag is: *misp-galaxy:nice-framework-skills="Skill in generating operation plans - S0715"*

Skill in interpreting vulnerability scanner results - S0723

Skill in interpreting vulnerability scanner results

The tag is: *misp-galaxy:nice-framework-skills="Skill in interpreting vulnerability scanner results - S0723"*

Skill in programming - S0735

Skill in programming

The tag is: *misp-galaxy:nice-framework-skills="Skill in programming - S0735"*

Skill in performing reverse engineering of software - S0738

Skill in performing reverse engineering of software

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing reverse engineering of software - S0738"*

Skill in administering servers - S0741

Skill in administering servers

The tag is: *misp-galaxy:nice-framework-skills="Skill in administering servers - S0741"*

Skill in identifying network anomalies - S0743

Skill in identifying network anomalies

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying network anomalies - S0743"*

Skill in testing tools for implementation - S0745

Skill in testing tools for implementation

The tag is: *misp-galaxy:nice-framework-skills="Skill in testing tools for implementation - S0745"*

Skill in evaluating tools for implementation - S0746

Skill in evaluating tools for implementation

The tag is: *misp-galaxy:nice-framework-skills="Skill in evaluating tools for implementation - S0746"*

Skill in establishing persistence - S0754

Skill in establishing persistence

The tag is: *misp-galaxy:nice-framework-skills="Skill in establishing persistence - S0754"*

Skill in verifying the integrity of files - S0757

Skill in verifying the integrity of files

The tag is: *misp-galaxy:nice-framework-skills="Skill in verifying the integrity of files - S0757"*

Skill in performing wireless network analysis - S0758

Skill in performing wireless network analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing wireless network analysis - S0758"*

Skill in evaluating operational environments - S0778

Skill in evaluating operational environments

The tag is: *misp-galaxy:nice-framework-skills="Skill in evaluating operational environments - S0778"*

Skill in determining information requirements - S0779

Skill in determining information requirements

The tag is: *misp-galaxy:nice-framework-skills="Skill in determining information requirements - S0779"*

Skill in performing partner analysis - S0803

Skill in performing partner analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing partner analysis - S0803"*

Skill in executing computer scripts to automate tasks - S0837

Skill in executing computer scripts to automate tasks

The tag is: *misp-galaxy:nice-framework-skills="Skill in executing computer scripts to automate tasks - S0837"*

Skill in performing data analysis - S0854

Skill in performing data analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing data analysis - S0854"*

Skill in applying black-box software testing - S0616

Skill in applying black-box software testing

The tag is: *misp-galaxy:nice-framework-skills="Skill in applying black-box software testing - S0616"*

Skill in interpreting signatures - S0617

Skill in interpreting signatures

The tag is: *misp-galaxy:nice-framework-skills="Skill in interpreting signatures - S0617"*

Skill in conducting customer interviews - S0829

Skill in conducting customer interviews

The tag is: *misp-galaxy:nice-framework-skills="Skill in conducting customer interviews - S0829"*

Skill in integrating multiple technologies - S0420

Skill in integrating multiple technologies

The tag is: *misp-galaxy:nice-framework-skills="Skill in integrating multiple technologies - S0420"*

Skill in building architectures - S0426

Skill in building architectures

The tag is: *misp-galaxy:nice-framework-skills="Skill in building architectures - S0426"*

Skill in building frameworks - S0427

Skill in building frameworks

The tag is: *misp-galaxy:nice-framework-skills="Skill in building frameworks - S0427"*

Skill in writing code in a currently supported programming language - S0597

Skill in writing code in a currently supported programming language

The tag is: *misp-galaxy:nice-framework-skills="Skill in writing code in a currently supported programming language - S0597"*

Skill in identifying gaps in technical capabilities - S0066

Skill in identifying gaps in technical capabilities

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying gaps in technical capabilities - S0066"*

Skill in developing client organization profiles - S0497

Skill in developing client organization profiles

The tag is: *misp-galaxy:nice-framework-skills="Skill in developing client organization profiles - S0497"*

Skill in identifying partner capabilities - S0515

Skill in identifying partner capabilities

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying partner capabilities - S0515"*

Skill in performing systems analysis - S0554

Skill in performing systems analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing systems analysis - S0554"*

Skill in performing capabilities analysis - S0555

Skill in performing capabilities analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing capabilities analysis - S0555"*

Skill in performing requirements analysis - S0556

Skill in performing requirements analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing requirements analysis - S0556"*

Skill in conducting system reviews - S0654

Skill in conducting system reviews

The tag is: *misp-galaxy:nice-framework-skills="Skill in conducting system reviews - S0654"*

Skill in managing client relationships - S0724

Skill in managing client relationships

The tag is: *misp-galaxy:nice-framework-skills="Skill in managing client relationships - S0724"*

Skill in identifying requirements - S0759

Skill in identifying requirements

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying requirements - S0759"*

Skill in assessing partner operations capabilities - S0801

Skill in assessing partner operations capabilities

The tag is: *misp-galaxy:nice-framework-skills="Skill in assessing partner operations capabilities - S0801"*

Skill in conducting feasability studies - S0830

Skill in conducting feasability studies

The tag is: *misp-galaxy:nice-framework-skills="Skill in conducting feasability studies - S0830"*

Skill in performing needs analysis - S0870

Skill in performing needs analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing needs analysis - S0870"*

Skill in performing system analysis - S0886

Skill in performing system analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing system analysis - S0886"*

Skill in performing trade-off analysis - S0891

Skill in performing trade-off analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing trade-off analysis - S0891"*

Skill in recognizing digital forensics data - S0475

Skill in recognizing digital forensics data

The tag is: *misp-galaxy:nice-framework-skills="Skill in recognizing digital forensics data - S0475"*

Skill in identifying forensic digital footprints - S0481

Skill in identifying forensic digital footprints

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying forensic digital footprints - S0481"*

Skill in performing forensic data analysis - S0482

Skill in performing forensic data analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing forensic data analysis - S0482"*

Skill in identifying software communications vulnerabilities - S0483

Skill in identifying software communications vulnerabilities

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying software communications vulnerabilities - S0483"*

Skill in performing systems engineering - S0660

Skill in performing systems engineering

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing systems engineering - S0660"*

Skill in designing technology processes and solutions - S0668

Skill in designing technology processes and solutions

The tag is: *misp-galaxy:nice-framework-skills="Skill in designing technology processes and solutions - S0668"*

Skill in integrating technology processes and solutions - S0669

Skill in integrating technology processes and solutions

The tag is: *misp-galaxy:nice-framework-skills="Skill in integrating technology processes and solutions*

- S0669"

Skill in solving problems - S0807

Skill in solving problems

The tag is: *misp-galaxy:nice-framework-skills="Skill in solving problems - S0807"*

Skill in communicating with internal and external stakeholders - S0827

Skill in communicating with internal and external stakeholders

The tag is: *misp-galaxy:nice-framework-skills="Skill in communicating with internal and external stakeholders - S0827"*

Skill in conducting test events - S0015

Skill in conducting test events

The tag is: *misp-galaxy:nice-framework-skills="Skill in conducting test events - S0015"*

Skill in systems integration testing - S0048

Skill in systems integration testing

The tag is: *misp-galaxy:nice-framework-skills="Skill in systems integration testing - S0048"*

Skill in collecting data - S0401

Skill in collecting data

The tag is: *misp-galaxy:nice-framework-skills="Skill in collecting data - S0401"*

Skill in verifying data - S0402

Skill in verifying data

The tag is: *misp-galaxy:nice-framework-skills="Skill in verifying data - S0402"*

Skill in validating data - S0403

Skill in validating data

The tag is: *misp-galaxy:nice-framework-skills="Skill in validating data - S0403"*

Skill in developing algorithms - S0558

Skill in developing algorithms

The tag is: *misp-galaxy:nice-framework-skills="Skill in developing algorithms - S0558"*

Skill in performing data structure analysis - S0559

Skill in performing data structure analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing data structure analysis - S0559"*

Skill in designing data analysis structures - S0568

Skill in designing data analysis structures

The tag is: *misp-galaxy:nice-framework-skills="Skill in designing data analysis structures - S0568"*

Skill in developing testing scenarios - S0573

Skill in developing testing scenarios

The tag is: *misp-galaxy:nice-framework-skills="Skill in developing testing scenarios - S0573"*

Skill in preparing reports - S0579

Skill in preparing reports

The tag is: *misp-galaxy:nice-framework-skills="Skill in preparing reports - S0579"*

Skill in conducting Test Readiness Reviews (TRR) - S0630

Skill in conducting Test Readiness Reviews (TRR)

The tag is: *misp-galaxy:nice-framework-skills="Skill in conducting Test Readiness Reviews (TRR) - S0630"*

Skill in identifying Test and Evaluation Strategies (TES) infrastructure requirements - S0634

Skill in identifying Test and Evaluation Strategies (TES) infrastructure requirements

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying Test and Evaluation Strategies (TES) infrastructure requirements - S0634"*

Skill in managing test assets - S0635

Skill in managing test assets

The tag is: *misp-galaxy:nice-framework-skills="Skill in managing test assets - S0635"*

Skill in providing test and evaluation resource estimates - S0639

Skill in providing test and evaluation resource estimates

The tag is: *misp-galaxy:nice-framework-skills="Skill in providing test and evaluation resource estimates - S0639"*

Skill in interpeting test results - S0842

Skill in interpeting test results

The tag is: *misp-galaxy:nice-framework-skills="Skill in interpeting test results - S0842"*

Skill in performing test result analysis - S0889

Skill in performing test result analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing test result analysis - S0889"*

Skill in applying crisis planning procedures - S0186

Skill in applying crisis planning procedures

The tag is: *misp-galaxy:nice-framework-skills="Skill in applying crisis planning procedures - S0186"*

Skill in evaluating laws - S0414

Skill in evaluating laws

The tag is: *misp-galaxy:nice-framework-skills="Skill in evaluating laws - S0414"*

Skill in evaluating regulations - S0415

Skill in evaluating regulations

The tag is: *misp-galaxy:nice-framework-skills="Skill in evaluating regulations - S0415"*

Skill in evaluating policies - S0416

Skill in evaluating policies

The tag is: *misp-galaxy:nice-framework-skills="Skill in evaluating policies - S0416"*

Skill in applying critical thinking - S0431

Skill in applying critical thinking

The tag is: *misp-galaxy:nice-framework-skills="Skill in applying critical thinking - S0431"*

Skill in coordinating cybersecurity operations across an organization - S0432

Skill in coordinating cybersecurity operations across an organization

The tag is: *misp-galaxy:nice-framework-skills="Skill in coordinating cybersecurity operations across an organization - S0432"*

Skill in functioning effectively in a dynamic, fast-paced environment - S0438

Skill in functioning effectively in a dynamic, fast-paced environment

The tag is: *misp-galaxy:nice-framework-skills="Skill in functioning effectively in a dynamic, fast-paced environment - S0438"*

Skill in identifying external partners - S0439

Skill in identifying external partners

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying external partners - S0439"*

Skill in determining intelligence support requirements - S0493

Skill in determining intelligence support requirements

The tag is: *misp-galaxy:nice-framework-skills="Skill in determining intelligence support requirements - S0493"*

Skill in managing an intelligence collection plan - S0498

Skill in managing an intelligence collection plan

The tag is: *misp-galaxy:nice-framework-skills="Skill in managing an intelligence collection plan - S0498"*

Skill in developing crisis action plans - S0501

Skill in developing crisis action plans

The tag is: *misp-galaxy:nice-framework-skills="Skill in developing crisis action plans - S0501"*

Skill in initiating planning activities - S0526

Skill in initiating planning activities

The tag is: *misp-galaxy:nice-framework-skills="Skill in initiating planning activities - S0526"*

Skill in developing crisis action timelines - S0527

Skill in developing crisis action timelines

The tag is: *misp-galaxy:nice-framework-skills="Skill in developing crisis action timelines - S0527"*

Skill in designing wireless communications systems - S0537

Skill in designing wireless communications systems

The tag is: *misp-galaxy:nice-framework-skills="Skill in designing wireless communications systems - S0537"*

Skill in identifying network threats - S0540

Skill in identifying network threats

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying network threats - S0540"*

Skill in collecting relevant data from a variety of sources - S0600

Skill in collecting relevant data from a variety of sources

The tag is: *misp-galaxy:nice-framework-skills="Skill in collecting relevant data from a variety of*

sources - S0600"

Skill in communicating effectively - S0610

Skill in communicating effectively

The tag is: *misp-galaxy:nice-framework-skills="Skill in communicating effectively - S0610"*

Skill in performing administrative planning activities - S0687

Skill in performing administrative planning activities

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing administrative planning activities - S0687"*

Skill in developing comprehensive cyber operations assessment programs - S0707

Skill in developing comprehensive cyber operations assessment programs

The tag is: *misp-galaxy:nice-framework-skills="Skill in developing comprehensive cyber operations assessment programs - S0707"*

Skill in executing comprehensive cyber operations assessment programs - S0708

Skill in executing comprehensive cyber operations assessment programs

The tag is: *misp-galaxy:nice-framework-skills="Skill in executing comprehensive cyber operations assessment programs - S0708"*

Skill in developing analytics - S0709

Skill in developing analytics

The tag is: *misp-galaxy:nice-framework-skills="Skill in developing analytics - S0709"*

Skill in evaluating data source quality - S0712

Skill in evaluating data source quality

The tag is: *misp-galaxy:nice-framework-skills="Skill in evaluating data source quality - S0712"*

Skill in evaluating information quality - S0713

Skill in evaluating information quality

The tag is: *misp-galaxy:nice-framework-skills="Skill in evaluating information quality - S0713"*

Skill in preparing plans - S0729

Skill in preparing plans

The tag is: *misp-galaxy:nice-framework-skills="Skill in preparing plans - S0729"*

Skill in incorporating feedback - S0756

Skill in incorporating feedback

The tag is: *misp-galaxy:nice-framework-skills="Skill in incorporating feedback - S0756"*

Skill in assessing cyber operations - S0763

Skill in assessing cyber operations

The tag is: *misp-galaxy:nice-framework-skills="Skill in assessing cyber operations - S0763"*

Skill in defining progress indicators - S0769

Skill in defining progress indicators

The tag is: *misp-galaxy:nice-framework-skills="Skill in defining progress indicators - S0769"*

Skill in defining success indicators - S0770

Skill in defining success indicators

The tag is: *misp-galaxy:nice-framework-skills="Skill in defining success indicators - S0770"*

Skill in distinguishing between notional and actual resources - S0776

Skill in distinguishing between notional and actual resources

The tag is: *misp-galaxy:nice-framework-skills="Skill in distinguishing between notional and actual resources - S0776"*

Skill in determining capability estimates - S0782

Skill in determining capability estimates

The tag is: *misp-galaxy:nice-framework-skills="Skill in determining capability estimates - S0782"*

Skill in creating decision support materials - S0783

Skill in creating decision support materials

The tag is: *misp-galaxy:nice-framework-skills="Skill in creating decision support materials - S0783"*

Skill in implementing established procedures - S0784

Skill in implementing established procedures

The tag is: *misp-galaxy:nice-framework-skills="Skill in implementing established procedures - S0784"*

Skill in interpreting planning guidance - S0785

Skill in interpreting planning guidance

The tag is: *misp-galaxy:nice-framework-skills="Skill in interpreting planning guidance - S0785"*

Skill in analyzing organizational patterns and relationships - S0800

Skill in analyzing organizational patterns and relationships

The tag is: *misp-galaxy:nice-framework-skills="Skill in analyzing organizational patterns and relationships - S0800"*

Skill in building internal and external relationships - S0817

Skill in building internal and external relationships

The tag is: *misp-galaxy:nice-framework-skills="Skill in building internal and external relationships - S0817"*

Skill in creating technical documentation - S0391

Skill in creating technical documentation

The tag is: *misp-galaxy:nice-framework-skills="Skill in creating technical documentation - S0391"*

Skill in deriving evaluative conclusions from data - S0409

Skill in deriving evaluative conclusions from data

The tag is: *misp-galaxy:nice-framework-skills="Skill in deriving evaluative conclusions from data - S0409"*

Skill in analyzing processes to ensure conformance with procedural requirements - S0423

Skill in analyzing processes to ensure conformance with procedural requirements

The tag is: *misp-galaxy:nice-framework-skills="Skill in analyzing processes to ensure conformance with procedural requirements - S0423"*

Skill in integrating information security requirements in the acquisitions process - S0462

Skill in integrating information security requirements in the acquisitions process

The tag is: *misp-galaxy:nice-framework-skills="Skill in integrating information security requirements in the acquisitions process - S0462"*

Skill in implementing software quality control processes - S0463

Skill in implementing software quality control processes

The tag is: *misp-galaxy:nice-framework-skills="Skill in implementing software quality control processes - S0463"*

Skill in analyzing software configurations - S0532

Skill in analyzing software configurations

The tag is: *misp-galaxy:nice-framework-skills="Skill in analyzing software configurations - S0532"*

Skill in auditing technical systems - S0619

Skill in auditing technical systems

The tag is: *misp-galaxy:nice-framework-skills="Skill in auditing technical systems - S0619"*

Skill in applying policies that meet system security objectives - S0664

Skill in applying policies that meet system security objectives

The tag is: *misp-galaxy:nice-framework-skills="Skill in applying policies that meet system security objectives - S0664"*

Skill in performing design modeling - S0681

Skill in performing design modeling

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing design modeling - S0681"*

Skill in performing technical writing - S0744

Skill in performing technical writing

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing technical writing - S0744"*

Skill in orchestrating planning teams - S0788

Skill in orchestrating planning teams

The tag is: *misp-galaxy:nice-framework-skills="Skill in orchestrating planning teams - S0788"*

Skill in coordinating collection support - S0789

Skill in coordinating collection support

The tag is: *misp-galaxy:nice-framework-skills="Skill in coordinating collection support - S0789"*

Skill in monitoring status - S0790

Skill in monitoring status

The tag is: *misp-galaxy:nice-framework-skills="Skill in monitoring status - S0790"*

Skill in communicating with customers - S0824

Skill in communicating with customers

The tag is: *misp-galaxy:nice-framework-skills="Skill in communicating with customers - S0824"*

Skill in performing gap analysis - S0861

Skill in performing gap analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing gap analysis - S0861"*

Skill in testing interfaces - S0899

Skill in testing interfaces

The tag is: *misp-galaxy:nice-framework-skills="Skill in testing interfaces - S0899"*

Skill in performing root cause analysis - S0175

Skill in performing root cause analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing root cause analysis - S0175"*

Skill in tailoring code analysis - S0382

Skill in tailoring code analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in tailoring code analysis - S0382"*

Skill in deploying software securely - S0417

Skill in deploying software securely

The tag is: *misp-galaxy:nice-framework-skills="Skill in deploying software securely - S0417"*

Skill in debugging software - S0560

Skill in debugging software

The tag is: *misp-galaxy:nice-framework-skills="Skill in debugging software - S0560"*

Skill in creating mathematical models - S0562

Skill in creating mathematical models

The tag is: *misp-galaxy:nice-framework-skills="Skill in creating mathematical models - S0562"*

Skill in creating statistical models - S0563

Skill in creating statistical models

The tag is: *misp-galaxy:nice-framework-skills="Skill in creating statistical models - S0563"*

Skill in implementing input validation - S0565

Skill in implementing input validation

The tag is: *misp-galaxy:nice-framework-skills="Skill in implementing input validation - S0565"*

Skill in implementing error handling in applications - S0670

Skill in implementing error handling in applications

The tag is: *misp-galaxy:nice-framework-skills="Skill in implementing error handling in applications - S0670"*

Skill in communicating with engineering staff - S0825

Skill in communicating with engineering staff

The tag is: *misp-galaxy:nice-framework-skills="Skill in communicating with engineering staff - S0825"*

Skill in encrypting data - S0836

Skill in encrypting data

The tag is: *misp-galaxy:nice-framework-skills="Skill in encrypting data - S0836"*

Skill in performing risk analysis - S0878

Skill in performing risk analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing risk analysis - S0878"*

Skill in performing scientific analysis - S0879

Skill in performing scientific analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing scientific analysis - S0879"*

Skill in performing static code analysis - S0883

Skill in performing static code analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing static code analysis - S0883"*

Skill in assessing security systems designs - S0141

Skill in assessing security systems designs

The tag is: *misp-galaxy:nice-framework-skills="Skill in assessing security systems designs - S0141"*

Skill in applying secure coding techniques - S0172

Skill in applying secure coding techniques

The tag is: *misp-galaxy:nice-framework-skills="Skill in applying secure coding techniques - S0172"*

Skill in analyzing an organization’s enterprise information technology architecture - S0383

Skill in analyzing an organization’s enterprise information technology architecture

The tag is: *misp-galaxy:nice-framework-skills="Skill in analyzing an organization’s enterprise information technology architecture - S0383"*

Skill in communicating complex concepts - S0385

Skill in communicating complex concepts

The tag is: *misp-galaxy:nice-framework-skills="Skill in communicating complex concepts - S0385"*

Skill in communicating verbally - S0386

Skill in communicating verbally

The tag is: *misp-galaxy:nice-framework-skills="Skill in communicating verbally - S0386"*

Skill in communicating in writing - S0387

Skill in communicating in writing

The tag is: *misp-galaxy:nice-framework-skills="Skill in communicating in writing - S0387"*

Skill in applying secure network architectures - S0418

Skill in applying secure network architectures

The tag is: *misp-galaxy:nice-framework-skills="Skill in applying secure network architectures - S0418"*

Skill in designing systems - S0419

Skill in designing systems

The tag is: *misp-galaxy:nice-framework-skills="Skill in designing systems - S0419"*

Skill in designing architectures - S0428

Skill in designing architectures

The tag is: *misp-galaxy:nice-framework-skills="Skill in designing architectures - S0428"*

Skill in designing frameworks - S0429

Skill in designing frameworks

The tag is: *misp-galaxy:nice-framework-skills="Skill in designing frameworks - S0429"*

Skill in collaborating with others - S0430

Skill in collaborating with others

The tag is: *misp-galaxy:nice-framework-skills="Skill in collaborating with others - S0430"*

Skill in coordinating efforts between stakeholders - S0458

Skill in coordinating efforts between stakeholders

The tag is: *misp-galaxy:nice-framework-skills="Skill in coordinating efforts between stakeholders - S0458"*

Skill in identifying critical infrastructure systems - S0465

Skill in identifying critical infrastructure systems

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying critical infrastructure systems - S0465"*

Skill in identifying systems designed without security considerations - S0466

Skill in identifying systems designed without security considerations

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying systems designed without security*

considerations - S0466"

Skill in scanning for vulnerabilities - S0543

Skill in scanning for vulnerabilities

The tag is: *misp-galaxy:nice-framework-skills="Skill in scanning for vulnerabilities - S0543"*

Skill in recognizing vulnerabilities - S0544

Skill in recognizing vulnerabilities

The tag is: *misp-galaxy:nice-framework-skills="Skill in recognizing vulnerabilities - S0544"*

Skill in applying information technologies into proposed solutions - S0551

Skill in applying information technologies into proposed solutions

The tag is: *misp-galaxy:nice-framework-skills="Skill in applying information technologies into proposed solutions - S0551"*

Skill in designing security controls - S0569

Skill in designing security controls

The tag is: *misp-galaxy:nice-framework-skills="Skill in designing security controls - S0569"*

Skill in designing the integration of hardware solutions - S0570

Skill in designing the integration of hardware solutions

The tag is: *misp-galaxy:nice-framework-skills="Skill in designing the integration of hardware solutions - S0570"*

Skill in designing the integration of software solutions - S0571

Skill in designing the integration of software solutions

The tag is: *misp-galaxy:nice-framework-skills="Skill in designing the integration of software solutions - S0571"*

Skill in developing security system controls - S0574

Skill in developing security system controls

The tag is: *misp-galaxy:nice-framework-skills="Skill in developing security system controls - S0574"*

Skill in evaluating security designs - S0578

Skill in evaluating security designs

The tag is: *misp-galaxy:nice-framework-skills="Skill in evaluating security designs - S0578"*

Skill in building use cases - S0590

Skill in building use cases

The tag is: *misp-galaxy:nice-framework-skills="Skill in building use cases - S0590"*

Skill in encrypting network communications - S0596

Skill in encrypting network communications

The tag is: *misp-galaxy:nice-framework-skills="Skill in encrypting network communications - S0596"*

Skill in creating test plans - S0598

Skill in creating test plans

The tag is: *misp-galaxy:nice-framework-skills="Skill in creating test plans - S0598"*

Skill in configuring software-based computer protection tools - S0613

Skill in configuring software-based computer protection tools

The tag is: *misp-galaxy:nice-framework-skills="Skill in configuring software-based computer protection tools - S0613"*

Skill in designing Test and Evaluation Strategies (TES) - S0632

Skill in designing Test and Evaluation Strategies (TES)

The tag is: *misp-galaxy:nice-framework-skills="Skill in designing Test and Evaluation Strategies (TES) - S0632"*

Skill in designing multi-level security solutions - S0637

Skill in designing multi-level security solutions

The tag is: *misp-galaxy:nice-framework-skills="Skill in designing multi-level security solutions - S0637"*

Skill in designing cross-domain solutions - S0638

Skill in designing cross-domain solutions

The tag is: *misp-galaxy:nice-framework-skills="Skill in designing cross-domain solutions - S0638"*

Skill in designing secure test plans - S0655

Skill in designing secure test plans

The tag is: *misp-galaxy:nice-framework-skills="Skill in designing secure test plans - S0655"*

Skill in implementing Public Key Infrastructure (PKI) encryption - S0657

Skill in implementing Public Key Infrastructure (PKI) encryption

The tag is: *misp-galaxy:nice-framework-skills="Skill in implementing Public Key Infrastructure (PKI) encryption - S0657"*

Skill in implementing digital signatures - S0658

Skill in implementing digital signatures

The tag is: *misp-galaxy:nice-framework-skills="Skill in implementing digital signatures - S0658"*

Skill in applying security models - S0659

Skill in applying security models

The tag is: *misp-galaxy:nice-framework-skills="Skill in applying security models - S0659"*

Skill in translating operational requirements into security controls - S0673

Skill in translating operational requirements into security controls

The tag is: *misp-galaxy:nice-framework-skills="Skill in translating operational requirements into security controls - S0673"*

Skill in installing system and component upgrades - S0674

Skill in installing system and component upgrades

The tag is: *misp-galaxy:nice-framework-skills="Skill in installing system and component upgrades - S0674"*

Skill in optimizing system performance - S0675

Skill in optimizing system performance

The tag is: *misp-galaxy:nice-framework-skills="Skill in optimizing system performance - S0675"*

Skill in implementing network segregation - S0683

Skill in implementing network segregation

The tag is: *misp-galaxy:nice-framework-skills="Skill in implementing network segregation - S0683"*

Skill in configuring computer protection components - S0685

Skill in configuring computer protection components

The tag is: *misp-galaxy:nice-framework-skills="Skill in configuring computer protection components - S0685"*

Skill in performing risk assessments - S0686

Skill in performing risk assessments

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing risk assessments - S0686"*

Skill in preparing briefings - S0728

Skill in preparing briefings

The tag is: *misp-galaxy:nice-framework-skills="Skill in preparing briefings - S0728"*

Skill in integrating organization objectives - S0762

Skill in integrating organization objectives

The tag is: *misp-galaxy:nice-framework-skills="Skill in integrating organization objectives - S0762"*

Skill in presenting to an audience - S0791

Skill in presenting to an audience

The tag is: *misp-galaxy:nice-framework-skills="Skill in presenting to an audience - S0791"*

Skill in identifying cybersecurity issues in external connections - S0813

Skill in identifying cybersecurity issues in external connections

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying cybersecurity issues in external connections - S0813"*

Skill in identifying privacy issues in partner interconnections - S0814

Skill in identifying privacy issues in partner interconnections

The tag is: *misp-galaxy:nice-framework-skills="Skill in identifying privacy issues in partner interconnections - S0814"*

Skill in collaborating with stakeholders - S0822

Skill in collaborating with stakeholders

The tag is: *misp-galaxy:nice-framework-skills="Skill in collaborating with stakeholders - S0822"*

Skill in performing cybersecurity architecture analysis - S0853

Skill in performing cybersecurity architecture analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing cybersecurity architecture analysis - S0853"*

Skill in performing security architecture analysis - S0880

Skill in performing security architecture analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing security architecture analysis - S0880"*

Skill in performing user needs analysis - S0893

Skill in performing user needs analysis

The tag is: *misp-galaxy:nice-framework-skills="Skill in performing user needs analysis - S0893"*

NICE Tasks

Tasks based on the NIST NICE framework.

NICE Tasks is a cluster galaxy available in JSON format at **this location** The JSON format can be freely reused in your application or automatically enabled in MISP.

authors

NIST - Jean-Louis Huynen

Employ secure configuration management processes - T0084

Employ secure configuration management processes

The tag is: *misp-galaxy:nice-framework-tasks="Employ secure configuration management processes - T0084"*

Translate proposed capabilities into technical requirements - T0542

Translate proposed capabilities into technical requirements

The tag is: *misp-galaxy:nice-framework-tasks="Translate proposed capabilities into technical requirements - T0542"*

Communicate enterprise information technology architecture - T1010

Communicate enterprise information technology architecture

The tag is: *misp-galaxy:nice-framework-tasks="Communicate enterprise information technology architecture - T1010"*

Determine special needs of cyber-physical systems - T1019

Determine special needs of cyber-physical systems

The tag is: *misp-galaxy:nice-framework-tasks="Determine special needs of cyber-physical systems - T1019"*

Determine the operational and safety impacts of cybersecurity lapses - T1020

Determine the operational and safety impacts of cybersecurity lapses

The tag is: *misp-galaxy:nice-framework-tasks="Determine the operational and safety impacts of cybersecurity lapses - T1020"*

Integrate organizational goals and objectives into security architecture - T1027

Integrate organizational goals and objectives into security architecture

The tag is: *misp-galaxy:nice-framework-tasks="Integrate organizational goals and objectives into security architecture - T1027"*

Implement organizational evaluation and validation criteria - T1029

Implement organizational evaluation and validation criteria

The tag is: *misp-galaxy:nice-framework-tasks="Implement organizational evaluation and validation criteria - T1029"*

Assess the organization’s cybersecurity architecture - T1077

Assess the organization’s cybersecurity architecture

The tag is: *misp-galaxy:nice-framework-tasks="Assess the organization’s cybersecurity architecture - T1077"*

Perform privacy impact assessments (PIAs) - T1096

Perform privacy impact assessments (PIAs)

The tag is: *misp-galaxy:nice-framework-tasks="Perform privacy impact assessments (PIAs) - T1096"*

Configure network hubs, routers, and switches - T1100

Configure network hubs, routers, and switches

The tag is: *misp-galaxy:nice-framework-tasks="Configure network hubs, routers, and switches - T1100"*

Optimize network hubs, routers, and switches - T1101

Optimize network hubs, routers, and switches

The tag is: *misp-galaxy:nice-framework-tasks="Optimize network hubs, routers, and switches - T1101"*

Determine essential system capabilities and business functions - T1122

Determine essential system capabilities and business functions

The tag is: *misp-galaxy:nice-framework-tasks="Determine essential system capabilities and business functions - T1122"*

Prioritize essential system capabilities and business functions - T1123

Prioritize essential system capabilities and business functions

The tag is: *misp-galaxy:nice-framework-tasks="Prioritize essential system capabilities and business functions - T1123"*

Restore essential system capabilities and business functions after catastrophic failure events - T1124

Restore essential system capabilities and business functions after catastrophic failure events

The tag is: *misp-galaxy:nice-framework-tasks="Restore essential system capabilities and business functions after catastrophic failure events - T1124"*

Define system availability levels - T1125

Define system availability levels

The tag is: *misp-galaxy:nice-framework-tasks="Define system availability levels - T1125"*

Determine disaster recovery and continuity of operations system requirements - T1126

Determine disaster recovery and continuity of operations system requirements

The tag is: *misp-galaxy:nice-framework-tasks="Determine disaster recovery and continuity of*

operations system requirements - T1126"

Develop cybersecurity designs for systems and networks with multilevel security requirements - T1151

Develop cybersecurity designs for systems and networks with multilevel security requirements

The tag is: *misp-galaxy:nice-framework-tasks="Develop cybersecurity designs for systems and networks with multilevel security requirements - T1151"*

Develop cybersecurity designs for systems and networks that require processing of multiple data classification levels - T1152

Develop cybersecurity designs for systems and networks that require processing of multiple data classification levels

The tag is: *misp-galaxy:nice-framework-tasks="Develop cybersecurity designs for systems and networks that require processing of multiple data classification levels - T1152"*

Integrate cybersecurity designs for systems and networks - T1153

Integrate cybersecurity designs for systems and networks

The tag is: *misp-galaxy:nice-framework-tasks="Integrate cybersecurity designs for systems and networks - T1153"*

Define acquisition life cycle cybersecurity architecture requirements - T1168

Define acquisition life cycle cybersecurity architecture requirements

The tag is: *misp-galaxy:nice-framework-tasks="Define acquisition life cycle cybersecurity architecture requirements - T1168"*

Define acquisition life cycle systems security engineering requirements - T1169

Define acquisition life cycle systems security engineering requirements

The tag is: *misp-galaxy:nice-framework-tasks="Define acquisition life cycle systems security*

engineering requirements - T1169"

Determine if systems and architecture are consistent with cybersecurity architecture guidelines - T1179

Determine if systems and architecture are consistent with cybersecurity architecture guidelines

The tag is: *misp-galaxy:nice-framework-tasks="Determine if systems and architecture are consistent with cybersecurity architecture guidelines - T1179"*

Perform security reviews - T1263

Perform security reviews

The tag is: *misp-galaxy:nice-framework-tasks="Perform security reviews - T1263"*

Identify gaps in security architecture - T1264

Identify gaps in security architecture

The tag is: *misp-galaxy:nice-framework-tasks="Identify gaps in security architecture - T1264"*

Develop a cybersecurity risk management plan - T1265

Develop a cybersecurity risk management plan

The tag is: *misp-galaxy:nice-framework-tasks="Develop a cybersecurity risk management plan - T1265"*

Advise on security requirements to be included in statements of work - T1293

Advise on security requirements to be included in statements of work

The tag is: *misp-galaxy:nice-framework-tasks="Advise on security requirements to be included in statements of work - T1293"*

Advise on Risk Management Framework process activities and documentation - T1294

Advise on Risk Management Framework process activities and documentation

The tag is: *misp-galaxy:nice-framework-tasks="Advise on Risk Management Framework process activities and documentation - T1294"*

Determine the impact of new system and interface implementations on organization’s cybersecurity posture - T1361

Determine the impact of new system and interface implementations on organization’s cybersecurity posture

The tag is: *misp-galaxy:nice-framework-tasks="Determine the impact of new system and interface implementations on organization’s cybersecurity posture - T1361"*

Document impact of new system and interface implementations on organization’s cybersecurity posture - T1362

Document impact of new system and interface implementations on organization’s cybersecurity posture

The tag is: *misp-galaxy:nice-framework-tasks="Document impact of new system and interface implementations on organization’s cybersecurity posture - T1362"*

Plan system security development - T1363

Plan system security development

The tag is: *misp-galaxy:nice-framework-tasks="Plan system security development - T1363"*

Conduct system security development - T1364

Conduct system security development

The tag is: *misp-galaxy:nice-framework-tasks="Conduct system security development - T1364"*

Allocate cybersecurity services - T1403

Allocate cybersecurity services

The tag is: *misp-galaxy:nice-framework-tasks="Allocate cybersecurity services - T1403"*

Select cybersecurity mechanisms - T1404

Select cybersecurity mechanisms

The tag is: *misp-galaxy:nice-framework-tasks="Select cybersecurity mechanisms - T1404"*

Develop system security contexts - T1410

Develop system security contexts

The tag is: *misp-galaxy:nice-framework-tasks="Develop system security contexts - T1410"*

Create system security concept of operations (ConOps) documents - T1423

Create system security concept of operations (ConOps) documents

The tag is: *misp-galaxy:nice-framework-tasks="Create system security concept of operations (ConOps) documents - T1423"*

Determine cybersecurity design and architecture effectiveness - T1426

Determine cybersecurity design and architecture effectiveness

The tag is: *misp-galaxy:nice-framework-tasks="Determine cybersecurity design and architecture effectiveness - T1426"*

Create cybersecurity architecture functional specifications - T1434

Create cybersecurity architecture functional specifications

The tag is: *misp-galaxy:nice-framework-tasks="Create cybersecurity architecture functional specifications - T1434"*

Determine user requirements - T1507

Determine user requirements

The tag is: *misp-galaxy:nice-framework-tasks="Determine user requirements - T1507"*

Plan cybersecurity architecture - T1508

Plan cybersecurity architecture

The tag is: *misp-galaxy:nice-framework-tasks="Plan cybersecurity architecture - T1508"*

Design system security measures - T1519

Design system security measures

The tag is: *misp-galaxy:nice-framework-tasks="Design system security measures - T1519"*

Update system security measures - T1520

Update system security measures

The tag is: *misp-galaxy:nice-framework-tasks="Update system security measures - T1520"*

Develop enterprise architecture - T1521

Develop enterprise architecture

The tag is: *misp-galaxy:nice-framework-tasks="Develop enterprise architecture - T1521"*

Define baseline system security requirements - T1527

Define baseline system security requirements

The tag is: *misp-galaxy:nice-framework-tasks="Define baseline system security requirements - T1527"*

Create definition activity documentation - T1544

Create definition activity documentation

The tag is: *misp-galaxy:nice-framework-tasks="Create definition activity documentation - T1544"*

Create architecture activity documentation - T1545

Create architecture activity documentation

The tag is: *misp-galaxy:nice-framework-tasks="Create architecture activity documentation - T1545"*

Identify system and network protection needs - T1556

Identify system and network protection needs

The tag is: *misp-galaxy:nice-framework-tasks="Identify system and network protection needs - T1556"*

Implement system security measures - T1563

Implement system security measures

The tag is: *misp-galaxy:nice-framework-tasks="Implement system security measures - T1563"*

Determine effectiveness of system implementation and testing processes - T1583

Determine effectiveness of system implementation and testing processes

The tag is: *misp-galaxy:nice-framework-tasks="Determine effectiveness of system implementation and testing processes - T1583"*

Conduct cybersecurity management assessments - T1627

Conduct cybersecurity management assessments

The tag is: *misp-galaxy:nice-framework-tasks="Conduct cybersecurity management assessments - T1627"*

Design cybersecurity management functions - T1628

Design cybersecurity management functions

The tag is: *misp-galaxy:nice-framework-tasks="Design cybersecurity management functions - T1628"*

Develop secure code and error handling - T0077

Develop secure code and error handling

The tag is: *misp-galaxy:nice-framework-tasks="Develop secure code and error handling - T0077"*

Consult with customers about software system design and maintenance - T0311

Consult with customers about software system design and maintenance

The tag is: *misp-galaxy:nice-framework-tasks="Consult with customers about software system design and maintenance - T0311"*

Recommend development of new applications or modification of existing applications - T1067

Recommend development of new applications or modification of existing applications

The tag is: *misp-galaxy:nice-framework-tasks="Recommend development of new applications or modification of existing applications - T1067"*

Create development plans for new applications or modification of existing applications - T1068

Create development plans for new applications or modification of existing applications

The tag is: *misp-galaxy:nice-framework-tasks="Create development plans for new applications or modification of existing applications - T1068"*

Evaluate software design plan timelines and cost estimates - T1071

Evaluate software design plan timelines and cost estimates

The tag is: *misp-galaxy:nice-framework-tasks="Evaluate software design plan timelines and cost estimates - T1071"*

Perform code reviews - T1073

Perform code reviews

The tag is: *misp-galaxy:nice-framework-tasks="Perform code reviews - T1073"*

Prepare secure code documentation - T1074

Prepare secure code documentation

The tag is: *misp-galaxy:nice-framework-tasks="Prepare secure code documentation - T1074"*

Integrate software cybersecurity objectives into project plans and schedules - T1082

Integrate software cybersecurity objectives into project plans and schedules

The tag is: *misp-galaxy:nice-framework-tasks="Integrate software cybersecurity objectives into project plans and schedules - T1082"*

Determine project security controls - T1083

Determine project security controls

The tag is: *misp-galaxy:nice-framework-tasks="Determine project security controls - T1083"*

Create program documentation during initial development and subsequent revision phases - T1089

Create program documentation during initial development and subsequent revision phases

The tag is: *misp-galaxy:nice-framework-tasks="Create program documentation during initial development and subsequent revision phases - T1089"*

Determine system performance requirements - T1098

Determine system performance requirements

The tag is: *misp-galaxy:nice-framework-tasks="Determine system performance requirements - T1098"*

Design application interfaces - T1099

Design application interfaces

The tag is: *misp-galaxy:nice-framework-tasks="Design application interfaces - T1099"*

Evaluate interfaces between hardware and software - T1108

Evaluate interfaces between hardware and software

The tag is: *misp-galaxy:nice-framework-tasks="Evaluate interfaces between hardware and software - T1108"*

Correct program errors - T1116

Correct program errors

The tag is: *misp-galaxy:nice-framework-tasks="Correct program errors - T1116"*

Determine if desired program results are produced - T1117

Determine if desired program results are produced

The tag is: *misp-galaxy:nice-framework-tasks="Determine if desired program results are produced - T1117"*

Design and develop software systems - T1135

Design and develop software systems

The tag is: *misp-galaxy:nice-framework-tasks="Design and develop software systems - T1135"*

Determine hardware configuration - T1190

Determine hardware configuration

The tag is: *misp-galaxy:nice-framework-tasks="Determine hardware configuration - T1190"*

Identify common coding flaws - T1197

Identify common coding flaws

The tag is: *misp-galaxy:nice-framework-tasks="Identify common coding flaws - T1197"*

Determine software development security implications within centralized and decentralized environments across the enterprise - T1202

Determine software development security implications within centralized and decentralized environments across the enterprise

The tag is: *misp-galaxy:nice-framework-tasks="Determine software development security implications within centralized and decentralized environments across the enterprise - T1202"*

Implement software development cybersecurity methodologies within centralized and decentralized environments across the enterprise - T1203

Implement software development cybersecurity methodologies within centralized and decentralized environments across the enterprise

The tag is: *misp-galaxy:nice-framework-tasks="Implement software development cybersecurity methodologies within centralized and decentralized environments across the enterprise - T1203"*

Determine cybersecurity measures for steady state operation and management of software - T1204

Determine cybersecurity measures for steady state operation and management of software

The tag is: *misp-galaxy:nice-framework-tasks="Determine cybersecurity measures for steady state operation and management of software - T1204"*

Incorporate product end-of-life cybersecurity measures - T1205

Incorporate product end-of-life cybersecurity measures

The tag is: *misp-galaxy:nice-framework-tasks="Incorporate product end-of-life cybersecurity measures - T1205"*

Perform integrated quality assurance testing - T1258

Perform integrated quality assurance testing

The tag is: *misp-galaxy:nice-framework-tasks="Perform integrated quality assurance testing - T1258"*

Mitigate programming vulnerabilities - T1261

Mitigate programming vulnerabilities

The tag is: *misp-galaxy:nice-framework-tasks="Mitigate programming vulnerabilities - T1261"*

Identify programming code flaws - T1262

Identify programming code flaws

The tag is: *misp-galaxy:nice-framework-tasks="Identify programming code flaws - T1262"*

Conduct risk analysis of applications and systems undergoing major changes - T1269

Conduct risk analysis of applications and systems undergoing major changes

The tag is: *misp-galaxy:nice-framework-tasks="Conduct risk analysis of applications and systems undergoing major changes - T1269"*

Develop workflow charts and diagrams - T1280

Develop workflow charts and diagrams

The tag is: *misp-galaxy:nice-framework-tasks="Develop workflow charts and diagrams - T1280"*

Convert workflow charts and diagrams into coded computer language instructions - T1281

Convert workflow charts and diagrams into coded computer language instructions

The tag is: *misp-galaxy:nice-framework-tasks="Convert workflow charts and diagrams into coded*

computer language instructions - T1281"

Address security implications in the software acceptance phase - T1302

Address security implications in the software acceptance phase

The tag is: *misp-galaxy:nice-framework-tasks="Address security implications in the software acceptance phase - T1302"*

Analyze system capabilities and requirements - T1309

Analyze system capabilities and requirements

The tag is: *misp-galaxy:nice-framework-tasks="Analyze system capabilities and requirements - T1309"*

Integrate security requirements into application design elements - T1318

Integrate security requirements into application design elements

The tag is: *misp-galaxy:nice-framework-tasks="Integrate security requirements into application design elements - T1318"*

Document software attack surface elements - T1319

Document software attack surface elements

The tag is: *misp-galaxy:nice-framework-tasks="Document software attack surface elements - T1319"*

Conduct threat modeling - T1320

Conduct threat modeling

The tag is: *misp-galaxy:nice-framework-tasks="Conduct threat modeling - T1320"*

Design programming language exploitation countermeasures and mitigations - T1360

Design programming language exploitation countermeasures and mitigations

The tag is: *misp-galaxy:nice-framework-tasks="Design programming language exploitation countermeasures and mitigations - T1360"*

Design and develop secure applications - T1400

Design and develop secure applications

The tag is: *misp-galaxy:nice-framework-tasks="Design and develop secure applications - T1400"*

Develop software documentation - T1422

Develop software documentation

The tag is: *misp-galaxy:nice-framework-tasks="Develop software documentation - T1422"*

Integrate public key cryptography into applications - T1499

Integrate public key cryptography into applications

The tag is: *misp-galaxy:nice-framework-tasks="Integrate public key cryptography into applications - T1499"*

Analyze feasibility of software design within time and cost constraints - T1509

Analyze feasibility of software design within time and cost constraints

The tag is: *misp-galaxy:nice-framework-tasks="Analyze feasibility of software design within time and cost constraints - T1509"*

Conduct trial runs of programs and software applications - T1513

Conduct trial runs of programs and software applications

The tag is: *misp-galaxy:nice-framework-tasks="Conduct trial runs of programs and software applications - T1513"*

Develop software system testing and validation procedures - T1528

Develop software system testing and validation procedures

The tag is: *misp-galaxy:nice-framework-tasks="Develop software system testing and validation procedures - T1528"*

Create software system documentation - T1529

Create software system documentation

The tag is: *misp-galaxy:nice-framework-tasks="Create software system documentation - T1529"*

Adapt software to new hardware - T1575

Adapt software to new hardware

The tag is: *misp-galaxy:nice-framework-tasks="Adapt software to new hardware - T1575"*

