

# meldCX Core & ChromeOS: All-in-one stack for powerful kiosk & signage

The building blocks you need to rapidly build, manage, and deploy secure applications for kiosks & signage.

## Discover the benefits from meldCX Core on ChromeOS:

### Device & App Analytics Cloud

Collect local app and device metrics to be sent to our data lake for business intelligence analysis and insights. Access insights through the meldCX Core Cloud Console, and drill down to specific device and actions.

### Peripheral Connection & Monitoring

Easily connect to multiple peripherals – enhancing the capabilities of your device.

### Resilience & Self-Healing

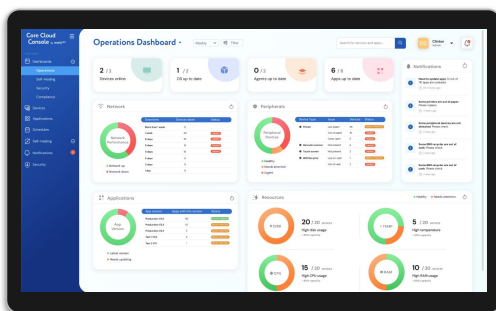

When an issue occurs, meldCX's built-in self-healing system Autonomous Device Intelligence (ADI) automatically restarts ports, reset devices, and updates firmware, ensuring your kiosks stay up and running.

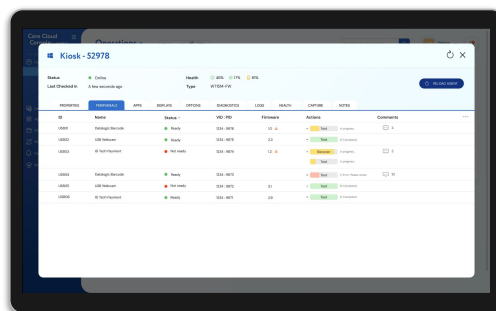

### Predictive Maintenance

ADI doesn't just react, it anticipates. ADI monitors key metrics, detects issues, and helps you act before downtime happens, reducing the need to have technicians come on-site.

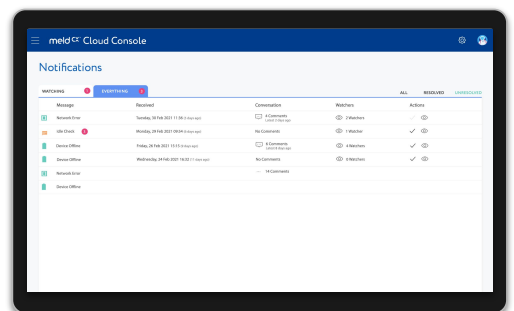

If you can't measure it, you can't manage it. We help you do both.
