

Private Practice Residency in Vision Therapy and Neuro-Optometric Rehabilitation

Barry Tannen, O.D. FCOVD, FAAO (Program Supervisor)

EyeCare Professionals, P.C. in association with the Southern College of Optometry, offers a *private practice* based optometric residency program in Vision Therapy and Neuro-Optometric Rehabilitation. This is a fully accredited A.C.O.E. program.

We now offer 2 residency positions per year.

Program Mission: It is our goal to create a premier optometric residency program that will help develop optometric specialists in Vision Therapy and Neuro-Optometric Rehabilitation. In order to achieve this goal, we need to partner with the highest caliber optometric graduates and provide them with a combination of excellent clinical, didactic, and practice management education in the field of Vision Therapy and Neuro-Optometric Rehabilitation as well as primary care and other optometric specialties.

Residency Emphasis:

- Advanced binocular vision cases
- Concussion and traumatic brain injury case management
- Co-management of patients with neurologists, OT's, PTs, OD's, and other health professionals.
- Presentations to colleagues and the community
- Practice management, business planning, goal setting, and networking for specialty optometric practice
- Primary care and ocular disease

"I feel very lucky to have had the opportunity to complete my residency with Eyecare Professionals. I feel more confident than ever in terms of my knowledge base, clinical abilities, and practice management skills. I would encourage any graduating optometrist to consider this residency if they are interested in learning how to successfully develop and manage a vision therapy specialty in a private practice."

Miki Lyn D'Angelo, OD
SUNY/ Optometry Class of 2013
Resident 2013-2014

"I am very fortunate to have completed my residency at EyeCare Professionals. I am grateful for the intellectual, clinical, and personal growth EyeCare Professionals has provided. I will cherish the time spent working alongside such a wonderful team of doctors and staff. I couldn't have asked for more."

Amy Desmond, O.D.
Salus, Class of 2010
Vision Therapy and Rehabilitation
Resident, 2010-2011