Upgrade software interfaces - T1576

Upgrade software interfaces

The tag is: *misp-galaxy:nice-framework-tasks="Upgrade software interfaces - T1576"*

Improve software performance - T1577

Improve software performance

The tag is: *misp-galaxy:nice-framework-tasks="Improve software performance - T1577"*

Conduct vulnerability analysis of software patches and updates - T1624

Conduct vulnerability analysis of software patches and updates

The tag is: *misp-galaxy:nice-framework-tasks="Conduct vulnerability analysis of software patches and updates - T1624"*

Prepare vulnerability analysis reports - T1625

Prepare vulnerability analysis reports

The tag is: *misp-galaxy:nice-framework-tasks="Prepare vulnerability analysis reports - T1625"*

Implement security designs for new or existing systems - T0122

Implement security designs for new or existing systems

The tag is: *misp-galaxy:nice-framework-tasks="Implement security designs for new or existing systems - T0122"*

Incorporate cybersecurity vulnerability solutions into system designs (e.g., Cybersecurity Vulnerability Alerts) - T0124

Incorporate cybersecurity vulnerability solutions into system designs (e.g., Cybersecurity Vulnerability Alerts)

The tag is: *misp-galaxy:nice-framework-tasks="Incorporate cybersecurity vulnerability solutions into system designs (e.g., Cybersecurity Vulnerability Alerts) - T0124"*

Develop cybersecurity designs to meet specific operational needs and environmental factors (e.g., access controls, automated applications, networked o - T0271

Develop cybersecurity designs to meet specific operational needs and environmental factors (e.g., access controls, automated applications, networked operations, high integrity and availability requirements, multilevel security/processing of multiple classification levels, and processing Sensitive Compartmented Information)

The tag is: *misp-galaxy:nice-framework-tasks="Develop cybersecurity designs to meet specific operational needs and environmental factors (e.g., access controls, automated applications, networked o - T0271"*

Review enterprise information technology (IT) goals and objectives - T1022

Review enterprise information technology (IT) goals and objectives

The tag is: *misp-galaxy:nice-framework-tasks="Review enterprise information technology (IT) goals and objectives - T1022"*

Determine procurement requirements - T1026

Determine procurement requirements

The tag is: *misp-galaxy:nice-framework-tasks="Determine procurement requirements - T1026"*

Estimate the impact of collateral damage - T1030

Estimate the impact of collateral damage

The tag is: *misp-galaxy:nice-framework-tasks="Estimate the impact of collateral damage - T1030"*

Determine impact of software configurations - T1041

Determine impact of software configurations

The tag is: *misp-galaxy:nice-framework-tasks="Determine impact of software configurations - T1041"*

Assess operation performance - T1046

Assess operation performance

The tag is: *misp-galaxy:nice-framework-tasks="Assess operation performance - T1046"*

Assess operation impact - T1047

Assess operation impact

The tag is: *misp-galaxy:nice-framework-tasks="Assess operation impact - T1047"*

Determine life cycle support requirements - T1072

Determine life cycle support requirements

The tag is: *misp-galaxy:nice-framework-tasks="Determine life cycle support requirements - T1072"*

Implement application cybersecurity policies - T1075

Implement application cybersecurity policies

The tag is: *misp-galaxy:nice-framework-tasks="Implement application cybersecurity policies - T1075"*

Determine effectiveness of system cybersecurity measures - T1078

Determine effectiveness of system cybersecurity measures

The tag is: *misp-galaxy:nice-framework-tasks="Determine effectiveness of system cybersecurity measures - T1078"*

Develop cybersecurity risk profiles - T1079

Develop cybersecurity risk profiles

The tag is: *misp-galaxy:nice-framework-tasks="Develop cybersecurity risk profiles - T1079"*

Create product prototypes using working and theoretical models - T1081

Create product prototypes using working and theoretical models

The tag is: *misp-galaxy:nice-framework-tasks="Create product prototypes using working and theoretical models - T1081"*

Identify anomalous network activity - T1084

Identify anomalous network activity

The tag is: *misp-galaxy:nice-framework-tasks="Identify anomalous network activity - T1084"*

Identify vulnerabilities - T1118

Identify vulnerabilities

The tag is: *misp-galaxy:nice-framework-tasks="Identify vulnerabilities - T1118"*

Recommend vulnerability remediation strategies - T1119

Recommend vulnerability remediation strategies

The tag is: *misp-galaxy:nice-framework-tasks="Recommend vulnerability remediation strategies - T1119"*

Design cybersecurity or cybersecurity-enabled products - T1128

Design cybersecurity or cybersecurity-enabled products

The tag is: *misp-galaxy:nice-framework-tasks="Design cybersecurity or cybersecurity-enabled products - T1128"*

Develop cybersecurity or cybersecurity-enabled products - T1129

Develop cybersecurity or cybersecurity-enabled products

The tag is: *misp-galaxy:nice-framework-tasks="Develop cybersecurity or cybersecurity-enabled products - T1129"*

Determine if hardware, operating systems, and software applications adequately address cybersecurity requirements - T1131

Determine if hardware, operating systems, and software applications adequately address cybersecurity requirements

The tag is: *misp-galaxy:nice-framework-tasks="Determine if hardware, operating systems, and software applications adequately address cybersecurity requirements - T1131"*

Design system data backup capabilities - T1132

Design system data backup capabilities

The tag is: *misp-galaxy:nice-framework-tasks="Design system data backup capabilities - T1132"*

Develop technical and procedural processes for integrity of stored backup data - T1133

Develop technical and procedural processes for integrity of stored backup data

The tag is: *misp-galaxy:nice-framework-tasks="Develop technical and procedural processes for integrity of stored backup data - T1133"*

Develop technical and procedural processes for backup data storage - T1134

Develop technical and procedural processes for backup data storage

The tag is: *misp-galaxy:nice-framework-tasks="Develop technical and procedural processes for backup data storage - T1134"*

Create system testing and validation procedures and documentation - T1138

Create system testing and validation procedures and documentation

The tag is: *misp-galaxy:nice-framework-tasks="Create system testing and validation procedures and documentation - T1138"*

Develop systems security design documentation - T1148

Develop systems security design documentation

The tag is: *misp-galaxy:nice-framework-tasks="Develop systems security design documentation - T1148"*

Develop disaster recovery and continuity of operations plans for systems under development - T1149

Develop disaster recovery and continuity of operations plans for systems under development

The tag is: *misp-galaxy:nice-framework-tasks="Develop disaster recovery and continuity of operations plans for systems under development - T1149"*

Test disaster recovery and continuity of operations plans for systems prior to deployment - T1150

Test disaster recovery and continuity of operations plans for systems prior to deployment

The tag is: *misp-galaxy:nice-framework-tasks="Test disaster recovery and continuity of operations plans for systems prior to deployment - T1150"*

Develop risk mitigation strategies - T1160

Develop risk mitigation strategies

The tag is: *misp-galaxy:nice-framework-tasks="Develop risk mitigation strategies - T1160"*

Resolve system vulnerabilities - T1161

Resolve system vulnerabilities

The tag is: *misp-galaxy:nice-framework-tasks="Resolve system vulnerabilities - T1161"*

Recommend security changes to systems and system components - T1162

Recommend security changes to systems and system components

The tag is: *misp-galaxy:nice-framework-tasks="Recommend security changes to systems and system components - T1162"*

Develop cybersecurity countermeasures for systems and applications - T1163

Develop cybersecurity countermeasures for systems and applications

The tag is: *misp-galaxy:nice-framework-tasks="Develop cybersecurity countermeasures for systems and applications - T1163"*

Develop risk mitigation strategies for systems and applications - T1164

Develop risk mitigation strategies for systems and applications

The tag is: *misp-galaxy:nice-framework-tasks="Develop risk mitigation strategies for systems and applications - T1164"*

Allocate security functions to components and elements - T1193

Allocate security functions to components and elements

The tag is: *misp-galaxy:nice-framework-tasks="Allocate security functions to components and elements - T1193"*

Remediate technical problems encountered during system testing and implementation - T1194

Remediate technical problems encountered during system testing and implementation

The tag is: *misp-galaxy:nice-framework-tasks="Remediate technical problems encountered during system testing and implementation - T1194"*

Direct the remediation of technical problems encountered during system testing and implementation - T1195

Direct the remediation of technical problems encountered during system testing and implementation

The tag is: *misp-galaxy:nice-framework-tasks="Direct the remediation of technical problems encountered during system testing and implementation - T1195"*

Recommend cybersecurity or cybersecurity-enabled products for use within a system - T1206

Recommend cybersecurity or cybersecurity-enabled products for use within a system

The tag is: *misp-galaxy:nice-framework-tasks="Recommend cybersecurity or cybersecurity-enabled products for use within a system - T1206"*

Develop guidelines for implementing developed systems for customers and installation teams - T1292

Develop guidelines for implementing developed systems for customers and installation teams

The tag is: *misp-galaxy:nice-framework-tasks="Develop guidelines for implementing developed systems for customers and installation teams - T1292"*

Conduct test and evaluation activities - T1312

Conduct test and evaluation activities

The tag is: *misp-galaxy:nice-framework-tasks="Conduct test and evaluation activities - T1312"*

Develop system performance predictions for various operating conditions - T1326

Develop system performance predictions for various operating conditions

The tag is: *misp-galaxy:nice-framework-tasks="Develop system performance predictions for various operating conditions - T1326"*

Document cybersecurity design and development activities - T1365

Document cybersecurity design and development activities

The tag is: *misp-galaxy:nice-framework-tasks="Document cybersecurity design and development activities - T1365"*

Integrate system development life cycle methodologies into development environment - T1401

Integrate system development life cycle methodologies into development environment

The tag is: *misp-galaxy:nice-framework-tasks="Integrate system development life cycle methodologies into development environment - T1401"*

Design secure interfaces between information systems, physical systems, and embedded technologies - T1454

Design secure interfaces between information systems, physical systems, and embedded technologies

The tag is: *misp-galaxy:nice-framework-tasks="Design secure interfaces between information systems, physical systems, and embedded technologies - T1454"*

Implement secure interfaces between information systems, physical systems, and embedded technologies - T1455

Implement secure interfaces between information systems, physical systems, and embedded technologies

The tag is: *misp-galaxy:nice-framework-tasks="Implement secure interfaces between information systems, physical systems, and embedded technologies - T1455"*

Correlate incident data - T1489

Correlate incident data

The tag is: *misp-galaxy:nice-framework-tasks="Correlate incident data - T1489"*

Determine if systems meet minimum security requirements - T1522

Determine if systems meet minimum security requirements

The tag is: *misp-galaxy:nice-framework-tasks="Determine if systems meet minimum security requirements - T1522"*

Establish minimum security requirements for applications - T1584

Establish minimum security requirements for applications

The tag is: *misp-galaxy:nice-framework-tasks="Establish minimum security requirements for applications - T1584"*

Determine if applications meet minimum security requirements - T1585

Determine if applications meet minimum security requirements

The tag is: *misp-galaxy:nice-framework-tasks="Determine if applications meet minimum security requirements - T1585"*

Conduct cybersecurity risk assessments - T1586

Conduct cybersecurity risk assessments

The tag is: *misp-galaxy:nice-framework-tasks="Conduct cybersecurity risk assessments - T1586"*

Conduct cybersecurity reviews - T1592

Conduct cybersecurity reviews

The tag is: *misp-galaxy:nice-framework-tasks="Conduct cybersecurity reviews - T1592"*

Identify cybersecurity gaps in enterprise architecture - T1593

Identify cybersecurity gaps in enterprise architecture

The tag is: *misp-galaxy:nice-framework-tasks="Identify cybersecurity gaps in enterprise architecture - T1593"*

Provide cybersecurity advice on implementation plans, standard operating procedures, maintenance documentation, and maintenance training materials - T1604

Provide cybersecurity advice on implementation plans, standard operating procedures, maintenance documentation, and maintenance training materials

The tag is: *misp-galaxy:nice-framework-tasks="Provide cybersecurity advice on implementation plans, standard operating procedures, maintenance documentation, and maintenance training materials - T1604"*

Determine if design components meet system requirements - T1613

Determine if design components meet system requirements

The tag is: *misp-galaxy:nice-framework-tasks="Determine if design components meet system requirements - T1613"*

Determine scalability of system architecture - T1614

Determine scalability of system architecture

The tag is: *misp-galaxy:nice-framework-tasks="Determine scalability of system architecture - T1614"*

Incorporate intelligence equities into the overall design of cyber operations plans - T0630

Incorporate intelligence equities into the overall design of cyber operations plans

The tag is: *misp-galaxy:nice-framework-tasks="Incorporate intelligence equities into the overall design of cyber operations plans - T0630"*

Incorporate cyber operations and communications security support plans into organization objectives - T0704

Incorporate cyber operations and communications security support plans into organization objectives

The tag is: *misp-galaxy:nice-framework-tasks="Incorporate cyber operations and communications security support plans into organization objectives - T0704"*

Identify intelligence gaps and shortfalls - T0718

Identify intelligence gaps and shortfalls

The tag is: *misp-galaxy:nice-framework-tasks="Identify intelligence gaps and shortfalls - T0718"*

Issue requests for information - T0734

Issue requests for information

The tag is: *misp-galaxy:nice-framework-tasks="Issue requests for information - T0734"*

Maintain situational awareness of cyber-related intelligence requirements and associated tasking - T0741

Maintain situational awareness of cyber-related intelligence requirements and associated tasking

The tag is: *misp-galaxy:nice-framework-tasks="Maintain situational awareness of cyber-related intelligence requirements and associated tasking - T0741"*

Maintain situational awareness of partner capabilities and activities - T0742

Maintain situational awareness of partner capabilities and activities

The tag is: *misp-galaxy:nice-framework-tasks="Maintain situational awareness of partner capabilities and activities - T0742"*

Support cyber operations - T1033

Support cyber operations

The tag is: *misp-galaxy:nice-framework-tasks="Support cyber operations - T1033"*

Integrate leadership priorities - T1036

Integrate leadership priorities

The tag is: *misp-galaxy:nice-framework-tasks="Integrate leadership priorities - T1036"*

Develop operations strategies - T1037

Develop operations strategies

The tag is: *misp-galaxy:nice-framework-tasks="Develop operations strategies - T1037"*

Integrate organization objectives in intelligence collection - T1038

Integrate organization objectives in intelligence collection

The tag is: *misp-galaxy:nice-framework-tasks="Integrate organization objectives in intelligence collection - T1038"*

Determine staffing needs - T1043

Determine staffing needs

The tag is: *misp-galaxy:nice-framework-tasks="Determine staffing needs - T1043"*

Review course of action analysis results - T1044

Review course of action analysis results

The tag is: *misp-galaxy:nice-framework-tasks="Review course of action analysis results - T1044"*

Review exercise analysis results - T1045

Review exercise analysis results

The tag is: *misp-galaxy:nice-framework-tasks="Review exercise analysis results - T1045"*

Synchronize operational assessment procedures and critical information requirement processes - T1048

Synchronize operational assessment procedures and critical information requirement processes

The tag is: *misp-galaxy:nice-framework-tasks="Synchronize operational assessment procedures and critical information requirement processes - T1048"*

Scope analysis reports to various audiences that accounts for data sharing classification restrictions - T1054

Scope analysis reports to various audiences that accounts for data sharing classification restrictions

The tag is: *misp-galaxy:nice-framework-tasks="Scope analysis reports to various audiences that accounts for data sharing classification restrictions - T1054"*

Determine if priority information requirements are satisfied - T1055

Determine if priority information requirements are satisfied

The tag is: *misp-galaxy:nice-framework-tasks="Determine if priority information requirements are satisfied - T1055"*

Determine the impact of threats on cybersecurity - T1456

Determine the impact of threats on cybersecurity

The tag is: *misp-galaxy:nice-framework-tasks="Determine the impact of threats on cybersecurity - T1456"*

Implement threat countermeasures - T1457

Implement threat countermeasures

The tag is: *misp-galaxy:nice-framework-tasks="Implement threat countermeasures - T1457"*

Assess target vulnerabilities and operational capabilities - T1639

Assess target vulnerabilities and operational capabilities

The tag is: *misp-galaxy:nice-framework-tasks="Assess target vulnerabilities and operational capabilities - T1639"*

Develop cyber operations indicators - T1644

Develop cyber operations indicators

The tag is: *misp-galaxy:nice-framework-tasks="Develop cyber operations indicators - T1644"*

Develop cybersecurity success metrics - T1650

Develop cybersecurity success metrics

The tag is: *misp-galaxy:nice-framework-tasks="Develop cybersecurity success metrics - T1650"*

Develop cyber operations crisis action plans - T1678

Develop cyber operations crisis action plans

The tag is: *misp-galaxy:nice-framework-tasks="Develop cyber operations crisis action plans - T1678"*

Develop organizational decision support tools - T1679

Develop organizational decision support tools

The tag is: *misp-galaxy:nice-framework-tasks="Develop organizational decision support tools - T1679"*

Identify strategies to counter potential target actions - T1688

Identify strategies to counter potential target actions

The tag is: *misp-galaxy:nice-framework-tasks="Identify strategies to counter potential target actions - T1688"*

Develop crisis plans - T1699

Develop crisis plans

The tag is: *misp-galaxy:nice-framework-tasks="Develop crisis plans - T1699"*

Maintain crisis plans - T1700

Maintain crisis plans

The tag is: *misp-galaxy:nice-framework-tasks="Maintain crisis plans - T1700"*

Integrate cyber operations guidance into broader planning activities - T1701

Integrate cyber operations guidance into broader planning activities

The tag is: *misp-galaxy:nice-framework-tasks="Integrate cyber operations guidance into broader planning activities - T1701"*

Develop intelligence operations plans - T1704

Develop intelligence operations plans

The tag is: *misp-galaxy:nice-framework-tasks="Develop intelligence operations plans - T1704"*

Develop policies for providing and obtaining cyber operations support from external partners - T1710

Develop policies for providing and obtaining cyber operations support from external partners

The tag is: *misp-galaxy:nice-framework-tasks="Develop policies for providing and obtaining cyber operations support from external partners - T1710"*

Recommend potential courses of action - T1712

Recommend potential courses of action

The tag is: *misp-galaxy:nice-framework-tasks="Recommend potential courses of action - T1712"*

Recommend changes to planning policies and procedures - T1717

Recommend changes to planning policies and procedures

The tag is: *misp-galaxy:nice-framework-tasks="Recommend changes to planning policies and procedures - T1717"*

Implement changes to planning policies and procedures - T1718

Implement changes to planning policies and procedures

The tag is: *misp-galaxy:nice-framework-tasks="Implement changes to planning policies and procedures - T1718"*

Prepare cyber operation strategy and planning documents - T1722

Prepare cyber operation strategy and planning documents

The tag is: *misp-galaxy:nice-framework-tasks="Prepare cyber operation strategy and planning documents - T1722"*

Implement collection operation plans - T1728

Implement collection operation plans

The tag is: *misp-galaxy:nice-framework-tasks="Implement collection operation plans - T1728"*

Synchronize intelligence planning activities with operational planning timelines - T1729

Synchronize intelligence planning activities with operational planning timelines

The tag is: *misp-galaxy:nice-framework-tasks="Synchronize intelligence planning activities with operational planning timelines - T1729"*

Facilitate interactions between internal and external partner decision makers to synchronize and integrate courses of action - T1735

Facilitate interactions between internal and external partner decision makers to synchronize and integrate courses of action

The tag is: *misp-galaxy:nice-framework-tasks="Facilitate interactions between internal and external partner decision makers to synchronize and integrate courses of action - T1735"*

Develop courses of action based on threat factors - T1752

Develop courses of action based on threat factors

The tag is: *misp-galaxy:nice-framework-tasks="Develop courses of action based on threat factors - T1752"*

Integrate cyber planning and targeting efforts - T1755

Integrate cyber planning and targeting efforts

The tag is: *misp-galaxy:nice-framework-tasks="Integrate cyber planning and targeting efforts - T1755"*

Interpret environment preparation assessments - T1756

Interpret environment preparation assessments

The tag is: *misp-galaxy:nice-framework-tasks="Interpret environment preparation assessments - T1756"*

Determine if changes to the operating environment require review of the plan - T1761

Determine if changes to the operating environment require review of the plan

The tag is: *misp-galaxy:nice-framework-tasks="Determine if changes to the operating environment require review of the plan - T1761"*

Asssess effectiveness of integrated cyber operations - T1764

Asssess effectiveness of integrated cyber operations

The tag is: *misp-galaxy:nice-framework-tasks="Asssess effectiveness of integrated cyber operations - T1764"*

Coordinate strategic planning efforts with internal and external partners - T1779

Coordinate strategic planning efforts with internal and external partners

The tag is: *misp-galaxy:nice-framework-tasks="Coordinate strategic planning efforts with internal and external partners - T1779"*

Develop cyber operations strategies - T1794

Develop cyber operations strategies

The tag is: *misp-galaxy:nice-framework-tasks="Develop cyber operations strategies - T1794"*

Advise stakeholders on administrative and logistical elements of operational support plans - T1797

Advise stakeholders on administrative and logistical elements of operational support plans

The tag is: *misp-galaxy:nice-framework-tasks="Advise stakeholders on administrative and logistical elements of operational support plans - T1797"*

Recommend changes to operational plans - T1800

Recommend changes to operational plans

The tag is: *misp-galaxy:nice-framework-tasks="Recommend changes to operational plans - T1800"*

Approve operational requirements for research, development, and acquisition of cyber capabilities - T1810

Approve operational requirements for research, development, and acquisition of cyber capabilities

The tag is: *misp-galaxy:nice-framework-tasks="Approve operational requirements for research, development, and acquisition of cyber capabilities - T1810"*

Prioritize operational requirements for research, development, and acquisition of cyber capabilities - T1811

Prioritize operational requirements for research, development, and acquisition of cyber capabilities

The tag is: *misp-galaxy:nice-framework-tasks="Prioritize operational requirements for research, development, and acquisition of cyber capabilities - T1811"*

Submit operational requirements for research, development, and acquisition of cyber capabilities - T1812

Submit operational requirements for research, development, and acquisition of cyber capabilities

The tag is: *misp-galaxy:nice-framework-tasks="Submit operational requirements for research, development, and acquisition of cyber capabilities - T1812"*

Submit requests for deconfliction of cyber operations - T1822

Submit requests for deconfliction of cyber operations

The tag is: *misp-galaxy:nice-framework-tasks="Submit requests for deconfliction of cyber operations - T1822"*

Respond to requests for deconfliction of cyber operations - T1823

Respond to requests for deconfliction of cyber operations

The tag is: *misp-galaxy:nice-framework-tasks="Respond to requests for deconfliction of cyber operations - T1823"*

Determine if intelligence requirements and collection plans are accurate and up-to-date - T1835

Determine if intelligence requirements and collection plans are accurate and up-to-date

The tag is: *misp-galaxy:nice-framework-tasks="Determine if intelligence requirements and collection plans are accurate and up-to-date - T1835"*

Document lessons learned during events and exercises - T1836

Document lessons learned during events and exercises

The tag is: *misp-galaxy:nice-framework-tasks="Document lessons learned during events and exercises - T1836"*

Develop test plans to address specifications and requirements - T0080

Develop test plans to address specifications and requirements

The tag is: *misp-galaxy:nice-framework-tasks="Develop test plans to address specifications and requirements - T0080"*

Create auditable evidence of security measures - T0274

Create auditable evidence of security measures

The tag is: *misp-galaxy:nice-framework-tasks="Create auditable evidence of security measures - T0274"*

Perform interoperability testing on systems exchanging electronic information with other systems - T0512

Perform interoperability testing on systems exchanging electronic information with other systems

The tag is: *misp-galaxy:nice-framework-tasks="Perform interoperability testing on systems exchanging electronic information with other systems - T0512"*

Perform operational testing - T0513

Perform operational testing

The tag is: *misp-galaxy:nice-framework-tasks="Perform operational testing - T0513"*

Determine appropriate level of test rigor for a given system - T1049

Determine appropriate level of test rigor for a given system

The tag is: *misp-galaxy:nice-framework-tasks="Determine appropriate level of test rigor for a given system - T1049"*

Determine level of assurance of developed capabilities - T1136

Determine level of assurance of developed capabilities

The tag is: *misp-galaxy:nice-framework-tasks="Determine level of assurance of developed capabilities - T1136"*

Implement new system design procedures - T1208

Implement new system design procedures

The tag is: *misp-galaxy:nice-framework-tasks="Implement new system design procedures - T1208"*

Implement new system test procedures - T1209

Implement new system test procedures

The tag is: *misp-galaxy:nice-framework-tasks="Implement new system test procedures - T1209"*

Implement new system quality standards - T1210

Implement new system quality standards

The tag is: *misp-galaxy:nice-framework-tasks="Implement new system quality standards - T1210"*

Install network infrastructure device operating system software - T1214

Install network infrastructure device operating system software

The tag is: *misp-galaxy:nice-framework-tasks="Install network infrastructure device operating system software - T1214"*

Maintain network infrastructure device operating system software - T1215

Maintain network infrastructure device operating system software

The tag is: *misp-galaxy:nice-framework-tasks="Maintain network infrastructure device operating system software - T1215"*

Perform cybersecurity testing of developed applications and systems - T1255

Perform cybersecurity testing of developed applications and systems

The tag is: *misp-galaxy:nice-framework-tasks="Perform cybersecurity testing of developed applications and systems - T1255"*

Determine if system requirements are adequately demonstrated in data samples - T1346

Determine if system requirements are adequately demonstrated in data samples

The tag is: *misp-galaxy:nice-framework-tasks="Determine if system requirements are adequately demonstrated in data samples - T1346"*

Establish testing specifications and requirements - T1484

Establish testing specifications and requirements

The tag is: *misp-galaxy:nice-framework-tasks="Establish testing specifications and requirements - T1484"*

Analyze software and hardware testing results - T1506

Analyze software and hardware testing results

The tag is: *misp-galaxy:nice-framework-tasks="Analyze software and hardware testing results -*

T1506"

Perform cybersecurity testing on systems in development - T1587

Perform cybersecurity testing on systems in development

The tag is: *misp-galaxy:nice-framework-tasks="Perform cybersecurity testing on systems in development - T1587"*

Determine if hardware and software complies with defined specifications and requirements - T1610

Determine if hardware and software complies with defined specifications and requirements

The tag is: *misp-galaxy:nice-framework-tasks="Determine if hardware and software complies with defined specifications and requirements - T1610"*

Record test data - T1611

Record test data

The tag is: *misp-galaxy:nice-framework-tasks="Record test data - T1611"*

Manage test data - T1612

Manage test data

The tag is: *misp-galaxy:nice-framework-tasks="Manage test data - T1612"*

Evaluate locally developed tools - T1829

Evaluate locally developed tools

The tag is: *misp-galaxy:nice-framework-tasks="Evaluate locally developed tools - T1829"*

Validate data mining and data warehousing programs, processes, and requirements - T1142

Validate data mining and data warehousing programs, processes, and requirements

The tag is: *misp-galaxy:nice-framework-tasks="Validate data mining and data warehousing programs, processes, and requirements - T1142"*

Identify system and network capabilities - T1337

Identify system and network capabilities

The tag is: *misp-galaxy:nice-framework-tasks="Identify system and network capabilities - T1337"*

Develop cybersecurity capability strategies for custom hardware and software development - T1338

Develop cybersecurity capability strategies for custom hardware and software development

The tag is: *misp-galaxy:nice-framework-tasks="Develop cybersecurity capability strategies for custom hardware and software development - T1338"*

Identify cybersecurity solutions tools and technologies - T1378

Identify cybersecurity solutions tools and technologies

The tag is: *misp-galaxy:nice-framework-tasks="Identify cybersecurity solutions tools and technologies - T1378"*

Design cybersecurity tools and technologies - T1379

Design cybersecurity tools and technologies

The tag is: *misp-galaxy:nice-framework-tasks="Design cybersecurity tools and technologies - T1379"*

Develop cybersecurity tools and technologies - T1380

Develop cybersecurity tools and technologies

The tag is: *misp-galaxy:nice-framework-tasks="Develop cybersecurity tools and technologies - T1380"*

Evaluate network infrastructure vulnerabilities - T1424

Evaluate network infrastructure vulnerabilities

The tag is: *misp-galaxy:nice-framework-tasks="Evaluate network infrastructure vulnerabilities - T1424"*

Recommend network infrastructure enhancements - T1425

Recommend network infrastructure enhancements

The tag is: *misp-galaxy:nice-framework-tasks="Recommend network infrastructure enhancements - T1425"*

Design data management systems - T1491

Design data management systems

The tag is: *misp-galaxy:nice-framework-tasks="Design data management systems - T1491"*

Troubleshoot prototype design and process issues - T1493

Troubleshoot prototype design and process issues

The tag is: *misp-galaxy:nice-framework-tasks="Troubleshoot prototype design and process issues - T1493"*

Recommend vulnerability exploitation functional and security-related features - T1494

Recommend vulnerability exploitation functional and security-related features

The tag is: *misp-galaxy:nice-framework-tasks="Recommend vulnerability exploitation functional and security-related features - T1494"*

Recommend vulnerability mitigation functional- and security-related features - T1495

Recommend vulnerability mitigation functional- and security-related features

The tag is: *misp-galaxy:nice-framework-tasks="Recommend vulnerability mitigation functional- and security-related features - T1495"*

Develop reverse engineering tools - T1496

Develop reverse engineering tools

The tag is: *misp-galaxy:nice-framework-tasks="Develop reverse engineering tools - T1496"*

Translate functional requirements into technical solutions - T0235

Translate functional requirements into technical solutions

The tag is: *misp-galaxy:nice-framework-tasks="Translate functional requirements into technical solutions - T0235"*

Identify critical technology procurement requirements - T1023

Identify critical technology procurement requirements

The tag is: *misp-galaxy:nice-framework-tasks="Identify critical technology procurement requirements - T1023"*

Implement intelligence collection requirements - T1031

Implement intelligence collection requirements

The tag is: *misp-galaxy:nice-framework-tasks="Implement intelligence collection requirements - T1031"*

Determine functional requirements and specifications - T1097

Determine functional requirements and specifications

The tag is: *misp-galaxy:nice-framework-tasks="Determine functional requirements and specifications - T1097"*

Evaluate functional requirements - T1107

Evaluate functional requirements

The tag is: *misp-galaxy:nice-framework-tasks="Evaluate functional requirements - T1107"*

Oversee the development of design solutions - T1115

Oversee the development of design solutions

The tag is: *misp-galaxy:nice-framework-tasks="Oversee the development of design solutions - T1115"*

Define project scope and objectives - T1127

Define project scope and objectives

The tag is: *misp-galaxy:nice-framework-tasks="Define project scope and objectives - T1127"*

Develop systems design procedures and processes - T1139

Develop systems design procedures and processes

The tag is: *misp-galaxy:nice-framework-tasks="Develop systems design procedures and processes - T1139"*

Determine if system analysis meets cybersecurity requirements - T1217

Determine if system analysis meets cybersecurity requirements

The tag is: *misp-galaxy:nice-framework-tasks="Determine if system analysis meets cybersecurity requirements - T1217"*

Oversee configuration management - T1243

Oversee configuration management

The tag is: *misp-galaxy:nice-framework-tasks="Oversee configuration management - T1243"*

Develop configuration management recommendations - T1244

Develop configuration management recommendations

The tag is: *misp-galaxy:nice-framework-tasks="Develop configuration management recommendations - T1244"*

Identify opportunities for new and improved business process solutions - T1259

Identify opportunities for new and improved business process solutions

The tag is: *misp-galaxy:nice-framework-tasks="Identify opportunities for new and improved business process solutions - T1259"*

Develop cybersecurity use cases - T1283

Develop cybersecurity use cases

The tag is: *misp-galaxy:nice-framework-tasks="Develop cybersecurity use cases - T1283"*

Identify supply chain risks for critical system elements - T1366

Identify supply chain risks for critical system elements

The tag is: *misp-galaxy:nice-framework-tasks="Identify supply chain risks for critical system elements - T1366"*

Document supply chain risks for critical system elements - T1367

Document supply chain risks for critical system elements

The tag is: *misp-galaxy:nice-framework-tasks="Document supply chain risks for critical system elements - T1367"*

Develop user experience requirements - T1392

Develop user experience requirements

The tag is: *misp-galaxy:nice-framework-tasks="Develop user experience requirements - T1392"*

Document user experience requirements - T1393

Document user experience requirements

The tag is: *misp-galaxy:nice-framework-tasks="Document user experience requirements - T1393"*

Develop quality standards - T1408

Develop quality standards

The tag is: *misp-galaxy:nice-framework-tasks="Develop quality standards - T1408"*

Document quality standards - T1409

Document quality standards

The tag is: *misp-galaxy:nice-framework-tasks="Document quality standards - T1409"*

Determine if system components can be aligned - T1430

Determine if system components can be aligned

The tag is: *misp-galaxy:nice-framework-tasks="Determine if system components can be aligned - T1430"*

Integrate system components - T1431

Integrate system components

The tag is: *misp-galaxy:nice-framework-tasks="Integrate system components - T1431"*

Develop cost estimates for new or modified systems - T1534

Develop cost estimates for new or modified systems

The tag is: *misp-galaxy:nice-framework-tasks="Develop cost estimates for new or modified systems - T1534"*

Determine if developed solutions meet customer requirements - T1573

Determine if developed solutions meet customer requirements

The tag is: *misp-galaxy:nice-framework-tasks="Determine if developed solutions meet customer requirements - T1573"*

Prepare trend analysis reports - T1429

Prepare trend analysis reports

The tag is: *misp-galaxy:nice-framework-tasks="Prepare trend analysis reports - T1429"*

Address security architecture gaps - T1591

Address security architecture gaps

The tag is: *misp-galaxy:nice-framework-tasks="Address security architecture gaps - T1591"*

Plan implementation strategies - T1597

Plan implementation strategies

The tag is: *misp-galaxy:nice-framework-tasks="Plan implementation strategies - T1597"*

Assess the integration and alignment capabilities of enterprise components - T1598

Assess the integration and alignment capabilities of enterprise components

The tag is: *misp-galaxy:nice-framework-tasks="Assess the integration and alignment capabilities of enterprise components - T1598"*

Prepare impact reports - T1606

Prepare impact reports

The tag is: *misp-galaxy:nice-framework-tasks="Prepare impact reports - T1606"*

Determine impact of new systems and system interfaces on current and target environments - T1626

Determine impact of new systems and system interfaces on current and target environments

The tag is: *misp-galaxy:nice-framework-tasks="Determine impact of new systems and system interfaces on current and target environments - T1626"*

Integrate black-box security testing tools into quality assurance processes - T1052

Integrate black-box security testing tools into quality assurance processes

The tag is: *misp-galaxy:nice-framework-tasks="Integrate black-box security testing tools into quality assurance processes - T1052"*

Develop threat models - T1106

Develop threat models

The tag is: *misp-galaxy:nice-framework-tasks="Develop threat models - T1106"*

Determine security requirements for new information technologies - T1222

Determine security requirements for new information technologies

The tag is: *misp-galaxy:nice-framework-tasks="Determine security requirements for new information technologies - T1222"*

Determine security requirements for new operational technologies - T1223

Determine security requirements for new operational technologies

The tag is: *misp-galaxy:nice-framework-tasks="Determine security requirements for new operational technologies - T1223"*

Identify system cybersecurity requirements - T1354

Identify system cybersecurity requirements

The tag is: *misp-galaxy:nice-framework-tasks="Identify system cybersecurity requirements - T1354"*

Perform penetration testing - T1359

Perform penetration testing

The tag is: *misp-galaxy:nice-framework-tasks="Perform penetration testing - T1359"*

Identify programming flaws - T1590

Identify programming flaws

The tag is: *misp-galaxy:nice-framework-tasks="Identify programming flaws - T1590"*

Determine customer requirements - T1658

Determine customer requirements

The tag is: *misp-galaxy:nice-framework-tasks="Determine customer requirements - T1658"*

Identify system security requirements - T1913

Identify system security requirements

The tag is: *misp-galaxy:nice-framework-tasks="Identify system security requirements - T1913"*

Provide real-time actionable geolocation information - T0796

Provide real-time actionable geolocation information

The tag is: *misp-galaxy:nice-framework-tasks="Provide real-time actionable geolocation information - T0796"*

Prepare deconfliction report - T1034

Prepare deconfliction report

The tag is: *misp-galaxy:nice-framework-tasks="Prepare deconfliction report - T1034"*

Determine how threat activity groups employ encryption to support their operations - T1035

Determine how threat activity groups employ encryption to support their operations

The tag is: *misp-galaxy:nice-framework-tasks="Determine how threat activity groups employ encryption to support their operations - T1035"*

Identify network artifacts from hardware and software options - T1039

Identify network artifacts from hardware and software options

The tag is: *misp-galaxy:nice-framework-tasks="Identify network artifacts from hardware and software options - T1039"*

Identify impact of network artifacts on exploitation - T1040

Identify impact of network artifacts on exploitation

The tag is: *misp-galaxy:nice-framework-tasks="Identify impact of network artifacts on exploitation - T1040"*

Identify target operational architecture vulnerabilities - T1633

Identify target operational architecture vulnerabilities

The tag is: *misp-galaxy:nice-framework-tasks="Identify target operational architecture vulnerabilities - T1633"*

Identify potential avenues of access in digital technologies - T1663

Identify potential avenues of access in digital technologies

The tag is: *misp-galaxy:nice-framework-tasks="Identify potential avenues of access in digital technologies - T1663"*

Access wireless computer and digital networks - T1664

Access wireless computer and digital networks

The tag is: *misp-galaxy:nice-framework-tasks="Access wireless computer and digital networks - T1664"*

Process intelligence collection data - T1665

Process intelligence collection data

The tag is: *misp-galaxy:nice-framework-tasks="Process intelligence collection data - T1665"*

Exploit wireless computer and digital networks - T1666

Exploit wireless computer and digital networks

The tag is: *misp-galaxy:nice-framework-tasks="Exploit wireless computer and digital networks - T1666"*

Conduct network scouting - T1668

Conduct network scouting

The tag is: *misp-galaxy:nice-framework-tasks="Conduct network scouting - T1668"*

Analyze system vulnerabilities within a network - T1669

Analyze system vulnerabilities within a network

The tag is: *misp-galaxy:nice-framework-tasks="Analyze system vulnerabilities within a network - T1669"*

Conduct on-net activities - T1670

Conduct on-net activities

The tag is: *misp-galaxy:nice-framework-tasks="Conduct on-net activities - T1670"*

Exfiltrate data from deployed technologies - T1671

Exfiltrate data from deployed technologies

The tag is: *misp-galaxy:nice-framework-tasks="Exfiltrate data from deployed technologies - T1671"*

Conduct off-net activities - T1672

Conduct off-net activities

The tag is: *misp-galaxy:nice-framework-tasks="Conduct off-net activities - T1672"*

Exfiltrate data from automated technologies - T1673

Exfiltrate data from automated technologies

The tag is: *misp-galaxy:nice-framework-tasks="Exfiltrate data from automated technologies - T1673"*

Perform open source data collection - T1674

Perform open source data collection

The tag is: *misp-galaxy:nice-framework-tasks="Perform open source data collection - T1674"*

Survey computer and digital networks - T1676

Survey computer and digital networks

The tag is: *misp-galaxy:nice-framework-tasks="Survey computer and digital networks - T1676"*

Detect exploits against targeted networks and hosts - T1691

Detect exploits against targeted networks and hosts

The tag is: *misp-galaxy:nice-framework-tasks="Detect exploits against targeted networks and hosts - T1691"*

Counter exploits against targeted networks and hosts - T1692

Counter exploits against targeted networks and hosts

The tag is: *misp-galaxy:nice-framework-tasks="Counter exploits against targeted networks and hosts - T1692"*

Develop new techniques for accessing target systems - T1709

Develop new techniques for accessing target systems

The tag is: *misp-galaxy:nice-framework-tasks="Develop new techniques for accessing target systems -*

T1709"

Exploit network devices and terminals - T1734

Exploit network devices and terminals

The tag is: *misp-galaxy:nice-framework-tasks="Exploit network devices and terminals - T1734"*

Identify system vulnerabilities within a network - T1747

Identify system vulnerabilities within a network

The tag is: *misp-galaxy:nice-framework-tasks="Identify system vulnerabilities within a network - T1747"*

Maintain situational awareness of organic operational infrastructure - T1759

Maintain situational awareness of organic operational infrastructure

The tag is: *misp-galaxy:nice-framework-tasks="Maintain situational awareness of organic operational infrastructure - T1759"*

Maintain functionality of organic operational infrastructure - T1760

Maintain functionality of organic operational infrastructure

The tag is: *misp-galaxy:nice-framework-tasks="Maintain functionality of organic operational infrastructure - T1760"*

Gain and maintain access to target systems - T1774

Gain and maintain access to target systems

The tag is: *misp-galaxy:nice-framework-tasks="Gain and maintain access to target systems - T1774"*

Degrade or remove data from networks and computers - T1781

Degrade or remove data from networks and computers

The tag is: *misp-galaxy:nice-framework-tasks="Degrade or remove data from networks and computers - T1781"*

Process exfiltrated data - T1784

Process exfiltrated data

The tag is: *misp-galaxy:nice-framework-tasks="Process exfiltrated data - T1784"*

Document information collection and environment activities - T1803

Document information collection and environment activities

The tag is: *misp-galaxy:nice-framework-tasks="Document information collection and environment activities - T1803"*

Test internally developed software - T1830

Test internally developed software

The tag is: *misp-galaxy:nice-framework-tasks="Test internally developed software - T1830"*

Perform analysis for target infrastructure exploitation activities - T0591

Perform analysis for target infrastructure exploitation activities

The tag is: *misp-galaxy:nice-framework-tasks="Perform analysis for target infrastructure exploitation activities - T0591"*

Produce network reconstructions - T0775

Produce network reconstructions

The tag is: *misp-galaxy:nice-framework-tasks="Produce network reconstructions - T0775"*

Expand network access - T1012

Expand network access

The tag is: *misp-galaxy:nice-framework-tasks="Expand network access - T1012"*

Conduct technical exploitation of a target - T1013

Conduct technical exploitation of a target

The tag is: *misp-galaxy:nice-framework-tasks="Conduct technical exploitation of a target - T1013"*

Perform authorized penetration testing on enterprise network assets - T1091

Perform authorized penetration testing on enterprise network assets

The tag is: *misp-galaxy:nice-framework-tasks="Perform authorized penetration testing on enterprise network assets - T1091"*

Track targets - T1211

Track targets

The tag is: *misp-galaxy:nice-framework-tasks="Track targets - T1211"*

Access targeted networks - T1635

Access targeted networks

The tag is: *misp-galaxy:nice-framework-tasks="Access targeted networks - T1635"*

Conduct independent in-depth target and technical analysis - T1667

Conduct independent in-depth target and technical analysis

The tag is: *misp-galaxy:nice-framework-tasks="Conduct independent in-depth target and technical analysis - T1667"*

Develop intelligence collection plans - T1677

Develop intelligence collection plans

The tag is: *misp-galaxy:nice-framework-tasks="Develop intelligence collection plans - T1677"*

Create comprehensive exploitation strategies - T1689

Create comprehensive exploitation strategies

The tag is: *misp-galaxy:nice-framework-tasks="Create comprehensive exploitation strategies - T1689"*

Identify exploitable technical or operational vulnerabilities - T1690

Identify exploitable technical or operational vulnerabilities

The tag is: *misp-galaxy:nice-framework-tasks="Identify exploitable technical or operational*

vulnerabilities - T1690"

Communicate tool requirements to developers - T1736

Communicate tool requirements to developers

The tag is: *misp-galaxy:nice-framework-tasks="Communicate tool requirements to developers - T1736"*

Identify gaps in understanding of target technology - T1745

Identify gaps in understanding of target technology

The tag is: *misp-galaxy:nice-framework-tasks="Identify gaps in understanding of target technology - T1745"*

Locate targets - T1751

Locate targets

The tag is: *misp-galaxy:nice-framework-tasks="Locate targets - T1751"*

Coordinate exploitation operations - T1757

Coordinate exploitation operations

The tag is: *misp-galaxy:nice-framework-tasks="Coordinate exploitation operations - T1757"*

Determine potential implications of new and emerging hardware and software technologies - T1758

Determine potential implications of new and emerging hardware and software technologies

The tag is: *misp-galaxy:nice-framework-tasks="Determine potential implications of new and emerging hardware and software technologies - T1758"*

Identify indications and warnings of target communication changes or processing failures - T1772

Identify indications and warnings of target communication changes or processing failures

The tag is: *misp-galaxy:nice-framework-tasks="Identify indications and warnings of target communication changes or processing failures - T1772"*

Profile network administrators and their activities - T1785

Profile network administrators and their activities

The tag is: *misp-galaxy:nice-framework-tasks="Profile network administrators and their activities - T1785"*

Conduct end-of-operations assessments - T0611

Conduct end-of-operations assessments

The tag is: *misp-galaxy:nice-framework-tasks="Conduct end-of-operations assessments - T0611"*

Conduct target research and analysis - T0624

Conduct target research and analysis

The tag is: *misp-galaxy:nice-framework-tasks="Conduct target research and analysis - T0624"*

Estimate operational effects generated through cyber activities - T0684

Estimate operational effects generated through cyber activities

The tag is: *misp-galaxy:nice-framework-tasks="Estimate operational effects generated through cyber activities - T0684"*

Evaluate threat decision-making processes - T0685

Evaluate threat decision-making processes

The tag is: *misp-galaxy:nice-framework-tasks="Evaluate threat decision-making processes - T0685"*

Identify threat vulnerabilities - T0686

Identify threat vulnerabilities

The tag is: *misp-galaxy:nice-framework-tasks="Identify threat vulnerabilities - T0686"*

Generate requests for information - T0707

Generate requests for information

The tag is: *misp-galaxy:nice-framework-tasks="Generate requests for information - T0707"*

Identify and characterize intrusion activities against a victim or target - T1053

Identify and characterize intrusion activities against a victim or target

The tag is: *misp-galaxy:nice-framework-tasks="Identify and characterize intrusion activities against a victim or target - T1053"*

Recommend cyber operation targets - T1638

Recommend cyber operation targets

The tag is: *misp-galaxy:nice-framework-tasks="Recommend cyber operation targets - T1638"*

Determine effectiveness of intelligence collection operations - T1640

Determine effectiveness of intelligence collection operations

The tag is: *misp-galaxy:nice-framework-tasks="Determine effectiveness of intelligence collection operations - T1640"*

Recommend adjustments to intelligence collection strategies - T1641

Recommend adjustments to intelligence collection strategies

The tag is: *misp-galaxy:nice-framework-tasks="Recommend adjustments to intelligence collection strategies - T1641"*

Advise stakeholders on course of action development - T1642

Advise stakeholders on course of action development

The tag is: *misp-galaxy:nice-framework-tasks="Advise stakeholders on course of action development - T1642"*

Develop common operational pictures - T1643

Develop common operational pictures

The tag is: *misp-galaxy:nice-framework-tasks="Develop common operational pictures - T1643"*

Coordinate all-source collection activities - T1645

Coordinate all-source collection activities

The tag is: *misp-galaxy:nice-framework-tasks="Coordinate all-source collection activities - T1645"*

Validate all-source collection requirements and plans - T1646

Validate all-source collection requirements and plans

The tag is: *misp-galaxy:nice-framework-tasks="Validate all-source collection requirements and plans - T1646"*

Develop priority information requirements - T1647

Develop priority information requirements

The tag is: *misp-galaxy:nice-framework-tasks="Develop priority information requirements - T1647"*

Develop performance success metrics - T1648

Develop performance success metrics

The tag is: *misp-galaxy:nice-framework-tasks="Develop performance success metrics - T1648"*

Prepare threat and target briefings - T1651

Prepare threat and target briefings

The tag is: *misp-galaxy:nice-framework-tasks="Prepare threat and target briefings - T1651"*

Prepare threat and target situational updates - T1652

Prepare threat and target situational updates

The tag is: *misp-galaxy:nice-framework-tasks="Prepare threat and target situational updates - T1652"*

Assess all-source data for intelligence or vulnerability value - T1661

Assess all-source data for intelligence or vulnerability value

The tag is: *misp-galaxy:nice-framework-tasks="Assess all-source data for intelligence or vulnerability value - T1661"*

Identify intelligence requirements - T1686

Identify intelligence requirements

The tag is: *misp-galaxy:nice-framework-tasks="Identify intelligence requirements - T1686"*

Prepare munitions effectiveness assessment reports - T1707

Prepare munitions effectiveness assessment reports

The tag is: *misp-galaxy:nice-framework-tasks="Prepare munitions effectiveness assessment reports - T1707"*

Modify collection requirements - T1762

Modify collection requirements

The tag is: *misp-galaxy:nice-framework-tasks="Modify collection requirements - T1762"*

Determine effectiveness of collection requirements - T1763

Determine effectiveness of collection requirements

The tag is: *misp-galaxy:nice-framework-tasks="Determine effectiveness of collection requirements - T1763"*

Monitor changes to designated cyber operations warning problem sets - T1765

Monitor changes to designated cyber operations warning problem sets

The tag is: *misp-galaxy:nice-framework-tasks="Monitor changes to designated cyber operations warning problem sets - T1765"*

Prepare change reports for designated cyber operations warning problem sets - T1766

Prepare change reports for designated cyber operations warning problem sets

The tag is: *misp-galaxy:nice-framework-tasks="Prepare change reports for designated cyber operations warning problem sets - T1766"*

Monitor threat activities - T1767

Monitor threat activities

The tag is: *misp-galaxy:nice-framework-tasks="Monitor threat activities - T1767"*

Prepare threat activity reports - T1768

Prepare threat activity reports

The tag is: *misp-galaxy:nice-framework-tasks="Prepare threat activity reports - T1768"*

Report on adversarial activities that fulfill priority information requirements - T1770

Report on adversarial activities that fulfill priority information requirements

The tag is: *misp-galaxy:nice-framework-tasks="Report on adversarial activities that fulfill priority information requirements - T1770"*

Prepare cyber operations intelligence reports - T1775

Prepare cyber operations intelligence reports

The tag is: *misp-galaxy:nice-framework-tasks="Prepare cyber operations intelligence reports - T1775"*

Prepare indications and warnings intelligence reports - T1776

Prepare indications and warnings intelligence reports

The tag is: *misp-galaxy:nice-framework-tasks="Prepare indications and warnings intelligence reports - T1776"*

Asssess effectiveness of intelligence production - T1792

Asssess effectiveness of intelligence production

The tag is: *misp-galaxy:nice-framework-tasks="Asssess effectiveness of intelligence production - T1792"*

Asssess effectiveness of intelligence reporting - T1793

Asssess effectiveness of intelligence reporting

The tag is: *misp-galaxy:nice-framework-tasks="Asssess effectiveness of intelligence reporting - T1793"*

Conduct post-action effectiveness assessments - T1795

Conduct post-action effectiveness assessments

The tag is: *misp-galaxy:nice-framework-tasks="Conduct post-action effectiveness assessments - T1795"*

Determine what technologies are used by a given target - T0650

Determine what technologies are used by a given target

The tag is: *misp-galaxy:nice-framework-tasks="Determine what technologies are used by a given target - T0650"*

Identify critical target elements - T0717

Identify critical target elements

The tag is: *misp-galaxy:nice-framework-tasks="Identify critical target elements - T0717"*

Maintain target lists (i.e., RTL, JTL, CTL, etc.) - T0744

Maintain target lists (i.e., RTL, JTL, CTL, etc.)

The tag is: *misp-galaxy:nice-framework-tasks="Maintain target lists (i.e., RTL, JTL, CTL, etc.) - T0744"*

Perform targeting automation activities - T0769

Perform targeting automation activities

The tag is: *misp-galaxy:nice-framework-tasks="Perform targeting automation activities - T0769"*

Produce target system analysis products - T0776

Produce target system analysis products

The tag is: *misp-galaxy:nice-framework-tasks="Produce target system analysis products - T0776"*

Profile targets and their activities - T0778

Profile targets and their activities

The tag is: *misp-galaxy:nice-framework-tasks="Profile targets and their activities - T0778"*

Determine cyber operation objectives - T1032

Determine cyber operation objectives

The tag is: *misp-galaxy:nice-framework-tasks="Determine cyber operation objectives - T1032"*

Acquire target identifiers - T1042

Acquire target identifiers

The tag is: *misp-galaxy:nice-framework-tasks="Acquire target identifiers - T1042"*

Identify potential threats to network resources - T1085

Identify potential threats to network resources

The tag is: *misp-galaxy:nice-framework-tasks="Identify potential threats to network resources - T1085"*

Prepare target analysis reports - T1629

Prepare target analysis reports

The tag is: *misp-galaxy:nice-framework-tasks="Prepare target analysis reports - T1629"*

Build electronic target folders - T1653

Build electronic target folders

The tag is: *misp-galaxy:nice-framework-tasks="Build electronic target folders - T1653"*

Maintain electronic target folders - T1654

Maintain electronic target folders

The tag is: *misp-galaxy:nice-framework-tasks="Maintain electronic target folders - T1654"*

Vet targets with partners - T1683

Vet targets with partners

The tag is: *misp-galaxy:nice-framework-tasks="Vet targets with partners - T1683"*

Prepare all-source intelligence targeting reports - T1697

Prepare all-source intelligence targeting reports

The tag is: *misp-galaxy:nice-framework-tasks="Prepare all-source intelligence targeting reports - T1697"*

Initiate requests to guide tasking - T1754

Initiate requests to guide tasking

The tag is: *misp-galaxy:nice-framework-tasks="Initiate requests to guide tasking - T1754"*

Develop website characterizations - T1782

Develop website characterizations

The tag is: *misp-galaxy:nice-framework-tasks="Develop website characterizations - T1782"*

Provide aim point recommendations for targets - T1789

Provide aim point recommendations for targets

The tag is: *misp-galaxy:nice-framework-tasks="Provide aim point recommendations for targets - T1789"*

Provide reengagement recommendations - T1790

Provide reengagement recommendations

The tag is: *misp-galaxy:nice-framework-tasks="Provide reengagement recommendations - T1790"*

Determine effectiveness of targeting activities - T1796

Determine effectiveness of targeting activities

The tag is: *misp-galaxy:nice-framework-tasks="Determine effectiveness of targeting activities - T1796"*

Determine validity and relevance of information - T1801

Determine validity and relevance of information

The tag is: *misp-galaxy:nice-framework-tasks="Determine validity and relevance of information -*

T1801"

Protect information sources and methods - T1814

Protect information sources and methods

The tag is: *misp-galaxy:nice-framework-tasks="Protect information sources and methods - T1814"*

Identify cyber collateral damage - T1824

Identify cyber collateral damage

The tag is: *misp-galaxy:nice-framework-tasks="Identify cyber collateral damage - T1824"*

Document cyber collateral damage - T1825

Document cyber collateral damage

The tag is: *misp-galaxy:nice-framework-tasks="Document cyber collateral damage - T1825"*

Classify documents - T1655

Classify documents

The tag is: *misp-galaxy:nice-framework-tasks="Classify documents - T1655"*

Identify information essential to intelligence collection operations - T1662

Identify information essential to intelligence collection operations

The tag is: *misp-galaxy:nice-framework-tasks="Identify information essential to intelligence collection operations - T1662"*

Determine validity and relevance of information gathered about networks - T1675

Determine validity and relevance of information gathered about networks

The tag is: *misp-galaxy:nice-framework-tasks="Determine validity and relevance of information gathered about networks - T1675"*

Collect target information - T1698

Collect target information

The tag is: *misp-galaxy:nice-framework-tasks="Collect target information - T1698"*

Determine effectiveness of network analysis strategies - T1732

Determine effectiveness of network analysis strategies

The tag is: *misp-galaxy:nice-framework-tasks="Determine effectiveness of network analysis strategies - T1732"*

Develop intelligence collection strategies - T1737

Develop intelligence collection strategies

The tag is: *misp-galaxy:nice-framework-tasks="Develop intelligence collection strategies - T1737"*

Identify information collection gaps - T1743

Identify information collection gaps

The tag is: *misp-galaxy:nice-framework-tasks="Identify information collection gaps - T1743"*

Prepare network reports - T1802

Prepare network reports

The tag is: *misp-galaxy:nice-framework-tasks="Prepare network reports - T1802"*

Research communications trends in emerging technologies - T1806

Research communications trends in emerging technologies

The tag is: *misp-galaxy:nice-framework-tasks="Research communications trends in emerging technologies - T1806"*

Analyze target communications - T1840

Analyze target communications

The tag is: *misp-galaxy:nice-framework-tasks="Analyze target communications - T1840"*

Inform external partners of the potential effects of new or revised policy and guidance on cyber operations partnering activities - T0729

Inform external partners of the potential effects of new or revised policy and guidance on cyber operations partnering activities

The tag is: *misp-galaxy:nice-framework-tasks="Inform external partners of the potential effects of new or revised policy and guidance on cyber operations partnering activities - T0729"*

Serve as a liaison with external partners - T0818

Serve as a liaison with external partners

The tag is: *misp-galaxy:nice-framework-tasks="Serve as a liaison with external partners - T0818"*

Synchronize intelligence support plans across partner organizations - T1649

Synchronize intelligence support plans across partner organizations

The tag is: *misp-galaxy:nice-framework-tasks="Synchronize intelligence support plans across partner organizations - T1649"*

Develop a diverse program of information materials - T1657

Develop a diverse program of information materials

The tag is: *misp-galaxy:nice-framework-tasks="Develop a diverse program of information materials - T1657"*

Develop cyber operations staffing policies - T1680

Develop cyber operations staffing policies

The tag is: *misp-galaxy:nice-framework-tasks="Develop cyber operations staffing policies - T1680"*

Develop international cybersecurity strategies, policies, and activities to meet organizational objectives - T1711

Develop international cybersecurity strategies, policies, and activities to meet organizational objectives

The tag is: *misp-galaxy:nice-framework-tasks="Develop international cybersecurity strategies, policies, and activities to meet organizational objectives - T1711"*

Develop partner planning strategies and processes - T1714

Develop partner planning strategies and processes

The tag is: *misp-galaxy:nice-framework-tasks="Develop partner planning strategies and processes - T1714"*

Develop operations strategies and processes - T1715

Develop operations strategies and processes

The tag is: *misp-galaxy:nice-framework-tasks="Develop operations strategies and processes - T1715"*

Develop capability development strategies and processes - T1716

Develop capability development strategies and processes

The tag is: *misp-galaxy:nice-framework-tasks="Develop capability development strategies and processes - T1716"*

Develop cybersecurity cooperation agreements with external partners - T1719

Develop cybersecurity cooperation agreements with external partners

The tag is: *misp-galaxy:nice-framework-tasks="Develop cybersecurity cooperation agreements with external partners - T1719"*

Maintain cybersecurity cooperation agreements with external partners - T1720

Maintain cybersecurity cooperation agreements with external partners

The tag is: *misp-galaxy:nice-framework-tasks="Maintain cybersecurity cooperation agreements with external partners - T1720"*

Assess cybersecurity cooperation agreements with external partners - T1721

Assess cybersecurity cooperation agreements with external partners

The tag is: *misp-galaxy:nice-framework-tasks="Assess cybersecurity cooperation agreements with external partners - T1721"*

Identify security cooperation priorities - T1740

Identify security cooperation priorities

The tag is: *misp-galaxy:nice-framework-tasks="Identify security cooperation priorities - T1740"*

Conduct policy reviews - T1777

Conduct policy reviews

The tag is: *misp-galaxy:nice-framework-tasks="Conduct policy reviews - T1777"*

Assess the consequences of endorsing or not endorsing policies - T1778

Assess the consequences of endorsing or not endorsing policies

The tag is: *misp-galaxy:nice-framework-tasks="Assess the consequences of endorsing or not endorsing policies - T1778"*

Develop external coordination policies - T1780

Develop external coordination policies

The tag is: *misp-galaxy:nice-framework-tasks="Develop external coordination policies - T1780"*

Provide cyber recommendations to intelligence support planning - T1791

Provide cyber recommendations to intelligence support planning

The tag is: *misp-galaxy:nice-framework-tasks="Provide cyber recommendations to intelligence support planning - T1791"*

Recommend subject matter experts who can assist in the investigation of complex or unusual situations - T1816

Recommend subject matter experts who can assist in the investigation of complex or unusual situations

The tag is: *misp-galaxy:nice-framework-tasks="Recommend subject matter experts who can assist in the investigation of complex or unusual situations - T1816"*

Synchronize intelligence engagement activities across partner organizations - T1826

Synchronize intelligence engagement activities across partner organizations

The tag is: *misp-galaxy:nice-framework-tasks="Synchronize intelligence engagement activities across partner organizations - T1826"*

Synchronize cybersecurity cooperation plans - T1827

Synchronize cybersecurity cooperation plans

The tag is: *misp-galaxy:nice-framework-tasks="Synchronize cybersecurity cooperation plans - T1827"*

Develop content for cyber defense tools - T0020

Develop content for cyber defense tools

The tag is: *misp-galaxy:nice-framework-tasks="Develop content for cyber defense tools - T0020"*

Perform cyber defense trend analysis and reporting - T0164

Perform cyber defense trend analysis and reporting

The tag is: *misp-galaxy:nice-framework-tasks="Perform cyber defense trend analysis and reporting - T0164"*

Recommend computing environment vulnerability corrections - T0292

Recommend computing environment vulnerability corrections

The tag is: *misp-galaxy:nice-framework-tasks="Recommend computing environment vulnerability corrections - T0292"*

Identify network mapping and operating system (OS) fingerprinting activities - T0299

Identify network mapping and operating system (OS) fingerprinting activities

The tag is: *misp-galaxy:nice-framework-tasks="Identify network mapping and operating system (OS) fingerprinting activities - T0299"*

Review cyber defense service provider reporting structure - T1021

Review cyber defense service provider reporting structure

The tag is: *misp-galaxy:nice-framework-tasks="Review cyber defense service provider reporting structure - T1021"*

Validate network alerts - T1112

Validate network alerts

The tag is: *misp-galaxy:nice-framework-tasks="Validate network alerts - T1112"*

Determine if cybersecurity-enabled products reduce identified risk to acceptable levels - T1176

Determine if cybersecurity-enabled products reduce identified risk to acceptable levels

The tag is: *misp-galaxy:nice-framework-tasks="Determine if cybersecurity-enabled products reduce identified risk to acceptable levels - T1176"*

Determine if security control technologies reduce identified risk to acceptable levels - T1177

Determine if security control technologies reduce identified risk to acceptable levels

The tag is: *misp-galaxy:nice-framework-tasks="Determine if security control technologies reduce identified risk to acceptable levels - T1177"*

Document cybersecurity incidents - T1241

Document cybersecurity incidents

The tag is: *misp-galaxy:nice-framework-tasks="Document cybersecurity incidents - T1241"*

Escalate incidents that may cause ongoing and immediate impact to the environment - T1242

Escalate incidents that may cause ongoing and immediate impact to the environment

The tag is: *misp-galaxy:nice-framework-tasks="Escalate incidents that may cause ongoing and immediate impact to the environment - T1242"*

Determine the effectiveness of an observed attack - T1254

Determine the effectiveness of an observed attack

The tag is: *misp-galaxy:nice-framework-tasks="Determine the effectiveness of an observed attack - T1254"*

Recommend risk mitigation strategies - T1266

Recommend risk mitigation strategies

The tag is: *misp-galaxy:nice-framework-tasks="Recommend risk mitigation strategies - T1266"*

Recommend system modifications - T1278

Recommend system modifications

The tag is: *misp-galaxy:nice-framework-tasks="Recommend system modifications - T1278"*

Communicate daily network event and activity reports - T1290

Communicate daily network event and activity reports

The tag is: *misp-galaxy:nice-framework-tasks="Communicate daily network event and activity reports - T1290"*

Determine causes of network alerts - T1299

Determine causes of network alerts

The tag is: *misp-galaxy:nice-framework-tasks="Determine causes of network alerts - T1299"*

Detect cybersecurity attacks and intrusions - T1347

Detect cybersecurity attacks and intrusions

The tag is: *misp-galaxy:nice-framework-tasks="Detect cybersecurity attacks and intrusions - T1347"*

Distinguish between benign and potentially malicious cybersecurity attacks and intrusions - T1348

Distinguish between benign and potentially malicious cybersecurity attacks and intrusions

The tag is: *misp-galaxy:nice-framework-tasks="Distinguish between benign and potentially malicious cybersecurity attacks and intrusions - T1348"*

Communicate cybersecurity attacks and intrusions alerts - T1349

Communicate cybersecurity attacks and intrusions alerts

The tag is: *misp-galaxy:nice-framework-tasks="Communicate cybersecurity attacks and intrusions alerts - T1349"*

Perform continuous monitoring of system activity - T1350

Perform continuous monitoring of system activity

The tag is: *misp-galaxy:nice-framework-tasks="Perform continuous monitoring of system activity - T1350"*

Determine impact of malicious activity on systems and information - T1351

Determine impact of malicious activity on systems and information

The tag is: *misp-galaxy:nice-framework-tasks="Determine impact of malicious activity on systems and information - T1351"*

Establish intrusion set procedures - T1384

Establish intrusion set procedures

The tag is: *misp-galaxy:nice-framework-tasks="Establish intrusion set procedures - T1384"*

Identify network traffic anomalies - T1385

Identify network traffic anomalies

The tag is: *misp-galaxy:nice-framework-tasks="Identify network traffic anomalies - T1385"*

Analyze network traffic anomalies - T1386

Analyze network traffic anomalies

The tag is: *misp-galaxy:nice-framework-tasks="Analyze network traffic anomalies - T1386"*

Validate intrusion detection system alerts - T1387

Validate intrusion detection system alerts

The tag is: *misp-galaxy:nice-framework-tasks="Validate intrusion detection system alerts - T1387"*

Isolate malware - T1388

Isolate malware

The tag is: *misp-galaxy:nice-framework-tasks="Isolate malware - T1388"*

Remove malware - T1389

Remove malware

The tag is: *misp-galaxy:nice-framework-tasks="Remove malware - T1389"*

Identify network device applications and operating systems - T1390

Identify network device applications and operating systems

The tag is: *misp-galaxy:nice-framework-tasks="Identify network device applications and operating systems - T1390"*

Reconstruct malicious attacks - T1391

Reconstruct malicious attacks

The tag is: *misp-galaxy:nice-framework-tasks="Reconstruct malicious attacks - T1391"*

Construct cyber defense network tool signatures - T1406

Construct cyber defense network tool signatures

The tag is: *misp-galaxy:nice-framework-tasks="Construct cyber defense network tool signatures - T1406"*

Notify designated managers, cyber incident responders, and cybersecurity service provider team members of suspected cybersecurity incidents - T1428

Notify designated managers, cyber incident responders, and cybersecurity service provider team members of suspected cybersecurity incidents

The tag is: *misp-galaxy:nice-framework-tasks="Notify designated managers, cyber incident responders, and cybersecurity service provider team members of suspected cybersecurity incidents - T1428"*

Analyze organizational cybrersecurity posture trends - T1539

Analyze organizational cybrersecurity posture trends

The tag is: *misp-galaxy:nice-framework-tasks="Analyze organizational cybrersecurity posture trends - T1539"*

Develop organizational cybersecurity posture trend reports - T1540

Develop organizational cybersecurity posture trend reports

The tag is: *misp-galaxy:nice-framework-tasks="Develop organizational cybersecurity posture trend reports - T1540"*

Develop system security posture trend reports - T1541

Develop system security posture trend reports

The tag is: *misp-galaxy:nice-framework-tasks="Develop system security posture trend reports - T1541"*

Determine adequacy of access controls - T1548

Determine adequacy of access controls

The tag is: *misp-galaxy:nice-framework-tasks="Determine adequacy of access controls - T1548"*

Maintain currency of cyber defense threat conditions - T1582

Maintain currency of cyber defense threat conditions

The tag is: *misp-galaxy:nice-framework-tasks="Maintain currency of cyber defense threat conditions - T1582"*

Recommend threat and vulnerability risk mitigation strategies - T1603

Recommend threat and vulnerability risk mitigation strategies

The tag is: *misp-galaxy:nice-framework-tasks="Recommend threat and vulnerability risk mitigation strategies - T1603"*

Advise stakeholders on vulnerability compliance - T1615

Advise stakeholders on vulnerability compliance

The tag is: *misp-galaxy:nice-framework-tasks="Advise stakeholders on vulnerability compliance - T1615"*

Resolve computer security incidents - T1616

Resolve computer security incidents

The tag is: *misp-galaxy:nice-framework-tasks="Resolve computer security incidents - T1616"*

Advise stakeholders on disaster recovery, contingency, and continuity of operations plans - T1618

Advise stakeholders on disaster recovery, contingency, and continuity of operations plans

The tag is: *misp-galaxy:nice-framework-tasks="Advise stakeholders on disaster recovery, contingency, and continuity of operations plans - T1618"*

Perform file signature analysis - T0167

Perform file signature analysis

The tag is: *misp-galaxy:nice-framework-tasks="Perform file signature analysis - T0167"*

Perform data comparison against established database - T0168

Perform data comparison against established database

The tag is: *misp-galaxy:nice-framework-tasks="Perform data comparison against established*

database - T0168"

Perform real-time forensic analysis (e.g., using Helix in conjunction with LiveView) - T0172

Perform real-time forensic analysis (e.g., using Helix in conjunction with LiveView)

The tag is: *misp-galaxy:nice-framework-tasks="Perform real-time forensic analysis (e.g., using Helix in conjunction with LiveView) - T0172"*

Perform timeline analysis - T0173

Perform timeline analysis

The tag is: *misp-galaxy:nice-framework-tasks="Perform timeline analysis - T0173"*

Perform static media analysis - T0179

Perform static media analysis

The tag is: *misp-galaxy:nice-framework-tasks="Perform static media analysis - T0179"*

Perform tier 1, 2, and 3 malware analysis - T0182

Perform tier 1, 2, and 3 malware analysis

The tag is: *misp-galaxy:nice-framework-tasks="Perform tier 1, 2, and 3 malware analysis - T0182"*

Perform Windows registry analysis - T0397

Perform Windows registry analysis

The tag is: *misp-galaxy:nice-framework-tasks="Perform Windows registry analysis - T0397"*

Set up a forensic workstation - T1051

Set up a forensic workstation

The tag is: *misp-galaxy:nice-framework-tasks="Set up a forensic workstation - T1051"*

Determine best methods for identifying the perpetrator(s) of a network intrusion - T1090

Determine best methods for identifying the perpetrator(s) of a network intrusion

The tag is: *misp-galaxy:nice-framework-tasks="Determine best methods for identifying the*

perpetrator(s) of a network intrusion - T1090"

Identify instrusions - T1102

Identify instrusions

The tag is: *misp-galaxy:nice-framework-tasks="Identify instrusions - T1102"*

Analyze intrusions - T1103

Analyze intrusions

The tag is: *misp-galaxy:nice-framework-tasks="Analyze intrusions - T1103"*

Document what is known about intrusions - T1104

Document what is known about intrusions

The tag is: *misp-galaxy:nice-framework-tasks="Document what is known about intrusions - T1104"*

Create forensically sound duplicates of evidence - T1120

Create forensically sound duplicates of evidence

The tag is: *misp-galaxy:nice-framework-tasks="Create forensically sound duplicates of evidence - T1120"*

Decrypt seized data - T1121

Decrypt seized data

The tag is: *misp-galaxy:nice-framework-tasks="Decrypt seized data - T1121"*

Create technical summary of findings reports - T1159

Create technical summary of findings reports

The tag is: *misp-galaxy:nice-framework-tasks="Create technical summary of findings reports - T1159"*

Determine if digital media chain or custody processes meet Federal Rules of Evidence requirements - T1175

Determine if digital media chain or custody processes meet Federal Rules of Evidence requirements

The tag is: *misp-galaxy:nice-framework-tasks="Determine if digital media chain or custody processes*

meet Federal Rules of Evidence requirements - T1175"

Determine relevance of recovered data - T1191

Determine relevance of recovered data

The tag is: *misp-galaxy:nice-framework-tasks="Determine relevance of recovered data - T1191"*

Identify digital evidence for analysis - T1199

Identify digital evidence for analysis

The tag is: *misp-galaxy:nice-framework-tasks="Identify digital evidence for analysis - T1199"*

Perform dynamic analysis on drives - T1253

Perform dynamic analysis on drives

The tag is: *misp-galaxy:nice-framework-tasks="Perform dynamic analysis on drives - T1253"*

Perform real-time cyber defense incident handling - T1260

Perform real-time cyber defense incident handling

The tag is: *misp-galaxy:nice-framework-tasks="Perform real-time cyber defense incident handling - T1260"*

Prepare digital media for imaging - T1282

Prepare digital media for imaging

The tag is: *misp-galaxy:nice-framework-tasks="Prepare digital media for imaging - T1282"*

Report forensic artifacts indicative of a particular operating system - T1301

Report forensic artifacts indicative of a particular operating system

The tag is: *misp-galaxy:nice-framework-tasks="Report forensic artifacts indicative of a particular operating system - T1301"*

Capture network traffic associated with malicious activities - T1322

Capture network traffic associated with malicious activities

The tag is: *misp-galaxy:nice-framework-tasks="Capture network traffic associated with malicious activities - T1322"*

Analyze network traffic associated with malicious activities - T1323

Analyze network traffic associated with malicious activities

The tag is: *misp-galaxy:nice-framework-tasks="Analyze network traffic associated with malicious activities - T1323"*

Process digital evidence - T1324

Process digital evidence

The tag is: *misp-galaxy:nice-framework-tasks="Process digital evidence - T1324"*

Document digital evidence - T1325

Document digital evidence

The tag is: *misp-galaxy:nice-framework-tasks="Document digital evidence - T1325"*

Collect intrusion artifacts - T1370

Collect intrusion artifacts

The tag is: *misp-galaxy:nice-framework-tasks="Collect intrusion artifacts - T1370"*

Mitigate potential cyber defense incidents - T1371

Mitigate potential cyber defense incidents

The tag is: *misp-galaxy:nice-framework-tasks="Mitigate potential cyber defense incidents - T1371"*

Advise law enforcement personnel as technical expert - T1372

Advise law enforcement personnel as technical expert

The tag is: *misp-galaxy:nice-framework-tasks="Advise law enforcement personnel as technical expert -*

T1372"

Scan digital media for viruses - T1381

Scan digital media for viruses

The tag is: *misp-galaxy:nice-framework-tasks="Scan digital media for viruses - T1381"*

Mount a drive image - T1382

Mount a drive image

The tag is: *misp-galaxy:nice-framework-tasks="Mount a drive image - T1382"*

Utilize deployable forensics toolkit - T1383

Utilize deployable forensics toolkit

The tag is: *misp-galaxy:nice-framework-tasks="Utilize deployable forensics toolkit - T1383"*

Correlate threat assessment data - T1407

Correlate threat assessment data

The tag is: *misp-galaxy:nice-framework-tasks="Correlate threat assessment data - T1407"*

Process forensic images - T1486

Process forensic images

The tag is: *misp-galaxy:nice-framework-tasks="Process forensic images - T1486"*

Perform file and registry monitoring on running systems - T1487

Perform file and registry monitoring on running systems

The tag is: *misp-galaxy:nice-framework-tasks="Perform file and registry monitoring on running systems - T1487"*

Enter digital media information into tracking databases - T1488

Enter digital media information into tracking databases

The tag is: *misp-galaxy:nice-framework-tasks="Enter digital media information into tracking*

databases - T1488"

Prepare cyber defense toolkits - T1490

Prepare cyber defense toolkits

The tag is: *misp-galaxy:nice-framework-tasks="Prepare cyber defense toolkits - T1490"*

Preserve digital evidence - T1510

Preserve digital evidence

The tag is: *misp-galaxy:nice-framework-tasks="Preserve digital evidence - T1510"*

Recover information from forensic data sources - T1607

Recover information from forensic data sources

The tag is: *misp-galaxy:nice-framework-tasks="Recover information from forensic data sources - T1607"*

Prepare cyber defense reports - T1617

Prepare cyber defense reports

The tag is: *misp-galaxy:nice-framework-tasks="Prepare cyber defense reports - T1617"*

Acquire resources to support cybersecurity program goals and objectives - T1056

Acquire resources to support cybersecurity program goals and objectives

The tag is: *misp-galaxy:nice-framework-tasks="Acquire resources to support cybersecurity program goals and objectives - T1056"*

Conduct an effective enterprise continuity of operations program - T1057

Conduct an effective enterprise continuity of operations program

The tag is: *misp-galaxy:nice-framework-tasks="Conduct an effective enterprise continuity of operations program - T1057"*

Contribute insider threat expertise to organizational cybersecurity awareness program - T1062

Contribute insider threat expertise to organizational cybersecurity awareness program

The tag is: *misp-galaxy:nice-framework-tasks="Contribute insider threat expertise to organizational cybersecurity awareness program - T1062"*

Manage cybersecurity budget, staffing, and contracting - T1227

Manage cybersecurity budget, staffing, and contracting

The tag is: *misp-galaxy:nice-framework-tasks="Manage cybersecurity budget, staffing, and contracting - T1227"*

Assess the behavior of individual victims, witnesses, or suspects during cybersecurity investigations - T1439

Assess the behavior of individual victims, witnesses, or suspects during cybersecurity investigations

The tag is: *misp-galaxy:nice-framework-tasks="Assess the behavior of individual victims, witnesses, or suspects during cybersecurity investigations - T1439"*

Notify appropriate personnel of imminent hostile intentions or activities - T1799

Notify appropriate personnel of imminent hostile intentions or activities

The tag is: *misp-galaxy:nice-framework-tasks="Notify appropriate personnel of imminent hostile intentions or activities - T1799"*

Document system alerts - T1969

Document system alerts

The tag is: *misp-galaxy:nice-framework-tasks="Document system alerts - T1969"*

Escalate system alerts that may indicate risks - T1970

Escalate system alerts that may indicate risks

The tag is: *misp-galaxy:nice-framework-tasks="Escalate system alerts that may indicate risks - T1970"*

Disseminate anomalous activity reports to the insider threat hub - T1971

Disseminate anomalous activity reports to the insider threat hub

The tag is: *misp-galaxy:nice-framework-tasks="Disseminate anomalous activity reports to the insider threat hub - T1971"*

Conduct independent comprehensive assessments of target-specific information - T1973

Conduct independent comprehensive assessments of target-specific information

The tag is: *misp-galaxy:nice-framework-tasks="Conduct independent comprehensive assessments of target-specific information - T1973"*

Conduct insider threat risk assessments - T1974

Conduct insider threat risk assessments

The tag is: *misp-galaxy:nice-framework-tasks="Conduct insider threat risk assessments - T1974"*

Prepare insider threat briefings - T1975

Prepare insider threat briefings

The tag is: *misp-galaxy:nice-framework-tasks="Prepare insider threat briefings - T1975"*

Recommend risk mitigation courses of action (CoA) - T1976

Recommend risk mitigation courses of action (CoA)

The tag is: *misp-galaxy:nice-framework-tasks="Recommend risk mitigation courses of action (CoA) - T1976"*

Coordinate with internal and external incident management partners across jurisdictions - T1977

Coordinate with internal and external incident management partners across jurisdictions

The tag is: *misp-galaxy:nice-framework-tasks="Coordinate with internal and external incident management partners across jurisdictions - T1977"*

Recommend improvements to insider threat detection processes - T1978

Recommend improvements to insider threat detection processes

The tag is: *misp-galaxy:nice-framework-tasks="Recommend improvements to insider threat detection processes - T1978"*

Determine digital evidence priority intelligence requirements - T1979

Determine digital evidence priority intelligence requirements

The tag is: *misp-galaxy:nice-framework-tasks="Determine digital evidence priority intelligence requirements - T1979"*

Develop digital evidence reports for internal and external partners - T1980

Develop digital evidence reports for internal and external partners

The tag is: *misp-galaxy:nice-framework-tasks="Develop digital evidence reports for internal and external partners - T1980"*

Develop elicitation indicators - T1981

Develop elicitation indicators

The tag is: *misp-galaxy:nice-framework-tasks="Develop elicitation indicators - T1981"*

Identify high value assets - T1982

Identify high value assets

The tag is: *misp-galaxy:nice-framework-tasks="Identify high value assets - T1982"*

Identify potential insider threats - T1983

Identify potential insider threats

The tag is: *misp-galaxy:nice-framework-tasks="Identify potential insider threats - T1983"*

Identify imminent or hostile intentions or activities - T1985

Identify imminent or hostile intentions or activities

The tag is: *misp-galaxy:nice-framework-tasks="Identify imminent or hostile intentions or activities - T1985"*

Develop a continuously updated overview of an incident throughout the incident’s life cycle - T1986

Develop a continuously updated overview of an incident throughout the incident’s life cycle

The tag is: *misp-galaxy:nice-framework-tasks="Develop a continuously updated overview of an incident throughout the incident’s life cycle - T1986"*

Develop insider threat cyber operations indicators - T1987

Develop insider threat cyber operations indicators

The tag is: *misp-galaxy:nice-framework-tasks="Develop insider threat cyber operations indicators - T1987"*

Integrate information from cyber resources, internal partners, and external partners - T1988

Integrate information from cyber resources, internal partners, and external partners

The tag is: *misp-galaxy:nice-framework-tasks="Integrate information from cyber resources, internal partners, and external partners - T1988"*

Advise insider threat hub inquiries - T1989

Advise insider threat hub inquiries

The tag is: *misp-galaxy:nice-framework-tasks="Advise insider threat hub inquiries - T1989"*

Conduct cybersecurity insider threat inquiries - T1990

Conduct cybersecurity insider threat inquiries

The tag is: *misp-galaxy:nice-framework-tasks="Conduct cybersecurity insider threat inquiries - T1990"*

Deliver all-source cyber operations and intelligence indications and warnings - T1991

Deliver all-source cyber operations and intelligence indications and warnings

The tag is: *misp-galaxy:nice-framework-tasks="Deliver all-source cyber operations and intelligence indications and warnings - T1991"*

Interpret network activity for intelligence value - T1992

Interpret network activity for intelligence value

The tag is: *misp-galaxy:nice-framework-tasks="Interpret network activity for intelligence value - T1992"*

Monitor network activity for vulnerabilities - T1993

Monitor network activity for vulnerabilities

The tag is: *misp-galaxy:nice-framework-tasks="Monitor network activity for vulnerabilities - T1993"*

Identify potential insider risks to networks - T1994

Identify potential insider risks to networks

The tag is: *misp-galaxy:nice-framework-tasks="Identify potential insider risks to networks - T1994"*

Document potential insider risks to networks - T1995

Document potential insider risks to networks

The tag is: *misp-galaxy:nice-framework-tasks="Document potential insider risks to networks - T1995"*

Report network vulnerabilities - T1996

Report network vulnerabilities

The tag is: *misp-galaxy:nice-framework-tasks="Report network vulnerabilities - T1996"*

Develop insider threat investigation plans - T1997

Develop insider threat investigation plans

The tag is: *misp-galaxy:nice-framework-tasks="Develop insider threat investigation plans - T1997"*

Investigate alleged insider threat cybersecurity policy violations - T1998

Investigate alleged insider threat cybersecurity policy violations

The tag is: *misp-galaxy:nice-framework-tasks="Investigate alleged insider threat cybersecurity policy violations - T1998"*

Refer cases on active insider threat activities to law enforcement investigators - T1999

Refer cases on active insider threat activities to law enforcement investigators

The tag is: *misp-galaxy:nice-framework-tasks="Refer cases on active insider threat activities to law enforcement investigators - T1999"*

Establish an insider threat risk management assessment program - T2001

Establish an insider threat risk management assessment program

The tag is: *misp-galaxy:nice-framework-tasks="Establish an insider threat risk management assessment program - T2001"*

Evaluate organizational insider risk response capabilities - T2003

Evaluate organizational insider risk response capabilities

The tag is: *misp-galaxy:nice-framework-tasks="Evaluate organizational insider risk response capabilities - T2003"*

Document insider threat information sources - T2004

Document insider threat information sources

The tag is: *misp-galaxy:nice-framework-tasks="Document insider threat information sources - T2004"*

Conduct insider threat studies - T2005

Conduct insider threat studies

The tag is: *misp-galaxy:nice-framework-tasks="Conduct insider threat studies - T2005"*

Identify potential targets for exploitation - T2006

Identify potential targets for exploitation

The tag is: *misp-galaxy:nice-framework-tasks="Identify potential targets for exploitation - T2006"*

Analyze potential targets for exploitation - T2007

Analyze potential targets for exploitation

The tag is: *misp-galaxy:nice-framework-tasks="Analyze potential targets for exploitation - T2007"*

Vet insider threat targeting with law enforcement and intelligence partners - T2008

Vet insider threat targeting with law enforcement and intelligence partners

The tag is: *misp-galaxy:nice-framework-tasks="Vet insider threat targeting with law enforcement and intelligence partners - T2008"*

Develop insider threat targets - T2009

Develop insider threat targets

The tag is: *misp-galaxy:nice-framework-tasks="Develop insider threat targets - T2009"*

Maintain User Activity Monitoring (UAM) tools - T2010

Maintain User Activity Monitoring (UAM) tools

The tag is: *misp-galaxy:nice-framework-tasks="Maintain User Activity Monitoring (UAM) tools - T2010"*

Monitor the output from User Activity Monitoring (UAM) tools - T2011

Monitor the output from User Activity Monitoring (UAM) tools

The tag is: *misp-galaxy:nice-framework-tasks="Monitor the output from User Activity Monitoring (UAM) tools - T2011"*

Administer rule and signature updates for specialized cyber defense applications - T1111

Administer rule and signature updates for specialized cyber defense applications

The tag is: *misp-galaxy:nice-framework-tasks="Administer rule and signature updates for specialized cyber defense applications - T1111"*

Perform system administration on specialized cyber defense applications and systems - T1267

Perform system administration on specialized cyber defense applications and systems

The tag is: *misp-galaxy:nice-framework-tasks="Perform system administration on specialized cyber defense applications and systems - T1267"*

Administer Virtual Private Network (VPN) devices - T1268

Administer Virtual Private Network (VPN) devices

The tag is: *misp-galaxy:nice-framework-tasks="Administer Virtual Private Network (VPN) devices - T1268"*

Coordinate critical cyber defense infrastructure protection measures - T1352

Coordinate critical cyber defense infrastructure protection measures

The tag is: *misp-galaxy:nice-framework-tasks="Coordinate critical cyber defense infrastructure protection measures - T1352"*

Prioritize critical cyber defense infrastructure resources - T1353

Prioritize critical cyber defense infrastructure resources

The tag is: *misp-galaxy:nice-framework-tasks="Prioritize critical cyber defense infrastructure resources - T1353"*

Build dedicated cyber defense hardware - T1432

Build dedicated cyber defense hardware

The tag is: *misp-galaxy:nice-framework-tasks="Build dedicated cyber defense hardware - T1432"*

Install dedicated cyber defense hardware - T1433

Install dedicated cyber defense hardware

The tag is: *misp-galaxy:nice-framework-tasks="Install dedicated cyber defense hardware - T1433"*

Assess the impact of implementing and sustaining a dedicated cyber defense infrastructure - T1442

Assess the impact of implementing and sustaining a dedicated cyber defense infrastructure

The tag is: *misp-galaxy:nice-framework-tasks="Assess the impact of implementing and sustaining a dedicated cyber defense infrastructure - T1442"*

Evaluate platforms managed by service providers - T1503

Evaluate platforms managed by service providers

The tag is: *misp-galaxy:nice-framework-tasks="Evaluate platforms managed by service providers - T1503"*

Manage network access control lists on specialized cyber defense systems - T1515

Manage network access control lists on specialized cyber defense systems

The tag is: *misp-galaxy:nice-framework-tasks="Manage network access control lists on specialized cyber defense systems - T1515"*

Implement cyber defense tools - T1555

Implement cyber defense tools

The tag is: *misp-galaxy:nice-framework-tasks="Implement cyber defense tools - T1555"*

Implement dedicated cyber defense systems - T1561

Implement dedicated cyber defense systems

The tag is: *misp-galaxy:nice-framework-tasks="Implement dedicated cyber defense systems - T1561"*

Document system requirements - T1562

Document system requirements

The tag is: *misp-galaxy:nice-framework-tasks="Document system requirements - T1562"*

Evaluate organizational cybersecurity policy regulatory compliance - T1069

Evaluate organizational cybersecurity policy regulatory compliance

The tag is: *misp-galaxy:nice-framework-tasks="Evaluate organizational cybersecurity policy regulatory compliance - T1069"*

Evaluate organizational cybersecurity policy alignment with organizational directives - T1070

Evaluate organizational cybersecurity policy alignment with organizational directives

The tag is: *misp-galaxy:nice-framework-tasks="Evaluate organizational cybersecurity policy alignment with organizational directives - T1070"*

Maintain deployable cyber defense audit toolkits - T1229

Maintain deployable cyber defense audit toolkits

The tag is: *misp-galaxy:nice-framework-tasks="Maintain deployable cyber defense audit toolkits - T1229"*

Prepare audit reports - T1279

Prepare audit reports

The tag is: *misp-galaxy:nice-framework-tasks="Prepare audit reports - T1279"*

Perform required reviews - T1341

Perform required reviews

The tag is: *misp-galaxy:nice-framework-tasks="Perform required reviews - T1341"*

Perform risk and vulnerability assessments - T1619

Perform risk and vulnerability assessments

The tag is: *misp-galaxy:nice-framework-tasks="Perform risk and vulnerability assessments - T1619"*

Recommend cost-effective security controls - T1620

Recommend cost-effective security controls

The tag is: *misp-galaxy:nice-framework-tasks="Recommend cost-effective security controls - T1620"*

Employ approved defense-in-depth principles and practices (e.g., defense-in-multiple places, layered defenses, security robustness) - T0262

Employ approved defense-in-depth principles and practices (e.g., defense-in-multiple places, layered defenses, security robustness)

The tag is: *misp-galaxy:nice-framework-tasks="Employ approved defense-in-depth principles and practices (e.g., defense-in-multiple places, layered defenses, security robustness) - T0262"*

Coordinate incident response functions - T0510

Coordinate incident response functions

The tag is: *misp-galaxy:nice-framework-tasks="Coordinate incident response functions - T0510"*

Resolve cyber defense incidents - T1109

Resolve cyber defense incidents

The tag is: *misp-galaxy:nice-framework-tasks="Resolve cyber defense incidents - T1109"*

Coordinate technical support to enterprise-wide cybersecurity defense technicians - T1110

Coordinate technical support to enterprise-wide cybersecurity defense technicians

The tag is: *misp-galaxy:nice-framework-tasks="Coordinate technical support to enterprise-wide cybersecurity defense technicians - T1110"*

Perform cyber defense incident triage - T1250

Perform cyber defense incident triage

The tag is: *misp-galaxy:nice-framework-tasks="Perform cyber defense incident triage - T1250"*

Recommend incident remediation strategies - T1251

Recommend incident remediation strategies

The tag is: *misp-galaxy:nice-framework-tasks="Recommend incident remediation strategies - T1251"*

Determine the scope, urgency, and impact of cyber defense incidents - T1252

Determine the scope, urgency, and impact of cyber defense incidents

The tag is: *misp-galaxy:nice-framework-tasks="Determine the scope, urgency, and impact of cyber defense incidents - T1252"*

Perform forensically sound image collection - T1256

Perform forensically sound image collection

The tag is: *misp-galaxy:nice-framework-tasks="Perform forensically sound image collection - T1256"*

Recommend mitigation and remediation strategies for enterprise systems - T1257

Recommend mitigation and remediation strategies for enterprise systems

The tag is: *misp-galaxy:nice-framework-tasks="Recommend mitigation and remediation strategies for enterprise systems - T1257"*

Track cyber defense incidents from initial detection through final resolution - T1315

Track cyber defense incidents from initial detection through final resolution

The tag is: *misp-galaxy:nice-framework-tasks="Track cyber defense incidents from initial detection through final resolution - T1315"*

Document cyber defense incidents from initial detection through final resolution - T1316

Document cyber defense incidents from initial detection through final resolution

The tag is: *misp-galaxy:nice-framework-tasks="Document cyber defense incidents from initial detection through final resolution - T1316"*

Produce incident findings reports - T1332

Produce incident findings reports

The tag is: *misp-galaxy:nice-framework-tasks="Produce incident findings reports - T1332"*

Communicate incident findings to appropriate constituencies - T1333

Communicate incident findings to appropriate constituencies

The tag is: *misp-galaxy:nice-framework-tasks="Communicate incident findings to appropriate constituencies - T1333"*

Prepare after action reviews (AARs) - T1485

Prepare after action reviews (AARs)

The tag is: *misp-galaxy:nice-framework-tasks="Prepare after action reviews (AARs) - T1485"*

Maintain database management systems software - T0137

Maintain database management systems software

The tag is: *misp-galaxy:nice-framework-tasks="Maintain database management systems software - T0137"*

Maintain assured message delivery systems - T0330

Maintain assured message delivery systems

The tag is: *misp-galaxy:nice-framework-tasks="Maintain assured message delivery systems - T0330"*

Implement data management standards, requirements, and specifications - T0422

Implement data management standards, requirements, and specifications

The tag is: *misp-galaxy:nice-framework-tasks="Implement data management standards, requirements, and specifications - T0422"*

Implement data mining and data warehousing applications - T0459

Implement data mining and data warehousing applications

The tag is: *misp-galaxy:nice-framework-tasks="Implement data mining and data warehousing applications - T0459"*

Maintain directory replication services - T1230

Maintain directory replication services

The tag is: *misp-galaxy:nice-framework-tasks="Maintain directory replication services - T1230"*

Maintain information exchanges through publish, subscribe, and alert functions - T1231

Maintain information exchanges through publish, subscribe, and alert functions

The tag is: *misp-galaxy:nice-framework-tasks="Maintain information exchanges through publish, subscribe, and alert functions - T1231"*

Perform backup and recovery of databases - T1249

Perform backup and recovery of databases

The tag is: *misp-galaxy:nice-framework-tasks="Perform backup and recovery of databases - T1249"*

Manage databases and data management systems - T1402

Manage databases and data management systems

The tag is: *misp-galaxy:nice-framework-tasks="Manage databases and data management systems - T1402"*

Install database management systems and software - T1564

Install database management systems and software

The tag is: *misp-galaxy:nice-framework-tasks="Install database management systems and software - T1564"*

Configure database management systems and software - T1565

Configure database management systems and software

The tag is: *misp-galaxy:nice-framework-tasks="Configure database management systems and software - T1565"*

Construct access paths to suites of information - T1105

Construct access paths to suites of information

The tag is: *misp-galaxy:nice-framework-tasks="Construct access paths to suites of information - T1105"*

Monitor the usage of knowledge management assets and resources - T1239

Monitor the usage of knowledge management assets and resources

The tag is: *misp-galaxy:nice-framework-tasks="Monitor the usage of knowledge management assets and resources - T1239"*

Create knowledge management assets and resources usage reports - T1240

Create knowledge management assets and resources usage reports

The tag is: *misp-galaxy:nice-framework-tasks="Create knowledge management assets and resources usage reports - T1240"*

Plan knowledge management projects - T1273

Plan knowledge management projects

The tag is: *misp-galaxy:nice-framework-tasks="Plan knowledge management projects - T1273"*

Deliver knowledge management projects - T1274

Deliver knowledge management projects

The tag is: *misp-galaxy:nice-framework-tasks="Deliver knowledge management projects - T1274"*

Recommend data structures for use in the production of reports - T1296

Recommend data structures for use in the production of reports

The tag is: *misp-galaxy:nice-framework-tasks="Recommend data structures for use in the production of reports - T1296"*

Manage organizational knowledge repositories - T1504

Manage organizational knowledge repositories

The tag is: *misp-galaxy:nice-framework-tasks="Manage organizational knowledge repositories - T1504"*

Design organizational knowledge management frameworks - T1523

Design organizational knowledge management frameworks

The tag is: *misp-galaxy:nice-framework-tasks="Design organizational knowledge management frameworks - T1523"*

Implement organizational knowledge management frameworks - T1524

Implement organizational knowledge management frameworks

The tag is: *misp-galaxy:nice-framework-tasks="Implement organizational knowledge management frameworks - T1524"*

Maintain organizational knowledge management frameworks - T1525

Maintain organizational knowledge management frameworks

The tag is: *misp-galaxy:nice-framework-tasks="Maintain organizational knowledge management frameworks - T1525"*

Check system hardware availability, functionality, integrity, and efficiency - T0431

Check system hardware availability, functionality, integrity, and efficiency

The tag is: *misp-galaxy:nice-framework-tasks="Check system hardware availability, functionality, integrity, and efficiency - T0431"*

Troubleshoot hardware/software interface and interoperability problems - T0531

Troubleshoot hardware/software interface and interoperability problems

The tag is: *misp-galaxy:nice-framework-tasks="Troubleshoot hardware/software interface and*

interoperability problems - T0531"

Conduct functional and connectivity testing - T1092

Conduct functional and connectivity testing

The tag is: *misp-galaxy:nice-framework-tasks="Conduct functional and connectivity testing - T1092"*

Develop group policies and access control lists - T1130

Develop group policies and access control lists

The tag is: *misp-galaxy:nice-framework-tasks="Develop group policies and access control lists - T1130"*

Develop systems administration standard operating procedures - T1140

Develop systems administration standard operating procedures

The tag is: *misp-galaxy:nice-framework-tasks="Develop systems administration standard operating procedures - T1140"*

Document systems administration standard operating procedures - T1141

Document systems administration standard operating procedures

The tag is: *misp-galaxy:nice-framework-tasks="Document systems administration standard operating procedures - T1141"*

Maintain baseline system security - T1228

Maintain baseline system security

The tag is: *misp-galaxy:nice-framework-tasks="Maintain baseline system security - T1228"*

Determine the effectiveness of data redundancy and system recovery procedures - T1275

Determine the effectiveness of data redundancy and system recovery procedures

The tag is: *misp-galaxy:nice-framework-tasks="Determine the effectiveness of data redundancy and system recovery procedures - T1275"*

Develop data redundancy and system recovery procedures - T1276

Develop data redundancy and system recovery procedures

The tag is: *misp-galaxy:nice-framework-tasks="Develop data redundancy and system recovery procedures - T1276"*

Execute data redundancy and system recovery procedures - T1277

Execute data redundancy and system recovery procedures

The tag is: *misp-galaxy:nice-framework-tasks="Execute data redundancy and system recovery procedures - T1277"*

Produce cybersecurity instructional materials - T1334

Produce cybersecurity instructional materials

The tag is: *misp-galaxy:nice-framework-tasks="Produce cybersecurity instructional materials - T1334"*

Install systems and servers - T1500

Install systems and servers

The tag is: *misp-galaxy:nice-framework-tasks="Install systems and servers - T1500"*

Update systems and servers - T1501

Update systems and servers

The tag is: *misp-galaxy:nice-framework-tasks="Update systems and servers - T1501"*

Troubleshoot systems and servers - T1502

Troubleshoot systems and servers

The tag is: *misp-galaxy:nice-framework-tasks="Troubleshoot systems and servers - T1502"*

Perform periodic system maintenance - T1512

Perform periodic system maintenance

The tag is: *misp-galaxy:nice-framework-tasks="Perform periodic system maintenance - T1512"*

Develop local network usage policies and procedures - T1530

Develop local network usage policies and procedures

The tag is: *misp-galaxy:nice-framework-tasks="Develop local network usage policies and procedures - T1530"*

Determine compliance with local network usage policies and procedures - T1531

Determine compliance with local network usage policies and procedures

The tag is: *misp-galaxy:nice-framework-tasks="Determine compliance with local network usage policies and procedures - T1531"*

Administer system and network user accounts - T1569

Administer system and network user accounts

The tag is: *misp-galaxy:nice-framework-tasks="Administer system and network user accounts - T1569"*

Establish system and network rights processes and procedures - T1570

Establish system and network rights processes and procedures

The tag is: *misp-galaxy:nice-framework-tasks="Establish system and network rights processes and procedures - T1570"*

Establish systems and equipment access protocols - T1571

Establish systems and equipment access protocols

The tag is: *misp-galaxy:nice-framework-tasks="Establish systems and equipment access protocols - T1571"*

Monitor system and server configurations - T1578

Monitor system and server configurations

The tag is: *misp-galaxy:nice-framework-tasks="Monitor system and server configurations - T1578"*

Maintain system and server configurations - T1579

Maintain system and server configurations

The tag is: *misp-galaxy:nice-framework-tasks="Maintain system and server configurations - T1579"*

Diagnose faulty system and server hardware - T1588

Diagnose faulty system and server hardware

The tag is: *misp-galaxy:nice-framework-tasks="Diagnose faulty system and server hardware - T1588"*

Repair faulty system and server hardware - T1589

Repair faulty system and server hardware

The tag is: *misp-galaxy:nice-framework-tasks="Repair faulty system and server hardware - T1589"*

Develop data standards, policies, and procedures - T0068

Develop data standards, policies, and procedures

The tag is: *misp-galaxy:nice-framework-tasks="Develop data standards, policies, and procedures - T0068"*

Collect metrics and trending data - T0349

Collect metrics and trending data

The tag is: *misp-galaxy:nice-framework-tasks="Collect metrics and trending data - T0349"*

Program custom algorithms - T0383

Program custom algorithms

The tag is: *misp-galaxy:nice-framework-tasks="Program custom algorithms - T0383"*

Develop and implement data mining and data warehousing programs - T0460

Develop and implement data mining and data warehousing programs

The tag is: *misp-galaxy:nice-framework-tasks="Develop and implement data mining and data warehousing programs - T0460"*

Determine data requirements - T1063

Determine data requirements

The tag is: *misp-galaxy:nice-framework-tasks="Determine data requirements - T1063"*

Determine data specifications - T1064

Determine data specifications

The tag is: *misp-galaxy:nice-framework-tasks="Determine data specifications - T1064"*

Determine data capacity requirements - T1065

Determine data capacity requirements

The tag is: *misp-galaxy:nice-framework-tasks="Determine data capacity requirements - T1065"*

Plan for anticipated changes in data capacity requirements - T1066

Plan for anticipated changes in data capacity requirements

The tag is: *misp-galaxy:nice-framework-tasks="Plan for anticipated changes in data capacity requirements - T1066"*

Recommend new database technologies and architectures - T1297

Recommend new database technologies and architectures

The tag is: *misp-galaxy:nice-framework-tasks="Recommend new database technologies and architectures - T1297"*

Assess the validity of source data - T1440

Assess the validity of source data

The tag is: *misp-galaxy:nice-framework-tasks="Assess the validity of source data - T1440"*

Conduct hypothesis testing - T1445

Conduct hypothesis testing

The tag is: *misp-galaxy:nice-framework-tasks="Conduct hypothesis testing - T1445"*

Develop data gathering processes - T1458

Develop data gathering processes

The tag is: *misp-galaxy:nice-framework-tasks="Develop data gathering processes - T1458"*

Process crime scenes - T0193

Process crime scenes

The tag is: *misp-galaxy:nice-framework-tasks="Process crime scenes - T0193"*

Conduct victim and witness interviews - T1094

Conduct victim and witness interviews

The tag is: *misp-galaxy:nice-framework-tasks="Conduct victim and witness interviews - T1094"*

Conduct suspect interrogations - T1095

Conduct suspect interrogations

The tag is: *misp-galaxy:nice-framework-tasks="Conduct suspect interrogations - T1095"*

Investigate suspicious activity and alleged digital crimes - T1137

Investigate suspicious activity and alleged digital crimes

The tag is: *misp-galaxy:nice-framework-tasks="Investigate suspicious activity and alleged digital crimes - T1137"*

Establish internal and external cross-team relationships - T1187

Establish internal and external cross-team relationships

The tag is: *misp-galaxy:nice-framework-tasks="Establish internal and external cross-team relationships - T1187"*

Conduct analysis of computer network attacks - T1192

Conduct analysis of computer network attacks

The tag is: *misp-galaxy:nice-framework-tasks="Conduct analysis of computer network attacks - T1192"*

Determine if security incidents are indicative of a violation of law that requires specific legal action - T1196

Determine if security incidents are indicative of a violation of law that requires specific legal action

The tag is: *misp-galaxy:nice-framework-tasks="Determine if security incidents are indicative of a violation of law that requires specific legal action - T1196"*

Identify data or intelligence of evidentiary value - T1198

Identify data or intelligence of evidentiary value

The tag is: *misp-galaxy:nice-framework-tasks="Identify data or intelligence of evidentiary value - T1198"*

Identify elements of proof of cybersecurity crimes - T1200

Identify elements of proof of cybersecurity crimes

The tag is: *misp-galaxy:nice-framework-tasks="Identify elements of proof of cybersecurity crimes - T1200"*

Collect documentary or physical evidence of cyber intrusion incidents, investigations, and operations - T1207

Collect documentary or physical evidence of cyber intrusion incidents, investigations, and operations

The tag is: *misp-galaxy:nice-framework-tasks="Collect documentary or physical evidence of cyber intrusion incidents, investigations, and operations - T1207"*

Advise trial counsel as technical expert - T1477

Advise trial counsel as technical expert

The tag is: *misp-galaxy:nice-framework-tasks="Advise trial counsel as technical expert - T1477"*

Analyze cybersecurity threats for counter intelligence or criminal activity - T1505

Analyze cybersecurity threats for counter intelligence or criminal activity

The tag is: *misp-galaxy:nice-framework-tasks="Analyze cybersecurity threats for counter intelligence or criminal activity - T1505"*

Identify responsible parties for intrusions and other crimes - T1526

Identify responsible parties for intrusions and other crimes

The tag is: *misp-galaxy:nice-framework-tasks="Identify responsible parties for intrusions and other crimes - T1526"*

Document original condition of digital evidence - T1542

Document original condition of digital evidence

The tag is: *misp-galaxy:nice-framework-tasks="Document original condition of digital evidence - T1542"*

Prosecute cybercrimes and fraud committed against people and property - T1551

Prosecute cybercrimes and fraud committed against people and property

The tag is: *misp-galaxy:nice-framework-tasks="Prosecute cybercrimes and fraud committed against people and property - T1551"*

Prepare investigative reports - T1600

Prepare investigative reports

The tag is: *misp-galaxy:nice-framework-tasks="Prepare investigative reports - T1600"*

Detect concealed data - T1516

Detect concealed data

The tag is: *misp-galaxy:nice-framework-tasks="Detect concealed data - T1516"*

Answer requests for information - T0569

Answer requests for information

The tag is: *misp-galaxy:nice-framework-tasks="Answer requests for information - T0569"*

Facilitate continuously updated intelligence, surveillance, and visualization input to common operational picture managers - T0698

Facilitate continuously updated intelligence, surveillance, and visualization input to common operational picture managers

The tag is: *misp-galaxy:nice-framework-tasks="Facilitate continuously updated intelligence, surveillance, and visualization input to common operational picture managers - T0698"*

Monitor open source websites for hostile content directed towards organizational or partner interests - T0751

Monitor open source websites for hostile content directed towards organizational or partner interests

The tag is: *misp-galaxy:nice-framework-tasks="Monitor open source websites for hostile content directed towards organizational or partner interests - T0751"*

Identify cyber threat tactics and methodologies - T0845

Identify cyber threat tactics and methodologies

The tag is: *misp-galaxy:nice-framework-tasks="Identify cyber threat tactics and methodologies - T0845"*

Provide intelligence analysis and support - T1798

Provide intelligence analysis and support

The tag is: *misp-galaxy:nice-framework-tasks="Provide intelligence analysis and support - T1798"*

Prepare network intrusion reports - T1804

Prepare network intrusion reports

The tag is: *misp-galaxy:nice-framework-tasks="Prepare network intrusion reports - T1804"*

Assess performance of collection assets against prescribed specifications - T0578

Assess performance of collection assets against prescribed specifications

The tag is: *misp-galaxy:nice-framework-tasks="Assess performance of collection assets against prescribed specifications - T0578"*

Determine course of action for addressing changes to objectives, guidance, and operational environment - T0645

Determine course of action for addressing changes to objectives, guidance, and operational environment

The tag is: *misp-galaxy:nice-framework-tasks="Determine course of action for addressing changes to objectives, guidance, and operational environment - T0645"*

Identify potential collection disciplines for application against priority information requirements - T0723

Identify potential collection disciplines for application against priority information requirements

The tag is: *misp-galaxy:nice-framework-tasks="Identify potential collection disciplines for application against priority information requirements - T0723"*

Link priority collection requirements to optimal assets and resources - T0737

Link priority collection requirements to optimal assets and resources

The tag is: *misp-galaxy:nice-framework-tasks="Link priority collection requirements to optimal assets and resources - T0737"*

Address identified issues in collection operations and collection plans - T1630

Address identified issues in collection operations and collection plans

The tag is: *misp-galaxy:nice-framework-tasks="Address identified issues in collection operations and collection plans - T1630"*

Synchronize collections with operational requirements - T1631

Synchronize collections with operational requirements

The tag is: *misp-galaxy:nice-framework-tasks="Synchronize collections with operational requirements - T1631"*

Determine if collection products and services meet requirements - T1632

Determine if collection products and services meet requirements

The tag is: *misp-galaxy:nice-framework-tasks="Determine if collection products and services meet requirements - T1632"*

Determine impacts on collection management operational structure and requirements - T1634

Determine impacts on collection management operational structure and requirements

The tag is: *misp-galaxy:nice-framework-tasks="Determine impacts on collection management operational structure and requirements - T1634"*

Develop intelligence collection management processes - T1636

Develop intelligence collection management processes

The tag is: *misp-galaxy:nice-framework-tasks="Develop intelligence collection management processes - T1636"*

Compare allocated and available assets to collection demand - T1659

Compare allocated and available assets to collection demand

The tag is: *misp-galaxy:nice-framework-tasks="Compare allocated and available assets to collection demand - T1659"*

Prepare intelligence collection reports - T1660

Prepare intelligence collection reports

The tag is: *misp-galaxy:nice-framework-tasks="Prepare intelligence collection reports - T1660"*

Coordinate resource allocation of collection assets with collection discipline leads - T1681

Coordinate resource allocation of collection assets with collection discipline leads

The tag is: *misp-galaxy:nice-framework-tasks="Coordinate resource allocation of collection assets with collection discipline leads - T1681"*

Prepare collection plan documentation - T1682

Prepare collection plan documentation

The tag is: *misp-galaxy:nice-framework-tasks="Prepare collection plan documentation - T1682"*

Inventory existing collection management webpage databases, libraries, and storehouses - T1693

Inventory existing collection management webpage databases, libraries, and storehouses

The tag is: *misp-galaxy:nice-framework-tasks="Inventory existing collection management webpage databases, libraries, and storehouses - T1693"*

Determine organizations with collection authority over predefined accessible collection assets - T1695

Determine organizations with collection authority over predefined accessible collection assets

The tag is: *misp-galaxy:nice-framework-tasks="Determine organizations with collection authority over predefined accessible collection assets - T1695"*

Develop intelligence collection report analysis processes - T1696

Develop intelligence collection report analysis processes

The tag is: *misp-galaxy:nice-framework-tasks="Develop intelligence collection report analysis processes - T1696"*

Prepare collections operation instructions - T1703

Prepare collections operation instructions

The tag is: *misp-galaxy:nice-framework-tasks="Prepare collections operation instructions - T1703"*

Allocate collection assets - T1706

Allocate collection assets

The tag is: *misp-galaxy:nice-framework-tasks="Allocate collection assets - T1706"*

Disseminate tasking messages - T1723

Disseminate tasking messages

The tag is: *misp-galaxy:nice-framework-tasks="Disseminate tasking messages - T1723"*

Disseminate collection plans - T1724

Disseminate collection plans

The tag is: *misp-galaxy:nice-framework-tasks="Disseminate collection plans - T1724"*

Select collaboration platforms - T1742

Select collaboration platforms

The tag is: *misp-galaxy:nice-framework-tasks="Select collaboration platforms - T1742"*

Develop coordination requirements and procedures - T1744

Develop coordination requirements and procedures

The tag is: *misp-galaxy:nice-framework-tasks="Develop coordination requirements and procedures - T1744"*

Determine effectiveness of processing, exploitation, and dissemination architecture - T1746

Determine effectiveness of processing, exploitation, and dissemination architecture

The tag is: *misp-galaxy:nice-framework-tasks="Determine effectiveness of processing, exploitation, and dissemination architecture - T1746"*

Identify collection management risks - T1748

Identify collection management risks

The tag is: *misp-galaxy:nice-framework-tasks="Identify collection management risks - T1748"*

Mitigate collection management risks - T1749

Mitigate collection management risks

The tag is: *misp-galaxy:nice-framework-tasks="Mitigate collection management risks - T1749"*

Determine when reallocated collection efforts are completed - T1769

Determine when reallocated collection efforts are completed

The tag is: *misp-galaxy:nice-framework-tasks="Determine when reallocated collection efforts are completed - T1769"*

Determine effectiveness of the processing, exploitation, and dissemination architecture - T1771

Determine effectiveness of the processing, exploitation, and dissemination architecture

The tag is: *misp-galaxy:nice-framework-tasks="Determine effectiveness of the processing, exploitation, and dissemination architecture - T1771"*

Identify collection operational management process risks - T1773

Identify collection operational management process risks

The tag is: *misp-galaxy:nice-framework-tasks="Identify collection operational management process risks - T1773"*

Prioritize collection requirements for collection platforms - T1783

Prioritize collection requirements for collection platforms

The tag is: *misp-galaxy:nice-framework-tasks="Prioritize collection requirements for collection platforms - T1783"*

Reassign collection assets and resources in response to dynamic operational situations - T1787

Reassign collection assets and resources in response to dynamic operational situations

The tag is: *misp-galaxy:nice-framework-tasks="Reassign collection assets and resources in response to dynamic operational situations - T1787"*

Request discipline-specific processing, exploitation, and dissemination information - T1805

Request discipline-specific processing, exploitation, and dissemination information

The tag is: *misp-galaxy:nice-framework-tasks="Request discipline-specific processing, exploitation, and dissemination information - T1805"*

Determine intelligence collection asset capabilities - T1807

Determine intelligence collection asset capabilities

The tag is: *misp-galaxy:nice-framework-tasks="Determine intelligence collection asset capabilities - T1807"*

Determine accuracy of intelligence collection guidance - T1808

Determine accuracy of intelligence collection guidance

The tag is: *misp-galaxy:nice-framework-tasks="Determine accuracy of intelligence collection guidance - T1808"*

Update collection plans - T1809

Update collection plans

The tag is: *misp-galaxy:nice-framework-tasks="Update collection plans - T1809"*

Update collection matrices - T1813

Update collection matrices

The tag is: *misp-galaxy:nice-framework-tasks="Update collection matrices - T1813"*

Recommend changes to collection plans - T1818

Recommend changes to collection plans

The tag is: *misp-galaxy:nice-framework-tasks="Recommend changes to collection plans - T1818"*

Recommend changes to operational environment - T1819

Recommend changes to operational environment

The tag is: *misp-galaxy:nice-framework-tasks="Recommend changes to operational environment - T1819"*

Specify discipline-specific taskings - T1820

Specify discipline-specific taskings

The tag is: *misp-galaxy:nice-framework-tasks="Specify discipline-specific taskings - T1820"*

Synchronize the integrated employment of organic and partner intelligence collection assets - T1828

Synchronize the integrated employment of organic and partner intelligence collection assets

The tag is: *misp-galaxy:nice-framework-tasks="Synchronize the integrated employment of organic and partner intelligence collection assets - T1828"*

Diagnose network connectivity problems - T0081

Diagnose network connectivity problems

The tag is: *misp-galaxy:nice-framework-tasks="Diagnose network connectivity problems - T0081"*

Install or replace network hubs, routers, and switches - T0126

Install or replace network hubs, routers, and switches

The tag is: *misp-galaxy:nice-framework-tasks="Install or replace network hubs, routers, and switches - T0126"*

Integrate new systems into existing network architecture - T0129

Integrate new systems into existing network architecture

The tag is: *misp-galaxy:nice-framework-tasks="Integrate new systems into existing network architecture - T0129"*

Monitor network capacity and performance - T0153

Monitor network capacity and performance

The tag is: *misp-galaxy:nice-framework-tasks="Monitor network capacity and performance - T0153"*

Improve network security practices - T1050

Improve network security practices

The tag is: *misp-galaxy:nice-framework-tasks="Improve network security practices - T1050"*

Develop network backup and recovery procedures - T1143

Develop network backup and recovery procedures

The tag is: *misp-galaxy:nice-framework-tasks="Develop network backup and recovery procedures - T1143"*

Implement network backup and recovery procedures - T1144

Implement network backup and recovery procedures

The tag is: *misp-galaxy:nice-framework-tasks="Implement network backup and recovery procedures - T1144"*

Patch network vulnerabilities - T1248

Patch network vulnerabilities

The tag is: *misp-galaxy:nice-framework-tasks="Patch network vulnerabilities - T1248"*

Test network infrastructure, including software and hardware devices - T1313

Test network infrastructure, including software and hardware devices

The tag is: *misp-galaxy:nice-framework-tasks="Test network infrastructure, including software and hardware devices - T1313"*

Maintain network infrastructure, including software and hardware devices - T1314

Maintain network infrastructure, including software and hardware devices

The tag is: *misp-galaxy:nice-framework-tasks="Maintain network infrastructure, including software and hardware devices - T1314"*

Assess the effectiveness of security controls - T0309

Assess the effectiveness of security controls

The tag is: *misp-galaxy:nice-framework-tasks="Assess the effectiveness of security controls - T0309"*

Implement system cybersecurity policies - T1076

Implement system cybersecurity policies

The tag is: *misp-galaxy:nice-framework-tasks="Implement system cybersecurity policies - T1076"*

Determine if systems security operations and maintenance activities are property documented and updated - T1172

Determine if systems security operations and maintenance activities are property documented and updated

The tag is: *misp-galaxy:nice-framework-tasks="Determine if systems security operations and maintenance activities are property documented and updated - T1172"*

Determine that the application of security patches for commercial products meets timeline requirements - T1173

Determine that the application of security patches for commercial products meets timeline requirements

The tag is: *misp-galaxy:nice-framework-tasks="Determine that the application of security patches for commercial products meets timeline requirements - T1173"*

Document commercial product timeline requirements dictated by the management authority for intended operational environments - T1174

Document commercial product timeline requirements dictated by the management authority for intended operational environments

The tag is: *misp-galaxy:nice-framework-tasks="Document commercial product timeline requirements dictated by the management authority for intended operational environments - T1174"*

Implement cybersecurity countermeasures for systems and applications - T1212

Implement cybersecurity countermeasures for systems and applications

The tag is: *misp-galaxy:nice-framework-tasks="Implement cybersecurity countermeasures for systems and applications - T1212"*

Integrate automated capabilities for updating or patching system software - T1218

Integrate automated capabilities for updating or patching system software

The tag is: *misp-galaxy:nice-framework-tasks="Integrate automated capabilities for updating or patching system software - T1218"*

Develop processes and procedures for manual updating and patching of system software - T1219

Develop processes and procedures for manual updating and patching of system software

The tag is: *misp-galaxy:nice-framework-tasks="Develop processes and procedures for manual updating and patching of system software - T1219"*

Document systems security activities - T1287

Document systems security activities

The tag is: *misp-galaxy:nice-framework-tasks="Document systems security activities - T1287"*

Update security documentation to reflect current application and system security design features - T1327

Update security documentation to reflect current application and system security design features

The tag is: *misp-galaxy:nice-framework-tasks="Update security documentation to reflect current application and system security design features - T1327"*

Determine effectiveness of configuration management processes - T1437

Determine effectiveness of configuration management processes

The tag is: *misp-galaxy:nice-framework-tasks="Determine effectiveness of configuration management processes - T1437"*

Develop procedures for system operations transfer to alternate sites - T1532

Develop procedures for system operations transfer to alternate sites

The tag is: *misp-galaxy:nice-framework-tasks="Develop procedures for system operations transfer to alternate sites - T1532"*

Test failover for system operations transfer to alternative sites - T1533

Test failover for system operations transfer to alternative sites

The tag is: *misp-galaxy:nice-framework-tasks="Test failover for system operations transfer to alternative sites - T1533"*

Execute disaster recovery and continuity of operations processes - T1550

Execute disaster recovery and continuity of operations processes

The tag is: *misp-galaxy:nice-framework-tasks="Execute disaster recovery and continuity of operations processes - T1550"*

Implement security measures for systems and system components - T1557

Implement security measures for systems and system components

The tag is: *misp-galaxy:nice-framework-tasks="Implement security measures for systems and system components - T1557"*

Resolve vulnerabilities in systems and system components - T1559

Resolve vulnerabilities in systems and system components

The tag is: *misp-galaxy:nice-framework-tasks="Resolve vulnerabilities in systems and system components - T1559"*

Mitigate risks in systems and system components - T1560

Mitigate risks in systems and system components

The tag is: *misp-galaxy:nice-framework-tasks="Mitigate risks in systems and system components - T1560"*

Implement cross-domain solutions - T1568

Implement cross-domain solutions

The tag is: *misp-galaxy:nice-framework-tasks="Implement cross-domain solutions - T1568"*

Develop risk acceptance documentation for senior leaders and authorized representatives - T1574

Develop risk acceptance documentation for senior leaders and authorized representatives

The tag is: *misp-galaxy:nice-framework-tasks="Develop risk acceptance documentation for senior leaders and authorized representatives - T1574"*

Troubleshoot system hardware and software - T0237

Troubleshoot system hardware and software

The tag is: *misp-galaxy:nice-framework-tasks="Troubleshoot system hardware and software - T0237"*

Implement organizational security policies and procedures - T1024

Implement organizational security policies and procedures

The tag is: *misp-galaxy:nice-framework-tasks="Implement organizational security policies and procedures - T1024"*

Identify emerging incident trends - T1405

Identify emerging incident trends

The tag is: *misp-galaxy:nice-framework-tasks="Identify emerging incident trends - T1405"*

Develop technical training curriculum and resources - T1411

Develop technical training curriculum and resources

The tag is: *misp-galaxy:nice-framework-tasks="Develop technical training curriculum and resources - T1411"*

Deliver technical training to customers - T1412

Deliver technical training to customers

The tag is: *misp-galaxy:nice-framework-tasks="Deliver technical training to customers - T1412"*

Maintain incident tracking and solution databases - T1427

Maintain incident tracking and solution databases

The tag is: *misp-galaxy:nice-framework-tasks="Maintain incident tracking and solution databases - T1427"*

Resolve customer-reported system incidents and events - T1538

Resolve customer-reported system incidents and events

The tag is: *misp-galaxy:nice-framework-tasks="Resolve customer-reported system incidents and events - T1538"*

Recommend enhancements to software and hardware solutions - T1554

Recommend enhancements to software and hardware solutions

The tag is: *misp-galaxy:nice-framework-tasks="Recommend enhancements to software and hardware solutions - T1554"*

Install system hardware, software, and peripheral equipment - T1566

Install system hardware, software, and peripheral equipment

The tag is: *misp-galaxy:nice-framework-tasks="Install system hardware, software, and peripheral equipment - T1566"*

Configure system hardware, software, and peripheral equipment - T1567

Configure system hardware, software, and peripheral equipment

The tag is: *misp-galaxy:nice-framework-tasks="Configure system hardware, software, and peripheral equipment - T1567"*

Inventory technology resources - T1572

Inventory technology resources

The tag is: *misp-galaxy:nice-framework-tasks="Inventory technology resources - T1572"*

Monitor client-level computer system performance - T1580

Monitor client-level computer system performance

The tag is: *misp-galaxy:nice-framework-tasks="Monitor client-level computer system performance - T1580"*

Create client-level computer system performance reports - T1581

Create client-level computer system performance reports

The tag is: *misp-galaxy:nice-framework-tasks="Create client-level computer system performance reports - T1581"*

Develop intelligence collection requirements - T1739

Develop intelligence collection requirements

The tag is: *misp-galaxy:nice-framework-tasks="Develop intelligence collection requirements - T1739"*

Designate priority information requirements - T1741

Designate priority information requirements

The tag is: *misp-galaxy:nice-framework-tasks="Designate priority information requirements - T1741"*

Identify roles and responsibilities for appointed Communications Security (COMSEC) personnel - T1015

Identify roles and responsibilities for appointed Communications Security (COMSEC) personnel

The tag is: *misp-galaxy:nice-framework-tasks="Identify roles and responsibilities for appointed Communications Security (COMSEC) personnel - T1015"*

Identify Communications Security (COMSEC) incidents - T1016

Identify Communications Security (COMSEC) incidents

The tag is: *misp-galaxy:nice-framework-tasks="Identify Communications Security (COMSEC) incidents - T1016"*

Report Communications Security (COMSEC) incidents - T1017

Report Communications Security (COMSEC) incidents

The tag is: *misp-galaxy:nice-framework-tasks="Report Communications Security (COMSEC) incidents - T1017"*

Identify in-process accounting requirements for Communications Security (COMSEC) - T1018

Identify in-process accounting requirements for Communications Security (COMSEC)

The tag is: *misp-galaxy:nice-framework-tasks="Identify in-process accounting requirements for Communications Security (COMSEC) - T1018"*

Advise senior management on risk levels and security posture - T1058

Advise senior management on risk levels and security posture

The tag is: *misp-galaxy:nice-framework-tasks="Advise senior management on risk levels and security posture - T1058"*

Perform cost/benefit analyses of cybersecurity programs, policies, processes, systems, and elements - T1059

Perform cost/benefit analyses of cybersecurity programs, policies, processes, systems, and elements

The tag is: *misp-galaxy:nice-framework-tasks="Perform cost/benefit analyses of cybersecurity programs, policies, processes, systems, and elements - T1059"*

Advise senior management on organizational cybersecurity efforts - T1060

Advise senior management on organizational cybersecurity efforts

The tag is: *misp-galaxy:nice-framework-tasks="Advise senior management on organizational cybersecurity efforts - T1060"*

Communicate the value of cybersecurity to organizational stakeholders - T1088

Communicate the value of cybersecurity to organizational stakeholders

The tag is: *misp-galaxy:nice-framework-tasks="Communicate the value of cybersecurity to organizational stakeholders - T1088"*

Develop the enterprise continuity of operations strategy - T1113

Develop the enterprise continuity of operations strategy

The tag is: *misp-galaxy:nice-framework-tasks="Develop the enterprise continuity of operations strategy - T1113"*

Establish the enterprise continuity of operations program - T1114

Establish the enterprise continuity of operations program

The tag is: *misp-galaxy:nice-framework-tasks="Establish the enterprise continuity of operations program - T1114"*

Determine if security improvement actions are evaluated, validated, and implemented as required - T1178

Determine if security improvement actions are evaluated, validated, and implemented as required

The tag is: *misp-galaxy:nice-framework-tasks="Determine if security improvement actions are evaluated, validated, and implemented as required - T1178"*

Establish enterprise information security architecture - T1186

Establish enterprise information security architecture

The tag is: *misp-galaxy:nice-framework-tasks="Establish enterprise information security architecture - T1186"*

Report cybersecurity incidents - T1300

Report cybersecurity incidents

The tag is: *misp-galaxy:nice-framework-tasks="Report cybersecurity incidents - T1300"*

Implement protective or corrective measures when a cybersecurity incident or vulnerability is discovered - T1310

Implement protective or corrective measures when a cybersecurity incident or vulnerability is discovered

The tag is: *misp-galaxy:nice-framework-tasks="Implement protective or corrective measures when a cybersecurity incident or vulnerability is discovered - T1310"*

Serve on agency and interagency policy boards - T0226

Serve on agency and interagency policy boards

The tag is: *misp-galaxy:nice-framework-tasks="Serve on agency and interagency policy boards - T0226"*

Research new vulnerabilities in emerging technologies - T1028

Research new vulnerabilities in emerging technologies

The tag is: *misp-galaxy:nice-framework-tasks="Research new vulnerabilities in emerging technologies - T1028"*

Develop cybersecurity implementation policies and guidelines - T1158

Develop cybersecurity implementation policies and guidelines

The tag is: *misp-galaxy:nice-framework-tasks="Develop cybersecurity implementation policies and guidelines - T1158"*

Establish stakeholder communication channels - T1184

Establish stakeholder communication channels

The tag is: *misp-galaxy:nice-framework-tasks="Establish stakeholder communication channels - T1184"*

Maintain stakeholder communication channels - T1185

Maintain stakeholder communication channels

The tag is: *misp-galaxy:nice-framework-tasks="Maintain stakeholder communication channels - T1185"*

Conduct technology program and project audits - T1306

Conduct technology program and project audits

The tag is: *misp-galaxy:nice-framework-tasks="Conduct technology program and project audits - T1306"*

Promote cybersecurity awareness to management - T1335

Promote cybersecurity awareness to management

The tag is: *misp-galaxy:nice-framework-tasks="Promote cybersecurity awareness to management - T1335"*

Verify the inclusion of sound cybersecurity principles in the organization’s vision and goals - T1336

Verify the inclusion of sound cybersecurity principles in the organization’s vision and goals

The tag is: *misp-galaxy:nice-framework-tasks="Verify the inclusion of sound cybersecurity principles in the organization’s vision and goals - T1336"*

Determine if cybersecurity requirements have been successfully implemented - T1357

Determine if cybersecurity requirements have been successfully implemented

The tag is: *misp-galaxy:nice-framework-tasks="Determine if cybersecurity requirements have been successfully implemented - T1357"*

Determine the effectiveness of organizational cybersecurity policies and procedures - T1358

Determine the effectiveness of organizational cybersecurity policies and procedures

The tag is: *misp-galaxy:nice-framework-tasks="Determine the effectiveness of organizational cybersecurity policies and procedures - T1358"*

Develop independent cybersecurity audit processes for application software, networks, and systems - T1394

Develop independent cybersecurity audit processes for application software, networks, and systems

The tag is: *misp-galaxy:nice-framework-tasks="Develop independent cybersecurity audit processes for application software, networks, and systems - T1394"*

Implement independent cybersecurity audit processes for application software, networks, and systems - T1395

Implement independent cybersecurity audit processes for application software, networks, and systems

The tag is: *misp-galaxy:nice-framework-tasks="Implement independent cybersecurity audit processes for application software, networks, and systems - T1395"*

Oversee independent cybersecurity audits - T1396

Oversee independent cybersecurity audits

The tag is: *misp-galaxy:nice-framework-tasks="Oversee independent cybersecurity audits - T1396"*

Determine if research and design processes and procedures are in compliance with cybersecurity requirements - T1397

Determine if research and design processes and procedures are in compliance with cybersecurity requirements

The tag is: *misp-galaxy:nice-framework-tasks="Determine if research and design processes and procedures are in compliance with cybersecurity requirements - T1397"*

Determine if research and design processes and procedures are accurately followed by cybersecurity staff when performing their day-to-day activities - T1398

Determine if research and design processes and procedures are accurately followed by cybersecurity staff when performing their day-to-day activities

The tag is: *misp-galaxy:nice-framework-tasks="Determine if research and design processes and procedures are accurately followed by cybersecurity staff when performing their day-to-day activities - T1398"*

Acquire adequate funding for cybersecurity training - T1436

Acquire adequate funding for cybersecurity training

The tag is: *misp-galaxy:nice-framework-tasks="Acquire adequate funding for cybersecurity training - T1436"*

Determine if cybersecurity workforce management policies and procedures comply with legal and organizational requirements - T1464

Determine if cybersecurity workforce management policies and procedures comply with legal and organizational requirements

The tag is: *misp-galaxy:nice-framework-tasks="Determine if cybersecurity workforce management policies and procedures comply with legal and organizational requirements - T1464"*

Promote awareness of cybersecurity policy and strategy among management - T1476

Promote awareness of cybersecurity policy and strategy among management

The tag is: *misp-galaxy:nice-framework-tasks="Promote awareness of cybersecurity policy and strategy among management - T1476"*

Conduct cybersecurity workforce assessments - T1482

Conduct cybersecurity workforce assessments

The tag is: *misp-galaxy:nice-framework-tasks="Conduct cybersecurity workforce assessments - T1482"*

Integrate laws and regulations into policy - T1492

Integrate laws and regulations into policy

The tag is: *misp-galaxy:nice-framework-tasks="Integrate laws and regulations into policy - T1492"*

Develop organizational cybersecurity strategy - T1518

Develop organizational cybersecurity strategy

The tag is: *misp-galaxy:nice-framework-tasks="Develop organizational cybersecurity strategy - T1518"*

Develop cybersecurity policies and procedures - T1543

Develop cybersecurity policies and procedures

The tag is: *misp-galaxy:nice-framework-tasks="Develop cybersecurity policies and procedures - T1543"*

Advise management, staff, and users on cybersecurity policy - T1605

Advise management, staff, and users on cybersecurity policy

The tag is: *misp-galaxy:nice-framework-tasks="Advise management, staff, and users on cybersecurity policy - T1605"*

Identify organizational policy stakeholders - T0116

Identify organizational policy stakeholders

The tag is: *misp-galaxy:nice-framework-tasks="Identify organizational policy stakeholders - T0116"*

Correlate training and learning to business or mission requirements - T0437

Correlate training and learning to business or mission requirements

The tag is: *misp-galaxy:nice-framework-tasks="Correlate training and learning to business or mission requirements - T0437"*

Implement organizational training and education policies and procedures - T1025

Implement organizational training and education policies and procedures

The tag is: *misp-galaxy:nice-framework-tasks="Implement organizational training and education policies and procedures - T1025"*

Conduct learning needs assessments - T1446

Conduct learning needs assessments

The tag is: *misp-galaxy:nice-framework-tasks="Conduct learning needs assessments - T1446"*

Identify training requirements - T1447

Identify training requirements

The tag is: *misp-galaxy:nice-framework-tasks="Identify training requirements - T1447"*

Determine if qualification standards meet organizational functional requirements and comply with industry standards - T1449

Determine if qualification standards meet organizational functional requirements and comply with industry standards

The tag is: *misp-galaxy:nice-framework-tasks="Determine if qualification standards meet organizational functional requirements and comply with industry standards - T1449"*

Allocate and distribute human capital assets - T1450

Allocate and distribute human capital assets

The tag is: *misp-galaxy:nice-framework-tasks="Allocate and distribute human capital assets - T1450"*

Develop standardized cybersecurity position descriptions using the NICE Framework - T1459

Develop standardized cybersecurity position descriptions using the NICE Framework

The tag is: *misp-galaxy:nice-framework-tasks="Develop standardized cybersecurity position descriptions using the NICE Framework - T1459"*

Develop recruiting, hiring, and retention processes - T1460

Develop recruiting, hiring, and retention processes

The tag is: *misp-galaxy:nice-framework-tasks="Develop recruiting, hiring, and retention processes - T1460"*

Determine cybersecurity position requirements - T1461

Determine cybersecurity position requirements

The tag is: *misp-galaxy:nice-framework-tasks="Determine cybersecurity position requirements - T1461"*

Develop cybersecurity training policies and procedures - T1462

Develop cybersecurity training policies and procedures

The tag is: *misp-galaxy:nice-framework-tasks="Develop cybersecurity training policies and procedures - T1462"*

Establish cybersecurity workforce readiness metrics - T1466

Establish cybersecurity workforce readiness metrics

The tag is: *misp-galaxy:nice-framework-tasks="Establish cybersecurity workforce readiness metrics - T1466"*

Establish waiver processes for cybersecurity career field entry and training qualification requirements - T1467

Establish waiver processes for cybersecurity career field entry and training qualification requirements

The tag is: *misp-galaxy:nice-framework-tasks="Establish waiver processes for cybersecurity career field entry and training qualification requirements - T1467"*

Establish organizational cybersecurity career pathways - T1468

Establish organizational cybersecurity career pathways

The tag is: *misp-galaxy:nice-framework-tasks="Establish organizational cybersecurity career pathways - T1468"*

Develop cybersecurity workforce reporting requirements - T1469

Develop cybersecurity workforce reporting requirements

The tag is: *misp-galaxy:nice-framework-tasks="Develop cybersecurity workforce reporting requirements - T1469"*

Establish cybersecurity workforce management programs - T1470

Establish cybersecurity workforce management programs

The tag is: *misp-galaxy:nice-framework-tasks="Establish cybersecurity workforce management programs - T1470"*

Assess cybersecurity workforce management programs - T1471

Assess cybersecurity workforce management programs

The tag is: *misp-galaxy:nice-framework-tasks="Assess cybersecurity workforce management programs - T1471"*

Determine cybersecurity career field qualification requirements - T1478

Determine cybersecurity career field qualification requirements

The tag is: *misp-galaxy:nice-framework-tasks="Determine cybersecurity career field qualification requirements - T1478"*

Determine organizational policies related to or influencing the cyber workforce - T1479

Determine organizational policies related to or influencing the cyber workforce

The tag is: *misp-galaxy:nice-framework-tasks="Determine organizational policies related to or influencing the cyber workforce - T1479"*

Integrate cybersecurity workforce personnel into information systems life cycle development processes - T1483

Integrate cybersecurity workforce personnel into information systems life cycle development processes

The tag is: *misp-galaxy:nice-framework-tasks="Integrate cybersecurity workforce personnel into information systems life cycle development processes - T1483"*

Identify cyber workforce planning and management issues - T1552

Identify cyber workforce planning and management issues

The tag is: *misp-galaxy:nice-framework-tasks="Identify cyber workforce planning and management issues - T1552"*

Address cyber workforce planning and management issues - T1553

Address cyber workforce planning and management issues

The tag is: *misp-galaxy:nice-framework-tasks="Address cyber workforce planning and management issues - T1553"*

Develop supply chain cybersecurity risk management policy - T1623

Develop supply chain cybersecurity risk management policy

The tag is: *misp-galaxy:nice-framework-tasks="Develop supply chain cybersecurity risk management policy - T1623"*

Identify foreign language terminology within computer programs (e.g., comments, variable names) - T0858

Identify foreign language terminology within computer programs (e.g., comments, variable names)

The tag is: *misp-galaxy:nice-framework-tasks="Identify foreign language terminology within computer programs (e.g., comments, variable names) - T0858"*

Advise managers and operators on language and cultural issues - T1837

Advise managers and operators on language and cultural issues

The tag is: *misp-galaxy:nice-framework-tasks="Advise managers and operators on language and cultural issues - T1837"*

Assess target motivation - T1838

Assess target motivation

The tag is: *misp-galaxy:nice-framework-tasks="Assess target motivation - T1838"*

Conduct all-source target research - T1839

Conduct all-source target research

The tag is: *misp-galaxy:nice-framework-tasks="Conduct all-source target research - T1839"*

Conduct quality reviews of transcribed or translated materials - T1841

Conduct quality reviews of transcribed or translated materials

The tag is: *misp-galaxy:nice-framework-tasks="Conduct quality reviews of transcribed or translated materials - T1841"*

Identify metadata patterns - T1842

Identify metadata patterns

The tag is: *misp-galaxy:nice-framework-tasks="Identify metadata patterns - T1842"*

Identify metadata anomalies - T1843

Identify metadata anomalies

The tag is: *misp-galaxy:nice-framework-tasks="Identify metadata anomalies - T1843"*

Identify metadata events - T1844

Identify metadata events

The tag is: *misp-galaxy:nice-framework-tasks="Identify metadata events - T1844"*

Identify foreign languages and dialects in initial source data - T1845

Identify foreign languages and dialects in initial source data

The tag is: *misp-galaxy:nice-framework-tasks="Identify foreign languages and dialects in initial source data - T1845"*

Develop language processing tools - T1846

Develop language processing tools

The tag is: *misp-galaxy:nice-framework-tasks="Develop language processing tools - T1846"*

Prepare social network analysis documents - T1847

Prepare social network analysis documents

The tag is: *misp-galaxy:nice-framework-tasks="Prepare social network analysis documents - T1847"*

Scan target graphic and audio language materials - T1848

Scan target graphic and audio language materials

The tag is: *misp-galaxy:nice-framework-tasks="Scan target graphic and audio language materials - T1848"*

Communicate critical or time-sensitive information - T1849

Communicate critical or time-sensitive information

The tag is: *misp-galaxy:nice-framework-tasks="Communicate critical or time-sensitive information - T1849"*

Transcribe target audio language materials - T1850

Transcribe target audio language materials

The tag is: *misp-galaxy:nice-framework-tasks="Transcribe target audio language materials - T1850"*

Translate target graphic language materials - T1851

Translate target graphic language materials

The tag is: *misp-galaxy:nice-framework-tasks="Translate target graphic language materials - T1851"*

Translate target audio language materials - T1852

Translate target audio language materials

The tag is: *misp-galaxy:nice-framework-tasks="Translate target audio language materials - T1852"*

Coordinate intelligence support to operational planning - T1637

Coordinate intelligence support to operational planning

The tag is: *misp-galaxy:nice-framework-tasks="Coordinate intelligence support to operational planning - T1637"*

Communicate information requirements to collection managers - T1684

Communicate information requirements to collection managers

The tag is: *misp-galaxy:nice-framework-tasks="Communicate information requirements to collection managers - T1684"*

Assess capability to satisfy assigned intelligence tasks - T1685

Assess capability to satisfy assigned intelligence tasks

The tag is: *misp-galaxy:nice-framework-tasks="Assess capability to satisfy assigned intelligence tasks - T1685"*

Draft intelligence sections of cyber operations plans - T1687

Draft intelligence sections of cyber operations plans

The tag is: *misp-galaxy:nice-framework-tasks="Draft intelligence sections of cyber operations plans - T1687"*

Integrate intelligence guidance into cyber operations planning activities - T1702

Integrate intelligence guidance into cyber operations planning activities

The tag is: *misp-galaxy:nice-framework-tasks="Integrate intelligence guidance into cyber operations planning activities - T1702"*

Provide intelligence guidance to cyber operations requirements - T1705

Provide intelligence guidance to cyber operations requirements

The tag is: *misp-galaxy:nice-framework-tasks="Provide intelligence guidance to cyber operations requirements - T1705"*

Develop cyber intelligence collection and production requirements - T1727

Develop cyber intelligence collection and production requirements

The tag is: *misp-galaxy:nice-framework-tasks="Develop cyber intelligence collection and production requirements - T1727"*

Determine cyber operations partner intelligence capabilities and limitations - T1738

Determine cyber operations partner intelligence capabilities and limitations

The tag is: *misp-galaxy:nice-framework-tasks="Determine cyber operations partner intelligence capabilities and limitations - T1738"*

Identify intelligence environment preparation derived production needs - T1750

Identify intelligence environment preparation derived production needs

The tag is: *misp-galaxy:nice-framework-tasks="Identify intelligence environment preparation derived production needs - T1750"*

Develop cyber intelligence plans - T1815

Develop cyber intelligence plans

The tag is: *misp-galaxy:nice-framework-tasks="Develop cyber intelligence plans - T1815"*

Analyze incoming collection requests - T0565

Analyze incoming collection requests

The tag is: *misp-galaxy:nice-framework-tasks="Analyze incoming collection requests - T0565"*

Assess efficiency of existing information exchange and management systems - T0577

Assess efficiency of existing information exchange and management systems

The tag is: *misp-galaxy:nice-framework-tasks="Assess efficiency of existing information exchange and management systems - T0577"*

Manage request for information (RFI) processes - T1656

Manage request for information (RFI) processes

The tag is: *misp-galaxy:nice-framework-tasks="Manage request for information (RFI) processes -*

T1656"

Develop feedback procedures - T1713

Develop feedback procedures

The tag is: *misp-galaxy:nice-framework-tasks="Develop feedback procedures - T1713"*

Assess intelligence collection results - T1725

Assess intelligence collection results

The tag is: *misp-galaxy:nice-framework-tasks="Assess intelligence collection results - T1725"*

Document intelligence collection assessment findings - T1726

Document intelligence collection assessment findings

The tag is: *misp-galaxy:nice-framework-tasks="Document intelligence collection assessment findings - T1726"*

Determine if collection requests meet priority intelligence requirements - T1730

Determine if collection requests meet priority intelligence requirements

The tag is: *misp-galaxy:nice-framework-tasks="Determine if collection requests meet priority intelligence requirements - T1730"*

Determine if information collected satisfies intelligence requests - T1731

Determine if information collected satisfies intelligence requests

The tag is: *misp-galaxy:nice-framework-tasks="Determine if information collected satisfies intelligence requests - T1731"*

Determine if collection operations meet operational requirements - T1733

Determine if collection operations meet operational requirements

The tag is: *misp-galaxy:nice-framework-tasks="Determine if collection operations meet operational requirements - T1733"*

Inform stakeholders of evaluation results - T1753

Inform stakeholders of evaluation results

The tag is: *misp-galaxy:nice-framework-tasks="Inform stakeholders of evaluation results - T1753"*

Promote collection planning as an integrated component of the strategic campaign plans and other adaptive plans - T1788

Promote collection planning as an integrated component of the strategic campaign plans and other adaptive plans

The tag is: *misp-galaxy:nice-framework-tasks="Promote collection planning as an integrated component of the strategic campaign plans and other adaptive plans - T1788"*

Submit information requests to collection requirement management section - T1821

Submit information requests to collection requirement management section

The tag is: *misp-galaxy:nice-framework-tasks="Submit information requests to collection requirement management section - T1821"*

Track status of information requests - T1831

Track status of information requests

The tag is: *misp-galaxy:nice-framework-tasks="Track status of information requests - T1831"*

Translate collection requests for discipline-specific collection requirements - T1832

Translate collection requests for discipline-specific collection requirements

The tag is: *misp-galaxy:nice-framework-tasks="Translate collection requests for discipline-specific collection requirements - T1832"*

Identify opportunities to improve collection management efficiency and effectiveness - T1833

Identify opportunities to improve collection management efficiency and effectiveness

Validate information requests - T1834

Validate information requests

The tag is: *misp-galaxy:nice-framework-tasks="Validate information requests - T1834"*

Establish an internal privacy audit program - T0898

Establish an internal privacy audit program

The tag is: *misp-galaxy:nice-framework-tasks="Establish an internal privacy audit program - T0898"*

Determine if security incidents require legal action - T1014

Determine if security incidents require legal action

The tag is: *misp-galaxy:nice-framework-tasks="Determine if security incidents require legal action - T1014"*

Determine impact of noncompliance on organizational risk levels - T1224

Determine impact of noncompliance on organizational risk levels

The tag is: *misp-galaxy:nice-framework-tasks="Determine impact of noncompliance on organizational risk levels - T1224"*

Determine impact of noncompliance on effectiveness of the enterprise’s cybersecurity program - T1225

Determine impact of noncompliance on effectiveness of the enterprise’s cybersecurity program

The tag is: *misp-galaxy:nice-framework-tasks="Determine impact of noncompliance on effectiveness of the enterprise’s cybersecurity program - T1225"*

Determine if new and existing services comply with privacy and data security obligations - T1853

Determine if new and existing services comply with privacy and data security obligations

The tag is: *misp-galaxy:nice-framework-tasks="Determine if new and existing services comply with privacy and data security obligations - T1853"*

Develop and maintain privacy and confidentiality consent forms - T1854

Develop and maintain privacy and confidentiality consent forms

The tag is: *misp-galaxy:nice-framework-tasks="Develop and maintain privacy and confidentiality consent forms - T1854"*

Develop and maintain privacy and confidentiality authorization forms - T1855

Develop and maintain privacy and confidentiality authorization forms

The tag is: *misp-galaxy:nice-framework-tasks="Develop and maintain privacy and confidentiality authorization forms - T1855"*

Integrate civil rights and civil liberties in organizational programs, policies, and procedures - T1856

Integrate civil rights and civil liberties in organizational programs, policies, and procedures

The tag is: *misp-galaxy:nice-framework-tasks="Integrate civil rights and civil liberties in organizational programs, policies, and procedures - T1856"*

Integrate privacy considerations in organizational programs, policies, and procedures - T1857

Integrate privacy considerations in organizational programs, policies, and procedures

The tag is: *misp-galaxy:nice-framework-tasks="Integrate privacy considerations in organizational programs, policies, and procedures - T1857"*

Serve as liaison to regulatory and accrediting bodies - T1858

Serve as liaison to regulatory and accrediting bodies

The tag is: *misp-galaxy:nice-framework-tasks="Serve as liaison to regulatory and accrediting bodies - T1858"*

Register databases with local privacy and data protection authorities - T1859

Register databases with local privacy and data protection authorities

The tag is: *misp-galaxy:nice-framework-tasks="Register databases with local privacy and data protection authorities - T1859"*

Promote privacy awareness to management - T1860

Promote privacy awareness to management

The tag is: *misp-galaxy:nice-framework-tasks="Promote privacy awareness to management - T1860"*

Establish organizational Privacy Oversight Committee - T1861

Establish organizational Privacy Oversight Committee

The tag is: *misp-galaxy:nice-framework-tasks="Establish organizational Privacy Oversight Committee - T1861"*

Develop information sharing strategic plans - T1863

Develop information sharing strategic plans

The tag is: *misp-galaxy:nice-framework-tasks="Develop information sharing strategic plans - T1863"*

Develop organizational information infrastructure - T1864

Develop organizational information infrastructure

The tag is: *misp-galaxy:nice-framework-tasks="Develop organizational information infrastructure - T1864"*

Implement organizational information infrastructure - T1865

Implement organizational information infrastructure

The tag is: *misp-galaxy:nice-framework-tasks="Implement organizational information infrastructure - T1865"*

Develop self-disclosure policies and procedures - T1866

Develop self-disclosure policies and procedures

The tag is: *misp-galaxy:nice-framework-tasks="Develop self-disclosure policies and procedures - T1866"*

Oversee consumer information access rights - T1867

Oversee consumer information access rights

The tag is: *misp-galaxy:nice-framework-tasks="Oversee consumer information access rights - T1867"*

Serve as information privacy liaison to technology system users - T1868

Serve as information privacy liaison to technology system users

The tag is: *misp-galaxy:nice-framework-tasks="Serve as information privacy liaison to technology system users - T1868"*

Serve as liaison to information systems department - T1869

Serve as liaison to information systems department

The tag is: *misp-galaxy:nice-framework-tasks="Serve as liaison to information systems department - T1869"*

Deliver privacy awareness orientations - T1872

Deliver privacy awareness orientations

The tag is: *misp-galaxy:nice-framework-tasks="Deliver privacy awareness orientations - T1872"*

Manage organizational participation in public privacy and cybersecurity events - T1874

Manage organizational participation in public privacy and cybersecurity events

The tag is: *misp-galaxy:nice-framework-tasks="Manage organizational participation in public privacy and cybersecurity events - T1874"*

Prepare privacy program status reports - T1875

Prepare privacy program status reports

The tag is: *misp-galaxy:nice-framework-tasks="Prepare privacy program status reports - T1875"*

Respond to press and other public data security inquiries - T1876

Respond to press and other public data security inquiries

The tag is: *misp-galaxy:nice-framework-tasks="Respond to press and other public data security inquiries - T1876"*

Develop organizational privacy program - T1877

Develop organizational privacy program

The tag is: *misp-galaxy:nice-framework-tasks="Develop organizational privacy program - T1877"*

Apply sanctions for failure to comply with privacy policies - T1878

Apply sanctions for failure to comply with privacy policies

The tag is: *misp-galaxy:nice-framework-tasks="Apply sanctions for failure to comply with privacy policies - T1878"*

Develop sanctions for failure to comply with privacy policies - T1879

Develop sanctions for failure to comply with privacy policies

The tag is: *misp-galaxy:nice-framework-tasks="Develop sanctions for failure to comply with privacy policies - T1879"*

Resolve allegations of noncompliance with privacy policies and notice of information practices - T1880

Resolve allegations of noncompliance with privacy policies and notice of information practices

The tag is: *misp-galaxy:nice-framework-tasks="Resolve allegations of noncompliance with privacy policies and notice of information practices - T1880"*

Develop a risk management and compliance framework for privacy - T1881

Develop a risk management and compliance framework for privacy

The tag is: *misp-galaxy:nice-framework-tasks="Develop a risk management and compliance framework for privacy - T1881"*

Determine if projects comply with organizational privacy and data security policies - T1882

Determine if projects comply with organizational privacy and data security policies

The tag is: *misp-galaxy:nice-framework-tasks="Determine if projects comply with organizational privacy and data security policies - T1882"*

Develop organizational privacy policies and procedures - T1883

Develop organizational privacy policies and procedures

The tag is: *misp-galaxy:nice-framework-tasks="Develop organizational privacy policies and procedures - T1883"*

Establish complaint processes - T1884

Establish complaint processes

The tag is: *misp-galaxy:nice-framework-tasks="Establish complaint processes - T1884"*

Establish mechanisms to track access to protected health information - T1885

Establish mechanisms to track access to protected health information

The tag is: *misp-galaxy:nice-framework-tasks="Establish mechanisms to track access to protected health information - T1885"*

Maintain the organizational policy program - T1886

Maintain the organizational policy program

The tag is: *misp-galaxy:nice-framework-tasks="Maintain the organizational policy program - T1886"*

Conduct privacy impact assessments - T1887

Conduct privacy impact assessments

The tag is: *misp-galaxy:nice-framework-tasks="Conduct privacy impact assessments - T1887"*

Conduct privacy compliance monitoring - T1888

Conduct privacy compliance monitoring

The tag is: *misp-galaxy:nice-framework-tasks="Conduct privacy compliance monitoring - T1888"*

Align cybersecurity and privacy practices in system information security plans - T1889

Align cybersecurity and privacy practices in system information security plans

The tag is: *misp-galaxy:nice-framework-tasks="Align cybersecurity and privacy practices in system information security plans - T1889"*

Determine if protected information releases comply with organizational policies and procedures - T1890

Determine if protected information releases comply with organizational policies and procedures

The tag is: *misp-galaxy:nice-framework-tasks="Determine if protected information releases comply with organizational policies and procedures - T1890"*

Administer requests for release or disclosure of protected information - T1891

Administer requests for release or disclosure of protected information

The tag is: *misp-galaxy:nice-framework-tasks="Administer requests for release or disclosure of protected information - T1891"*

Develop vendor review procedures - T1892

Develop vendor review procedures

The tag is: *misp-galaxy:nice-framework-tasks="Develop vendor review procedures - T1892"*

Develop vendor auditing procedures - T1893

Develop vendor auditing procedures

The tag is: *misp-galaxy:nice-framework-tasks="Develop vendor auditing procedures - T1893"*

Determine if partner and business agreements address privacy requirements and responsibilities - T1894

Determine if partner and business agreements address privacy requirements and responsibilities

The tag is: *misp-galaxy:nice-framework-tasks="Determine if partner and business agreements address privacy requirements and responsibilities - T1894"*

Provide legal advice for business partner contracts - T1895

Provide legal advice for business partner contracts

The tag is: *misp-galaxy:nice-framework-tasks="Provide legal advice for business partner contracts - T1895"*

Mitigate Personal Identifiable Information (PII) breaches - T1896

Mitigate Personal Identifiable Information (PII) breaches

The tag is: *misp-galaxy:nice-framework-tasks="Mitigate Personal Identifiable Information (PII) breaches - T1896"*

Administer action on organizational privacy complaints - T1897

Administer action on organizational privacy complaints

The tag is: *misp-galaxy:nice-framework-tasks="Administer action on organizational privacy complaints - T1897"*

Determine if the organization’s privacy program complies with federal and state privacy laws and regulations - T1898

Determine if the organization’s privacy program complies with federal and state privacy laws and regulations

The tag is: *misp-galaxy:nice-framework-tasks="Determine if the organization’s privacy program*

complies with federal and state privacy laws and regulations - T1898"

Identify organizational privacy compliance gaps - T1899

Identify organizational privacy compliance gaps

The tag is: *misp-galaxy:nice-framework-tasks="Identify organizational privacy compliance gaps - T1899"*

Correct organizational privacy compliance gaps - T1900

Correct organizational privacy compliance gaps

The tag is: *misp-galaxy:nice-framework-tasks="Correct organizational privacy compliance gaps - T1900"*

Manage privacy breaches - T1901

Manage privacy breaches

The tag is: *misp-galaxy:nice-framework-tasks="Manage privacy breaches - T1901"*

Implement and maintain organizational privacy policies and procedures - T1902

Implement and maintain organizational privacy policies and procedures

The tag is: *misp-galaxy:nice-framework-tasks="Implement and maintain organizational privacy policies and procedures - T1902"*

Develop and maintain privacy and confidentiality information notices - T1903

Develop and maintain privacy and confidentiality information notices

The tag is: *misp-galaxy:nice-framework-tasks="Develop and maintain privacy and confidentiality information notices - T1903"*

Monitor advancements in information privacy technologies - T1905

Monitor advancements in information privacy technologies

The tag is: *misp-galaxy:nice-framework-tasks="Monitor advancements in information privacy technologies - T1905"*

Establish organizational risk management strategies - T1907

Establish organizational risk management strategies

The tag is: *misp-galaxy:nice-framework-tasks="Establish organizational risk management strategies - T1907"*

Design and execute exercise scenarios - T1311

Design and execute exercise scenarios

The tag is: *misp-galaxy:nice-framework-tasks="Design and execute exercise scenarios - T1311"*

Develop training modules and classes - T1413

Develop training modules and classes

The tag is: *misp-galaxy:nice-framework-tasks="Develop training modules and classes - T1413"*

Develop training assignments - T1414

Develop training assignments

The tag is: *misp-galaxy:nice-framework-tasks="Develop training assignments - T1414"*

Develop training evaluations - T1415

Develop training evaluations

The tag is: *misp-galaxy:nice-framework-tasks="Develop training evaluations - T1415"*

Develop grading and proficiency standards - T1416

Develop grading and proficiency standards

The tag is: *misp-galaxy:nice-framework-tasks="Develop grading and proficiency standards - T1416"*

Create learner development, training, and remediation plans - T1417

Create learner development, training, and remediation plans

The tag is: *misp-galaxy:nice-framework-tasks="Create learner development, training, and remediation plans - T1417"*

Determine effectiveness of instruction and training - T1438

Determine effectiveness of instruction and training

The tag is: *misp-galaxy:nice-framework-tasks="Determine effectiveness of instruction and training - T1438"*

Create interactive learning exercises - T1451

Create interactive learning exercises

The tag is: *misp-galaxy:nice-framework-tasks="Create interactive learning exercises - T1451"*

Develop cybersecurity curriculum goals and objectives - T1463

Develop cybersecurity curriculum goals and objectives

The tag is: *misp-galaxy:nice-framework-tasks="Develop cybersecurity curriculum goals and objectives - T1463"*

Develop instructional strategies - T1475

Develop instructional strategies

The tag is: *misp-galaxy:nice-framework-tasks="Develop instructional strategies - T1475"*

Perform periodic reviews of learning materials and courses for accuracy and currency - T1608

Perform periodic reviews of learning materials and courses for accuracy and currency

The tag is: *misp-galaxy:nice-framework-tasks="Perform periodic reviews of learning materials and courses for accuracy and currency - T1608"*

Create privacy training materials - T1870

Create privacy training materials

The tag is: *misp-galaxy:nice-framework-tasks="Create privacy training materials - T1870"*

Prepare privacy awareness communications - T1871

Prepare privacy awareness communications

The tag is: *misp-galaxy:nice-framework-tasks="Prepare privacy awareness communications - T1871"*

Deliver privacy awareness trainings - T1873

Deliver privacy awareness trainings

The tag is: *misp-galaxy:nice-framework-tasks="Deliver privacy awareness trainings - T1873"*

Evaluate the effectiveness and comprehensiveness of existing training programs - T0101

Evaluate the effectiveness and comprehensiveness of existing training programs

The tag is: *misp-galaxy:nice-framework-tasks="Evaluate the effectiveness and comprehensiveness of existing training programs - T0101"*

Prepare and deliver education and awareness briefings - T1008

Prepare and deliver education and awareness briefings

The tag is: *misp-galaxy:nice-framework-tasks="Prepare and deliver education and awareness briefings - T1008"*

Create a cybersecurity awareness program - T1009

Create a cybersecurity awareness program

The tag is: *misp-galaxy:nice-framework-tasks="Create a cybersecurity awareness program - T1009"*

Conduct interactive training exercises - T1093

Conduct interactive training exercises

The tag is: *misp-galaxy:nice-framework-tasks="Conduct interactive training exercises - T1093"*

Develop awareness and training materials - T1156

Develop awareness and training materials

The tag is: *misp-galaxy:nice-framework-tasks="Develop awareness and training materials - T1156"*

Identify pertinent awareness and training materials - T1157

Identify pertinent awareness and training materials

The tag is: *misp-galaxy:nice-framework-tasks="Identify pertinent awareness and training materials - T1157"*

Develop learning objectives and goals - T1418

Develop learning objectives and goals

The tag is: *misp-galaxy:nice-framework-tasks="Develop learning objectives and goals - T1418"*

Develop organizational training materials - T1419

Develop organizational training materials

The tag is: *misp-galaxy:nice-framework-tasks="Develop organizational training materials - T1419"*

Develop proficiency assessments - T1421

Develop proficiency assessments

The tag is: *misp-galaxy:nice-framework-tasks="Develop proficiency assessments - T1421"*

Deliver training courses - T1517

Deliver training courses

The tag is: *misp-galaxy:nice-framework-tasks="Deliver training courses - T1517"*

Determine if cybersecurity training, education, and awareness meet established goals - T1537

Determine if cybersecurity training, education, and awareness meet established goals

The tag is: *misp-galaxy:nice-framework-tasks="Determine if cybersecurity training, education, and awareness meet established goals - T1537"*

Plan classroom learning sessions - T1594

Plan classroom learning sessions

The tag is: *misp-galaxy:nice-framework-tasks="Plan classroom learning sessions - T1594"*

Coordinate training and education - T1595

Coordinate training and education

The tag is: *misp-galaxy:nice-framework-tasks="Coordinate training and education - T1595"*

Plan delivery of non-classroom learning - T1596

Plan delivery of non-classroom learning

The tag is: *misp-galaxy:nice-framework-tasks="Plan delivery of non-classroom learning - T1596"*

Recommend revisions to learning materials and curriculum - T1609

Recommend revisions to learning materials and curriculum

The tag is: *misp-galaxy:nice-framework-tasks="Recommend revisions to learning materials and curriculum - T1609"*

Advocate organization’s official position in legal and legislative proceedings - T0006

Advocate organization’s official position in legal and legislative proceedings

The tag is: *misp-galaxy:nice-framework-tasks="Advocate organization’s official position in legal and legislative proceedings - T0006"*

Resolve conflicts in laws, regulations, policies, standards, or procedures - T0220

Resolve conflicts in laws, regulations, policies, standards, or procedures

The tag is: *misp-galaxy:nice-framework-tasks="Resolve conflicts in laws, regulations, policies, standards, or procedures - T0220"*

Determine if contracts comply with funding, legal, and program requirements - T1189

Determine if contracts comply with funding, legal, and program requirements

The tag is: *misp-galaxy:nice-framework-tasks="Determine if contracts comply with funding, legal, and program requirements - T1189"*

Identify alleged violations of law, regulations, policy, or guidance - T1511

Identify alleged violations of law, regulations, policy, or guidance

The tag is: *misp-galaxy:nice-framework-tasks="Identify alleged violations of law, regulations, policy, or guidance - T1511"*

Develop implementation guidelines - T1535

Develop implementation guidelines

The tag is: *misp-galaxy:nice-framework-tasks="Develop implementation guidelines - T1535"*

Provide inspectors general, privacy officers, and oversight and compliance with legal analysis and decisions - T1546

Provide inspectors general, privacy officers, and oversight and compliance with legal analysis and decisions

The tag is: *misp-galaxy:nice-framework-tasks="Provide inspectors general, privacy officers, and oversight and compliance with legal analysis and decisions - T1546"*

Evaluate the impact of legal, regulatory, policy, standard, or procedural changes - T1549

Evaluate the impact of legal, regulatory, policy, standard, or procedural changes

The tag is: *misp-galaxy:nice-framework-tasks="Evaluate the impact of legal, regulatory, policy, standard, or procedural changes - T1549"*

Prepare legal documents - T1599

Prepare legal documents

The tag is: *misp-galaxy:nice-framework-tasks="Prepare legal documents - T1599"*

Implement access control processes for continuous monitoring tools and technologies - T1959

Implement access control processes for continuous monitoring tools and technologies

The tag is: *misp-galaxy:nice-framework-tasks="Implement access control processes for continuous monitoring tools and technologies - T1959"*

Manage the continuous monitoring program - T1950

Manage the continuous monitoring program

The tag is: *misp-galaxy:nice-framework-tasks="Manage the continuous monitoring program - T1950"*

Verify currency of software application, network, and system accreditation and assurance documentation - T1331

Verify currency of software application, network, and system accreditation and assurance documentation

The tag is: *misp-galaxy:nice-framework-tasks="Verify currency of software application, network, and system accreditation and assurance documentation - T1331"*

Develop architectures or system components consistent with technical specifications - T0067

Develop architectures or system components consistent with technical specifications

The tag is: *misp-galaxy:nice-framework-tasks="Develop architectures or system components consistent with technical specifications - T0067"*

Determine if systems comply with security, resilience, and dependability requirements - T1237

Determine if systems comply with security, resilience, and dependability requirements

The tag is: *misp-galaxy:nice-framework-tasks="Determine if systems comply with security, resilience, and dependability requirements - T1237"*

Determine compliance with cybersecurity policies and legal and regulatory requirements - T1547

Determine compliance with cybersecurity policies and legal and regulatory requirements

The tag is: *misp-galaxy:nice-framework-tasks="Determine compliance with cybersecurity policies and legal and regulatory requirements - T1547"*

Establish technical help processes for continuous monitoring mitigators - T1960

Establish technical help processes for continuous monitoring mitigators

The tag is: *misp-galaxy:nice-framework-tasks="Establish technical help processes for continuous monitoring mitigators - T1960"*

Communicate continuous monitoring reporting requirements - T1961

Communicate continuous monitoring reporting requirements

The tag is: *misp-galaxy:nice-framework-tasks="Communicate continuous monitoring reporting requirements - T1961"*

Implement risk mitigation strategies - T1968

Implement risk mitigation strategies

The tag is: *misp-galaxy:nice-framework-tasks="Implement risk mitigation strategies - T1968"*

Assess continuous monitoring performance - T1966

Assess continuous monitoring performance

The tag is: *misp-galaxy:nice-framework-tasks="Assess continuous monitoring performance - T1966"*

Coordinate responses to issues flagged during continuous monitoring - T1967

Coordinate responses to issues flagged during continuous monitoring

The tag is: *misp-galaxy:nice-framework-tasks="Coordinate responses to issues flagged during continuous monitoring - T1967"*

Establish risk management processes - T1964

Establish risk management processes

The tag is: *misp-galaxy:nice-framework-tasks="Establish risk management processes - T1964"*

Establish performance measurement requirements for continuous monitoring tools and technologies - T1965

Establish performance measurement requirements for continuous monitoring tools and technologies

The tag is: *misp-galaxy:nice-framework-tasks="Establish performance measurement requirements for*

continuous monitoring tools and technologies - T1965"

Define responsibilities for implementing continuous monitoring tools or technologies - T1962

Define responsibilities for implementing continuous monitoring tools or technologies

The tag is: *misp-galaxy:nice-framework-tasks="Define responsibilities for implementing continuous monitoring tools or technologies - T1962"*

Establish liaison to scoring and metrics working group - T1963

Establish liaison to scoring and metrics working group

The tag is: *misp-galaxy:nice-framework-tasks="Establish liaison to scoring and metrics working group - T1963"*

Implement system disposal processes - T1939

Implement system disposal processes

The tag is: *misp-galaxy:nice-framework-tasks="Implement system disposal processes - T1939"*

Determine if system security meets acceptable risk levels - T1937

Determine if system security meets acceptable risk levels

The tag is: *misp-galaxy:nice-framework-tasks="Determine if system security meets acceptable risk levels - T1937"*

Establish system disposal processes - T1938

Establish system disposal processes

The tag is: *misp-galaxy:nice-framework-tasks="Establish system disposal processes - T1938"*

Update cybersecurity action plans - T1935

Update cybersecurity action plans

The tag is: *misp-galaxy:nice-framework-tasks="Update cybersecurity action plans - T1935"*

Report system security status to authorizing officials - T1936

Report system security status to authorizing officials

The tag is: *misp-galaxy:nice-framework-tasks="Report system security status to authorizing officials - T1936"*

Determine if system security risks are acceptable - T1933

Determine if system security risks are acceptable

The tag is: *misp-galaxy:nice-framework-tasks="Determine if system security risks are acceptable - T1933"*

Determine if common control risks are acceptable - T1934

Determine if common control risks are acceptable

The tag is: *misp-galaxy:nice-framework-tasks="Determine if common control risks are acceptable - T1934"*

Determine risks of using common controls - T1931

Determine risks of using common controls

The tag is: *misp-galaxy:nice-framework-tasks="Determine risks of using common controls - T1931"*

Implement cybersecurity action plans - T1932

Implement cybersecurity action plans

The tag is: *misp-galaxy:nice-framework-tasks="Implement cybersecurity action plans - T1932"*

Determine risks of operating or using a system - T1930

Determine risks of operating or using a system

The tag is: *misp-galaxy:nice-framework-tasks="Determine risks of operating or using a system - T1930"*

Prepare authorization packages - T1928

Prepare authorization packages

The tag is: *misp-galaxy:nice-framework-tasks="Prepare authorization packages - T1928"*

Submit authorization packages to authorizing officials for adjudication - T1929

Submit authorization packages to authorizing officials for adjudication

The tag is: *misp-galaxy:nice-framework-tasks="Submit authorization packages to authorizing officials for adjudication - T1929"*

Conduct security control remediations - T1926

Conduct security control remediations

The tag is: *misp-galaxy:nice-framework-tasks="Conduct security control remediations - T1926"*

Develop cybersecurity action plans and milestones - T1927

Develop cybersecurity action plans and milestones

The tag is: *misp-galaxy:nice-framework-tasks="Develop cybersecurity action plans and milestones - T1927"*

Determine accurate security levels in programs and software applications - T1514

Determine accurate security levels in programs and software applications

The tag is: *misp-galaxy:nice-framework-tasks="Determine accurate security levels in programs and software applications - T1514"*

Document software application, system, and network security postures, capabilities, and vulnerabilities - T1289

Document software application, system, and network security postures, capabilities, and vulnerabilities

The tag is: *misp-galaxy:nice-framework-tasks="Document software application, system, and network security postures, capabilities, and vulnerabilities - T1289"*

Prepare technical evaluations of software applications, systems, and networks - T1288

Prepare technical evaluations of software applications, systems, and networks

The tag is: *misp-galaxy:nice-framework-tasks="Prepare technical evaluations of software applications, systems, and networks - T1288"*

Determine effectiveness of security controls - T1924

Determine effectiveness of security controls

The tag is: *misp-galaxy:nice-framework-tasks="Determine effectiveness of security controls - T1924"*

Prepare security control assessment reports - T1925

Prepare security control assessment reports

The tag is: *misp-galaxy:nice-framework-tasks="Prepare security control assessment reports - T1925"*

Develop system security control assessment plans - T1922

Develop system security control assessment plans

The tag is: *misp-galaxy:nice-framework-tasks="Develop system security control assessment plans - T1922"*

Approve system security control assessment plans - T1923

Approve system security control assessment plans

The tag is: *misp-galaxy:nice-framework-tasks="Approve system security control assessment plans - T1923"*

Establish system configuration baselines - T1920

Establish system configuration baselines

The tag is: *misp-galaxy:nice-framework-tasks="Establish system configuration baselines - T1920"*

Document changes to planned system control implementations - T1921

Document changes to planned system control implementations

The tag is: *misp-galaxy:nice-framework-tasks="Document changes to planned system control implementations - T1921"*

Implement system security controls - T1919

Implement system security controls

The tag is: *misp-galaxy:nice-framework-tasks="Implement system security controls - T1919"*

Establish security control monitoring strategies - T1917

Establish security control monitoring strategies

The tag is: *misp-galaxy:nice-framework-tasks="Establish security control monitoring strategies - T1917"*

Review and approve System Security Plans (SSPs) - T1918

Review and approve System Security Plans (SSPs)

The tag is: *misp-galaxy:nice-framework-tasks="Review and approve System Security Plans (SSPs) - T1918"*

Identify required system security controls - T1915

Identify required system security controls

The tag is: *misp-galaxy:nice-framework-tasks="Identify required system security controls - T1915"*

Document planned system security control implementations - T1916

Document planned system security control implementations

The tag is: *misp-galaxy:nice-framework-tasks="Document planned system security control implementations - T1916"*

Register systems with organizational program management offices - T1914

Register systems with organizational program management offices

The tag is: *misp-galaxy:nice-framework-tasks="Register systems with organizational program management offices - T1914"*

Determine the security categorization for organizational systems - T1911

Determine the security categorization for organizational systems

The tag is: *misp-galaxy:nice-framework-tasks="Determine the security categorization for organizational systems - T1911"*

Determine system boundaries - T1912

Determine system boundaries

The tag is: *misp-galaxy:nice-framework-tasks="Determine system boundaries - T1912"*

Identify common controls available for inheritance by organizational systems - T1910

Identify common controls available for inheritance by organizational systems

The tag is: *misp-galaxy:nice-framework-tasks="Identify common controls available for inheritance by organizational systems - T1910"*

Determine which business functions a system supports - T1908

Determine which business functions a system supports

The tag is: *misp-galaxy:nice-framework-tasks="Determine which business functions a system supports - T1908"*

Determine system stakeholders - T1909

Determine system stakeholders

The tag is: *misp-galaxy:nice-framework-tasks="Determine system stakeholders - T1909"*

Determine business partner requirements - T1904

Determine business partner requirements

The tag is: *misp-galaxy:nice-framework-tasks="Determine business partner requirements - T1904"*

Determine if risk metrics support continuous monitoring - T1946

Determine if risk metrics support continuous monitoring

The tag is: *misp-galaxy:nice-framework-tasks="Determine if risk metrics support continuous monitoring - T1946"*

Determine if continuous monitoring data provides situational awareness of risk levels - T1947

Determine if continuous monitoring data provides situational awareness of risk levels

The tag is: *misp-galaxy:nice-framework-tasks="Determine if continuous monitoring data provides situational awareness of risk levels - T1947"*

Provide training and resources to continuous monitoring staff - T1944

Provide training and resources to continuous monitoring staff

The tag is: *misp-galaxy:nice-framework-tasks="Provide training and resources to continuous monitoring staff - T1944"*

Prepare continuous monitoring reports - T1945

Prepare continuous monitoring reports

The tag is: *misp-galaxy:nice-framework-tasks="Prepare continuous monitoring reports - T1945"*

Integrate a continuous monitoring program into organizational security governance structures and policies - T1942

Integrate a continuous monitoring program into organizational security governance structures and policies

The tag is: *misp-galaxy:nice-framework-tasks="Integrate a continuous monitoring program into organizational security governance structures and policies - T1942"*

Make cybersecurity investment decisions to address persistent issues - T1943

Make cybersecurity investment decisions to address persistent issues

The tag is: *misp-galaxy:nice-framework-tasks="Make cybersecurity investment decisions to address persistent issues - T1943"*

Form continuous monitoring working groups - T1940

Form continuous monitoring working groups

The tag is: *misp-galaxy:nice-framework-tasks="Form continuous monitoring working groups - T1940"*

Establish continous monitoring scoring and grading metrics - T1941

Establish continous monitoring scoring and grading metrics

The tag is: *misp-galaxy:nice-framework-tasks="Establish continous monitoring scoring and grading metrics - T1941"*

Profile system administrators and their activities - T1786

Profile system administrators and their activities

The tag is: *misp-galaxy:nice-framework-tasks="Profile system administrators and their activities - T1786"*

Recommend new or revised security, resilience, and dependability measures - T1303

Recommend new or revised security, resilience, and dependability measures

The tag is: *misp-galaxy:nice-framework-tasks="Recommend new or revised security, resilience, and dependability measures - T1303"*

Prepare operational assessment reports - T1708

Prepare operational assessment reports

The tag is: *misp-galaxy:nice-framework-tasks="Prepare operational assessment reports - T1708"*

Intergrate continuous monitoring results in ongoing authorizations - T1957

Intergrate continuous monitoring results in ongoing authorizations

The tag is: *misp-galaxy:nice-framework-tasks="Intergrate continuous monitoring results in ongoing authorizations - T1957"*

Establish access control processes for continuous monitoring tools and technologies - T1958

Establish access control processes for continuous monitoring tools and technologies

The tag is: *misp-galaxy:nice-framework-tasks="Establish access control processes for continuous monitoring tools and technologies - T1958"*

Establish automated control assessment reporting requirements - T1955

Establish automated control assessment reporting requirements

The tag is: *misp-galaxy:nice-framework-tasks="Establish automated control assessment reporting requirements - T1955"*

Conduct continuous monitoring data assessments - T1956

Conduct continuous monitoring data assessments

The tag is: *misp-galaxy:nice-framework-tasks="Conduct continuous monitoring data assessments - T1956"*

Establish continuous monitoring reporting requirements - T1953

Establish continuous monitoring reporting requirements

The tag is: *misp-galaxy:nice-framework-tasks="Establish continuous monitoring reporting requirements - T1953"*

Perform continuous monitoring - T1954

Perform continuous monitoring

The tag is: *misp-galaxy:nice-framework-tasks="Perform continuous monitoring - T1954"*

Establish continuous monitoring communication processes - T1951

Establish continuous monitoring communication processes

The tag is: *misp-galaxy:nice-framework-tasks="Establish continuous monitoring communication processes - T1951"*

Identify reporting requirements that are fulfilled by the continous monitoring program - T1952

Identify reporting requirements that are fulfilled by the continous monitoring program

The tag is: *misp-galaxy:nice-framework-tasks="Identify reporting requirements that are fulfilled by the continous monitoring program - T1952"*

Define unacceptable risk threshold triggers for continuous monitoring data - T1948

Define unacceptable risk threshold triggers for continuous monitoring data

The tag is: *misp-galaxy:nice-framework-tasks="Define unacceptable risk threshold triggers for continuous monitoring data - T1948"*

Establish system-level reporting categories - T1949

Establish system-level reporting categories

The tag is: *misp-galaxy:nice-framework-tasks="Establish system-level reporting categories - T1949"*

Notify appropriate personnel of imminent of imminent hostile intentions or activities - T1984

Notify appropriate personnel of imminent of imminent hostile intentions or activities

The tag is: *misp-galaxy:nice-framework-tasks="Notify appropriate personnel of imminent of imminent hostile intentions or activities - T1984"*

Document security, resilience, and dependability requirements - T1166

Document security, resilience, and dependability requirements

The tag is: *misp-galaxy:nice-framework-tasks="Document security, resilience, and dependability requirements - T1166"*

Develop risk, compliance, and assurance specifications - T1165

Develop risk, compliance, and assurance specifications

The tag is: *misp-galaxy:nice-framework-tasks="Develop risk, compliance, and assurance specifications - T1165"*

Recommend courses of action or countermeasures to mitigate risks - T2002

Recommend courses of action or countermeasures to mitigate risks

The tag is: *misp-galaxy:nice-framework-tasks="Recommend courses of action or countermeasures to mitigate risks - T2002"*

Perform cybersecurity reviews - T2000

Perform cybersecurity reviews

The tag is: *misp-galaxy:nice-framework-tasks="Perform cybersecurity reviews - T2000"*

Document preliminary or residual security risks for system operation - T1170

Document preliminary or residual security risks for system operation

The tag is: *misp-galaxy:nice-framework-tasks="Document preliminary or residual security risks for system operation - T1170"*

Identify anomalous activity - T1972

Identify anomalous activity

The tag is: *misp-galaxy:nice-framework-tasks="Identify anomalous activity - T1972"*

Conduct import/export reviews for acquiring systems and software - T0412

Conduct import/export reviews for acquiring systems and software

The tag is: *misp-galaxy:nice-framework-tasks="Conduct import/export reviews for acquiring systems and software - T0412"*

Apply standards to identify safety risk and protect cyber-physical functions - T1011

Apply standards to identify safety risk and protect cyber-physical functions

The tag is: *misp-galaxy:nice-framework-tasks="Apply standards to identify safety risk and protect cyber-physical functions - T1011"*

Develop risk, compliance, and assurance monitoring strategies - T1154

Develop risk, compliance, and assurance monitoring strategies

The tag is: *misp-galaxy:nice-framework-tasks="Develop risk, compliance, and assurance monitoring strategies - T1154"*

Develop risk, compliance, and assurance measurement strategies - T1155

Develop risk, compliance, and assurance measurement strategies

The tag is: *misp-galaxy:nice-framework-tasks="Develop risk, compliance, and assurance measurement strategies - T1155"*

Advise stakeholders on the development of continuity of operations plans - T1291

Advise stakeholders on the development of continuity of operations plans

The tag is: *misp-galaxy:nice-framework-tasks="Advise stakeholders on the development of continuity of operations plans - T1291"*

Determine if procurement activities sufficiently address supply chain risks - T1344

Determine if procurement activities sufficiently address supply chain risks

The tag is: *misp-galaxy:nice-framework-tasks="Determine if procurement activities sufficiently address supply chain risks - T1344"*

Recommend improvements to procurement activities to address cybersecurity requirements - T1345

Recommend improvements to procurement activities to address cybersecurity requirements

The tag is: *misp-galaxy:nice-framework-tasks="Recommend improvements to procurement activities to address cybersecurity requirements - T1345"*

Determine if acquisitions, procurement, and outsourcing efforts address cybersecurity requirements - T1369

Determine if acquisitions, procurement, and outsourcing efforts address cybersecurity requirements

The tag is: *misp-galaxy:nice-framework-tasks="Determine if acquisitions, procurement, and outsourcing efforts address cybersecurity requirements - T1369"*

Develop supply chain, system, network, and operational security contract language - T1399

Develop supply chain, system, network, and operational security contract language

The tag is: *misp-galaxy:nice-framework-tasks="Develop supply chain, system, network, and operational security contract language - T1399"*

Determine if technology services are delivered successfully - T1435

Determine if technology services are delivered successfully

The tag is: *misp-galaxy:nice-framework-tasks="Determine if technology services are delivered successfully - T1435"*

Manage customer services - T1448

Manage customer services

The tag is: *misp-galaxy:nice-framework-tasks="Manage customer services - T1448"*

Define service-level agreements (SLAs) - T1465

Define service-level agreements (SLAs)

The tag is: *misp-galaxy:nice-framework-tasks="Define service-level agreements (SLAs) - T1465"*

Gather customer satisfaction and service performance feedback - T1472

Gather customer satisfaction and service performance feedback

The tag is: *misp-galaxy:nice-framework-tasks="Gather customer satisfaction and service performance feedback - T1472"*

Examine service performance reports for issues and variances - T1480

Examine service performance reports for issues and variances

The tag is: *misp-galaxy:nice-framework-tasks="Examine service performance reports for issues and variances - T1480"*

Initiate corrective actions to service performance issues and variances - T1481

Initiate corrective actions to service performance issues and variances

The tag is: *misp-galaxy:nice-framework-tasks="Initiate corrective actions to service performance issues and variances - T1481"*

Determine supply chain cybersecurity requirements - T1497

Determine supply chain cybersecurity requirements

The tag is: *misp-galaxy:nice-framework-tasks="Determine supply chain cybersecurity requirements - T1497"*

Advise stakeholders on enterprise cybersecurity risk management - T1601

Advise stakeholders on enterprise cybersecurity risk management

The tag is: *misp-galaxy:nice-framework-tasks="Advise stakeholders on enterprise cybersecurity risk management - T1601"*

Advise stakeholders on supply chain risk management - T1602

Advise stakeholders on supply chain risk management

The tag is: *misp-galaxy:nice-framework-tasks="Advise stakeholders on supply chain risk management - T1602"*

Prepare supply chain security reports - T1621

Prepare supply chain security reports

The tag is: *misp-galaxy:nice-framework-tasks="Prepare supply chain security reports - T1621"*

Prepare risk management reports - T1622

Prepare risk management reports

The tag is: *misp-galaxy:nice-framework-tasks="Prepare risk management reports - T1622"*

Develop strategic plans - T1145

Develop strategic plans

The tag is: *misp-galaxy:nice-framework-tasks="Develop strategic plans - T1145"*

Maintain strategic plans - T1146

Maintain strategic plans

The tag is: *misp-galaxy:nice-framework-tasks="Maintain strategic plans - T1146"*

Disseminate incident and other Computer Network Defense (CND) information - T1221

Disseminate incident and other Computer Network Defense (CND) information

The tag is: *misp-galaxy:nice-framework-tasks="Disseminate incident and other Computer Network Defense (CND) information - T1221"*

Align cybersecurity priorities with organizational security strategy - T1226

Align cybersecurity priorities with organizational security strategy

The tag is: *misp-galaxy:nice-framework-tasks="Align cybersecurity priorities with organizational security strategy - T1226"*

Develop Computer Network Defense (CND) guidance for organizational stakeholders - T1234

Develop Computer Network Defense (CND) guidance for organizational stakeholders

The tag is: *misp-galaxy:nice-framework-tasks="Develop Computer Network Defense (CND) guidance for organizational stakeholders - T1234"*

Determine the effectiveness of enterprise cybersecurity safeguards - T1238

Determine the effectiveness of enterprise cybersecurity safeguards

The tag is: *misp-galaxy:nice-framework-tasks="Determine the effectiveness of enterprise cybersecurity safeguards - T1238"*

Develop cybersecurity policy recommendations - T1307

Develop cybersecurity policy recommendations

The tag is: *misp-galaxy:nice-framework-tasks="Develop cybersecurity policy recommendations - T1307"*

Coordinate cybersecurity policy review and approval processes - T1308

Coordinate cybersecurity policy review and approval processes

The tag is: *misp-galaxy:nice-framework-tasks="Coordinate cybersecurity policy review and approval processes - T1308"*

Oversee policy standards and implementation strategy development - T1342

Oversee policy standards and implementation strategy development

The tag is: *misp-galaxy:nice-framework-tasks="Oversee policy standards and implementation strategy development - T1342"*

Determine if vulnerability remediation plans are in place - T1355

Determine if vulnerability remediation plans are in place

The tag is: *misp-galaxy:nice-framework-tasks="Determine if vulnerability remediation plans are in place - T1355"*

Develop vulnerability remediation plans - T1356

Develop vulnerability remediation plans

The tag is: *misp-galaxy:nice-framework-tasks="Develop vulnerability remediation plans - T1356"*

Develop critical infrastructure protection policies and procedures - T1376

Develop critical infrastructure protection policies and procedures

The tag is: *misp-galaxy:nice-framework-tasks="Develop critical infrastructure protection policies and procedures - T1376"*

Implement critical infrastructure protection policies and procedures - T1377

Implement critical infrastructure protection policies and procedures

The tag is: *misp-galaxy:nice-framework-tasks="Implement critical infrastructure protection policies and procedures - T1377"*

Establish cybersecurity risk assessment processes - T1862

Establish cybersecurity risk assessment processes

The tag is: *misp-galaxy:nice-framework-tasks="Establish cybersecurity risk assessment processes - T1862"*

Establish a cybersecurity risk management program - T1906

Establish a cybersecurity risk management program

The tag is: *misp-galaxy:nice-framework-tasks="Establish a cybersecurity risk management program - T1906"*

Manage Accreditation Packages (e.g., ISO/IEC 15026-2) - T0495

Manage Accreditation Packages (e.g., ISO/IEC 15026-2)

The tag is: *misp-galaxy:nice-framework-tasks="Manage Accreditation Packages (e.g., ISO/IEC 15026-2) - T0495"*

Approve accreditation packages - T1232

Approve accreditation packages

The tag is: *misp-galaxy:nice-framework-tasks="Approve accreditation packages - T1232"*

Plan security authorization reviews for system and network installations - T1270

Plan security authorization reviews for system and network installations

The tag is: *misp-galaxy:nice-framework-tasks="Plan security authorization reviews for system and network installations - T1270"*

Conduct security authorization reviews for system and network installations - T1271

Conduct security authorization reviews for system and network installations

The tag is: *misp-galaxy:nice-framework-tasks="Conduct security authorization reviews for system and network installations - T1271"*

Develop security assurance cases for system and network installations - T1272

Develop security assurance cases for system and network installations

The tag is: *misp-galaxy:nice-framework-tasks="Develop security assurance cases for system and network installations - T1272"*

Determine if authorization and assurance documents identify an acceptable level of risk for software applications, systems, and networks - T1305

Determine if authorization and assurance documents identify an acceptable level of risk for software applications, systems, and networks

The tag is: *misp-galaxy:nice-framework-tasks="Determine if authorization and assurance documents identify an acceptable level of risk for software applications, systems, and networks - T1305"*

Verify implementation of software, network, and system cybersecurity postures - T1328

Verify implementation of software, network, and system cybersecurity postures

The tag is: *misp-galaxy:nice-framework-tasks="Verify implementation of software, network, and system cybersecurity postures - T1328"*

Document software, network, and system deviations from implemented security postures - T1329

Document software, network, and system deviations from implemented security postures

The tag is: *misp-galaxy:nice-framework-tasks="Document software, network, and system deviations from implemented security postures - T1329"*

Recommend required actions to correct software, network, and system deviations from implemented security postures - T1330

Recommend required actions to correct software, network, and system deviations from implemented security postures

The tag is: *misp-galaxy:nice-framework-tasks="Recommend required actions to correct software, network, and system deviations from implemented security postures - T1330"*

Develop cybersecurity compliance processes for external services - T1339

Develop cybersecurity compliance processes for external services

The tag is: *misp-galaxy:nice-framework-tasks="Develop cybersecurity compliance processes for external services - T1339"*

Develop cybersecurity audit processes for external services - T1340

Develop cybersecurity audit processes for external services

The tag is: *misp-galaxy:nice-framework-tasks="Develop cybersecurity audit processes for external services - T1340"*

Provide cybersecurity guidance to organizational risk governance processes - T1343

Provide cybersecurity guidance to organizational risk governance processes

The tag is: *misp-galaxy:nice-framework-tasks="Provide cybersecurity guidance to organizational risk governance processes - T1343"*

Support cybersecurity compliance activities - T1368

Support cybersecurity compliance activities

The tag is: *misp-galaxy:nice-framework-tasks="Support cybersecurity compliance activities - T1368"*

Monitor changes to a system and its environment of operation - T0960

Monitor changes to a system and its environment of operation

The tag is: *misp-galaxy:nice-framework-tasks="Monitor changes to a system and its environment of operation - T0960"*

Identify stakeholder assets that require protection - T0934

Identify stakeholder assets that require protection

The tag is: *misp-galaxy:nice-framework-tasks="Identify stakeholder assets that require protection - T0934"*

Develop organizational training programs - T1420

Develop organizational training programs

The tag is: *misp-galaxy:nice-framework-tasks="Develop organizational training programs - T1420"*

Identify the types of information to be processed, stored, or transmitted by a system - T0942

Identify the types of information to be processed, stored, or transmitted by a system

The tag is: *misp-galaxy:nice-framework-tasks="Identify the types of information to be processed, stored, or transmitted by a system - T0942"*

Recommend commercial, government off-the-shelf, or open source products for use within a system - T1443

Recommend commercial, government off-the-shelf, or open source products for use within a system

The tag is: *misp-galaxy:nice-framework-tasks="Recommend commercial, government off-the-shelf, or open source products for use within a system - T1443"*

Determine if products comply with cybersecurity requirements - T1444

Determine if products comply with cybersecurity requirements

The tag is: *misp-galaxy:nice-framework-tasks="Determine if products comply with cybersecurity requirements - T1444"*

Determine the validity of findings - T1441

Determine the validity of findings

The tag is: *misp-galaxy:nice-framework-tasks="Determine the validity of findings - T1441"*

Design system administration and management functionality for privileged access users - T1452

Design system administration and management functionality for privileged access users

The tag is: *misp-galaxy:nice-framework-tasks="Design system administration and management functionality for privileged access users - T1452"*

Develop system administration and management functionality for privileged access users - T1453

Develop system administration and management functionality for privileged access users

The tag is: *misp-galaxy:nice-framework-tasks="Develop system administration and management functionality for privileged access users - T1453"*

Create risk-driven systems maintenance and updates processes - T1473

Create risk-driven systems maintenance and updates processes

The tag is: *misp-galaxy:nice-framework-tasks="Create risk-driven systems maintenance and updates*

processes - T1473"

Determine the placement of a system within the enterprise architecture - T0937

Determine the placement of a system within the enterprise architecture

The tag is: *misp-galaxy:nice-framework-tasks="Determine the placement of a system within the enterprise architecture - T0937"*

Maintain information systems assurance and accreditation materials - T0141

Maintain information systems assurance and accreditation materials

The tag is: *misp-galaxy:nice-framework-tasks="Maintain information systems assurance and accreditation materials - T0141"*

Define operating level agreements (OLAs) - T1474

Define operating level agreements (OLAs)

The tag is: *misp-galaxy:nice-framework-tasks="Define operating level agreements (OLAs) - T1474"*

Determine if cybersecurity requirements included in contracts are delivered - T1498

Determine if cybersecurity requirements included in contracts are delivered

The tag is: *misp-galaxy:nice-framework-tasks="Determine if cybersecurity requirements included in contracts are delivered - T1498"*

Advise senior leadership and authorizing official of changes affecting the organization’s cybersecurity posture - T1061

Advise senior leadership and authorizing official of changes affecting the organization’s cybersecurity posture

The tag is: *misp-galaxy:nice-framework-tasks="Advise senior leadership and authorizing official of changes affecting the organization’s cybersecurity posture - T1061"*

Collect and maintain system cybersecurity report data - T1086

Collect and maintain system cybersecurity report data

The tag is: *misp-galaxy:nice-framework-tasks="Collect and maintain system cybersecurity report data - T1086"*

Create system cybersecurity reports - T1087

Create system cybersecurity reports

The tag is: *misp-galaxy:nice-framework-tasks="Create system cybersecurity reports - T1087"*

Determine if cybersecurity inspections, tests, and reviews are coordinated for the network environment - T1180

Determine if cybersecurity inspections, tests, and reviews are coordinated for the network environment

The tag is: *misp-galaxy:nice-framework-tasks="Determine if cybersecurity inspections, tests, and reviews are coordinated for the network environment - T1180"*

Determine if cybersecurity requirements are integrated into continuity planning - T1181

Determine if cybersecurity requirements are integrated into continuity planning

The tag is: *misp-galaxy:nice-framework-tasks="Determine if cybersecurity requirements are integrated into continuity planning - T1181"*

Determine if security engineering is used when acquiring or developing protection and detection capabilities - T1182

Determine if security engineering is used when acquiring or developing protection and detection capabilities

The tag is: *misp-galaxy:nice-framework-tasks="Determine if security engineering is used when acquiring or developing protection and detection capabilities - T1182"*

Determine if protection and detection capabilities are consistent with organization-level cybersecurity architecture - T1183

Determine if protection and detection capabilities are consistent with organization-level cybersecurity architecture

The tag is: *misp-galaxy:nice-framework-tasks="Determine if protection and detection capabilities are consistent with organization-level cybersecurity architecture - T1183"*

Determine if baseline security safeguards are appropriately installed - T1188

Determine if baseline security safeguards are appropriately installed

The tag is: *misp-galaxy:nice-framework-tasks="Determine if baseline security safeguards are appropriately installed - T1188"*

Determine implications of new and upgraded technologies to the cybersecurity program - T1201

Determine implications of new and upgraded technologies to the cybersecurity program

The tag is: *misp-galaxy:nice-framework-tasks="Determine implications of new and upgraded technologies to the cybersecurity program - T1201"*

Monitor cybersecurity data sources - T1233

Monitor cybersecurity data sources

The tag is: *misp-galaxy:nice-framework-tasks="Monitor cybersecurity data sources - T1233"*

Manage threat and target analysis - T1235

Manage threat and target analysis

The tag is: *misp-galaxy:nice-framework-tasks="Manage threat and target analysis - T1235"*

Manage the production of threat information - T1236

Manage the production of threat information

The tag is: *misp-galaxy:nice-framework-tasks="Manage the production of threat information - T1236"*

Oversee the cybersecurity training and awareness program - T1245

Oversee the cybersecurity training and awareness program

The tag is: *misp-galaxy:nice-framework-tasks="Oversee the cybersecurity training and awareness program - T1245"*

Establish Security Assessment and Authorization processes - T1246

Establish Security Assessment and Authorization processes

The tag is: *misp-galaxy:nice-framework-tasks="Establish Security Assessment and Authorization processes - T1246"*

Develop computer environment cybersecurity plans and requirements - T1247

Develop computer environment cybersecurity plans and requirements

The tag is: *misp-galaxy:nice-framework-tasks="Develop computer environment cybersecurity plans and requirements - T1247"*

Develop standard operating procedures for secure network system operations - T1284

Develop standard operating procedures for secure network system operations

The tag is: *misp-galaxy:nice-framework-tasks="Develop standard operating procedures for secure network system operations - T1284"*

Distribute standard operating procedures - T1285

Distribute standard operating procedures

The tag is: *misp-galaxy:nice-framework-tasks="Distribute standard operating procedures - T1285"*

Maintain standard operating procedures - T1286

Maintain standard operating procedures

The tag is: *misp-galaxy:nice-framework-tasks="Maintain standard operating procedures - T1286"*

Provide cybersecurity awareness and training - T1295

Provide cybersecurity awareness and training

The tag is: *misp-galaxy:nice-framework-tasks="Provide cybersecurity awareness and training - T1295"*

Communicate situational awareness information to leadership - T1298

Communicate situational awareness information to leadership

The tag is: *misp-galaxy:nice-framework-tasks="Communicate situational awareness information to leadership - T1298"*

Recommend organizational cybersecurity resource allocations - T1304

Recommend organizational cybersecurity resource allocations

The tag is: *misp-galaxy:nice-framework-tasks="Recommend organizational cybersecurity resource allocations - T1304"*

Determine if appropriate threat mitigation actions have been taken - T1317

Determine if appropriate threat mitigation actions have been taken

The tag is: *misp-galaxy:nice-framework-tasks="Determine if appropriate threat mitigation actions have been taken - T1317"*

Manage computing environment system operations - T1321

Manage computing environment system operations

The tag is: *misp-galaxy:nice-framework-tasks="Manage computing environment system operations - T1321"*

Determine organizational compliance - T1373

Determine organizational compliance

The tag is: *misp-galaxy:nice-framework-tasks="Determine organizational compliance - T1373"*

Forecast ongoing service demands - T1374

Forecast ongoing service demands

The tag is: *misp-galaxy:nice-framework-tasks="Forecast ongoing service demands - T1374"*

Conduct periodic reviews of security assumptions - T1375

Conduct periodic reviews of security assumptions

The tag is: *misp-galaxy:nice-framework-tasks="Conduct periodic reviews of security assumptions - T1375"*

NICE Work Roles

Work roles based on the NIST NICE framework.

NICE Work Roles is a cluster galaxy available in JSON format at **this location** The JSON format can be freely reused in your application or automatically enabled in MISP.

Responsible for overseeing and directly managing technology projects. Ensures cybersecurity is built into projects to protect the organization’s critical infrastructure and assets, reduce risk, and

meet organizational goals. Tracks and communicates project status and demonstrates project value to the organization.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for overseeing and directly managing technology projects. Ensures cybersecurity is built into projects to protect the organization's criti - OG-WRL-011"*

Responsible for managing the cybersecurity of a program, organization, system, or enclave. - OG-WRL-014

Responsible for managing the cybersecurity of a program, organization, system, or enclave.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for managing the cybersecurity of a program, organization, system, or enclave. - OG-WRL-014"*

Responsible for conducting independent comprehensive assessments of management, operational, and technical security controls and control enhancements - OG-WRL-012

Responsible for conducting independent comprehensive assessments of management, operational, and technical security controls and control enhancements employed within or inherited by a system to determine their overall effectiveness.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for conducting independent comprehensive assessments of management, operational, and technical security controls and control enhancements - OG-WRL-012"*

Responsible for conducting evaluations of technology programs or their individual components to determine compliance with published standards. - OG-WRL-016

Responsible for conducting evaluations of technology programs or their individual components to determine compliance with published standards.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for conducting evaluations of technology programs or their individual components to determine compliance with published standards. - OG-WRL-016"*

Responsible for operating an information system at an acceptable level of risk to organizational operations, organizational assets, individuals, other - OG-WRL-013

Responsible for operating an information system at an acceptable level of risk to organizational operations, organizational assets, individuals, other organizations, and the nation.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for operating an information system at an acceptable level of risk to organizational operations, organizational assets, individuals, other - OG-WRL-013"*

Responsible for developing and overseeing an organization’s privacy compliance program and staff, including establishing and managing privacy-related - OG-WRL-008

Responsible for developing and overseeing an organization’s privacy compliance program and staff, including establishing and managing privacy-related governance, policy, and incident response needs.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for developing and overseeing an organization’s privacy compliance program and staff, including establishing and managing privacy-related - OG-WRL-008"*

Responsible for leading, coordinating, and the overall success of a defined program. Includes communicating about the program and ensuring alignment w - OG-WRL-010

Responsible for leading, coordinating, and the overall success of a defined program. Includes communicating about the program and ensuring alignment with agency or organizational priorities.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for leading, coordinating, and the overall success of a defined program. Includes communicating about the program and ensuring alignment w - OG-WRL-010"*

Responsible for establishing vision and direction for an organization’s cybersecurity operations and resources and their impact on digital and physica - OG-WRL-007

Responsible for establishing vision and direction for an organization’s cybersecurity operations and resources and their impact on digital and physical spaces. Possesses authority to make and execute decisions that impact an organization broadly, including policy approval and stakeholder engagement.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for establishing vision and direction for an organization’s cybersecurity operations and resources and their impact on digital and physica - OG-WRL-007"*

Responsible for analyzing data and information from one or multiple sources to conduct preparation of the operational environment, respond to requests - CI-WRL-001

Responsible for analyzing data and information from one or multiple sources to conduct preparation of the operational environment, respond to requests for information, and submit intelligence collection and production requirements in support of intelligence planning and operations.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for analyzing data and information from one or multiple sources to conduct preparation of the operational environment, respond to requests - CI-WRL-001"*

Responsible for managing the Communications Security (COMSEC) resources of an organization. - OG-WRL-001

Responsible for managing the Communications Security (COMSEC) resources of an organization.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for managing the Communications Security (COMSEC) resources of an organization. - OG-WRL-001"*

Responsible for providing cybersecurity legal advice and recommendations, including monitoring related legislation and regulations. - OG-WRL-006

Responsible for providing cybersecurity legal advice and recommendations, including monitoring related legislation and regulations.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for providing cybersecurity legal advice and recommendations, including monitoring related legislation and regulations. - OG-WRL-006"*

Responsible for developing and conducting cybersecurity awareness, training, or education. - OG-WRL-005

Responsible for developing and conducting cybersecurity awareness, training, or education.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for developing and conducting cybersecurity awareness, training, or education. - OG-WRL-005"*

Responsible for planning, estimating costs, budgeting, developing, implementing, and managing product support strategies in order to field and maintai - OG-WRL-009

Responsible for planning, estimating costs, budgeting, developing, implementing, and managing product support strategies in order to field and maintain the readiness and operational capability of systems and components.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for planning, estimating costs, budgeting, developing, implementing, and managing product support strategies in order to field and maintai - OG-WRL-009"*

Responsible for developing intelligence plans to satisfy cyber operation requirements. Identifies, validates, and levies requirements for intelligence - CI-WRL-004

Responsible for developing intelligence plans to satisfy cyber operation requirements. Identifies, validates, and levies requirements for intelligence collection and analysis. Participates in targeting selection, validation, synchronization, and execution of cyber actions. Synchronizes intelligence activities to support organization objectives in cyberspace.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for developing intelligence plans to satisfy cyber operation requirements. Identifies, validates, and levies requirements for intelligence - CI-WRL-004"*

Responsible for applying language and cultural expertise with target, threat, and technical knowledge to process, analyze, and disseminate intelligenc - CI-WRL-005

Responsible for applying language and cultural expertise with target, threat, and technical knowledge to process, analyze, and disseminate intelligence information derived from lanugage, voice, and/or graphic materials. Creates and maintains language-specific databases and working aids to support cyber action execution and ensure critical knowledge sharing. Provides subject matter experise in foreign language-intensive or interdisciplinary projects.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for applying language and cultural expertise with target, threat, and technical knowledge to process, analyze, and disseminate intelligenc - CI-WRL-005"*

Responsible for developing, planning, coordinating, and evaluating cybersecurity awareness, training, or education content, methods, and techniques ba - OG-WRL-004

Responsible for developing, planning, coordinating, and evaluating cybersecurity awareness, training, or education content, methods, and techniques based on instructional needs and requirements.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for developing, planning, coordinating, and evaluating cybersecurity awareness, training, or education content, methods, and techniques ba - OG-WRL-004"*

Responsible for developing cybersecurity workforce plans, assessments, strategies, and guidance, including cybersecurity-related staff training, educa - OG-WRL-003

Responsible for developing cybersecurity workforce plans, assessments, strategies, and guidance, including cybersecurity-related staff training, education, and hiring processes. Makes adjustments in response to or in anticipation of changes to cybersecurity-related policy, technology, and staffing needs and requirements.Authors mandated workforce planning strategies to maintain compliance with legislation, regulation, and policy.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for developing cybersecurity workforce plans, assessments, strategies, and guidance, including cybersecurity-related staff training, educa - OG-WRL-003"*

Responsible for developing and maintaining cybersecurity plans, strategy, and policy to support and align with organizational cybersecurity initiative - OG-WRL-002

Responsible for developing and maintaining cybersecurity plans, strategy, and policy to support and align with organizational cybersecurity initiatives and regulatory compliance.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for developing and maintaining cybersecurity plans, strategy, and policy to support and align with organizational cybersecurity initiative - OG-WRL-002"*

Responsible for identifying intelligence collection authorities and environment; incorporating priority information requirements into intelligence col - CI-WRL-002

Responsible for identifying intelligence collection authorities and environment; incorporating priority information requirements into intelligence collection management; and developing concepts to meet leadership's intent. Determines capabilities of available intelligence collection assets; constructs and disseminates intelligence collection plans; and monitors execution of intelligence collection tasks to ensure effective execution of collection plans.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for identifying intelligence collection authorities and environment; incorporating priority information requirements into intelligence col - CI-WRL-002"*

Responsible for analyzing data from multiple disparate sources to provide cybersecurity and privacy insight. Designs and implements custom algorithms, - IO-WRL-001

Responsible for analyzing data from multiple disparate sources to provide cybersecurity and privacy insight. Designs and implements custom algorithms, workflow processes, and layouts for complex, enterprise-scale data sets used for modeling, data mining, and research purposes.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for analyzing data from multiple disparate sources to provide cybersecurity and privacy insight. Designs and implements custom*

algorithms, - IO-WRL-001"

Responsible for providing technical support to customers who need assistance utilizing client-level hardware and software in accordance with establish - IO-WRL-007

Responsible for providing technical support to customers who need assistance utilizing client-level hardware and software in accordance with established or approved organizational policies and processes.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for providing technical support to customers who need assistance utilizing client-level hardware and software in accordance with establish - IO-WRL-007"*

Responsible for setting up and maintaining a system or specific components of a system in adherence with organizational security policies and procedur - IO-WRL-005

Responsible for setting up and maintaining a system or specific components of a system in adherence with organizational security policies and procedures. Includes hardware and software installation, configuration, and updates; user account management; backup and recovery management; and security control implementation.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for setting up and maintaining a system or specific components of a system in adherence with organizational security policies and procedur - IO-WRL-005"*

Responsible for evaluating intelligence collection operations and developing effects-based collection requirements strategies using available sources - CI-WRL-003

Responsible for evaluating intelligence collection operations and developing effects-based collection requirements strategies using available sources and methods to improve collection. Develops, processes, validates, and coordinates submission of intelligence collection requirements. Evaluates performance of intelligence collection assets and operations.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for evaluating intelligence collection operations and developing effects-based collection requirements strategies using available sources - CI-WRL-003"*

Responsible for assessing systems and networks to identify deviations from acceptable configurations, enclave policy, or local policy. Measure effecti - PD-WRL-007

Responsible for assessing systems and networks to identify deviations from acceptable configurations, enclave policy, or local policy. Measure effectiveness of defense-in-depth architecture against known vulnerabilities.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for assessing systems and networks to identify deviations from acceptable configurations, enclave policy, or local policy. Measure effecti - PD-WRL-007"*

Responsible for investigating cyberspace intrusion incidents and crimes. Applies tactics, techniques, and procedures for a full range of investigative - IN-WRL-001

Responsible for investigating cyberspace intrusion incidents and crimes. Applies tactics, techniques, and procedures for a full range of investigative tools and processes and appropriately balances the benefits of prosecution versus intelligence gathering.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for investigating cyberspace intrusion incidents and crimes. Applies tactics, techniques, and procedures for a full range of investigative - IN-WRL-001"*

Responsible for identifying, collecting, examining, and preserving digital evidence using controlled and documented analytical and investigative techn - IN-WRL-002

Responsible for identifying, collecting, examining, and preserving digital evidence using controlled and documented analytical and investigative techniques.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for identifying, collecting, examining, and preserving digital evidence using controlled and documented analytical and investigative techn - IN-WRL-002"*

Responsible for administering databases and data management systems that allow for the secure storage, query, protection, and utilization of data. - IO-WRL-002

Responsible for administering databases and data management systems that allow for the secure storage, query, protection, and utilization of data.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for administering databases and data management systems that allow for the secure storage, query, protection, and utilization of data. - IO-WRL-002"*

Responsible for developing and analyzing the integration, testing, operations, and maintenance of systems security. Prepares, performs, and manages th - IO-WRL-006

Responsible for developing and analyzing the integration, testing, operations, and maintenance of systems security. Prepares, performs, and manages the security aspects of implementing and operating a system.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for developing and analyzing the integration, testing, operations, and maintenance of systems security. Prepares, performs, and manages th - IO-WRL-006"*

Responsible for planning, implementing, and operating network services and systems, including hardware and virtual environments. - IO-WRL-004

Responsible for planning, implementing, and operating network services and systems, including hardware and virtual environments.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for planning, implementing, and operating network services and systems, including hardware and virtual environments. - IO-WRL-004"*

Responsible for managing and administering processes and tools to identify, document, and access an organization’s intellectual capital. - IO-WRL-003

Responsible for managing and administering processes and tools to identify, document, and access an organization’s intellectual capital.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for managing and administering processes and tools to identify, document, and access an organization's intellectual capital. - IO-WRL-003"*

Responsible for testing, implementing, deploying, maintaining, and administering infrastructure hardware and software for cybersecurity. - PD-WRL-004

Responsible for testing, implementing, deploying, maintaining, and administering infrastructure hardware and software for cybersecurity.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for testing, implementing, deploying, maintaining, and administering infrastructure hardware and software for cybersecurity. - PD-WRL-004"*

Responsible for gathering evidence on criminal or foreign intelligence entities to mitigate and protect against possible or real-time threats. Conduct - CE-WRL-001

Responsible for gathering evidence on criminal or foreign intelligence entities to mitigate and protect against possible or real-time threats. Conducts collection, processing, and geolocation of systems to exploit, locate, and track targets. Performs network navigation and tactical forensic analysis and executes on-net operations when directed.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for gathering evidence on criminal or foreign intelligence entities to mitigate and protect against possible or real-time threats. Conduct - CE-WRL-001"*

Responsible for analyzing data collected from various cybersecurity defense tools to mitigate risks. - PD-WRL-001

Responsible for analyzing data collected from various cybersecurity defense tools to mitigate risks.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for analyzing data collected from various cybersecurity defense tools to mitigate risks. - PD-WRL-001"*

Responsible for identifying and assessing the capabilities and activities of cybersecurity insider threats; produces findings to help initialize and s - PD-WRL-005

Responsible for identifying and assessing the capabilities and activities of cybersecurity insider threats; produces findings to help initialize and support law enforcement and counterintelligence activities and investigations.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for identifying and assessing the capabilities and activities of cybersecurity insider threats; produces findings to help initialize and s - PD-WRL-005"*

Responsible for collecting, processing, analyzing, and disseminating cybersecurity threat assessments. Develops cybersecurity indicators to maintain a - PD-WRL-006

Responsible for collecting, processing, analyzing, and disseminating cybersecurity threat assessments. Develops cybersecurity indicators to maintain awareness of the status of the highly dynamic operating environment.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for collecting, processing, analyzing, and disseminating cybersecurity threat assessments. Develops cybersecurity indicators to maintain a - PD-WRL-006"*

Responsible for investigating, analyzing, and responding to network cybersecurity incidents. - PD-WRL-003

Responsible for investigating, analyzing, and responding to network cybersecurity incidents.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for investigating, analyzing, and responding to network cybersecurity incidents. - PD-WRL-003"*

Responsible for analyzing digital evidence from computer security incidents to derive useful information in support of system and network vulnerabilit - PD-WRL-002

Responsible for analyzing digital evidence from computer security incidents to derive useful

information in support of system and network vulnerability mitigation.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for analyzing digital evidence from computer security incidents to derive useful information in support of system and network vulnerabilit - PD-WRL-002"*

Responsible for conducting target development at the system, component, and entity levels. Builds and maintains electronic target folders to include i - CE-WRL-006

Responsible for conducting target development at the system, component, and entity levels. Builds and maintains electronic target folders to include inputs from environment preparation and/or internal or external intelligence sources. Coordinates with partner target working groups and intelligence community members, and presents candidate targets for vetting and validation. Assesses and reports on damage resulting from the application of military force and coordinates federal support as required.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for conducting target development at the system, component, and entity levels. Builds and maintains electronic target folders to include i - CE-WRL-006"*

Responsible for conducting advanced analysis of collection and open-source data to ensure target continuity; profiling targets and their activities; a - CE-WRL-007

Responsible for conducting advanced analysis of collection and open-source data to ensure target continuity; profiling targets and their activities; and developing techniques to gain target information. Determines how targets communicate, move, operate, and live based on knowledge of target technologies, digital networks, and applications.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for conducting advanced analysis of collection and open-source data to ensure target continuity; profiling targets and their activities; a - CE-WRL-007"*

Responsible for advancing cooperation across organizaitonal or national borders betwen cyber operations partners. Provides guidance, resources, and co - CE-WRL-005

Responsible for advancing cooperation across organizaitonal or national borders betwen cyber

operations partners. Provides guidance, resources, and collaboration to develop best practices and facilitate organizational support for achieving objectives in integrated cyber actions.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for advancing cooperation across organizaitonal or national borders betwen cyber operations partners. Provides guidance, resources, and co - CE-WRL-005"*

Responsible for developing assessment plans and performance measures; conducting strategic and operational effectiveness assessments for cyber events; - CE-WRL-004

Responsible for developing assessment plans and performance measures; conducting strategic and operational effectiveness assessments for cyber events; determining whether systems perform as expected; and providing input to the determination of operational effectiveness.

The tag is: *misp-galaxy:nice-framework-work_roles="Responsible for developing assessment plans and performance measures; conducting strategic and operational effectiveness assessments for cyber events; - CE-WRL-004"*

Trend Micro

Trend Micro Inc. (□□□□□□□□□□□□, Torendo Maikuro Kabushiki-Gaisha) is an American-Japanese cyber security software company. The company has globally dispersed R&D in 16 locations across every continent excluding Antarctica. The company develops enterprise security software for servers, containers, & cloud computing environments, networks, and end points.

The tag is: *misp-galaxy:producer="Trend Micro"*

Trend Micro is also known as:

- □□□□□□□□□□□□

AhnLab

AhnLab, Inc. offers industry-leading cyber security solutions and services for consumers, enterprises, and small and medium-sized businesses worldwide. Founded in 1995, AhnLab provides comprehensive protection for endpoint, cloud, network, and other services. With its headquarters in South Korea, the most wired country in the world, AhnLab has become a leading innovator of dynamic security solutions that counter cyber threats.

The tag is: *misp-galaxy:producer="AhnLab"*

Check Point

Check Point Software Technologies Ltd. is an American-Israeli multinational provider of software and combined hardware and software products for IT security, including network security, endpoint security, cloud security, mobile security, data security and security management.

The tag is: *misp-galaxy:producer="Check Point"*

CERT-UA

The Computer Emergency Response Team of Ukraine (CERT-UA) is a specialized structural unit of the State Center for Cyber Defense of the State Service for Special Communications and Information Protection of Ukraine.

The tag is: *misp-galaxy:producer="CERT-UA"*

Avast

Avast Software s.r.o. is a Czech multinational cybersecurity software company headquartered in Prague, Czech Republic, that researches and develops computer security software, machine learning, and artificial intelligence.

The tag is: *misp-galaxy:producer="Avast"*

CISA

The Cybersecurity and Infrastructure Security Agency (CISA) is a component of the United States Department of Homeland Security (DHS) responsible for cybersecurity and infrastructure protection across all levels of government, coordinating cybersecurity programs with U.S. states, and improving the government's cybersecurity protections against private and nation-state hackers.

The tag is: *misp-galaxy:producer="CISA"*

CISA is also known as:

- Cybersecurity and Infrastructure Security Agency

JPCERT

JPCERT/CC is the first CSIRT (Computer Security Incident Response Team) established in Japan. The organization coordinates with network service providers, security vendors, government agencies, as well as the industry associations. As such, it acts as a 'CSIRT of CSIRTs' in the Japanese community. In the Asia Pacific region, JPCERT/CC helped form APCERT (Asia Pacific Computer Emergency Response Team) and provides a secretariat function for APCERT. Globally, as a member of the Forum of Incident Response and Security Teams (FIRST), JPCERT/CC cooperates with the trusted CSIRTs worldwide.

The tag is: *misp-galaxy:producer="JPCERT"*

JPCERT is also known as:

- JPCERT/CC

Proofpoint

Proofpoint, Inc. is an American enterprise cybersecurity company based in Sunnyvale, California that provides software as a service and products for email security, identity threat defense, data loss prevention, electronic discovery, and email archiving.

The tag is: *misp-galaxy:producer="Proofpoint"*

Qihoo 360

Qihoo 360 (Chinese: □□ 360; pinyin: Qíh□ Sānliùlíng; approximate pronunciation CHEE-hoo), full name 360 Security Technology Inc., is a Chinese internet security company that has developed the antivirus software programs 360 Safeguard and 360 Mobile Safe, the Web browser 360 Secure Browser, and the mobile application store 360 Mobile Assistant.

The tag is: *misp-galaxy:producer="Qihoo 360"*

Bitdefender

Bitdefender provides cybersecurity solutions with leading security efficacy, performance and ease of use to small and medium businesses, mid-market enterprises and consumers.

The tag is: *misp-galaxy:producer="Bitdefender"*

Avira

Avira Operations GmbH & Co. KG is a German multinational computer security software company mainly known for its Avira Free Security antivirus software. Since 2021, Avira has been owned by

American software company NortonLifeLock (now Gen Digital), which also operates Norton, Avast and AVG. It was previously owned by investment firm Investcorp.

The tag is: *misp-galaxy:producer="Avira"*

Cloudflare

Cloudflare, Inc. is an American company that provides content delivery network services, cloud cybersecurity, DDoS mitigation, wide area network services, reverse proxies, Domain Name Service, and ICANN-accredited domain registration services. Cloudflare's headquarters are in San Francisco, California.

The tag is: *misp-galaxy:producer="Cloudflare"*

Recorded Future

Recorded Future, Inc. is an American privately held cybersecurity company founded in 2009, with headquarters in Somerville, Massachusetts.

The tag is: *misp-galaxy:producer="Recorded Future"*

Cado Security

Cado Security provides cloud forensics and incident response solutions, helping businesses detect, investigate, and mitigate threats in their cloud environments.

The tag is: *misp-galaxy:producer="Cado Security"*

Table 12950. Table References

Links
https://www.cadosecurity.com/

Security Boulevard

Security Boulevard is a leading cybersecurity blog that aggregates news, analysis, and insights about the security industry. It features articles from security experts on a variety of cybersecurity topics.

The tag is: *misp-galaxy:producer="Security Boulevard"*

Table 12951. Table References

Links
https://securityboulevard.com/

Lab52

Lab52 offers a wide range of cybersecurity services, including threat hunting and incident response. Their blog provides insights into security research, threat analysis, and mitigation strategies.

The tag is: *misp-galaxy:producer="Lab52"*

Table 12952. Table References

Links
https://lab52.io/blog/

GreyNoise

GreyNoise is a cybersecurity company that provides internet-wide threat intelligence by collecting and analyzing data from internet-connected devices. It helps security teams by filtering out noise from malicious activity and identifying the true threats targeting an organization.

The tag is: *misp-galaxy:producer="GreyNoise"*

Table 12953. Table References

Links
https://www.greynoise.io/

AbuseIPDB

AbuseIPDB is a project dedicated to providing a centralized database for reporting and checking IP addresses involved in malicious activities. It helps organizations identify harmful IPs associated with spamming, hacking, fraud, and other cybercrimes.

The tag is: *misp-galaxy:producer="AbuseIPDB"*

Table 12954. Table References

Links
https://www.abuseipdb.com/

RansomLook

RansomLook provides a comprehensive set of tools for identifying and analyzing ransomware-related incidents. It focuses on detecting ransomware payloads, providing intelligence on ransomware families, and offering insights into how ransomware attacks operate.

The tag is: *misp-galaxy:producer="RansomLook"*

Table 12955. Table References

Links
https://www.ransomlook.io/

URLScan.io

URLScan.io is a free service that analyzes websites by submitting their URLs and providing a detailed report of their behavior and security status. It helps cybersecurity professionals identify

malicious websites and investigate potential threats from suspicious URLs.

The tag is: *misp-galaxy:producer="URLScan.io"*

Table 12956. Table References

Links
https://urlscan.io/

Farghlymal Blog

Farghlymal's GitHub blog is a platform where security-related content is shared, including tutorials, code samples, and research on various cybersecurity topics.

The tag is: *misp-galaxy:producer="Farghlymal Blog"*

Table 12957. Table References

Links

Telecrypt Ransomware

This is most likely to affect Russian speaking users, since the note is written in Russian. Therefore, residents of Russian speaking country are affected. The hacker spread the virus using email spam, fake updates, and harmful attachments. All your files are compromised including music, MS Office, Open Office, pictures, videos, shared online files etc.. The ransomware's authors would request around $75 from their victims to provide them with a decryptor (payments are accepted via Russian payment services Qiwi or Yandex.Money). Right from the start, however, researchers suggested that TeleCrypt was written by cybercriminals without advanced skills. Telecrypt will generate a random string to encrypt with that is between 10-20 length and only contain the letters vo,pr,bm,xu,zt,dq.

The tag is: *misp-galaxy:ransomware="Telecrypt Ransomware"*

Jaff

We recently observed several large scale email campaigns that were attempting to distribute a new variant of ransomware that has been dubbed "Jaff". Interestingly we identified several characteristics that we have previously observed being used during Dridex and Locky campaigns. In a short period of time, we observed multiple campaigns featuring high volumes of malicious spam emails being distributed, each using a PDF attachment with an embedded Microsoft Word document functioning as the initial downloader for the Jaff ransomware.

SynAck

The ransomware does not use a customized desktop wallpaper to signal its presence, and the only way to discover that SynAck has infected your PC is by the ransom notes dropped on the user's desktop, named in the format: RESTORE_INFO-[id].txt. For example: RESTORE_INFO-4ABFA0EF.txt In addition, SynAck also appends its own extension at the end of all files it encrypted. This file extensions format is ten random alpha characters for each file. For example: test.jpg.XbMiJQiuoh. Experts believe the group behind SynAck uses RDP brute-force attacks to access remote computers and manually download and install the ransomware.

The tag is: *misp-galaxy:ransomware="SynAck"*

Bad Rabbit

On October 24, 2017, Cisco Talos was alerted to a widescale ransomware campaign affecting organizations across eastern Europe and Russia. As was the case in previous situations, we quickly mobilized to assess the situation and ensure that customers remain protected from this and other threats as they emerge across the threat landscape. There have been several large scale ransomware campaigns over the last several months. This appears to have some similarities to Nyetya in that it is also based on Petya ransomware. Major portions of the code appear to have been rewritten. The distribution does not appear to have the sophistication of the supply chain attacks we have seen recently.

StorageCrypt

Recently BleepingComputer has received a flurry of support requests for a new ransomware being named StorageCrypt that is targeting NAS devices such as the Western Digital My Cloud. Victims have been reporting that their files have been encrypted and a note left with a ransom demand of between .4 and 2 bitcoins to get their files back. User's have also reported that each share on their NAS device contains a Autorun.inf file and a Windows executable named □□□□□.exe, which translates to Beauty and the beast. From the samples BleepingComputer has received, this Autorun.inf is an attempt to spread the □□□□□.exe file to other computers that open the folders on the NAS devices.

The tag is: *misp-galaxy:ransomware="StorageCrypt"*

HC7

A new ransomware called HC7 is infecting victims by hacking into Windows computers that are running publicly accessible Remote Desktop services. Once the developers gain access to the hacked computer, the HC7 ransomware is then installed on all accessible computers on the network. Originally released as HC6, victims began posting about it in the BleepingComputer forums towards the end of November. As this is a Python-to-exe executable, once the script was extracted ID Ransomware creator Michael Gillespie was able determine that it was decryptable and released a decryptor. Unfortunately, a few days later, the ransomware developers released a new version called HC7 that was not decryptable. Thi sis because they removed the hard coded encryption key and instead switched to inputting the key as a command line argument when the attackers run the ransomware executable. Thankfully, there may be a way to get around that as well so that victims

can recover their keys.

The tag is: *misp-galaxy:ransomware="HC7"*

Scarab

The Scarab ransomware is a relatively new ransomware strain that was first spotted by security

researcher Michael Gillespie in June this year. Written in Delphi, the first version was simplistic and was recognizable via the ".scarab" extension it appended after the names of encrypted files. Malwarebytes researcher Marcelo Rivera spotted a second version in July that used the ".scorpio" extension. The version spotted with the Necurs spam today has reverted back to using the .scarab extension. The current version of Scarab encrypts files but does not change original file names as previous versions. This Scarab version appends each file's name with the ".[suupport@protonmail.com].scarab" extension. Scarab also deletes shadow volume copies and drops a ransom note named "IF YOU WANT TO GET ALL YOUR FILES BACK, PLEASE READ THIS.TXT" on users' computers, which it opens immediately.

The tag is: *misp-galaxy:ransomware="Scarab"*

Black Ruby

A new ransomware was discovered this week by MalwareHunterTeam called Black Ruby. This ransomware will encrypt the files on a computer, scramble the file name, and then append the BlackRuby extension. To make matters worse, Black Ruby will also install a Monero miner on the computer that utilizes as much of the CPU as it can. Discovered on February 6, 2018. May have been distributed through unknown vectors. Will not encrypt a machine if its IP address is identified as coming from Iran; this feature enables actors to avoid a particular Iranian cybercrime law that prohibits Iran-based actors from attacking Iranian victims. Encrypts files on the infected machine, scrambles files, and appends the .BlackRuby extension to them. Installs a Monero miner on the infected computer that utilizes the machine's maximum CPU power. Delivers a ransom note in English asking for US$650 in Bitcoins. Might be installed via Remote Desktop Services.

The tag is: *misp-galaxy:ransomware="Black Ruby"*

Black Ruby is also known as:

- BlackRuby

PUBG Ransomware

In what could only be a joke, a new ransomware has been discovered called "PUBG Ransomware" that will decrypt your files if you play the game called PlayerUnknown’s Battlegrounds. Discovered by MalwareHunterTeam, when the PUBG Ransomware is launched it will encrypt a user’s files and folders on the user’s desktop and append the .PUBG extension to them. When it has finished encrypting the files, it will display a screen giving you two methods that you can use to decrypt the encrypted files.

The tag is: *misp-galaxy:ransomware="PUBG Ransomware"*

LockCrypt

LockCrypt is an example of yet another simple ransomware created and used by unsophisticated

attackers. Its authors ignored well-known guidelines about the proper use of cryptography. The internal structure of the application is also unprofessional. Sloppy, unprofessional code is pretty commonplace when ransomware is created for manual distribution. Authors don't take much time preparing the attack or the payload. Instead, they're rather focused on a fast and easy gain, rather than on creating something for the long run. Because of this, they could easily be defeated.

The tag is: *misp-galaxy:ransomware="LockCrypt"*

Reveton ransomware

A ransomware family that targets users from certain countries or regions. It locks the computer and displays a location-specific webpage that covers the desktop and demands that the user pay a fine for the supposed possession of illicit material. The Reveton ransomware is one of the first screen-locking ransomware strains, and it appeared when Bitcoin was still in its infancy, and before it became the cryptocurrency of choice in all ransomware operations. Instead, Reveton operators asked victims to buy GreenDot MoneyPak vouchers, take the code on the voucher and enter it in the Reveton screen locker.

The tag is: *misp-galaxy:ransomware="Reveton ransomware"*

Fusob

Fusob is one of the major mobile ransomware families. Between April 2015 and March 2016, about 56 percent of accounted mobile ransomware was Fusob. Like a typical mobile ransomware, it employs scare tactics to extort people to pay a ransom. The program pretends to be an accusatory authority, demanding the victim to pay a fine from $100 to $200 USD or otherwise face a fictitious charge. Rather surprisingly, Fusob suggests using iTunes gift cards for payment. Also, a timer clicking down on the screen adds to the users' anxiety as well. In order to infect devices, Fusob masquerades as a pornographic video player. Thus, victims, thinking it is harmless, unwittingly download Fusob. When Fusob is installed, it first checks the language used in the device. If it uses Russian or certain Eastern European languages, Fusob does nothing. Otherwise, it proceeds on to lock the device and demand ransom. Among victims, about 40% of them are in Germany with the United Kingdom and the United States following with 14.5% and 11.4% respectively. Fusob has lots in common with Small, which is another major family of mobile ransomware. They represented over 93% of mobile ransomwares between 2015 and 2016.

NMCRYPT Ransomware

The NMCRYPT Ransomware is a generic file encryption Trojan that was detected in the middle of April 2018. The NMCRYPT Ransomware is a file encoder Trojan that is designed to make data unreadable and convince users to pay a fee for unlocking content on the infected computers. The NMCRYPT Ransomware is nearly identical to hundreds of variants of the HiddenTear open-source ransomware and compromised users are unable to use the Shadow Volume snapshots made by Windows to recover. Unfortunately, the NMCRYPT Ransomware disables the native recovery features on Windows, and you need third-party applications to rebuild your data.

The tag is: *misp-galaxy:ransomware="NMCRYPT Ransomware"*

Unnamed ramsomware 1

A new in-development ransomware was discovered that has an interesting characteristic. Instead of the distributed executable performing the ransomware functionality, the executables compiles an embedded encrypted C# program at runtime and launches it directly into memory.

The tag is: *misp-galaxy:ransomware="Unnamed ramsomware 1"*

Table 13498. Table References

Links
https://www.bleepingcomputer.com/news/security/new-c-ransomware-compiles-itself-at-runtime/

HPE iLO 4 Ransomware

Attackers are targeting Internet accessible HPE iLO 4 remote management interfaces, supposedly encrypting the hard drives, and then demanding Bitcoins to get access to the data again. According to the victim, the attackers are demanding 2 bitcoins to gain access to the drives again. The attackers will also provide a bitcoin address to the victim that should be used for payment. These bitcoin addresses appear to be unique per victim as the victim’s was different from other reported ones. An interesting part of the ransom note is that the attackers state that the ransom price is not negotiable unless the victim’s are from Russia. This is common for Russian based attackers, who in many cases tries to avoid infecting Russian victims. Finally, could this be a decoy/wiper rather than an actual true ransomware attack? Ransomware attacks typically provide a unique ID to the victim in order to distinguish one victim from another. This prevents a victim from "stealing" another victim’s payment and using it to unlock their computer. In a situation like this, where no unique ID is given to identify the encrypted computer and the email is publicly accessible, it could be a case

where the main goal is to wipe a server or act as a decoy for another attack.

The tag is: *misp-galaxy:ransomware="HPE iLO 4 Ransomware"*

DBGer Ransomware

The authors of the Satan ransomware have rebranded their "product" and they now go by the name of DBGer ransomware, according to security researcher MalwareHunter, who spotted this new version earlier today. The change was not only in name but also in the ransomware's modus operandi. According to the researcher, whose discovery was later confirmed by an Intezer code similarity analysis, the new (Satan) DBGer ransomware now also incorporates Mimikatz, an open-source password-dumping utility. The purpose of DBGer incorporating Mimikatz is for lateral movement inside compromised networks. This fits a recently observed trend in Satan's modus operandi.

Barack Obama’s Everlasting Blue Blackmail Virus Ransomware

A new ransomware that only encrypts .EXE files on a computer. It then displays a screen with a picture of President Obama that asks for a "tip" to decrypt the files.

The tag is: *misp-galaxy:ransomware="Barack Obama’s Everlasting Blue Blackmail Virus Ransomware"*

Barack Obama’s Everlasting Blue Blackmail Virus Ransomware is also known as:

- Barack Obama’s Blackmail Virus Ransomware

CryptoNar

When the CryptoNar, or Crypto Nar, Ransomware encrypts a victims files it will perform the encryption differently depending on the type of file being encrypted. If the targeted file has a .txt or .md extension, it will encrypt the entire file and append the .fully.cryptoNar extension to the encrypted file’s name. All other files will only have the first 1,024 bytes encrypted and will have the .partially.cryptoNar extensions appended to the file’s name.

The tag is: *misp-galaxy:ransomware="CryptoNar"*

Crypt0saur

The tag is: *misp-galaxy:ransomware="Crypt0saur"*

Mongo Lock

An attack called Mongo Lock is targeting remotely accessible and unprotected MongoDB databases, wiping them, and then demanding a ransom in order to get the contents back. While this new campaign is using a name to identify itself, these types of attacks are not new and MongoDB databases have been targeted for a while now. These hijacks work by attackers scanning the Internet or using services such as Shodan.io to search for unprotected MongoDB servers. Once connected, the attackers may export the databases, delete them, and then create a ransom note explaining how to get the databases back.

The tag is: *misp-galaxy:ransomware="Mongo Lock"*

Ryuk ransomware

Similar to Samas and BitPaymer, Ryuk is specifically used to target enterprise environments. Code comparison between versions of Ryuk and Hermes ransomware indicates that Ryuk was derived from the Hermes source code and has been under steady development since its release. Hermes is commodity ransomware that has been observed for sale on forums and used by multiple threat actors. However, Ryuk is only used by GRIM SPIDER and, unlike Hermes, Ryuk has only been used to target enterprise environments. Since Ryuk's appearance in August, the threat actors operating it have netted over 705.80 BTC across 52 transactions for a total current value of $3,701,893.98 USD.

The tag is: *misp-galaxy:ransomware="Ryuk ransomware"*

https://www.cert.ssi.gouv.fr/uploads/CERTFR-2019-ACT-005.pdf

BitPaymer

In August 2017, a new ransomware variant identified as BitPaymer was reported to have ransomed the U.K.'s National Health Service (NHS), with a high ransom demand of 53 BTC (approximately $200,000 USD). The targeting of an organization rather than individuals, and the high ransom demands, made BitPaymer stand out from other contemporary ransomware at the time. Though the encryption and ransom functionality of BitPaymer was not technically sophisticated, the malware contained multiple anti-analysis features that overlapped with Dridex. Later technical analysis of BitPaymer indicated that it had been developed by INDRIK SPIDER, suggesting the group had expanded its criminal operation to include ransomware as a monetization strategy.

The tag is: *misp-galaxy:ransomware="BitPaymer"*

BitPaymer is also known as:

- FriedEx
- IEncrypt

Princess Evolution

We have been observing a malvertising campaign via Rig exploit kit delivering a cryptocurrency-mining malware and the GandCrab ransomware since July 25. On August 1, we found Rig's traffic stream dropping a then-unknown ransomware. Delving into this seemingly new ransomware, we checked its ransom payment page in the Tor network and saw it was called Princess Evolution (detected by Trend Micro as RANSOM_PRINCESSLOCKER.B), and was actually a new version of the Princess Locker ransomware that emerged in 2016. Based on its recent advertisement in underground forums, it appears that its operators are peddling Princess Evolution as a ransomware as a service (RaaS) and are looking for affiliates. The new malvertising campaign we observed since July 25 is notable in that the malvertisements included Coinhive (COINMINER_MALXMR.TIDBF). Even if users aren't diverted to the exploit kit and infected with the ransomware, the cybercriminals can still earn illicit profit through cryptocurrency mining. Another characteristic of this new campaign is that they hosted their malvertisement page on a free web hosting service and used domain name system canonical name (DNS CNAME) to map their advertisement domain on a malicious webpage on the service.

The tag is: *misp-galaxy:ransomware="Princess Evolution"*

Princess Evolution is also known as:

- PrincessLocker Evolution

Table 13564. Table References

GlobeImposter

During December 2017, a new variant of the GlobeImposter Ransomware was detected for the first time and reported on malware-traffic-analysis. At first sight this ransomware looks very similar to other ransomware samples and uses common techniques such as process hollowing. However, deeper inspection showed that like LockPoS, which was analyzed by CyberBit, GlobeImposter too bypasses user-mode hooks by directly invoking system calls. Given this evasion technique is being leveraged by new malware samples may indicate that this is a beginning of a trend aiming to bypass user-mode security products.

The tag is: *misp-galaxy:ransomware="GlobeImposter"*

Cr1ptT0r

Cr1ptT0r Ransomware Targets NAS Devices with Old Firmware.

The tag is: *misp-galaxy:ransomware="Cr1ptT0r"*

Cr1ptT0r is also known as:

- Criptt0r
- Cr1pt0r
- Cripttor

Sodinokibi

Attackers are actively exploiting a recently disclosed vulnerability in Oracle WebLogic to install a new variant of ransomware called "Sodinokibi." Sodinokibi attempts to encrypt data in a user's directory and delete shadow copy backups to make data recovery more difficult. Oracle first patched the issue on April 26, outside of their normal patch cycle, and assigned it CVE-2019-2725. This vulnerability is easy for attackers to exploit, as anyone with HTTP access to the WebLogic server could carry out an attack. Because of this, the bug has a CVSS score of 9.8/10. Attackers have

been making use of this exploit in the wild since at least April 17. Cisco's Incident Response (IR) team, along with Cisco Talos, are actively investigating these attacks and Sodinokibi.

The tag is: *misp-galaxy:ransomware="Sodinokibi"*

Sodinokibi is also known as:

- REvil
- Revil

Phobos

Phobos exploits open or poorly secured RDP ports to sneak inside networks and execute a ransomware attack, encrypting files and demanding a ransom be paid in bitcoin for returning the files, which in this case are locked with a .phobos extension.

The tag is: *misp-galaxy:ransomware="Phobos"*

Phobos is also known as:

- Java NotDharma

Table 13573. Table References

https://www.ransomlook.io/group/phobos

GetCrypt

A new ransomware is in the dark market which encrypts all the files on the device and redirects victims to the RIG exploit kit.

The tag is: *misp-galaxy:ransomware="GetCrypt"*

Table 13574. Table References

Links
https://www.ehackingnews.com/2019/05/getcrypt-ransomware-modus-operandi-and.html

Nemty

A new ransomware family dubbed “Nemty” for the extension it adds to encrypted files has recently surfaced in the wild. According to a report from Bleeping Computer, New York-based reverse engineer Vitali Kremez posits that Nemty is possibly delivered through exposed remote desktop connections.

The tag is: *misp-galaxy:ransomware="Nemty"*

View relationships graph

Nemty has relationships with:

- related-to: misp-galaxy:ransomware="Nefilim" with estimative-language:likelihood-probability="likely"

Buran

Buran is a new version of the Vega ransomware strain (a.k.a. Jamper, Ghost, Buhtrap) that attacked accountants from February through April 2019. The new Buran ransomware first was discovered by nao_sec in June 2019, delivered by the RIG Exploit Kit, as reported by BleepingComputer.

The tag is: *misp-galaxy:ransomware="Buran"*

Table 13576. Table References

Links

https://www.acronis.com/en-us/blog/posts/meet-buran-new-delphi-ransomware-delivered-rig-exploit-kit

Hildacrypt

The Hildacrypt ransomware encrypts the victim's files with a strong encryption algorithm and the filename extension .hilda until the victim pays a fee to get them back.

The tag is: *misp-galaxy:ransomware="Hildacrypt"*

Table 13577. Table References

Links
https://securitynews.sonicwall.com/xmlpost/hildacrypt-ransomware-actively-spreading-in-the-wild/

Mr.Dec

Mr. Dec ransomware is cryptovirus that was first spotted in mid-May 2018, and since then was updated multiple times. The ransomware encrypts all personal data on the device with the help of AES encryption algorithm and appends .[ID]random 16 characters[ID] file extension, preventing from their further usage.

The tag is: *misp-galaxy:ransomware="Mr.Dec"*

Mr.Dec is also known as:

- MrDec
- Sherminator

Table 13578. Table References

Links

https://id-ransomware.blogspot.com/2018/05/mrdec-ransomware.html

Freeme

Freezing crypto ransomware encrypts user data using AES, and then requires a ransom in # BTC to return the files. Original title: not indicated in the note. The file says: FreeMe.exe

The tag is: *misp-galaxy:ransomware="Freeme"*

Freeme is also known as:

- Freezing

Table 13579. Table References

Links
http://id-ransomware.blogspot.com/2019/06/freeme-freezing-ransomware.html

DoppelPaymer

We have dubbed this new ransomware DoppelPaymer because it shares most of its code with the BitPaymer ransomware operated by INDRIK SPIDER. However, there are a number of differences between DoppelPaymer and BitPaymer, which may signify that one or more members of INDRIK SPIDER have split from the group and forked the source code of both Dridex and BitPaymer to start their own Big Game Hunting ransomware operation.

The tag is: *misp-galaxy:ransomware="DoppelPaymer"*

DoppelPaymer is also known as:

- Pay OR Grief
- BitPaymer
- IEncrypt
- FriedEx

Desync

This crypto ransomware encrypts enterprise LAN data with AES (ECB mode), and then requires a ransom in # BTC to return the files.

The tag is: *misp-galaxy:ransomware="Desync"*

Table 13581. Table References

Links
https://id-ransomware.blogspot.com/2019/01/unnamed-desync-ransomware.html

Maze

Maze Ransomware encrypts files and makes them inaccessible while adding a custom extension containing part of the ID of the victim. The ransom note is placed inside a text file and an htm file. There are a few different extensions appended to files which are randomly generated.

The tag is: *misp-galaxy:ransomware="Maze"*

View relationships graph

Maze has relationships with:

- related-to: misp-galaxy:ransomware="Ragnar Locker" with estimative-language:likelihood-probability="likely"

Cyborg Ransomware

Ransomware delivered using fake Windows Update spam

The tag is: *misp-galaxy:ransomware="Cyborg Ransomware"*

Table 13583. Table References

Links
https://www.trustwave.com/en-us/resources/blogs/spiderlabs-blog/fake-windows-update-spam-leads-to-cyborg-ransomware-and-its-builder/

FTCode

A targeted email campaign has been spotted distributing the JasperLoader to victims. While the JasperLoader was originally used to then install Gootkit, Certego has observed it now being used to

infect victims with a new ransomware dubbed FTCODE. Using an invoice-themed email appearing to target Italian users, the attackers attempt to convince users to allow macros in a Word document. The macro is used to run PowerShell to retrieve additional PowerShell code.

The tag is: *misp-galaxy:ransomware="FTCode"*

PornBlackmailer

A new infection is being distributed by porn sites that tries to blackmail a victim into paying a ransom by stating they will tell law enforcement that the victim is spreading child porn. This is done by collecting information about the user, including screen shots of their active desktop, in order to catch them in compromising situations.

The tag is: *misp-galaxy:ransomware="PornBlackmailer"*

5ss5c Ransomware

The cybercrime group that brought us Satan, DBGer and Lucky ransomware and perhaps Iron ransomware, has now come up with a new version or rebranding named 5ss5c. [...] It will however only encrypt files with the following extensions: 7z, bak, cer, csv, db, dbf, dmp, docx, eps, ldf, mdb, mdf, myd, myi, ora, pdf, pem, pfx, ppt, pptx, psd, rar, rtf, sql, tar, txt, vdi, vmdk, vmx, xls, xlsx, zip

Nodera Ransomware

Nodera is a ransomware family that uses the Node.js framework and was discovered by Quick Heal researchers. The infection chain starts with a VBS script embedded with multiple JavaScript files. Upon execution, a directory is created and both the main node.exe program and several required NodeJS files are downloaded into the directory. Additionally, a malicious JavaScript payload that performs the encryption process is saved in this directory. After checking that it has admin privileges and setting applicable variables, the malicious JavaScript file enumerates the drives to create a list of targets. Processes associated with common user file types are stopped and volume shadow copies are deleted. Finally, all user-specific files on the C: drive and all files on other drives are encrypted and are appended with a .encrypted extension. The ransom note containing instructions on paying the Bitcoin ransom are provided along with a batch script to be used for decryption after obtaining the private key. Some mistakes in the ransom note identified by the researchers include the fact that it mentions a 2048-bit RSA public key instead of 4096-bit (the size that was actually used), a hard-coded private key destruction time dating back almost 2 years ago, and a lack of instructions for how the private key will be obtained after the ransom is paid. These are signs that the ransomware may be in the development phase and was likely written by an amateur. For more information, see the QuickHeal blog post in the Reference section below.

Bart ransomware

Bart ransomware is distributed by the same Russian Cyber Mafia behind Dridex 220 and Locky. Bart doesn't communicate with a command and control (C&C) server, so it can encrypt files without being connected to a computer. Bart is spread to end users via phishing emails containing .zip attachments with JavaScript Code and use social engineering to trick users into opening the 'photo' attachments. The zipped files are obfuscated to make it more hard to tell what actions they are performing. See screenshot above for an example of what they look like. If opened, these attachments download and install the intermediary loader RockLoader which downloads Bart onto the machine over HTTPS. Once executed, it will first check the language on the infected computer. If the malware detects Russian, Belorussian, or Ukrainian, the ransomware will terminate and will not proceed with the infection. If it's any other language, it will start scanning the computer for certain file extensions to encrypt. Because Bart does not require communication with C&C infrastructure prior to encrypting files, Bart could possibly encrypt machines sitting behind corporate firewalls that would otherwise block such traffic. Thus, organizations need to ensure that Bart is blocked at the email gateway using rules that block zipped executables.

The tag is: *misp-galaxy:ransomware="Bart ransomware"*

Bart ransomware is also known as:

- Locky Bart

Table 13593. Table References

Links

Razor

Razor was discovered by dnwls0719, it is a part of Garrantydecrypt ransomware family. Like many other programs of this type, Razor is designed to encrypt files (make them unusable/inaccessible), change their filenames, create a ransom note and change victim's desktop wallpaper. Razor renames files by appending the ".razor" extension to their filenames. For example, it renames "1.jpg" to "1.jpg.razor", and so on. It creates a ransom note which is a text file named " RECOVERY.txt", this file contains instructions on how to contact Razor's developers (cyber criminals) and other details. As stated in the "RECOVERY.txt" file, this ransomware encrypts all files and information about how to purchase a decryption tool can be received by contacting Razor's developers. Victims supposed to contact them via razor2020@protonmail.ch, Jabber client (razor2020@jxmpp.jp) or ICQ client (@razor2020) and wait for further instructions. It is very likely that they will name a price of a decryption tool and/or key and provide cryptocurrency wallet's address that should be used to make a transaction. However, it is never a good idea to trust (pay)

any cyber criminals/ransomware developers. It is common that they do not provide decryption tools even after a payment. Another problem is that ransomware-type programs encrypt files with strong encryption algorithms and their developers are the only ones who have tools that can decrypt files encrypted by their ransomware. In most cases victims have the only free and safe option: to restore files from a backup. Also, it is worth mentioning that files remain encrypted even after uninstallation of ransomware, its removal only prevents it from causing further encryptions.

CoronaVirus

A new ransomware called CoronaVirus has been distributed through a fake web site pretending to promote the system optimization software and utilities from WiseCleaner. With the increasing fears and anxiety of the Coronavirus (COVID-19) outbreak, an attacker has started to build a campaign to distribute a malware cocktail consisting of the CoronaVirus Ransomware and the Kpot information-stealing Trojan. This new ransomware was discovered by MalwareHunterTeam and after further digging into the source of the file, we have been able to determine how the threat actor plans on distributing the ransomware and possible clues suggesting that it may actually be a wiper.

Snake Ransomware

Snake ransomware first attracted the attention of malware analysts in January 2020 when they observed the crypto-malware family targeting entire corporate networks. Shortly after this discovery, the threat quieted down. It produced few new detected infections in the wild for the next few months. That was until May 4, when ID Ransomware registered a sudden spike in submissions for the ransomware.

The tag is: *misp-galaxy:ransomware="Snake Ransomware"*

eCh0raix

Anomali researchers have observed a new ransomware family, dubbed eCh0raix, targeting QNAP Network Attached Storage (NAS) devices. QNAP devices are created by the Taiwanese company QNAP Systems, Inc., and contain device storage and media player functionality, amongst others. The devices appear to be compromised by brute forcing weak credentials and exploiting known vulnerabilities in targeted attacks. The malicious payload encrypts the targeted file extensions on the NAS using AES encryption and appends .encrypt extension to the encrypted files. The ransom note created by the ransomware has the form shown below. eCh0raix was first seen in June 2019, after victims began reporting ransomware attacks in a forum topic on BleepingComputer. On June 1st, 2020, there has been a sudden surge of eCh0raix victims seeking help in our forums and submissions to the ransomware identification site ID-Ransomware.

LockBit

LockBit operators tend to be very indiscriminate and opportunistic in their targeting. Actors behind this attack will use a variety of methods to gain initial access, up to and including basic methods such as brute force. After gaining initial access the actor follows a fairly typical escalation, lateral movement and ransomware execution playbook. LockBit operators tend to have a very brief dwell time, executing the final ransomware payload as quickly as they are able to. LockBit ransomware has the built-in lateral movement features; given adequate permissions throughout the targeted environment.

WastedLocker

WastedLocker primarily targets corporate networks. Upon initial compromise, often using a fake browser update containing SocGholish, the actor then takes advantage of dual-use and LoLBin tools in an attempt to evade detection. Key observations include lateral movement and privilege escalation. The WastedLocker ransomware has been tied back to EvilCorp.

https://research.nccgroup.com/2020/06/23/wastedlocker-a-new-ransomware-variant-developed-by-the-evil-corp-group/

Babuk Ransomsware

Since this is the first detection of this malware in the wild, it’s not surprising that Babuk is not obsfuscated at all. Overall, it’s a pretty standard ransomware that utilizes some of the new techniques we see such as multi-threading encryption as well as abusing the Windows Restart Manager similar to Conti and REvil. For encrypting scheme, Babuk uses its own implementation of SHA256 hashing, ChaCha8 encryption, and Elliptic-curve Diffie–Hellman (ECDH) key generation and exchange algorithm to protect its keys and encrypt files. Like many ransomware that came before, it also has the ability to spread its encryption through enumerating the available network resources.

The tag is: *misp-galaxy:ransomware="Babuk Ransomsware"*

Darkside

Darkside, the latest ransomware operation to emerge has been attacking organizations beginning earlier this month. Darkside's customized attacks on companies have already garnered them million-dollar payouts. Through their "press release", these threat actors have claimed to be affiliated with prior ransomware operations making millions of dollars. They stated that they created this new product to match their needs, as prior products didn't. Darkside explains that they only target companies they know that can pay the specified ransom. They have allegedly promised that they will not attack the following sectors. They include medicine, education, non-profit organizations, and the government sector.

The tag is: *misp-galaxy:ransomware="Darkside"*

Darkside is also known as:

- BlackMatter

RansomEXX

We recently discovered a new file-encrypting Trojan built as an ELF executable and intended to encrypt data on machines controlled by Linux-based operating systems. After the initial analysis we noticed similarities in the code of the Trojan, the text of the ransom notes and the general approach to extortion, which suggested that we had in fact encountered a Linux build of the previously known ransomware family RansomEXX. This malware is notorious for attacking large organizations and was most active earlier this year. RansomEXX is a highly targeted Trojan. Each sample of the malware contains a hardcoded name of the victim organization. Moreover, both the encrypted file extension and the email address for contacting the extortionists make use of the victim's name.

The tag is: *misp-galaxy:ransomware="RansomEXX"*

RansomEXX is also known as:

- Ransom X
- Defray777
- Defray-777

- Defray 2018

CovidLock

Mobile ransomware. The Zscaler ThreatLabZ team recently came across a URL named hxxp://coronavirusapp[.]site/mobile.html, which portrays itself as a download site for an Android app that tracks the coronavirus spread across the globe. In reality, the app is Android ransomware, which locks out the victim and asks for ransom to unlock the device. The app portrays itself as a Coronavirus Tracker. As soon as it starts running, it asks the user for several authorizations, including admin rights. In fact, this ransomware does not encrypt nor steal anything and only lock the device with an hard coded code.

The tag is: *misp-galaxy:ransomware="CovidLock"*

Tycoon

This malware is written in Java and is named after references in the code. Tycoon has been in the wild since December 2019 and has targeted organizations in the education, SMBs, and software industries. Tycoon is a multi-platform Java ransomware that targets Windows and Linux systems. This ransomware denies access to the system administrator following an attack on the domain controller and file servers. The initial intrusion occurs through an internet-facing remote desktop protocol (RDP) jump-server.

MedusaLocker

Observed as recently as May 2022, MedusaLocker actors predominantly rely on vulnerabilities in Remote Desktop Protocol (RDP) to access victims' networks. The MedusaLocker actors encrypt the victim's data and leave a ransom note with communication instructions in every folder containing an encrypted file. The note directs victims to provide ransomware payments to a specific Bitcoin wallet address. MedusaLocker appears to operate as a Ransomware-as-a-Service (RaaS) model based on the observed split of ransom payments. Typical RaaS models involve the ransomware developer and various affiliates that deploy the ransomware on victim systems. MedusaLocker ransomware payments appear to be consistently split between the affiliate, who receives 55 to 60 percent of the ransom; and the developer, who receives the remainder.

The tag is: *misp-galaxy:ransomware="MedusaLocker"*

Nefilim

According to Vitali Kremez and Michael Gillespie, this ransomware shares much code with Nemty 2.5. A difference is removal of the RaaS component, which was switched to email communications for payments. Uses AES-128, which is then protected RSA2048.

The tag is: *misp-galaxy:ransomware="Nefilim"*

View relationships graph

Nefilim has relationships with:

- related-to: misp-galaxy:ransomware="Nemty" with estimative-language:likelihood-probability="likely"

ProLock

PwndLocker is a ransomware that was observed in late 2019 and is reported to have been used to target businesses and local governments/cities. According to one source, ransom amounts demanded as part of PwndLocker activity range from $175k USD to $650k USD depending on the size of the network. PwndLocker attempts to disable a variety of Windows services so that their data can be encrypted. Various processes will also be targeted, such as web browsers and software related to security, backups, and databases. Shadow copies are cleared by the ransomware, and encryption of files occurs once the system has been prepared in this way. Executable files and those that are likely to be important for the system to continue to function appear to be skipped by the ransomware, and a large number of folders mostly related to Microsoft Windows system files are also ignored. As of March 2020, encrypted files have been observed with the added extensions of .key and .pwnd. Ransom notes are dropped in folders where encrypted files are found and also on the user's desktop.

The tag is: *misp-galaxy:ransomware="ProLock"*

View relationships graph

ProLock has relationships with:

- dropped-by: misp-galaxy:botnet="Qbot" with estimative-language:likelihood-probability="likely"

Conti

Conti ransomware is a RaaS and has been observed encrypting networks since mid-2020. Conti was developed by the “TrickBot” group, an organized Russian cybercriminal operation. Their reputation has allowed the group to create a strong brand name, attracting many affiliates which has made Conti one of the most widespread ransomware strains in the world. One of the last known “Conti” attacks was against the government of Costa Rica in April 2022 causing the country to declare a state of emergency. Shortly after this final attack, the “Conti” brand disappeared. The group behind it likely switched to a different brand to avoid sanctions and start over with a new, clean reputation.

The tag is: *misp-galaxy:ransomware="Conti"*

BlackCat

BlackCat (ALPHV) is ransomware written in Rust. The ransomware makes heavy use of plaintext JSON configuration files to specify the ransomware functionality. BlackCat has many advanced capabilities like escalating privileges and bypassing UAC make use of AES and ChaCha20 or Salsa encryption, may use the Restart Manager, can delete volume shadow copies, can enumerate disk volumes and network shares automatically, and may kill specific processes and services. The ransomware exists for both Windows, Linux, and ESXi systems. Multiple extortion techniques are used by the BlackCat gang, such as exfiltrating victim data before the ransomware deployment, threats to release data if the ransomw is not paid, and distributed denial-of-service (DDoS) attacks.

The tag is: *misp-galaxy:ransomware="BlackCat"*

BlackCat is also known as:

- ALPHV
- Noberus

HelloXD

HelloXD is a ransomware family performing double extortion attacks that surfaced in November 2021. During our research we observed multiple variants impacting Windows and Linux systems. Unlike other ransomware groups, this ransomware family doesn't have an active leak site; instead it prefers to direct the impacted victim to negotiations through TOX chat and onion-based messenger instances.

The tag is: *misp-galaxy:ransomware="HelloXD"*

Maui ransomware

Maui ransomware stand out because of a lack of several key features commonly seen with tooling from RaaS providers, such as an embedded ransom note to provide recovery instructions or automated means of transmitting encryption keys to attackers. Instead, it is believed that Maui is manually operated, in which operators will specify which files to encrypt when executing it and then exfiltrate the resulting runtime artifacts. There are many aspects to Maui ransomware that are unknown, including usage context.

The tag is: *misp-galaxy:ransomware="Maui ransomware"*

Lorenz Ransomware

Lorenz is a ransomware group that has been active since at least February 2021 and like many ransomware groups, performs double-extortion by exfiltrating data before encrypting systems.

The tag is: *misp-galaxy:ransomware="Lorenz Ransomware"*

BlackBasta

Black Basta is a new ransomware strain discovered during April 2022 - looks in dev since at least early February 2022 - and due to their ability to quickly amass new victims and the style of their negotiations, this is likely not a new operation but rather a rebrand of a previous top-tier ransomware gang that brought along their affiliates.

The tag is: *misp-galaxy:ransomware="BlackBasta"*

View relationships graph

BlackBasta has relationships with:

BlackByte

BlackByte is recently discovered Ransomware with a .NET DLL core payload wrapped in JavaScript. It employs heavy obfuscation both in its JavaScript wrapper and .NET DLL core.

Once the JavaScript wrapper is executed, the malware will de-obfuscate the core payload and execute it in memory. The core .DLL is loaded and BlackByte will check the installed operating system language and terminate if an eastern European language is found.

It will proceed to check for the presence of several anti-virus and sandbox-related .DLLs, attempt to bypass AMSI, delete system shadow-copies in order to hinder system recovery, and modify several other system services (including Windows Firewall) in order to “prep” the system for encryption. Once the system is “ready” for encryption, it will download a symmetric key-file which will be used

to encrypt files on the system. If this file is not found, the malware will terminate.

Unlike most Ransomware today, BlackByte uses a single symmetric encryption key, and does not generate a unique encryption key for each victim system, meaning the same key can be used to decrypt all files encrypted by the malware.

This makes for substantially easier key-management for the actors behind BlackByte at the cost of a weaker encryption scheme and easier victim system recovery (as there is only a single online point with a single key to maintain).

As with most Ransomware today, BlackByte has worming capabilities and can infect additional endpoints on the same network.

AvosLocker

In March 2022, the FBI and the U.S. Treasury Financial Crimes Enforcement Network released a joint advisory addressing AvosLocker and their activity targeting organizations across several critical infrastructure sectors. The RaaS gang deploys ransomware onto their victim's networks and systems, then threatens to leak their files on the dark web if they don't pay up. AvosLocker is both the name of the RaaS gang, as well as the name of the ransomware itself.

In May 2022, AvosLocker took responsibility for attacking and stealing data from the Texas-based healthcare organization, CHRISTUS Health. CHRISTUS Health runs hundreds of healthcare facilities across Mexico, the U.S., and South America. The group stole information from a cancer patient registry which included names, social security numbers, diagnoses, dates of birth, and other medical information. The nonprofit Catholic health system has more than 600 healthcare facilities in Texas, Louisiana, New Mexico, and Arkansas. There are also facilities in Columbia, Mexico, and Chile.

Fortunately, the ransomware attack was quickly identified and was limited. While other healthcare organizations have not been as fortunate with ransomware attacks, the AvosLocker attack didn't impact CHRISTUS Health's patient care or clinical operations. CHRISTUS Health didn't reveal whether or not the security incident included ransomware, data exfiltration or extortion, but due to AvosLocker's reputation, it is more than likely that the incident included at least one of the three.

0Mega

0mega, a new ransomware operation, has been observed targeting organizations around the world. The ransomware operators are launching double-extortion attacks and demanding millions of dollars as ransom.

0mega ransomware operation launched in May and has already claimed multiple victims. 0mega maintains a dedicated data leak site that the attackers use to post stolen data if the demanded ransom is not paid. The leak site currently hosts 152 GB of data stolen from an electronics repair firm in an attack that happened in May. However, an additional victim has since been removed, implying that they might have paid the ransom to the 0mega group.

How does it work? Hackers add the .0mega extension to the encrypted file's names and create ransom notes (DECRYPT-FILES[.]txt). The ransom note has a link to a Tor payment negotiation site

with a support chat to reach out to the ransomware group. To log in to this site, the victims are asked to upload their ransom notes with a unique Base64-encoded blob identity.

The tag is: *misp-galaxy:ransomware="0Mega"*

Ako

Once installed, Ako will attempt to delete Volume Shadow Copies and disable recovery services. It will then begin to encrypt all files that do not match a hard-coded list using an unknown algorithm. Whilst this is happening, Ako will scan the affected network for any connected devices or drives for it to propagate to.

The tag is: *misp-galaxy:ransomware="Ako"*

Ako is also known as:

- MedusaReborn

Atomsilo

AtomSilo is a new Ransomware recently seen in September 2021 during one of their attacks by exploiting a recently revealed vulnerability (CVE-2021-26084) in Atlassian's Confluence Collaboration Software for initial access. The Ransomware used the double extortion method which is gaining popularity among ransomware threat actors where they first, exfiltrate the confidential information and as a second step encrypt the system files.

Babuk-Locker

Babuk-Locker emerged in early 2021 as a Ransomware-as-a-Service (RaaS) gang targeting high-value “big game” enterprises across sectors like healthcare, telecommunications, finance, education, and government. It initially deployed crypto-ransomware—encrypting files using ChaCha8 encryption with keys secured via elliptic-curve Diffie-Hellman—and later added a double-extortion model involving data theft and leak site threats. Notable incidents include attacks on the Washington, D.C. Metropolitan Police Department and other organizations. In mid-2021, Babuk’s source code was leaked, prompting both a fragmentation of its core operations and emergence of variants like Babuk Tortilla and Babuk V2. Affiliates exploited vulnerabilities in ESXi hypervisors to deliver destructive variants, and law enforcement actions eventually disrupted key operators.

Bianlian

BianLian used subtle techniques to exploit, enumerate, and move laterally in victim networks to remain undetected and aggressively worked to counter Endpoint Detection & Response (EDR) protections during the encryption phase of their operations. The group has displayed signs of being new to the practical business aspects of ransomware and associated logistics. Generally they seemed to be experiencing the growing pains of a group of talented hackers new to this aspect of criminal extortion.

Infrastructure associated with the BianLian group first appeared online in December 2021 and their toolset appears to have been under active development since then. Finally, we have observed the BianLian threat actor tripling their known command and control (C2) infrastructure in the month of August, suggesting a possible increase in the actor's operational tempo.

Blackshadow

BlackShadow is a state-aligned cybercrime group reportedly linked to Iran's cyber operations, first identified in late 2020. Their operations blend data exfiltration with ransom threats, notably targeting Israeli organizations such as Cyberserve—a web hosting provider—and leaking data to inflict reputational damage. Victims included entities like Atraf (an LGBTQ dating app), tour booking services, and museums, reflecting political or ideological motivations over financial gain. Despite carrying out extortion, there is no evidence that BlackShadow employs typical encryption-based ransomware mechanics; instead, they leverage stolen data and the threat of public exposure.

Cheers

Cheers is a Linux-based ransomware variant observed starting in May 2022, engineered specifically to target VMware ESXi servers. The malware was developed from leaked Babuk ransomware source code and leverages the SOSEMANUK stream cipher combined with ECDH key exchange for encryption. It terminates all running virtual machines before renaming and encrypting log files

and VM-related extensions—like .vmdk, .vmsn, and .vswp—appending a .Cheers extension. A ransom note titled "How To Restore Your Files.txt" is dropped per directory. The ransomware is attributed to the Chinese-affiliated group BRONZE STARLIGHT (also known as Emperor Dragonfly, DEV-0401), which has previously deployed other strains like Rook, NightSky, and Pandora. Cheers targets a range of industry sectors, with confirmed victims across healthcare, finance, logistics, and manufacturing.

Cuba

The Cuba Ransomware, also known as Colddraw Ransomware, was first identified in the threat landscape in 2019 and built a relatively small but selected list of victims. The group is also known as Fidel Ransomware, due to a characteristic marker placed at the beginning of all encrypted files. This file marker is used as an indicator for the ransomware and its decoder that the file has been encrypted. Despite its name and the Cuban nationalist style on its leak site, it is difficult to assert any connection or affiliation with the Republic of Cuba. The group has been linked to a Russian-language threat actor by Profero researchers due to some details of incorrect translation they discovered, as well as the discovery of a 404 page containing text in Russian on the threat actor's own leak site. According to BlackBerry, based on the analysis of the code strings used in the campaign analyzed in 2023, there were indications that the developer behind the Cuba ransomware speaks Russian. The ransomware operators use a double extortion approach, and following the USA, in August 2022, it was believed that the Cuba ransomware group had compromised 101 entities, demanding $145 million in ransom payments and receiving up to $60 million. The group used a similar set of TTPs, with only a slight change each year, as they generally consist of LOLBins (executables that are part of the operating system and can be exploited to

support an attack), exploits, off-the-shelf and custom malware, as well as intrusion tools like Cobalt Strike and Metasploit. In 2022, the group allegedly developed a relationship with operators of the Industrial Spy market, using their platform as a means of data leakage.

Daixin

Daixin Team is a ransomware and data extortion group active since at least June 2022, known for targeting the healthcare sector, including hospitals, clinics, and related service providers. The group employs a double-extortion model—exfiltrating sensitive data before encrypting systems—and has leaked protected health information (PHI) to pressure victims. Intrusions often involve exploiting VPN vulnerabilities (notably in Fortinet FortiOS) and using compromised

credentials for initial access. The ransomware uses AES for file encryption with RSA to protect the keys, and ransom notes direct victims to a Tor-based portal. The U.S. CISA, FBI, and HHS have issued joint advisories warning of the group's impact on healthcare delivery and patient safety

Dark Power

Dark Power is a ransomware group first observed in January 2023, known for targeting small to mid-sized organizations across education, healthcare, manufacturing, and information technology sectors. The group uses a double-extortion model, encrypting files and threatening to leak exfiltrated data via a Tor-based site if ransom demands are not met. Written in the Nim programming language, Dark Power ransomware appends the .dark_power extension to encrypted files and drops a ransom note named README.txt, giving victims 72 hours to contact them. The note typically demands payment in cryptocurrency and offers to negotiate. Victims have been observed in North America, Asia, and Europe, with attacks often involving exploitation of vulnerable public-facing systems or stolen credentials.

Darkangel

Dark Angels is a highly targeted ransomware and data-extortion group that emerged in spring 2022. Rather than using an affiliate-driven model, it orchestrates discreet, high-impact attacks on large organizations—often choosing one Fortune-level victim at a time. The group exfiltrates massive volumes of data (sometimes 10–100 TB), optionally deploys encryption on Windows or ESXi systems, and pressures victims via a Tor-hosted leak platform ("Dunghill Leak"). Their notable incidents include extorting a record $75 million from a Fortune 50 company in 2024 and demanding around $51 million from Johnson Controls. Dark Angels' operations emphasize stealth

and precision over disruption, often avoiding high-profile media exposure and operating with low operational visibility.

Endurance

Endurance is a destructive ransomware variant first observed in 2023, developed and operated by the threat actor known as IntelBroker (also referred to as Butler Spider). Rather than encrypting files for decryption, it functions primarily as a data wiper, overwriting file contents, appending randomized filenames, and then deleting the files altogether. The source code for the malware was intentionally made public by the operator, indicating its use as both a tool and a statement. Endurance was used in high-profile breaches, including targeting government agencies, large enterprises, and telecommunications providers.

Entropy

Entropy is a ransomware first seen in 1st quarter of 2022, is being used in conjunction of Dridex infection. The ransomware uses a custom packer to pack itself which has been seen in some early dridex samples.

Groove

Groove was a short-lived ransomware group and cybercrime gang that emerged in August 2021 and became notable for its aggressive, publicity-driven tactics. Unlike traditional Ransomware-as-a-Service (RaaS) groups, Groove functioned more as a loose criminal collective, encouraging other threat actors to join forces in attacking U.S. entities, particularly in the government and financial sectors. The group ran a Tor-based leak site where it published stolen data, but its operators claimed to focus more on building an “underground alliance” than on ransomware deployment itself. Analysts noted overlaps between Groove and actors behind Babuk and BlackMatter, as well as forum personas known for data theft operations. By early 2022, Groove’s activity had largely ceased, with some experts suggesting the group was either a short-term recruitment campaign or a misinformation effort.

Hotarus

Hotarus is a ransomware and data extortion group first observed in March 2021, believed to be linked to threat actors of Latin American origin. The group has targeted entities in South America and the United States, including financial institutions, government agencies, and private companies. Hotarus is known for deploying both custom ransomware and publicly available tools, alongside stealing sensitive information for double-extortion purposes. The group has been observed exploiting vulnerable web services, using stolen credentials, and leveraging publicly available post-exploitation frameworks to gain persistence in victim networks. Encrypted files are typically appended with extensions such as .hotarus or campaign-specific identifiers, and ransom notes direct victims to communicate via encrypted email services. Notably, in some campaigns, Hotarus deployed data leak threats without encrypting files, focusing solely on exposure as a pressure tactic.

Kelvin Security

Kelvin Security is a cybercrime group active since at least 2013, primarily known for hacktivism, data breaches, and website defacements rather than traditional ransomware operations. The group has claimed responsibility for intrusions targeting government agencies, educational institutions,

and private companies across multiple regions, including Latin America, Europe, and the Middle East. While it has engaged in data theft and leak threats, there is no confirmed evidence that Kelvin Security operates a ransomware encryption component. Instead, their extortion model focuses on stealing sensitive data and threatening public disclosure, often publicizing breaches via social media and underground forums. The group's activities have been linked to politically motivated campaigns as well as financially motivated breaches. Victim selection appears opportunistic, exploiting vulnerabilities in web servers, poorly configured databases, and exposed credentials.

Lapsus$

Lapsus$ is a cyber extortion group first observed in late 2021, known for high-profile breaches and data theft campaigns against major global companies rather than traditional ransomware encryption. The group primarily focuses on data exfiltration and public leak threats without encrypting victim systems. Lapsus$ uses a combination of social engineering, SIM swapping, MFA fatigue attacks, and purchasing access from insiders or access brokers to infiltrate corporate networks. Their victim list includes Microsoft, Okta, NVIDIA, Samsung, Uber, and telecom operators, with operations targeting multiple regions worldwide. Once inside, Lapsus$ actors exfiltrate source code, proprietary data, and customer information, often leaking samples to pressure victims into negotiation. The group is known for a brash and public-facing style, communicating directly with followers on Telegram channels and occasionally mocking victims. Several members, including minors, have been arrested in the UK, but the group's activities have persisted in some form.

Midas

This malware written in C# is a variant of the Thanos ransomware family and emerged in October 2021 and is obfuscated using SmartAssembly. In 2022, ThreatLabz analysed a report of Midas ransomware was slowly deployed over a two month period (ZScaler). This ransomware features also its own data leak site as part of its double extortion strategy.

Eraleign

A new ransomware group is said to have emerged in mid-April 2024, under the name "APT73." It's worth noting that the group reportedly self-proclaimed as an APT, which stands for "Advanced Persistent Threat" in the cybersecurity field. According to research, much of the available information about the aforementioned group came from another ransomware group known as LockBit. This is evident as the group, on its Data Leak Site (DLS) website, added pages such as "Contact Us," "How to buy Bitcoin," "Web Security Bug Bounty," and "Mirrors." Another relevant fact is that this group is also known as Ransomware Eraleig. This is because the group allegedly used a domain in the past to disclose information about victims. There is no information available about any Tactics, Techniques, and Procedures associated with this ransomware group, nor about the latest artifacts used for encryption purposes.

darkrace

DarkRace is a moderately destructive ransomware strain observed since 2024. It encrypts files and appends a randomized extension (e.g., .1352FF327) that varies per victim. Implemented as a 32-bit Windows application, it disables antivirus defenses, deletes volume shadow copies, terminates processes, and drops ransom note files for payment negotiation. Technical weaknesses in its encryption have enabled developers to produce a universal decryptor that works against DarkRace

and related variants.

dan0n

dAn0n is a data-extortion actor that first appeared in April 2024. Operating primarily in a leak-focused extortion model, they publish stolen data on a Tor-hosted site rather than encrypting files. Their victims include organizations across sectors like business services, technology, healthcare, transportation, and legal—all largely based in the United States, with a few in Ireland and South Korea. Activity surged in May 2024, landing them in the top 10 most active ransomware actors that month. Despite limited branding efforts, their smaller operational footprint has allowed for swift, targeted breaches that prioritize rapid data exposure over elaborate cryptographic tactics.

8base

8Base emerged in early 2022 and rapidly escalated its ransomware operations by mid-2023, positioning itself as a “simple pen tester” while executing a relentless double-extortion scheme: encrypting files using AES-256 CBC mode (appending the “.8base” extension) and threatening to leak stolen data via a Tor-accessible leak site. The group leverages initial access methods such as phishing and SmokeLoader, disables security mechanisms like Volume Shadow Copy and firewalls, and deploys persistence via registry and startup entries. Targeting primarily small and medium-sized organizations across sectors such as manufacturing, finance, IT, and healthcare in regions including the U.S., Brazil, and Europe, 8Base has drawn comparisons to Phobos and RansomHouse for its tactics and ransom-note style. In early 2025, international law enforcement operations disrupted the group, resulting in the arrest of four key actors, seizure of servers, and warnings to hundreds of potential victims.

black suit

BlackSuit is a type of malicious software classified as ransomware. Its operation involves multifaceted extortion, encrypting and exfiltrating victim data, and hosting public data leak sites for victims who fail to meet its demands. BlackSuit's activities first began in early May 2023. Designed to prevent access to files by encrypting them, this ransomware appends the ".blacksuit" extension to the names of all affected files. Furthermore, it changes the desktop wallpaper and creates a ransom note file named "README.BlackSuit.txt." This threat actor targets large corporations, small and medium-sized enterprises (SMEs), with no apparent specific discrimination regarding industry or type of victim.

rhysida

Rhysida is a ransomware-as-a-service (RAAS) group that emerged in May 2023. The group utilizes a namesake ransomware through phishing attacks and Cobalt Strike to breach the targets' networks and deploy their payloads.

The group threatens to publicly distribute exfiltrated data if the ransom is not paid, and it’s worth mentioning that Rhysida is still in the early stages of development.

The ransomware leaves PDF notes in the affected folders, instructing victims to contact the group

through its portal, and payment is made via Bitcoin.

After encryption, the ransomware appends the extension ".ryshida" to encrypted files.

For encryption purposes, Trend Micro published an analysis stating that the ransomware uses a 4096-bit RSA key and AES-CTR for encryption.

In addition to the encryption method, Trend Micro published an analysis of the Ryshida Ransomware attack chain.

Finally, the group has a website on the Tor network hosting the companies that have been breached.

medusa

The ransomware landscape remains active in 2024, with various ransomware groups attacking a wide range of organizations. In this context, Medusa Ransomware has emerged as a significant cyber threat, standing out for its data encryption and extortion operations.

Medusa Ransomware appeared in 2021, quickly becoming one of the most feared cyber threats. This malware encrypts critical files and demands ransoms in cryptocurrency, exploiting vulnerabilities in corporate and institutional systems. Known for its advanced phishing tactics, Medusa infiltrates networks with ease, causing significant damage.

Critical sectors such as healthcare and finance have been severely impacted, facing operational disruptions and substantial financial losses. The ransomware continuously evolves, making it difficult for security experts to neutralize it. Medusa's rapid adaptation to new security defenses underscores the urgent need for more robust cybersecurity measures, emphasizing the importance of proactive cybersecurity.

The rise of Medusa Ransomware serves as a global warning about the dangers of sophisticated cyber threats and the need for ongoing preparedness.

lorenz

Tesorion describes Lorenz as a ransomware with design and implementation flaws, leading to impossible decryption with tools provided by the attackers. A free decryptor for 2021 versions was made available via the NoMoreRansom initiative. A new version of the malware was discovered in March 2022, for which again was provided a free decryptor, while the ransomware operators are not able to provide tools to decrypt affected files.

crosslock

CrossLock ransomware was first observed in April 2023, targeting an IT services firm in Brazil using a double-extortion approach—encrypting data and threatening to leak it publicly. Written in Go, it uses a hybrid encryption scheme combining ChaCha20 for file encryption with Curve25519 for key protection. Victims see their files renamed with the .crlk extension and ransom notes titled ---CrossLock_readme_To_Decrypt---.txt. The malware includes advanced techniques like Event Tracing for Windows (ETW) bypass and process mimicking (e.g., Cybereason processes) for stealth. It was publicly tracked until July 2023, after which activity (and its leak site) went offline.

cyclops

Cyclops ransomware was rebranded as Knight around mid-2023, emerging initially in early 2023. It operates as a Ransomware-as-a-Service (RaaS), targeting multiple platforms including Windows, macOS, Linux, and ESXi systems. Crafted in Go, it uses strong encryption algorithms like ChaCha20 and Curve25519. Knight includes both a full and "lite" encryptor, supports batch attacks, hosts a Tor leak site, and offers a web portal for affiliates—positioning itself as a scalable and partner-friendly ransomware operation. Affiliates can manage deployments, track payments, and negotiate with victims through a sophisticated RaaS platform.

dragonforce

Research on the operators of the DragonForce ransomware was conducted, and it was identified that the group emerged around mid-November 2023. They employ the same method as many other ransomware groups, using double extortion in their attacks, i.e., data encryption and extortion for the publication of the attacks.

Initially, according to research, it was identified that another hacktivist group, also named DragonForce and based in Malaysia, conducted several campaigns in 2021 and 2022 against various government organizations and agencies across the Middle East and Asia. Additionally, the hacktivist group announced in 2022 its intention to initiate ransomware attacks. However, due to the limitation and difficulty in obtaining substantial information, no direct link could be established.

The activities of the DragonForce ransomware group were identified in November 2023 through a clandestine forum, where they announced their victims via data leaks.

Some samples related to the DragonForce ransomware group were obtained, and it was concluded that the group uses a binary (ransomware) based on LockBit Black. In other words, this threat group took advantage of the previously leaked builder from another ransomware group, LockBit, and incorporated these samples into their attacks to encrypt data.

The company Cyble published an analysis indicating that the ransomware used by DragonForce has a 99% similarity to the LockBit Black ransomware, suggesting the use of the leaked builder.

It is worth noting that the ransomware performs the entire operational routine, terminating processes, encrypting specific files, and subsequently creating a ransom note for the victim.

play

Initially observed in June 2022, the Play ransomware (a.k.a PlayCrypt) operates through double extortion, targeting numerous organizations in Latin America. Its Initial Access method is quite similar to other ransomwares, involving attacks such as Phishing, Exposed Services to the Internet, and Valid Account compromises.

On April 19, 2023, the security company Symantec published two new tools developed by the Play group. These tools allow the malicious actor to enumerate and exfiltrate data from the internal network. The post mentions the following: "Play threat actors use the .NET infostealer to enumerate software and services via WMI, WinRM, Remote Registry, and Remote Service. The malware checks for the existence of security and backup software, as well as remote administration tools and other programs, saving the information in .CSV files that are compressed into a .ZIP file for later manual exfiltration by threat actors." These tools make use of the following .NET frameworks (Costura, AlphaVSS).

cactus

The CACTUS ransomware is said to have emerged around March 2023. The group became known for exploiting vulnerabilities to gain initial access and maintain a presence within the organization's infrastructure. There is little known information about the ransomware group, except that it emerged on the mentioned date and, following encryption, a text file named 'cAcTuS.readme.txt' would be created. Additionally, encrypted files were altered to the '.cts1' extension, and data exfiltration and victim extortion were conducted through the use of the service known as Tox. As mentioned earlier, the ransomware especially exploits vulnerabilities in VPNs, also utilizing obfuscation techniques to conceal its activities, such as employing UPX and utilizing

encryption algorithms like OpenSSL, AES OCB, ChaCha20_Poly1305, system reinitializations, and others.

dunghill

Dunghill Leak is the publicly branded data leak site (DLS) operated by the Dark Angels ransomware group, established circa January 2023. Rather than a standalone encryption threat, it serves as the disclosure and extortion platform where stolen victim data is published if ransom demands are ignored. Dark Angels is known for highly targeted “big game hunting” tactics, exfiltrating tens to hundreds of terabytes of corporate data, often without encrypting systems. Victims include major industry players—like Johnson Controls, Sabre, Sysco, and a Fortune 50 firm—which reportedly paid a record-breaking $75 million USD ransom. The leak site is complemented by a mirrored Telegram channel for distributing victim announcements and maintaining negotiation traffic.

insane ransomware

Insane is a relatively obscure ransomware family first reported in late 2021, with few confirmed incidents in public threat intelligence. It encrypts victim files using symmetric encryption (AES) combined with RSA for key protection and appends the .insane extension to affected files. The ransom note, typically named INSANE_README.txt, directs victims to contact the operators via email for decryption instructions. Based on limited reporting, Insane does not appear to operate as a Ransomware-as-a-Service (RaaS) platform; instead, it seems to be deployed by the core operators in targeted attacks. Initial access methods are not well-documented, but suspected vectors include phishing attachments and exploitation of exposed RDP services. The group's small footprint in open-source intelligence suggests limited distribution or use in highly selective campaigns.

risen

Risen, which is a fully optimized and high-speed program, is the result of our years of experience in the field of malware writing. Risen is written in C language and completely using winapi. We produced many products with different features and options, but we came to the conclusion that none of the options have the benefit and efficiency they should; So, instead of spending time on useless and inefficient options, we decided to spend all our time on the strength, speed and security of our cryptography, and that's how we created Risen. Software features in version 1:

 -Encryption security, utilizing Chacha20 and RSA 2048 algorithms.
 -High encryption speed and software optimization
 -compatible with all versions of Windows on any hardware without any issues.
 -Automatic option settings, its easy to using and default configuration set to the best mode.
 -Utilization of Threadpool method and queue creation for encryption.
 -A powerful file unlocker, unlock files without closing processes.
 -Safe deletion of backups, shadow copies, and all windows logs.
 -A blog, Leak website, and management panel on TOR for leaking data of non-paying companies.

brain cipher

In mid-June 2024, a new ransomware operation named Brain Cipher emerged, notably targeting Indonesia's National Data Center. This attack disrupted immigration operations at airports and various other government services. The payload employed by this group is based on the leaked LockBit 3.0 builder. Comparative analyses have confirmed significant similarities between Brain Cipher and LockBit 3.0 samples. Notably, the attackers modified the ransomware to not only append a new extension to encrypted files but also to encrypt the filenames themselves. Additionally, it was identified that the group appears to be in its early stages, as evidenced by their use of the leaked LockBit 3.0 builder and their recent operations. After encrypting the data, the ransomware generates ransom notes named "added_extension.README.txt." These notes contain a description of what occurred and a link to the attackers' website hosted on the Tor network.

good day

Good Day is a ransomware variant within the ARCrypter family, first observed in May 2023. It gained prominence due to its reticent financial extortion model and custom branding—victims are

greeted with a “Good day” message upon landing on individualized Tor-based victim portals. The malware is typically delivered via phishing campaigns disguising payloads as legitimate Windows updates. It utilizes a robust encryption workflow, including deletion of volume shadow copies and process evasion mechanisms. Notably, Good Day has been linked to the Cloak ransomware group through shared data leak infrastructure and overlapping leak portal behaviors.

holyghost

HolyGhost is a ransomware group first publicly reported in July 2022, believed to be operated by a North Korean state-sponsored threat actor tracked as APT43 or Andariel, a subgroup of the Lazarus Group. The group has been active since at least June 2021, using a double-extortion model that combines encryption of victim files with threats to leak stolen data via a Tor site. Early HolyGhost variants (BTLC_C.exe) used a custom file extension .h0lyenc, while later builds added more robust encryption, obfuscation, and evasion capabilities. Targeted victims include small and medium-sized businesses in manufacturing, finance, education, and event planning, primarily in the United States, South Korea, Brazil, and India. Intrusion methods include exploitation of vulnerable public-facing applications, credential theft, and possibly the use of purchased access from other threat actors. Unlike purely criminal groups, HolyGhost is suspected of being leveraged for both revenue generation and strategic cyber operations in support of DPRK objectives.

chilelocker

ChileLocker first emerged in August 2022 and is considered part of the broader ARCrypter ransomware family. It employs a double-extortion model, encrypting Windows and Linux/VMware ESXi systems and threatening data leaks. ChileLocker uses the NTRU public key cryptosystem for encryption and typically appends the .crypt extension to affected files. Following encryption, it drops a ransom note—often named readme_for_unlock.txt—and directs victims to a password-protected Tor negotiation portal, with the password provided in the note. The group also disables recovery mechanisms by deleting shadow copies. Its initial access tactics include exploitation of misconfigured RDP access, phishing, malicious installers, botnets, fake updates, and malvertising. The ransomware has impacted victims across various regions, including Chile, Mexico, Canada, Spain, and others.

adminlocker

AdminLocker was first observed around December 2021 and appears to be a lone operator or small group, with no clear Ransomware-as-a-Service (RaaS) model reported. It uses single-extortion tactics—encrypting files without publicly documented data exfiltration—primarily targeting enterprise and personal systems via methods such as malicious email attachments, cracked software installers, P2P downloads, and malvertising. The ransomware employs symmetric and asymmetric encryption (likely AES combined with RSA) to lock files, appending extensions such as .admin1, .admin2, .admin3, .1admin, .2admin, and .3admin; victims receive a “!!!Recovery File.txt” ransom note with instructions to pay via Tor and Bitcoin. Notable for its multiple simultaneous variants with varied extensions, it reportedly allows victims to decrypt up to five small files as “proof” before demanding ransom. No high-profile sector- or region-specific campaigns are publicly documented.

sarcoma

Sarcoma is a ransomware group that emerged in October 2024 and has been actively targeting various organizations. Sarcoma's attack methods include phishing campaigns, exploiting n-day vulnerabilities, and supply chain attacks. Once inside a network, they use RDP exploitation, lateral movement, and data exfiltration tactics. Sarcoma has claimed responsibility for attacks against Unimicron, a PCB manufacturer, Kelowna Springs Golf Club, Popular Life Insurance, CP Construplan, ADT Freight Services Australia, Micon National. These attacks have resulted in data exfiltration, with Sarcoma threatening to leak or having already leaked stolen data. Specifically, Sarcoma has exfiltrated 377 GB of SQL files and sensitive documents from Unimicron, 3.8 GB of data from Kelowna Springs, 36 GB of data from Popular Life Insurance, 2 GB of data from ADT Freight Services Australia, and 34 GB of data from Micon National. The group is known for its aggressive tactics against industrial organizations.

chort

Chort is a relatively new data-extortion ransomware group that surfaced in late 2024, with confirmed activity beginning in October–November 2024. It operates under a double-extortion model—exfiltrating sensitive data before encrypting systems—and organizes victims via a Tor-hosted data leak site (DLS). The group has targeted organizations in the U.S. education sector (including schools and nonprofits) and in Kuwait's agriculture sector, among others. Technical behaviors include execution via PowerShell and removal of shadow copies to disrupt recovery. The group's approach emphasizes public pressure through data exposure rather than technical innovation.

contfr

Launched around September 2024, ContFR is a French-speaking RaaS that uses a Tor-hosted platform to provide ransomware embedded in PDF files (targeting both Windows and macOS). The group offers a tiered subscription model—“TEST,” “BASIC,” and “ELITE”—allowing affiliates varying degrees of customization, offline capability, and support based on the package purchased. As of the latest reporting, no victims are publicly listed, though data leak publications likely require a subscription to access. The operation suggests an organized, business-like structure, distinct from opportunistic one-off strains.

safepay

SafePay ransomware started in October 2024 as a new ransomware service, using some of the leaked LockBit source code. Soon after launching, the group made a big impact in the ransomware world, hacking at least 33 organizations by December 9.

The first version of SafePay was created by modifying the LockBit source code. It adds the ".safepay" extension to files that it encrypts and includes a ransom note called "readme_safepay.txt." This version uses a three-step XOR method with a random single-byte key, making it hard for security researchers to analyse.

The group's technical infrastructure includes both a dark web blog and a presence on the TON network for victim communications. Their attack methodology follows a double extortion model, combining traditional file encryption with data theft to maximise pressure on victims. SafePay operators typically move from initial access to ransomware deployment in under 24 hours, significantly faster than the industry average. . Among the Tactics, Techniques, and Procedures (TTPs) of the SafePay group, notable characteristics include the use of compromised VPN credentials as an initial access vector, extensive use of living-off-the-land binaries (LOLBins), and sophisticated privilege escalation techniques. The group frequently employs ShareFinder.ps1 for network reconnaissance and uses WinRAR for data archival before exfiltration. Post encryption, SafePay directs victims to their negotiation portal accessible through both Tor and TON networks.

The group has demonstrated sophisticated operational security measures, including a Cyrillic-language-based killswitch that prevents execution in eastern European countries.

gwisin

Gwisin is a targeted ransomware group first publicly reported in July 2022, believed to operate primarily within South Korea. The group's name means "ghost" in Korean, reflecting its stealthy approach. Gwisin has been observed conducting attacks on critical sectors, including healthcare, pharmaceutical, and manufacturing industries. It uses custom-built payloads tailored for each victim, capable of encrypting both Windows and Linux/VMware ESXi environments, and often executes attacks during national holidays to maximize operational disruption. Gwisin employs a double-extortion model—exfiltrating sensitive data before encryption—and communicates with victims in Korean-language ransom notes. Initial access vectors are not fully confirmed in open-source reporting, but suspected methods include exploiting vulnerable VPN appliances and leveraging stolen administrative credentials. The group is known for extensive pre-encryption reconnaissance to identify high-value systems and backups.

ctblocker

aka Critroni
CTB-Locker emerged in mid-2014, introducing a new era of ransomware by leveraging elliptic curve cryptography (ECC), Tor-based C&C communication, and Bitcoin payments—earning its name from "Curve-Tor-Bitcoin Locker." It was packaged and sold as a ransomware kit for approximately $1,500–$3,000, allowing affiliates to deploy customized campaigns. The malware encrypts user data (including network and removable drives), changes desktop wallpapers, and appends file extensions like .CTBL, .CTB2, or randomized strings. Victims receive instructions for payment, typically within a limited timeframe, or risk permanent data loss.

In 2015–2017, law enforcement and cybersecurity firms (including McAfee and Kaspersky) disrupted the network, arrested operators, and facilitated decryption tools.

dataf locker

DataF Locker is a ransomware variant first observed in 2024, closely tied to the Babuk ransomware lineage. It operates under a double-extortion model, encrypting files by appending the .dataf extension and threatening to leak exfiltrated data if the ransom isn't paid. Victims receive a ransom note named How To Restore Your Files.txt, with satisfaction of specified recovery procedures. Observations suggest use of typical intrusion vectors such as phishing, exploit tools, or leaked credential abuse, although detailed delivery methods and leak infrastructure remain under-documented in high-tier intelligence reports.

br0k3r

Br0k3r is not a conventional ransomware gang, but rather an Iran-linked cyber espionage and access brokerage group leveraging its foothold within victim networks to facilitate ransomware operations. Active since around 2017, the group provides privileged domain access—often sold or shared directly—with known ransomware operators such as ALPHV/BlackCat, NoEscape, and

RansomHouse, receiving a portion of each successful ransom payout. Victims have included U.S. schools, municipal governments, financial and healthcare organizations, as well as targets in Israel, Azerbaijan, and the UAE. Br0k3r's strategy merges espionage with criminal collaboration, allowing them to support both state-aligned intelligence objectives and financial incentives.

cs-137

Cs-137 is a newly observed ransomware strain that first appeared in January 2025. It employs the ChaCha20 cipher for encryption and appends obfuscated filenames with a random 10-character alphanumeric identifier while preserving the original file extension. In its current testing phase, it drops a ransom note with a randomized filename (e.g. ABCDEF-README.txt) and sets a randomly named image file as the desktop wallpaper. The note references a Tor-based extortion portal—though access is not yet active, indicating the operation's early development stage. The strategy suggests single-extortion behavior, focused on disrupting access rather than data theft or leak threats.

DORRA

A new ransomware variant has been identified, named DORRA. It is worth mentioning in advance that this variant is derived from the Makop ransomware family.

This variant encrypts data by adding the ".DORRA" extension to files, as well as a unique ID and the ransomware developer's email address.

After encrypting the data, the payload creates a ransom note as a text file named "README-WANING.txt," through which victims are instructed to contact the threat actor via the provided email to decrypt the data.

Interestingly, this variant uses a simple email address hosted on Microsoft's Outlook service as the contact method.

The tag is: *misp-galaxy:ransomware="DORRA"*

View relationships graph

HSHARADA

The ransomware was identified in early April 2023 and is said to target English-speaking users and potentially other languages. The extension added to encrypted files is: ".m9SRob" (potentially random). The ransom note is named "m9SRob-README.txt". There are no further details about the mentioned group or potentially files. The fact is that it adds an ID for each victim.

The tag is: *misp-galaxy:ransomware="HSHARADA"*

Hunt

Hunt ransomware is a variant of the Dharma/CrySIS ransomware family. This variant creates a unique ID for each victim, appends the extension '.hunt' to encrypted files, and leaves a ransom note known as info-hunt.txt.

The Dharma/CrySIS ransomware family emerged around mid-2016 as a Ransomware-as-a-Service (RaaS) program, utilizing various initial intrusion methods such as phishing, disguising as legitimate software, and exploiting open RDP connections.

This variant uses AES-256 encryption (CBC mode) or DES+RSA and demands payment to recover files. Upon execution, the ransomware generates a 256-bit AES decryption key, which is then encrypted along with random bytes using the RSA-1024 algorithm and stored at the end of the encrypted file.

The ransomware is written in C/C++ and compiled using MS Visual Studio. Regarding geographic attribution, it has been identified in use by threat actors from Russia, Ukraine, India, and other countries.

The tag is: *misp-galaxy:ransomware="Hunt"*

Hunt is also known as:

a1project

The locker is written in C/C++/ASM.
It supports all systems starting from Windows 2003, has a separate binary for ESXi, and uses a unified encrypted file format across all systems.
WINDOWS:
 • Two encryption modes: patch-based and file header.
 • Extensive configuration settings: from ignoring specific paths/extensions to terminating services/processes, unlocking occupied files, working with network shares, and more.
 • Arguments available for shutting down Hyper-V virtual machines, deleting backups, network scanning with logged-in user tokens.
 • Each build includes an obfuscated PowerShell script.
 • Execution is password-protected.
 • The locker itself is shellcode for x86/x64; if you have custom execution methods, we can provide the shellcode.
ESXI:
 • Encrypts files in patches, with configurable path exclusions.
The default configuration is pre-set to avoid disrupting Windows/ESXi/Linux systems.

babuk-bjorka

On January 26th, Babuk’s dedicated leak site (DLS) was "relaunched". Bjorka (Telegram: @bjorkanesiaaaa) is the current administrator. Upon launch, the DLS was populated mainly by victims previously claimed by other groups such as RansomHub, Lockbit3, and Funksec. At this current time there is no apparent connection to the original Babuk operation besides reusing the Babuk site template and logos. The groups is also known as Babuk2 by other trackers.

It is important to note that the original Babuk DLS was hosted and available up until February 26th, 2024.

d0glun

D0glun is a crypto-ransomware strain first observed in January 2025, believed to be derived from Babuk via an intermediary variant known as Cheng Xilun. It uses AES-256 symmetric encryption and appends filenames with patterns such as .@D0glun@<original extension> or similar. The malware encrypts files rapidly, changes the desktop wallpaper, and drops ransom notes typically named @, Desktopcxl.txt, or help.exe. The campaign has shown signs of shared infrastructure and code reuse from Cheng Xilun, but there is no confirmed evidence of a large-scale or mature operation. Its activity so far suggests it is being tested or deployed by a small group or

individual rather than a structured affiliate network.

Shinra

SHINRA ransomware is a variant of the Proton ransomware family, known for its malicious activities involving data encryption and demanding a ransom for data decryption.

After encrypting files, the ransomware renames them with a sequence of random characters and appends the ".SHINRA3" extension to the filenames.

It is worth noting that this ransomware uses AES and ECC encryption algorithms to lock files on the victim’s computer. Following the encryption, it creates a ransom note named "SHINRA-Recovery.txt."

There are not many details about its operation or methods of infecting its victims, but after encryption, the victim needs to send an email regarding recovery to the addresses provided, including their ID as generated by the ransomware:

Qq.decrypt@gmail.com Qq.encrypt@gmail.com ethan@fastmsg.info

The ransomware also changes the victim's wallpaper, displaying the need to send the data and contact the threat actor.

Yashma

Cisco Talos has identified a new, previously unknown threat actor of Vietnamese origin conducting a ransomware operation that began at least on June 4, 2023.

The ongoing attack utilizes a variant of the Yashma Ransomware, likely targeting multiple geographical areas and mimicking the characteristics of WannaCry.

The threat actor uses an unusual technique to deliver the ransom note, as instead of embedding the ransom note strings in the binary, the actor downloads the ransom note from a GitHub repository controlled by ,the actor by executing an embedded batch file.

Talos stated that this threat actor targets victims in English-speaking countries, Bulgaria, China, and Vietnam, as the GitHub account of the actor "nguyenvientphat" contains ransomware notes written in the languages of these countries. The presence of the ransom note may indicate that the actor intends to expand its geographical area of operation.

The company also stated that the threat actor may have Vietnamese origin because the GitHub account name and email contact in the ransom notes fake the name of a legitimate organization. The ransom note also asks victims to contact between 19:00 and 23:00 UTC +07:00, coinciding with the Vietnam time zone.

A difference was also identified in the Vietnamese language ransom note, as it begins with "Sorry, your file is encrypted!" compared to the other notes that state "Oops, your files are encrypted!". By saying "sorry," the threat actor may intend to show greater sensitivity to victims in Vietnam, indicating that the attackers themselves are Vietnamese.

Talos further mentioned that the threat actor started the campaign around June 4, 2023, as they joined GitHub and created a public repository called "Ransomware." In the repository, the threat actor added text files of ransom notes in five languages: English, Bulgarian, Vietnamese, simplified Chinese, and traditional Chinese.

The note presents the email address "nguyenvietphat[.]n@gmail[.]com," for victims to contact them. At the time of analysis, no Bitcoin was observed in the wallet, and the ransom note did not specify an amount, indicating that the ransomware operation could still be in its early stages.

The threat actor deployed a variant of the Yashma ransomware, which they compiled on June 4, 2023. It is worth noting that Yashma is a 32-bit executable written in .NET and a renamed version of the Chaos Ransomware V5, which appeared in May 2022. In the variant, most of Yashma's features remained unchanged and were described by BlackBerry security researchers, with some notable modifications.

The ransomware stores the ransom note text as strings in the binary, but this Yashma variant executes an embedded batch file, which contains the commands to download the ransom note from the actor-controlled GitHub repository. This modification avoids endpoint detection solutions and antivirus software, which typically detect embedded ransom note strings in the binary.

Previous versions of Yashma established persistence on the victim's machine in the Run registry key and by dropping a Windows shortcut file pointing to the executable path of the ransomware in the startup folder. The identified variant also established persistence in the Run registry key. However, it was modified to create a ".url" favorites file in the startup folder pointing to the executable located in "%AppData%\Roaming\svchost.exe."

Additionally, the threat actor chose to maintain Yashma's anti-recovery capability in this variant. After encrypting a file, the ransomware wipes the content of the original unencrypted files, writes a

single "?" character, and then deletes the file. This technique makes it more difficult for incident responders and forensic analysts to recover deleted files from the victim's hard drive.

ghost

aka Cring / Ghost (Cring)

Beginning early 2021, Ghost actors began attacking victims whose internet facing services ran outdated versions of software and firmware. This indiscriminate targeting of networks containing vulnerabilities has led to the compromise of organizations across more than 70 countries, including organizations in China. Ghost actors, located in China, conduct these widespread attacks for financial gain. Affected victims include critical infrastructure, schools and universities, healthcare, government networks, religious institutions, technology and manufacturing companies, and numerous small- and medium-sized businesses.

Ghost actors rotate their ransomware executable payloads, switch file extensions for encrypted files, modify ransom note text, and use numerous ransom email addresses, which has led to variable attribution of this group over time. Names associated with this group include Ghost, Cring, Crypt3r, Phantom, Strike, Hello, Wickrme, HsHarada, and Rapture. Samples of ransomware files Ghost used during attacks are: Cring.exe, Ghost.exe, ElysiumO.exe, and Locker.exe.

mimic-guram

Mimic v.10 Ransomware-as-a-Service (RaaS). The malware is designed to target various operating systems (Windows, ESXi, NAS, FreeBSD) and features network-wide deployment, file obfuscation, backup destruction, UAC bypass, and multithreaded encryption. The service offers additional tools like NTLM password decryption and call-based extortion. They prohibit attacks on CIS countries and require active participation, with decryption tools available for a fee currently 800USD.

blackberserk

Black Berserk is a relatively unsophisticated ransomware strain analyzed in late 2023. It operates under a single-extortion model—encrypting files and demanding payment, with no documented abilities or threats for data exfiltration or public leaks. In observed cases, the malware appends the .Black extension to encrypted files (e.g., 1.jpg.Black) and leaves a ransom note titled Black_Recover.txt, which urges victims to make contact to negotiate payment or test decryption with benign files. The infection method appears opportunistic, delivered via isolated incidents or broad malware distribution—not linked to targeted campaigns or infrastructure. There is no evidence of it functioning as a RaaS operation or targeting any specific victim profiles or sectors.

antibrok3rs

Antibrok3rs emerged as an access broker (not a ransomware operator itself) linked to the aftermath of the 2023 MOVEit supply-chain exploitation. From November 2024 through early 2025, this actor has posted stolen data from at least 15 energy-sector victims, including U.S. utilities such as CenterPoint Energy, Entergy, Nevada Energy, and Appalachian Power—data likely obtained via the MOVEit breach. While some analysts suspected ties to the Cl0P ransomware collective, Antibrok3rs publicly denied any such affiliation. The extortion model centers on data leakage without accompanying file encryption—a purely leak-based threat. No delivery, encryption, or ransom note behaviors have been observed, nor is there evidence of RaaS activity.

core

Core ransomware surfaced in early 2025 as a new variant within the broader Makop family. It employs a single-extortion model, focusing on encrypting files and demanding payment, without public data-leak threats. The malware appends the .core extension to encrypted files and is delivered via typical exploit vectors known to RaaS campaigns. Core does not showcase advanced double-extortion tactics seen in other modern strains, but it stands out for its familial lineage and continued evolution from Makop ancestors.

2023lock

2023Lock is a ransomware strain first observed in January 2024, believed to be an evolution of the Venus and Zeoticus families and a direct precursor to the later TrinityLock variant. It employs a hybrid encryption method combining XChaCha20 and curve25519xsalsa20poly1305, appending the “.2023lock” extension to encrypted files. Upon infection, it delivers ransom notes in HTML, TXT, and HTA formats containing decryption instructions. Unlike many modern ransomware groups, there is

no evidence that 2023Lock engages in double extortion or data exfiltration, operating purely through file encryption to pressure victims into payment. Its codebase and operational patterns strongly align with TrinityLock, which emerged a few months later with more sophisticated extortion tactics.

arcrypter

ArcRypt (also known as ARCrypter or ChileLocker) was first identified in August 2022, originally targeting government entities in Latin America and subsequently expanding globally. The group employs a single-extortion model—there is no evidence of a data-leak threat or RaaS ecosystem. The malware encrypts files using extensions such as .crypt, .crYpt, and .crYptA3, and uniquely drops the ransom note before commencing encryption. It has variants for both Windows and Linux, including a Go-based Linux version. Communication with victims occurs via Tor-based portals, evolving over time from a single shared site to individualized mirror sites for each victim. In some cases, threat actors have instructed victims to contact them using Tox, creating a Tox profile for communication. Targets have included Chile's government infrastructure, Colombia's Invima agency, and organizations in China and Canada.

axxes

Axxes ransomware emerged as a rebranded version of the previously known Midas ransomware group, with roots also tracing back through Haron and Avaddon lineage. It operates via a single-extortion model, encrypting files and appending the .axxes extension. Victims receive both an "RESTORE_FILES_INFO.hta" and a ".txt" ransom note. The ransomware performs extra actions like determining the device's geolocation, modifying the Windows Firewall, changing file extensions, and terminating processes using taskkill.exe. Its known targets span the U.S., UAE, France, and China, including at least one high-profile victim—The H Dubai hotel. This group appears financially motivated, leveraging historical branding and code of earlier groups for its operations.

faust

Faust is a variant of the well-known Phobos ransomware, part of a Ransomware-as-a-Service (RaaS) ecosystem active since around May 2019. Faust employs a double-extortion model, encrypting victim files and threatening to release stolen data if ransom demands are not met. It's distributed via Office document payloads using VBA scripts and known for its fileless attack delivery, enabling stealth and evasion.

astralocker

AstraLocker first appeared in 2021, likely as a fork of Babuk ransomware using leaked source code. It follows a single-extortion, smash-and-grab approach: distributed directly via phishing Microsoft Word documents containing embedded OLE objects. Once executed, it kills security and backup processes, deletes shadow copies, and encrypts files using modified HC-128 and Curve25519 algorithms, appending extensions like .Astra or .babyk. A “smash-and-grab” style attack, it’s less methodical than more sophisticated campaigns—deploying ransomware immediately upon user action rather than conducting prolonged network reconnaissance. In mid-2022, the operator ceased ransomware operations, releasing decryptors and announcing a pivot to cryptojacking.

jsworm

JSWorm is a ransomware family that first appeared in May 2019 and is notable for undergoing

multiple rebrands and evolutions, later appearing under names such as Nemty, Nefilim, Offwhite, Fusion, and Milihpen. Initially, it was distributed via malicious spam emails containing JavaScript files, hence the “JS” in its name. Later versions moved to targeted intrusions, leveraging compromised RDP services and vulnerable network appliances for initial access. JSWorm encrypts files using AES-256 encryption with RSA-2048 for key protection and appends campaign-specific extensions (e.g., .JSWORM, .Nemty, .Nephilim). The group adopted a double-extortion model in its later stages, stealing data before encryption and threatening to leak it via Tor-hosted sites. Its victimology spans various sectors worldwide, including manufacturing, energy, healthcare, and professional services. The continuous rebranding suggests an effort to evade detection, disrupt attribution, and maintain pressure on victims.

crynox

Crynox (sometimes referred to as “Crynox Ransomware”) appears to be a generic file-locker threat that appends .crynox to encrypted files and drops a ransom note (read_it.txt) instructing victims to contact crynoxWARE@proton.me. It seems to use RSA-4096 and AES for encryption and may change

desktop wallpaper, but there's no evidence of double-extortion or leak site operation. Distribution methods cited include phishing, pirated software, and malicious websites.

ailock

AiLock is a Ransomware-as-a-Service (RaaS) group first identified in March 2025. It employs a double-extortion approach—encrypting files and threatening to report breaches to regulators or share stolen data with competitors if the ransom isn't paid. Victims have just 72 hours to respond and up to five days to pay; failure to pay results in data leaks and destruction of recovery tools. The ransomware appends the extension .AiLock to encrypted files, changes file icons to a green padlock with the "AiLock" name, and replaces the desktop wallpaper with a distinctive robot-skull logo. It employs a hybrid encryption scheme, combining ChaCha20 for file encryption with NTRUEncrypt for securing metadata, and uses a multi-threaded design (path-traversal and encryption threads with IOCP) for efficiency. While active campaigns and leak sites are confirmed, specific sectors, regions, and intrusion methods remain undisclosed in public sources.

cerbersyslock

CerBerSysLock first appeared in December 2017 as a cryptoransomware imposter, leveraging Cerber-style branding to deceive victims. It uses XOR-based encryption to lock files and appends extensions such as .CerBerSysLocked0009881. Victims receive a ransom note titled “HOW TO DECRYPT FILES.txt”, which falsely claims to be from the Cerber ransomware. The note includes an email contact—TerraBytefiles@scryptmail.com—and instructs victims to reference their ID (e.g., "CerBerSysLocked0009881") when communicating. The ransomware is technically linked to the Xorist family and is generally considered an opportunistic, low-profile scam rather than part of a broader Ransomware-as-a-Service (RaaS) operation.

blackbit

BlackBit ransomware was first observed in August 2022 and is a .NET-based strain that closely mimics the design and functionality of LockBit 3.0, indicating either a fork of LockBit's leaked builder or deliberate imitation. It uses a double-extortion model, encrypting victim files and threatening to leak stolen data via a Tor-based site. BlackBit employs AES symmetric encryption for file contents and RSA asymmetric encryption for key protection, appending the .BlackBit extension to affected files. The malware also includes features for terminating processes, deleting volume shadow copies, and disabling recovery mechanisms. Initial access vectors are not comprehensively documented but are consistent with phishing, exploitation of vulnerable public-facing services, and the use of compromised credentials. Victims have been identified across various sectors, including technology, manufacturing, and professional services, though its activity level has been far lower than LockBit's.

dharma

Dharma is a prolific ransomware family active since at least 2016, evolving from the earlier CrySiS ransomware. It operates under a Ransomware-as-a-Service (RaaS) model, allowing affiliates to deploy customized builds with their own contact emails and extensions. Dharma typically appends encrypted files with patterns like .id-[victimID].[email].dharma or other campaign-specific suffixes. Initial access is often gained through exposed Remote Desktop Protocol (RDP) services secured with weak or stolen credentials, sometimes combined with brute-force attacks. The malware encrypts files using AES with RSA to secure the keys and drops ransom notes in text files and pop-up windows. Numerous variants have emerged over time, each linked to different affiliates, making

attribution difficult.

aptlock

Aptlock surfaced in early 2025 and is characterized by a single-extortion model combined with threats of data leakage. The ransomware encrypts files on Windows systems, appending the extension .aptlock, and then changes the victim's desktop wallpaper. Victims receive a ransom note named read_me_to_access.txt informing them that their critical company data has been exfiltrated

and will be deleted or leaked if they don't act. They are given 72 hours to initiate contact via Tor-based chat access (using credentials provided in the note), with further warnings issued if no engagement occurs within 5 days. Specific details about intrusion vectors, encryption algorithms used, or known affiliate operators remain undisclosed in public threat intelligence. No reliable evidence links Aptlock to Ransomware-as-a-Service operations or lists any known affiliates.

elpaco

Elpaco is a variant of Mimic ransomware that emerged around August 2023. Designed with significant customization and stealth in mind, it targets Windows systems by abusing the Everything search utility to optimize file discovery and accelerate encryption. Operators exploit various initial access methods—most notably RDP brute-force and the Zerologon vulnerability (CVE-2020-1472)—to gain access, escalate privileges, and deliver the payload. The ransomware uses a 7z SFX dropper, deploys multi-threaded encryption, disables recovery options, and self-deletes after execution, leaving victims with encrypted files bearing Elpaco-specific extensions. It's recognized for its adaptability and advanced features compared to earlier Mimic variants.

fargo

Fargo is a ransomware variant that surfaced in 2022, primarily targeting Microsoft SQL Server (MSSQL) systems. Believed to be a variant of the TargetCompany ransomware family, Fargo uses brute-force or credential-stuffing attacks on exposed MSSQL instances to gain access, then executes payloads via SQL Server commands. Once deployed, it encrypts files using a combination of symmetric and asymmetric algorithms, appends the .Fargo3 (or similar) extension, and drops a

ransom note directing victims to contact operators via email. It also attempts to delete system backups and shadow copies to prevent recovery. Fargo has been observed targeting organizations in multiple sectors, with a concentration of victims in South Korea and other parts of Asia.

freeworld

FreeWorld is a ransomware variant first observed in September 2023, and is believed to be derived from the Mimic ransomware family. It is deployed through coordinated campaigns dubbed DB#JAMMER, which exploit poorly secured Microsoft SQL (MSSQL) servers exposed to the internet. Attackers gain initial access via brute force, leverage the xp_cmdshell feature to execute shell commands, disable defenses, deploy remote access tools like Cobalt Strike and AnyDesk, and eventually deliver the FreeWorld payload. The ransomware encrypts files using hybrid encryption and appends the .FreeWorldEncryption extension. Victims receive a ransom note titled FreeWorld-Contact.txt, directing them on payment and data recovery steps.

colossus

Colossus ransomware was first observed in September 2021, when ZeroFox researchers uncovered the variant attacking a U.S.-based automotive group. It employs a double-extortion model, using Themida packing and sandbox evasion to disable defenses and deliver encrypted payloads. Victims are urged to visit a support site—hosted at a domain like colossus.support—to negotiate payment, or face large-scale data dumps and increasing ransom amounts tied to countdown timers. Operators demonstrated familiarity with RaaS playbooks, drawing architectural parallels to groups like EpsilonRed, BlackCocaine, and REvil/Sodinokibi.

globe

Globe is a ransomware family that first appeared in August 2016, notable for its highly customizable codebase that allows operators to configure ransom note text, encryption algorithms, and file extensions. Globe uses symmetric encryption (RC4 or AES) to lock files and typically appends custom extensions such as .GLOBE, .PURPLE, .HNY, or others set by the attacker. The malware is distributed through malicious spam emails with infected attachments, compromised websites, and exploit kits. Globe's flexibility made it attractive to low-skilled actors, resulting in many different variants in the wild. The family has primarily targeted small to medium-sized businesses and individual users across multiple regions, with no clear geographic focus.

backmydata

BackMyData is a variant of the Phobos ransomware family, first observed in early 2024. It follows a double-extortion model: encrypting files and threatening data exposure. The ransomware primarily targets organizations via weak or misconfigured RDP access (e.g., remote desktop services), though phishing and initial-stage payloads like SmokeLoader have also been noted. Technical behavior includes AES-256 file encryption, with keys secured via a public RSA-2048 key embedded in the binary. Post-infection actions involve disabling firewalls, deleting volume shadow copies, inhibiting recovery functionality, and establishing persistence through registry Run keys and startup folder entries. Encrypted files receive the extension .BACKMYDATA, and victims are left with ransom notes (info.txt, info.hta, or .backmydata) that instruct them to contact attackers via email or Session Messenger. A significant incident involved a coordinated attack on Romania's Hipocrate Information System (HIS), impacting 26 hospitals and causing widespread system outages across nearly 100 facilities, with ransom demands of approximately 3.5 BTC (~$175,000).

hermes

Hermes is a ransomware family first observed in the wild in February 2017, believed to have been developed by a group operating out of Asia. It originally appeared as a Ransomware-as-a-Service (RaaS) offering on underground forums but later saw deployment in targeted attacks. Hermes uses AES-256 encryption to lock victim files and appends a variety of extensions (including .hrm and campaign-specific variants). The ransom note, often named DECRYPT_INFORMATION.html or DECRYPT_INFORMATION.txt, provides payment instructions via email. The ransomware gained notoriety in 2018 when it was used as a destructive wiper in the Far Eastern International Bank (FEIB) heist in Taiwan, where attackers deployed Hermes to cover their tracks after a SWIFT fraud operation. Over time, Hermes code has been re-used and integrated into other ransomware families, including some Ryuk builds, suggesting code sharing or purchase from the original developer. Distribution vectors have included phishing campaigns, malicious attachments, and exploitation of RDP services.

babylockerkz

BabyLockerKZ is a variant of MedusaLocker ransomware, first observed in late 2023. It operates under a double-extortion model, combining file encryption with data exfiltration and extortion. Technically, it reuses MedusaLocker's AES + RSA-2048 hybrid encryption, appends the .hazard file extension to encrypted files, and includes a unique autorun registry key ("BabyLockerKZ") alongside dedicated public/private key data inserted into registry values. Initial access is achieved through opportunistic methods like RDP compromises, with lateral movement facilitated by compromised credentials and tools such as Mimikatz. The variant employs a custom toolkit codenamed paid_memes, which includes tools like "Checker" for scanning credentials, facilitating automation, and bridging toolsets for further exploitation. Starting late 2022, its operators have

compromised over 100 organizations per month, initially targeting European victims before shifting toward Latin America in 2023.

The tag is: *misp-galaxy:ransomware="babylockerkz"*

vanhelsing

Designed to target Windows systems, this ransomware employs advanced encryption techniques and appends a unique file extension to compromised files. Its stealthy evasion tactics and persistence mechanisms make detection and removal challenging. This highlights the need for

proactive cybersecurity measures and a robust incident response strategy to safeguard data integrity and minimize breach risks.

The tag is: *misp-galaxy:ransomware="vanhelsing"*

arcane

Arcane first emerged in mid-2021 under the UNC2190 cluster and later rebranded as Sabbath, continuing its operations against critical infrastructure like hospitals, schools, and educational entities. It follows a double-extortion model—encrypting data (using ROLLCOAST/Eruption malware) while also exfiltrating sensitive information and threatening to leak it. Victims have included institutions in the U.S. and Canada across sectors such as healthcare, education, and natural resources. Initial intrusion tactics involved deployment of Cobalt Strike with custom profiles, DLL-based in-memory execution, and signed TLS certificates, plus use of stealthy GET requests ending with “kitten.gif.” Specific encryption algorithms or file extensions have not been publicly confirmed. The group appears to operate in an affiliate-style model but remains under single management rather than a full RaaS platform.

kasseika

Kasseika is a ransomware variant first publicly reported in January 2024, identified as a new evolution of the BlackMatter/LockBit ransomware codebase. The malware appends the .kasseika extension to encrypted files and uses a double-extortion model, combining file encryption with threats to publish stolen data on a Tor-based leak site. Early analysis revealed that Kasseika shares several traits with LockBit 3.0, including encryption routines, obfuscation methods, and ransom note structure, but with modified branding and negotiation portals. Initial access vectors have not been widely confirmed, though patterns from related ransomware suggest the use of compromised credentials, RDP exploitation, and vulnerabilities in public-facing services. Victims have been observed in North America, Europe, and Asia, spanning industries like manufacturing, logistics, and professional services.

catb

CatB ransomware was first observed in late 2022, gaining attention for abusing DLL hijacking via the Microsoft Distributed Transaction Coordinator (MSDTC) service—loading a malicious payload through DLL sideloading methods. The malware arrives in a two-stage dropper: the first DLL unpacks and launches the main payload (commonly named oci.dll), which subsequently encrypts files using hybrid RSA/AES cryptography. Unlike conventional ransomware, CatB does not rename files or distribute typical ransom notes; instead, it prepends the ransom message directly to the

start of each encrypted file, making detection more difficult. Victims are instructed to contact the attackers via email (e.g., catB9991@protonmail.com or fishA001@protonmail.com), with the ransom demand escalating daily. Initial analysis suggests CatB may be a rebrand or evolution of Pandora ransomware, sharing various code artifacts and operational behavior.

cerberimposter

Cerber Imposer is a post-2019 rebrand of the Cerber ransomware family, resurfacing in late 2021 with updated targeting of enterprise environments. Unlike its classic counterpart, Cerber Imposer utilizes the .locked file extension and includes a unique recovery note named *RECOVERY_README*.html. It does not reuse the original Cerber codebase; instead it borrows branding while operating under new cryptographic implementations and deployment tactics. Threat actors have leveraged known remote code execution vulnerabilities in Atlassian Confluence (CVE-2021-26084) and GitLab (CVE-2021-22205) to deliver this ransomware. The rebranded variant has compromised servers in the U.S., Germany, China, and Russia, indicating a broader scope of targeting than originally seen with early Cerber campaigns.

darkylock

Darky Lock is a commodity-style ransomware strain first identified in July 2022, derived from publicly available Babuk source code. Victim systems undergo file encryption with an added “.darky” extension, and a “Restore-My-Files.txt” ransom note is placed in all impacted locations. The

malware attempts to disable backup mechanisms, including shadow copies and specific applications. Its distribution leverages phishing and trojanized installers, complemented by payloads dropped via frameworks like Empire, Metasploit, and Cobalt Strike.

bidon

BIDON is a variant of the Monti ransomware family, first observed around mid-2023. It employs a double-extortion strategy—encrypting victims' files and simultaneously threatening to leak stolen data if the ransom isn't paid. Notably, it appends the .PUUUK extension to encrypted files and drops a readme.txt ransom note outlining the extortion demands. The note offers a free decryption of two files as proof of capability and emphasizes that only authorized company personnel (e.g., top management) should engage. BIDON specifically targets corporate and enterprise organizations, not home users, and warns victims not to involve law enforcement or third-party recovery firms. It represents a shift toward more aggressive extortion tactics within the Monti lineage.

deathgrip

DeathGrip is a Ransomware-as-a-Service (RaaS) that emerged around June 2024, offering malware payloads built with leaked LockBit 3.0 and Yashma/Chaos builders. Designed to lower technical barriers, it enables even low-skilled operators to deploy highly capable ransomware attacks. DeathGrip campaigns typically employ AES-256 encryption, delete shadow copies and recovery features, and modify system settings to hinder restoration. Earlier infections include low-tier ransom demands (e.g., around $100), reflecting entry-level targeting, though its flexible tooling allows a range of payload configurations.

blacksnake

BlackSnake is a Ransomware-as-a-Service (RaaS) operation that first appeared in August 2022, when its operators began recruiting affiliates on underground forums with an unusually low revenue share of 15%. It primarily targets home users rather than large enterprises and does not maintain a public leak site. Built on the Chaos ransomware code base, it features both file encryption and a cryptocurrency clipper module to steal funds from victims. The ransomware is developed in .NET and includes safeguards to avoid execution in Turkish or Azerbaijani environments, suggesting geographic targeting preferences. Infections result in encrypted files and ransom notes instructing victims to make contact via email for payment negotiations. The group's operational scale and visibility remain limited compared to major RaaS families.

bert

BERT ransomware (also tracked as Water Pombero) first emerged in April 2025, rapidly targeting both Windows and Linux systems across Asia, Europe, and the U.S., with confirmed victims in healthcare, technology, electronics, and event services sectors. Its Windows variant employs a PowerShell-based loader that escalates privileges, disables Defender, UAC, and the firewall, then downloads the ransomware payload. The Linux version aggressively encrypts with up to 50 concurrent threads, forcibly shuts down VMware ESXi VMs to prevent recovery, and appends extensions like .encryptedbybert or .encrypted_by_bert. BERT uses AES encryption, and later variants feature optimized multithreading via ConcurrentQueue and DiskWorker threads. Analysts note code similarities with REvil and Babuk ESXi lockers, potentially pointing to shared development lineage or code reuse.

black nevas

BlackNevas ransomware — also referred to as “Trial Recovery” — was first observed in November 2024. It is a direct derivative of the Trigona ransomware family and continues the lineage’s focus on extortion over public shaming. BlackNevas operators support a double-extortion model, encrypting files using AES-256 with RSA-4112-protected keys, and appending the .-encrypted or .ENCRYPTED file extension to affected files. Hybrid payloads are available for Windows, Linux, NAS, and VMware ESXi platforms.

While BlackNevas does not host its own data leak site, it reportedly collaborates with other ransomware groups for data publication — known

partners include Kill Security, Hunters International, DragonForce, Blackout, Embargo Team, and Mad Liberator. The group has predominantly targeted large enterprises in sectors such as finance, telecommunications, manufacturing, healthcare, and legal. Initial access is commonly achieved via phishing or exploitation of vulnerabilities, with lateral movement facilitated through SMB enumeration and optional LAN-wide propagation.

pear

ABOUT US:

"Pure Extraction And Ransom (PEAR) Team is the community of highly responsible and strictly disciplined members. We are a private team and have nothing common with any other threat actors. We’ve been monitoring this field for a long-long time. So, we understand all the processes and know well how it all works."

leaknet

In the cyber-undergrounds, we're exploring shadowed corridors of the digital world in search of inside information. we're a digital watchdog operating at the intersection of cybersecurity, internet freedom, and investigative journalism. We delve into the hidden corners of the web, exposing truths and uncovering stories that are often buried by mainstream media or distorted by corporate interests.

This project isn't just for tech experts or privacy advocates. It's for everyone who values transparency, freedom, and integrity in a connected world. Operating independently, we're free from corporate influence and political bias, enabling us to report with uncompromising honesty. Our work resonates with a diverse audience cybersecurity experts, digital rights activists, journalists, and anyone who values an internet free from control.

In a world where the lines between truth and agenda grow increasingly blurred, we're building something bold, the space where the truth of the internet can be uncovered, untamed and unfiltered. Our project is an independent voice for digital freedom, committed to shining a light on the internet's most vital and vulnerable spaces: cybersecurity, privacy, and the right to information without compromise.

In a landscape clouded by agendas and profit, we are here to do one thing: deliver the truth, boldly and beautifully. Join us as we push back against the systems that seek to compromise our digital freedoms and carve a path toward a more transparent, liberated internet.
